(8) Any byproduct material in a radiopharmaceutical and for a diagnostic use involving measurements of uptake, dilution, or excretion for which the Food and Drug Administration (FDA) has accepted a "Notice of Claimed Investigational Exemption for a New Drug" (IND) or approved a "New Drug Application" (NDA).

(b) A licensee using a radiopharmaceutical listed in paragraph (a) of this section for a clinical procedure other than one specified in the product label or package insert instructions for use shall comply with the product label or package insert instructions regarding physical form, route of administration and dosage range.

§ 35.120 Possession of survey instrument.

A licensee authorized to use byproduct material for uptake, dilution, and excretion studies shall have in its possession a portable low level radiation survey instrument whose most sensitive scale has a full-scale deflection of not more than 1 milliroentgen per hour.

Subpart E—Imaging and Localization

§ 35.200 Use of radiopharmaceuticals, generators, and reagent kits for imaging and localization studies.

(a) A licensee may use the following radiopharmaceuticals, generators, and reagent kits for imaging and localization studies:

(1) Molybdenum-99/technetium-99m generators for the elution or extraction of technetium-99m as pertechnetate;

(2) Technetium-99m as pertechnetate;

(3) Prepared radiopharmaceuticals and reagent kits for the preparation of the following technetium-99m labeled radiopharmaceuticals:

(i) Sulfur colloid;

(ii) Pentetate sodium;

(iii) Human serum albumin microspheres;

(iv) Polyphosphate;

(v) Macroaggregated human serum albumin;

(vi) Etidronate sodium;

(vii) Stannous pyrophosphate;

(viii) Human serum albumin;

(ix) Medronate sodium;

(x) Gluceptate sodium;

(xi) Oxidronate sodium;

(xii) Disofenin; and

(xiii) Succimer.

(4) Iodine-131 as sodium iodide, iodinated human serum albumin, macroaggregated iodinated human serum albumin, colloidal (microaggregated) iodinated human serum albumin, rose bengal, or sodium iodohippurate;

(5) Iodine-125 as sodium iodide or fibrinogen;

(6) Chromium-51 as human serum albumin;

(7) Gold-198 in colloidal form;

(8) Mercury-197 as chlormerodrin;

(9) Selenium-75 as selenomethionine;

(10) Strontium-85 as nitrate;

(11) Ytterbium-169 as pentetate sodium;

(12) Xenon-133 as a gas or saline solution;

(13) Any byproduct material in a diagnostic radiopharmaceutical or any generator or reagent kit for preparation and diagnostic use of a radiopharmaceutical containing byproduct material for which the Food and Drug Administration has accepted a "Notice of Claimed Investigational Exemption for a New Drug" (IND) or approved a "New Drug Application" (NDA).

(b) A licensee using the radiopharmaceuticals listed in paragraph (a) of this section for clinical procedures other than those specified in the product label or package insert shall comply with the product label or package insert regarding physical form, route of administration, and dosage range.

(c) A licensee shall elute generators and prepare reagent kits in accordance with the manufacturer's instructions.

(d) The following radiopharmaceuticals, when used for the listed clinical procedures, are not subject to the restrictions in paragraph (b) of this section:

(1) Technetium-99m pentetate as an aerosol for lung function studies.

§ 35.204 Permissible molybdenum-99 concentration.

(a) A licensee may not administer to humans a radiopharmaceutical containing more than 0.15 microcurie of molybdenum-99 per millicurie of technetium-99m.

(b) A licensee preparing technetium-99m radiopharmaceuticals from molybdenum-99/technetium-99m generators shall measure the molybdenum-99 concentration in each eluate or extract.

(c) A licensee who must measure molybdenum concentration shall retain a record of each measurement for two years. The record must include, for each elution or extraction of technetium-99m, the measured activity of the technetium expressed in millicuries, the measured activity of the molybdenum expressed in microcuries, the ratio of the measures expressed as microcuries of molybdenum per millicurie of technetium, the date of the test, and the initials of the individual who performed the test.

§ 35.205 Control of aerosols and gases.

(a) A licensee who administers radioactive aerosols or gases shall do so with a system that will keep airborne concentrations within the limits prescribed by §§ 20.103 and 20.106 of this chapter.

(b) The system must either be directly vented to the atmosphere through an air exhaust or provide for collection and decay or disposal of the aerosol or gas in a shielded container.

(c) A licensee shall only administer radioactive aerosols and gases in rooms that are at negative pressure compared to surrounding rooms.

(d) Before receiving, using, or storing a radioactive gas, the licensee shall calculate the amount of time needed after a spill to reduce the concentration in the area of use to the occupational limit listed in Appendix B to Part 20 of this chapter. The calculation must be based on the highest activity of gas handled in a single container and the measured available air exhaust rate.

(e) A licensee shall post the calculated time at the area of use and require that, in case of a gas spill, individuals evacuate the room until the posted time has elapsed.

(f) A licensee shall check the operation of collection and ventilation systems each six months.

§ 35.220 Possession of survey instruments.

A licensee authorized to use byproduct material for imaging and localization studies shall have in its possession a portable low level radiation survey instrument whose most sensitive scale has a full-scale deflection of not more than 1 milliroentgen per hour and a portable ion chamber radiation survey instrument that has a scale with a full-scale deflection of 1 roentgen per hour.

Subpart F—Radiopharmaceuticals for Therapy

§ 35.300 Use of radiopharmaceuticals for therapy.

A licensee may use the following prepared radiopharmaceuticals:

(a) Iodine-131 as iodide for treatment of hyperthyroidism, cardiac dysfunction, and thyroid carcinoma;

(b) Phosphorus-32 as soluble phosphate for treatment of polycythemia vera, leukemia, and bone metastases;

(c) Phosphorus-32 as colloidal chromic phosphate for intracavitary treatment of malignant effusions;

(d) Gold-198 as colloid for intracavitary treatment of malignant effusions;

(e) Any byproduct material in a radiopharmaceutical and for a therapeutic use for which the Food and Drug Administration has accepted a "Notice of Claimed Investigational Exemption for a New Drug" (IND), or approved a "New Drug Application" (NDA).

§ 35.310 Safety instruction.

(a) A licensee shall provide oral and written radiation safety instruction for all personnel caring for the patient undergoing radiopharmaceutical therapy. To satisfy this requirement, the instruction must describe the licensee's procedures for:

(1) Patient control;

(2) Visitor control;

(3) Contamination control;

(4) Waste control; and

(5) Notification of the Radiation Safety Officer in case of the patient's death or medical emergency.

(b) A licensee shall keep for two years a list of individuals receiving instruction required by paragraph (a) of this section, a description of the instruction, the date of instruction, and the name of the individual who gave the instruction.

§ 35.315 Safety precautions.

(a) A licensee shall provide each individual hospitalized for radiopharmaceutical therapy a private room with a private sanitary facility.

(b) A licensee shall notify the Radiation Safety Officer immediately if the patient dies or has a medical emergency.

(c) A licensee shall post the patient's door with a "Radioactive Materials" sign and note in the patient's chart where and how long visitors may stay in the patient's room.

(d) The authorized user and Radiation Safety Officer must specifically authorize visits by individuals under age 18 on a case-by-case basis.

(e) The licensee shall either monitor material and items removed from the patient's room to determine that their radioactivity cannot be distinguished from the natural background radiation level with a low range survey meter set on its most sensitive scale and with no interposed shielding, or handle them as radioactive waste.

(f) The licensee shall survey the patient's room and private sanitary facility for removable contamination before assigning another patient to the room. The room must not be reassigned until removable contamination is less than 200 disintegrations per minute per 100 square centimeters.

(g) Within three days after administering a therapeutic dosage of iodine-131, the licensee shall measure the thyroid burden of each individual who helped prepare or administer the dosage, and retain for the period required by § 20.401(c)(1) a record of each thyroid burden measurement, its date, the name of the individual whose thyroid burden was measured, and the initials of the individual who made the measurements.

§ 35.320 Possession of survey instruments.

A licensee authorized to use byproduct material for radiopharmaceutical therapy shall have in its possession a portable low level radiation survey instrument whose most sensitive scale has a full-scale deflection of not more than 1 milliroentgen per hour and a portable ion chamber radiation survey instrument that has a scale with a full scale deflection of 1 Roentgen per hour.

Subpart G—Sources for Brachytherapy

§ 35.400 Use of sources for brachytherapy.

A licensee shall use the following sources in accordance with the manufacturer's radiation safety and handling instructions:

(a) Cesium-137 as a sealed source in needles and applicator cells for topical, interstitial, and intracavitary treatment of cancer;

(b) Cobalt-60 as a sealed source in needles and applicator cells for topical, interstitial, and intracavitary treatment of cancer;

(c) Gold-198 as a sealed source in seeds for interstitial treatment of cancer;

(d) Iridium-192 as seeds encased in nylon ribbon for interstitial treatment of cancer;

(e) Strontium-90 as a sealed source in an applicator for treatment of superficial eye conditions; and

(f) Iodine-125 as a sealed source in seeds for interstitial treatment of cancer.

§ 35.404 Release of patients treated with temporary implants.

(a) Immediately after removing the last temporary implant source from a patient, the licensee shall make a radiation survey of the patient to confirm that all sources have been removed. The licensee may not release from confinement for medical care a patient treated by temporary implant until all sources have been removed.

(b) A licensee shall retain a record of patient surveys for two years. Each record must include the date of the survey, the name of the patient, the exposure rate from the patient expressed as millirem per hour and measured within one meter of the patient, and the initials of the individual who made the survey.

§ 35.406 Brachytherapy sources inventory.

(a) Each time brachytherapy sources are returned to an area of storage from an area of use, the licensee shall immediately count the number returned to ensure that all sources taken from the storage area have been returned.

(b) A licensee shall make a record of brachytherapy source use which must include:

(1) The names of the individuals permitted to handle the sources,

(2) The number and activity of sources

(2) Turn the primary beam of radiation off immediately when an entrance door

(g) A licensee shall promptly repair or

(c) The licensee shall retain a record

(1) The names of the individuals permitted to handle the sources,

(2) The number and activity of sources removed from storage, the room number of use or patient's name, the time and date they were removed from storage, the number and activity of the sources in storage after the removal, and the initials of the individual who removed the sources from storage;

(3) The number and activity of sources returned to storage, the room number of use or patient's name, the time and date they were returned to storage, the number and activity of sources in storage after the return, and the initials of the individual who returned the sources to storage.

(c) Immediately after implanting sources in a patient the licensee shall make a radiation survey of the patient and the area of use to confirm that no sources have been misplaced. The licensee shall make a record of each survey.

(d) A licensee shall retain the records required in paragraphs (b) and (c) of this section for two years.

§ 35.410 Safety instruction.

(a) The licensee shall provide oral and written radiation safety instruction to all personnel caring for the patient undergoing implant therapy. To satisfy this requirement, the instruction must describe:

(1) Size and appearance of the brachytherapy sources;

(2) Safe handling and shielding instructions in case of a dislodged source;

(3) Procedures for patient control;

(4) Procedures for visitor control; and

(5) Procedures for notification of the Radiation Safety Officer if the patient dies or has a medical emergency.

(b) A licensee shall retain for two years a record of individuals receiving instruction required by paragraph (a) of this section, a description of the instruction, the date of instruction, and the name of the individual who gave the instruction.

§ 35.415 Safety precautions.

(a) The licensee shall provide a private room to each individual hositalized for implant thereapy.

(b) The licensee shall notify the Radiation Safety Officer immediately if the patient dies or has a medical emergency.

(c) A licensee shall post the patient's door with a "Radioactive Materials" sign and note in the patient's chart where and how long visitors may stay in the patient's room.

(d) The authorized user and Radiation Safety Officer must specifically authorize visits by individuals under age 18 on a case-by-case basis.

§ 35.420 Possession of survey instrument.

A licensee authorized to use byproduct material for implant therapy shall have in its possession a portable ion chamber radiation survey instrument that has a scale with a full scale deflection of 1 Roentgen per hour.

Subpart H—Sealed Sources for Diagnosis

§ 35.500 Use of sealed sources for diagnosis.

A licensee shall use the following sealed sources in accordance with the manufacturer's radiation safety and handling instructions:

(a) Iodine-125 as a sealed source in a device for bone mineral analysis;

(b) Americium-241 as a sealed source in a device for bone mineral analysis; and

(c) Iodine-125 as a sealed source in a portable device for imaging.

§ 35.520 Availability of survey instrument.

A licensee authorized to use byproduct material as a sealed source for diagnostic purposes shall have available for use a portable low level radiation survey instrument whose most sensitive scale has a full-scale deflection of not more than 1 milliroentgen per hour or a portable ion chamber radiation survey instrument that has a scale with a full scale deflection of 1 Roentgen per hour. The instrument must have been calibrated in accordance with § 35.51 of this part.

Subpart I—Teletherapy

§ 35.600 Use of a sealed source in a teletherapy unit.

The regulations and provisions of this subpart govern the use of teletherapy units for medical use that contain the following sources.

(a) Cobalt-60 as a sealed source; and

(b) Cesium-137 as a sealed source.

§ 35.605 Maintenance and repair restrictions.

Only a person specifically licensed by the Commission or an Agreement State to perform teletherapy unit maintenance and repair shall install, relocate, or remove a teletherapy sealed source or a teletherapy unit that contains a sealed source or maintain, adjust, or repair the source drawer, the shutter or other mechanism of a teletherapy unit that could expose the source, reduce the shielding around the source, or result in increased radiation levels.

§ 35.606 Amendments.

A licensee shall apply for and must receive a license amendment before:

(a) Making any change in the treatment room shielding;

(b) Making any change in the location of the teletherapy unit within the treatment room;

(c) Using the teletherapy unit in a manner that could result in increased radiation levels in areas outside the teletherapy treatment room;

(d) Relocating the teletherapy unit; or

(e) Allowing and individual not listed on the licensee's license to perform the duties of the qualified teletherapy calibration expert.

§ 35.610 Safety instruction.

(a) A licensee shall post written instructions at the teletherapy unit console. To satisfy this requirement, these instructions must inform the operator of:

(1) The procedure to be followed to ensure that only the patient is in the treatment room before turning the primary beam of radiation on to begin a treatment or after a door interlock interruption;

(2) The procedure to be followed if:

(i) The operator is unable to turn the primary beam of radiation off with controls outside the treatment room or any other abnormal operation occurs; and

(ii) The names and telephone numbers of the authorized users and Radiation Safety Officer to be immediately contacted if the teletherapy unit or console operates abnormally.

(b) A licensee shall provide instruction in the topics identified in paragraph (a) of this section to all individuals who operate a teletherapy unit.

(c) A licensee shall retain for two years a record of individuals receiving instruction required by paragraph (b) of this section, a description of the instruction, the date of instruction, and the name of the individual who gave the instruction.

§ 35.615 Doors, interlocks, and warning systems.

(a) A licensee shall control access to the teletherapy room by a door at each entrance.

(b) A licensee shall equip each entrance to the teletherapy room with an electrical interlock system that will:

(1) Prevent the operator from turning the primary beam of radiation on unless each treatment room entrance door is closed;

(2) Turn the primary beam of radiation off immediately when an entrance door is opened; and

(3) Prevent the primary beam of radiation from being turned on following an interlock interruption until all treatment room entrance doors are closed and the beam on-off control is reset at the console.

(c) A licensee shall equip each entrance to the teletherapy room with a beam condition indicator light.

§ 35.620 Possession of survey instrument.

A licensee authorized to use byproduct material in a teletherapy unit shall have in its possession either a portable low level radiation survey instrument whose most sensitive scale has a full-scale deflection of not more than 1 milliroentgen per hour or a portable ion chamber radiation survey instrument that has a scale with a full scale deflection of 1 Roentgen per hour.

§ 35.621 Radiation monitoring device.

(a) A licensee shall install in each teletherapy room a permanent radiation monitor capable of continuously monitoring beam status.

(b) Each radiation monitor must be capable of providing visible notice of a teletherapy unit malfunction that results in an exposed or partially exposed source. The visible indicator of high radiation levels must be observable by an individual entering the teletherapy room.

(c) Each radiation monitor must be equipped with an emergency power supply separate from the power supply to the teletherapy unit. This emergency power supply may be a battery system.

(d) Each radiation monitor must be checked for proper operation each day before the teletherapy unit is used for treatment of patients.

(e) A licensee shall maintain a record of the check required by paragraph (d) of this section for two years. The record must include the date of the check, notation that the monitor indicates when the source is and is not exposed, and the initials of the individual who performed the check.

(f) If a radiation monitor is inoperable for any reason, the licensee shall require any individual entering the teletherapy room to use a survey instrument or audible alarm personal dosimeter to monitor for any malfunction of the source exposure mechanism that may result in an exposed or partially exposed source. The instrument or dosimeter must be checked for proper operation at the beginning of each day of use.

(g) A licensee shall promptly repair or replace the radiation monitor if it is inoperable.

§ 35.622 Viewing system.

A licensee shall construct or equip each teletherapy room to permit continuous observation of the patient from the teletherapy unit console during irradiation.

§ 35.630 Dosimetry equipment.

(a) A licensee shall have a calibrated dosimetry system available for use. To satisfy this requirement, one of the following two conditions must be met.

(1) The system must have been calibrated by the National Bureau of Standards or by a calibration laboratory accredited by the American Association of Physicists in Medicine (AAPM). The calibration must have been performed within the previous two years and after any servicing that may have affected system calibration; or

(2) The system must have been calibrated within the previous four years; eighteen to thirty months after that calibration, the system must have been intercompared at an intercomparison meeting with another dosimetry system that was calibrated within the past twenty-four months by the National Bureau of Standards or by a calibration laboratory accredited by the AAPM. The intercomparison meeting must be sanctioned by a calibration laboratory or radiologic physics center accredited by the AAPM. The results of the intercomparison meeting must have indicated that the calibration factor of the licensee's system had not changed by more than 2 percent. The licensee may not use the intercomparison result to change the calibration factor. When intercomparing dosimetry systems to be used for calibrating cobalt-60 teletherapy units, the licensee shall use a teletherapy unit with a cobalt-60 source. When intercomparing dosimetry systems to be used for calibrating cesium-137 teletherapy units, the licensee shall use a teletherapy unit with a cesium-137 source.

(b) The licensee shall have available for use a dosimetry system for spot-check measurements. To satisfy this requirement, the system may be compared with a system that has been calibrated in accordance with paragraph (a) of this section. This comparison must have been performed within the previous year and after each servicing that may have affected system calibration. The spot-check system may be the same system used to meet the requirement in paragraph (a) of this section.

(c) The licensee shall retain a record of each calibration, intercomparison, and comparison for the duration of the license. For each calibration, intercomparison, or comparison, the record must include the date, the model numbers and serial numbers of the instruments that were calibrated, intercompared, or compared as required by paragraphs (a) and (b) of this section, the correction factors that were deduced, the names of the individuals who performed the calibration, intercomparison, or comparison, and evidence that the intercomparison meeting was sanctioned by a calibration laboratory or radiologic physics center accredited by AAPM.

§ 35.632 Full calibration measurements.

(a) A licensee authorized to use a teletherapy unit for medical use shall perform full calibration measurements on each teletherapy unit:

(1) Before the first medical use of the unit; and

(2) Before medical use under the following conditions:

(i) Whenever spot-check measurements indicate that the output differs by more than 5 percent from the output obtained at the last full calibration corrected mathematically for radioactive decay;

(ii) Following replacement of the source or following reinstallation of the teletherapy unit in a new location;

(iii) Following any repair of the teletherapy unit that includes removal of the source or major repair of the components associated with the source exposure assembly; and

(3) At intervals not exceeding one year.

(b) To satisfy the requirement of paragraph (a) of this section, full calibration measurements must include determination of:

(1) The output within ±3 percent for the range of field sizes and for the distance or range of distances used for medical use;

(2) The coincidence of the radiation field and the field indicated by the light beam localizing device;

(3) The uniformity of the radiation field and its dependence on the orientation of the useful beam;

(4) Timer accuracy;

(5) On-off error; and

(6) The accuracy of all distance measuring and localization devices in medical use.

(c) A licensee shall use the dosimetry system described in § 35.630(a) to measure the output for one set of exposure conditions. The remaining radiation measurements required in

paragraph (b)(1) of this section may then be made using dosimetry system that

perform spot-checks on each teletherapy unit once in each calendar month.

(h) A licensee shall lock the control

treatment room do not exceed the limits specified in § 20.105(b) of this chapter.

§ 35.643 Modification of teletherapy unit or room before beginning a treatment.

requirement of paragraph (a) of this

paragraph (b)(1) of this section may then be made using dosimetry system that indicates relative dose rates.

(d) A licensee shall make full calibration measurements required by paragraph (a) of this section in accordance with either the procedures recommended by the Scientific Committee on Radiation Dosimetry of the American Association of Physicists in Medicine that are described in *Physics in Medicine and Biology* Vol. 16, No. 3, 1971, pp. 379–396, or by Task Group 21 of the Radiation Therapy Committee of the American Association of Physicists in Medicine that are described in *Medical Physics* Vol. 10, No. 6, 1983, pp. 741–771. Both of these references have been approved for incorporation by reference by the Director of the Federal Register. Copies of the documents are available for inspection or may be obtained from the U.S. Nuclear Regulatory Commission, Public Document Room, 1717 H Street NW., Washington, DC 20555. Copies of the documents are also on file at the Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, DC. A notice of any change in the material will be published in the Federal Register.

(e) A licensee shall correct mathematically the outputs determined in paragraph (b)(1) of this section for physical decay for intervals not exceeding one month.

(f) Full calibration measurements required by paragraph (a) of this section and physical decay corrections required by paragraph (e) of this section must be performed by a qualified teletherapy calibration expert.

(g) A licensee shall retain a record of each calibration for the duration of the license. The record must include the date of the calibration, the manufacturer's name, model number, and serial number for both the teletherapy unit and the source, the model numbers and serial numbers of the instruments used to calibrate the teletherapy unit, tables that describe the output of the unit over the range of field sizes and for the range of distances used in radiation therapy, a determination of the coincidence of the radiation field and the field indicated by the light beam localizing device, the measured timer accuracy for a typical treatment time, the calculated on-off error, the estimated accuracy of each distance measuring or localization device, and the signature of the qualified teletherapy calibration expert.

§ 35.633 Periodic spot-checks.

(a) A licensee authorized to use teletherapy units for medical use shall perform spot-checks on each teletherapy unit once in each calendar month.

(b) To satisfy the requirement of paragraph (a) of this section, measurements must include determination of:

(1) Timer accuracy;

(2) On-off error;

(3) The coincidence of the radiation field and the field indicated by the light beam localizing device;

(4) The accuracy of all distance measuring and localization devices used for medical use;

(5) The output for one typical set of operating conditions; and

(6) The difference between the measurement made in paragraph (b)(5) of this section and the anticipated output, expressed as a percentage of the anticipated output (i.e., the value obtained at last full calibration corrected mathematically for physical decay).

(c) A licensee shall use the dosimetry system decribed in § 35.630(b) to make the measurement required in paragraph (b)(5) of this section.

(d) A licensee shall perform measurements required by paragraph (a) of this section in accordance with procedures established by the qualified teletherapy calibration expert. That individual need not actually perform the spot-check measurements.

(e) A licensee shall have the qualified teletherapy calibration expert review the results of each spot-check within 15 days. The qualified teletherapy calibration expert shall promptly notify the licensee in writing of the results of each spot-check. The licensee shall keep a copy of each written notification for two years.

(f) A licensee authorized to use a teletherapy unit for medical use shall perform spot-checks of each teletherapy facility once in each calendar month.

(g) To satisfy the requirement of paragraph (f) of this section, checks must assure proper operation of:

(1) Electrical interlocks at each teletherapy room entrance;

(2) Electrical or mechanical stops installed for the purpose of limiting use of the primary beam of radiation (restriction of source housing angulation or elevation, carriage or stand travel and operation of the beam on-off mechanism);

(3) Beam condition indicator lights on the teletherapy unit, on the control console, and in the facility;

(4) Viewing systems;

(5) Treatment room doors from inside and outside the treatment room; and

(6) Electrically assisted treatment room doors with the teletherapy unit electrical power turned off.

(h) A licensee shall lock the control console in the off position if any door interlock malfunctions. The licensee may not use the unit until the interlock system is repaired.

(i) A licensee shall promptly repair any system identified in paragraph (g) of this section that is not operating properly.

(j) A licensee shall retain a record of each spot-check required by paragraphs (a) and (f) of this section for two years. The record must include the date of the spot-check, the manufacturer's names, model number, and serial number for both the teletherapy unit and source, the manufacturer's name, model number and serial number of the instrument used to measure the output of the teletherapy unit, the measured timer accuracy, the calculated on-off error, a determination of the coincidence of the radiation field and the field indicated by the light beam localizing device, the measured timer accuracy for a typical treatment time, the calculated on-off error, the estimated accuracy of each distance measuring or localization device, the difference between the anticipated output and the measured output, notations indicating the operability of each entrance door electrical interlock, each electrical or mechanical stop, each beam condition indicator light, the viewing system and doors, and the signature of the individual who performed the periodic spot-check.

§ 35.641 Radiation surveys for teletherapy facilities.

(a) Before medical use, after each installation of a teletherapy source, and after making any change for which an amendment is required by § 35.606(a)–(d), the licensee shall perform radiation surveys to verify that:

(1) The maximum and average radiation levels at one meter from the teletherapy source with the source in the off position and the collimators set for a normal treatment field do not exceed 10 milliroentgens per hour and 2 milliroentgens per hour, respectively; and

(2) With the teletherapy source in the on position with the largest clinically available treatment field and with a scattering phantom in the primary beam of radiation, that:

(i) Radiation quantities in restricted areas adjacent to the treatment room are not likely to cause personnel exposures in excess of the limits specified in § 20.101 of this chapter; and

(ii) Radiation quantities in unrestricted areas adjacent to the

treatment room do not exceed the limits specified in § 20.105(b) of this chapter.

(b) If the results of the surveys required in paragraph (a) of this section indicate any radiation quantity in excess of the respective limit specified in that paragraph, the licensee shall lock the control in the off position and not use the unit:

(1) Except as may be necessary to repair, replace, or test the teletherapy unit shielding or the treatment room shielding; or

(2) Until the licensee has received a specific exemption pursuant to § 20.501 of this chapter.

(c) A licensee shall retain a record of the radiation measurements made following installation of a source for the duration of the license. The record must include the date of the measurements, the reason the survey is required, the manufacturer's name, model number and serial number of the teletherapy unit, the source, and the instrument used to measure radiation levels, each dose rate measured around the teletherapy source while in the off position and the average of all measurements, a plan of the areas surrounding the treatment room that were surveyed, the measured dose rate at several points in each area expressed in millirem per hour, the calculated maximum quantity of radiation over a period of one week for each restricted and unrestricted area, and the signature of the Radiation Safety Officer.

§ 35.642 Safety checks for teletherapy facilities.

(a) A licensee shall promptly check all systems listed in § 35.633(g) for proper function after each installation of a teletherapy source and after making any change for which an amendment is required by § 35.606(a)–(d).

(b) If the results of the checks required in paragraph (a) of this section indicate the malfunction of any system specified in § 35.633(g), the licensee shall lock the control console in the off position and not use the unit except as may be necessary to repair, replace, or check the malfunctioning system.

(c) A licensee shall retain for two years a record of the facility checks following installation of a source. The record must include notations indicating the operability of each entrance door interlock, each electrical or mechanical stop, each beam condition indicator light, the viewing system, and doors, and the signature of the Radiation Safety Officer.

§ 35.643 Modification of teletherapy unit or room before beginning a treatment program.

If the survey required by § 35.641 indicates that an individual in an unrestricted area may be exposed to levels of radiation greater than those permitted by § 20.105(b) of this chapter, before beginning the treatment program the licensee shall:

(a) Either equip the unit with stops or add additional radiation shielding to ensure compliance with § 20.105(b);

(b) Perform the survey required by § 35.641 again; and

(c) Include in the report required by § 35.644 the results of the initial survey, a description of the modification made to comply with paragraph (a) of this section, and the results of the second survey; or

(d) Request and receive a license amendment under § 20.105(a) of this part that authorizes radiation levels in unrestricted areas greater than those permitted by § 20.105(b).

§ 35.644 Reports of teletherapy surveys, checks, tests, and measurements.

A licensee shall mail an original and a copy of the records required in §§ 35.641, 35.642, 35.643, and the output from the teletherapy source expressed as Roentgens per hour at a distance of one meter from the source and determined during the full calibration required in § 35.632, to the appropriate Commission Regional Office listed in § 35.16 of this part within thirty days following completion of the action that initiated the record requirement.

§ 35.645 Five-year inspection.

(a) A licensee shall have each teletherapy unit fully inspected and serviced during teletherapy source replacement or at intervals not to exceed five years, whichever comes first, to assure proper functioning of the source exposure mechanism.

(b) This inspection and servicing may only be performed by persons specifically licensed to do so by the Commission or an Agreement State.

(c) A licensee shall keep a record of the inspection and servicing for the duration of the license. The record must contain the inspector's name, the inspector's license number, the date of inspection, the manufacturer's name and model number and serial number for both the teletherapy unit and source, a list of components inspected, a list of components serviced and the type of service, a list of components replaced, and the signature of the inspector.

(d) Amendment to teletherapy licenses that extended the time interval for the inspection and servicing requirement of paragraph (a) of this section that were in effect on March 4, 1983 remain in effect and are not rescinded by this section.

Subpart J—Training and Experience Requirements

§ 35.900 Radiation Safety Officer.

Except as provided in § 35.901, the licensee shall require an individual fulfilling the responsibilities of the Radiation Safety Officer as provided in § 35.32 to:

(a) Be certified by:

(1) American Board of Health Physics in Comprehensive Health Physics;

(2) American Board of Radiology in Radiological Physics, Therapeutic Radiological Physics, or Medical Nuclear Physics; or

(3) American Board of Nuclear Medicine Science in Nuclear Medicine Science; or

(b) Have had 200 hours of classroom and laboratory training and one year of experience as follows:

(1) 100 hours of radiation physics and instrumentation;

(2) 30 hours of radiation protection;

(3) 20 hours of mathematics pertaining to the use and measurement of radioactivity;

(4) 20 hours of radiation biology;

(5) 30 hours of radiopharmaceutical chemistry; and

(6) One year of full time experience in radiation safety at a medical institution under the supervision of the individual identified as the Radiation Safety Officer on a Commission or Agreement State license that authorizes the medical use of byproduct material; or

(c) Be an authorized user for those byproduct material uses that come within the Radiation Safety Officer's responsibilities.

§ 35.901 Training for experienced Radiation Safety Officer.

An individual identified as a Radiation Safety Officer on a Commission or Agreement State license on [*insert effective date of final rule*] who oversees only the use of byproduct material for which the licensee was authorized on that date need not comply with the training requirements of § 35.900.

§ 35.910 Training for uptake, dilution, and excretion studies.

Except as provided in §§ 35.970 and 35.971, the licensee shall require the authorized user of a radiopharmaceutical listed in § 35.100(a) to be a physician who:

(a) Is certified in:

(1) Nuclear medicine by the American Board of Nuclear Medicine;

(2) Diagnostic radiology with special

(iv) Collaborating with the authorized

(3) Diagnostic radiology or radiology

VOL 50 ISS 144 JL 26 1985 UMI

(1) Nuclear medicine by the American Board of Nuclear Medicine;

(2) Diagnostic radiology with special competence in nuclear radiology by the American Board of Radiology; or

(3) Diagnostic radiology or radiology within the previous five years by the American Osteopathic Board of Radiology; or

(b) Has completed 80 hours of instruction in basic radioisotope handling techniques applicable to the use of prepared radiopharmaceuticals, and 40 hours of supervised clinical experience.

(1) To satisfy the basic instruction requirement, the classroom and laboratory instruction must include:

(i) 25 hours of radiation physics and instrumentation;

(ii) 25 hours of radiation protection;

(iii) 10 hours of mathematics pertaining to the use and measurement of radioactivity;

(iv) 10 hours of radiation biology; and

(v) 10 hours of radiopharmaceutical chemistry.

(2) To satisfy the requirement for supervised clinical experience, training must be under the supervision of an authorized user at a medical institution and must include:

(i) Examining patients and reviewing their case histories to determine their suitability for radioisotope diagnosis, limitations, or contraindications;

(ii) Selecting the suitable radiopharmaceuticals and calculating and measuring the dosages;

(iii) Administering dosages to patients and using syringe radiation shields;

(iv) Collaborating with the authorized user in the interpretation of radioisotope test results; and

(v) Patient followup; or

(c) Has successfully completed a six-month training program in nuclear medicine as part of a training program that has been approved by the Accreditation Council for Graduate Medical Education and that included classroom and laboratory training, work experience, and supervised clinical experience in all the topics identified in paragraph (b) of this section.

§ 35.920 Training for imaging and localization studies.

Except as provided in § 35.970 or 35.971, the licensee shall require the authorized user of a radiopharmaceutical, generator, or reagent kit listed in § 35.200(a) to be a physician who:

(a) Is certified in:

(1) Nuclear medicine by the American Board of Nuclear Medicine;

(2) Diagnostic radiology with special competence in nuclear radiology by the American Board of Radiology; or

(3) Diagnostic radiology or radiology within the previous five years by the American Osteopathic Board of Radiology; or

(b) Has completed 200 hours of instruction in basic radioisotope handling techniques applicable to the use of prepared radiopharmaceuticals, generators, and reagent kits, 500 hours of supervised work experience and 500 hours of supervised clinical experience.

(1) To satisfy the basic instruction requirement, the classroom and laboratory training must include:

(i) 100 hours of radiation physics and instrumentation;

(ii) 30 hours of radiation protection;

(iii) 20 hours of mathematics pertaining to the use and measurement of radioactivity;

(iv) 30 hours of radiopharmaceutical chemistry; and

(v) 20 hours of radiation biology.

(2) To satisfy the requirement for supervised work experience, training must be under the supervision of an authorized user at a medical institution and must include:

(i) Ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys;

(ii) Calibrating dose calibrators and diagnostic instruments and performing checks for proper operation of survey meters;

(iii) Calculating and safely preparing patient dosages;

(iv) Using administrative controls to prevent the misadministration of byproduct material;

(v) Using emergency procedures to contain spilled byproduct material safely and using proper decontamination procedures; and

(vi) Eluting technetium-99m from generator systems, assaying and testing the eluate for molybdenum-99 and alumina contamination, and processing the eluate with reagent kits to prepare technetium-99m labeled radiopharmaceuticals.

(3) To satisfy the requirement for supervised clinical experience, training must be under the supervision of an authorized user at a medical institution and must include:

(i) Examining patients and reviewing their case histories to determine their suitability for radioisotope diagnosis, limitations, or contraindications;

(ii) Selecting the suitable radiopharmaceuticals and calculating and measuring the dosages;

(iii) Administering dosages to patients and using syringe radiation shields;

(iv) Collaborating with the authorized user in the interpretation of radioisotope test results; and

(v) Patient followup; or

(c) Has successfully completed a six-month training program in nuclear medicine that has been approved by the Accreditation Council for Graduate Medical Education and that included classroom and laboratory training, work experience, and supervised clinical experience in all the topics identified in paragraph (b) of this section.

§ 35.930 Training for therapeutic use of radiopharmaceuticals.

Except as provided in § 35.970, the licensee shall require the authorized user of a radiopharmaceutical listed in § 35.300 for therapy to be a physician who:

(a) Is certified in nuclear medicine by the American Board of Nuclear Medicine; or

(b) Has completed 80 hours of instruction in basic radioisotope handling techniques applicable to the use of therapeutic radiopharmaceuticals, and has had supervised clinical experience.

(1) To satisfy the requirement for instruction, the classroom and laboratory training must include:

(i)

(i) 25 hours of radiation physics and instrumentation;

(ii) 25 hours of radiation protection;

(iii) 10 hours of mathematics pertaining to the use and measurement of radioactivity; and

(iv) 20 hours of radiation biology;

(2) To satisfy the requirement for supervised clinical experience, training must be under the supervision of an authorized user at a medical institution and must include:

(i) Use of iodine-131 for diagnosis of thyroid function and the treatment of hyperthyroidism or cardiac dysfunction in 10 individuals;

(ii) Use of soluble phosphorus-32 for the treatment of polycythemia vera, leukemia, or bone metastases in 3 individuals;

(iii) Use of iodine-131 for treatment of thyroid carcinoma in 3 individuals; and

(iv) Use of colloidal chromic phosphorus-32 or of colloidal gold-198 for intracavitary treatment of malignant effusions in 3 individuals.

§ 35.940 Training for therapeutic use of brachytherapy sources.

Except as provided in § 35.970, the licensee shall require the authorized user using a brachytherapy source listed in § 35.400 for therapy to be a physician who:

(a) Is certified in:

(1) Radiology or therapeutic radiology by the American Board of Radiology;

(2) Radiation oncology by the American Osteopathic Board of Radiology;

(3) Radiology, with a specialization in radiotherapy, as a British "Fellow of the Faculty of Radiology" or "Fellow of the Royal College of Radiology"; or

(4) Therapeutic radiology by the Canadian Royal College of Physicians and Surgeons; or

(b) Is in the active practice of therapeutic radiology, has completed 200 hours of instruction in basic radioisotope handling techniques applicable to the therapeutic use of brachytherapy sources and 500 hours of supervised work experience and a minimum of three years of supervised clinical experience.

(1) To satisfy the requirement for instruction, the classroom and laboratory training must include:

(i) 110 hours of radiation physics and instrumentation;

(ii) 40 hours of radiation protection;

(iii) 25 hours of mathematics pertaining to the use and measurement of radioactivity; and

(iv) 25 hours of radiation biology.

(2) To satisfy the requirement for supervised work experience, training must be under the supervision of an authorized user at an institution and must include:

(i) Ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys;

(ii) Checking survey meters for proper operation;

(iii) Preparing, implanting, and removing sealed sources;

(iv) Using administrative controls to prevent the misadministration of byproduct material; and

(v) Using emergency procedures to control byproduct material.

(3) To satisfy the requirement for a period of supervised clinical experience, training must include one year in a formal training program approved by the Residency Review Committee for Radiology of the Accreditation Council for Graduate Medical Education or the Committee on Postdoctoral Training of the American Osteopathic Association, and an additional two years of clinical experience in therapeutic radiology under the supervision of an authorized user at a medical institution. The supervised clinical experience must include:

(i) Examining individuals and reviewing their case histories to determine their suitability for brachytherapy treatment, and any limitations or contraindications;

(ii) Selecting the proper brachytherapy sources and dose and method of administration;

(iii) Calculating the dose; and

(iv) Post-administration followup and review of case histories in collaboration with the authorized user.

§ 35.941 Training for ophthalmic use of strontium-90.

Except as provided in § 35.970, the licensee shall require the authorized user using only strontium-90 ophthalmic radiotherapy to be a physician who:

(a) Is certified in radiology or therapeutic radiology by the American Board of Radiology; or

(b) Is in the active practice of therapeutic radiology or ophthalmology, and has completed 24 hours of instruction in basic radioisotope handling techniques applicable to the use of strontium-90 for ophthalmic radiotherapy, and a period of supervised clinical training in ophthalmic radiotherapy.

(1) To satisfy the requirement for instruction, the classroom and laboratory training must include:

(i) 6 hours of radiation physics and instrumentation;

(ii) 6 hours of radiation protection;

(iii) 4 hours of mathematics pertaining to the use and measurement of radioactivity; and

(iv) 8 hours of radiation biology.

(2) To satisfy the requirement for a period of supervised clinical training in ophthalmic radiotherapy, training must be under the supervision of an authorized user at a medical institution and must include the use of strontium-90 for the ophthalmic treatment of five individuals that includes

(i) Examination of each individual to be treated;

(ii) Calculation of the dose to be administered;

(iii) Administration of the dose; and

(iv) Followup and review of each individual's case history.

§ 35.950 Training for use of sealed sources for diagnosis.

Except as provided in § 35.970, the licensee shall require the authorized user using a sealed source in a device listed in § 35.500 to be a physician, dentist, or podiatrist who:

(a) Is certified in

(1) Radiology, diagnostic radiology with special competence in nuclear radiology, or therapeutic radiology by the American Board of Radiology;

(2) Nuclear medicine by the American Board of Nuclear Medicine; or

(3) Diagnostic radiology or radiology by the American Osteopathic Board of Radiology; or

(b) Has completed 8 hours of instruction in basic radioisotope handling techniques specifically applicable to the use of the device. To satisfy the requirement for instruction, the training must include:

(1) 3 hours of radiation physics, mathematics pertaining to the use and measurement of radioactivity, and instrumentation;

(2) 3 hours of radiation biology; and

(3) 2 hours of radiation protection and training in the use of the device for the purposes authorized by the license.

§ 35.960 Training for teletherapy.

Except as provided in § 35.970, the licensee shall require the authorized user using a sealed source listed in § 35.600 in a teletherapy unit to be a physician who:

(a) Is certified in:

(1) Radiology or therapeutic radiology by the American Board of Radiology;

(2) Radiation oncology by the American Osteopathic Board of Radiology;

(3) Radiology, with specialization in radiotherapy, as a British "Fellow of the Faculty of Radiology" or "Fellow of the Royal College of Radiology"; or

(4) Therapeutic radiology by the Canadian Royal College of Physicians and Surgeons; or

(b) Is in the active practice of therapeutic radiology, and has completed 200 hours of instruction in basic radioisotope techniques applicable to the use of a sealed source in a teletherapy unit, 500 hours of supervised work experience, and a minimum of three years of supervised clinical experience.

(1) To satisfy the requirement for instruction, the classroom and laboratory training must include:

(i) 110 hours of radiation physics and instrumentation;

(ii) 40 hours of radiation protection;

(iii) 25 hours of mathematics pertaining to the use and measurement of radioactivity; and

(iv) 25 hours of radiation biology.

(2) To satisfy the requirement for supervised work experience, training must be under the supervision of an authorized user at an institution and must include:

(i) Review of the full calibration measurements and periodic spot checks;

(ii) Preparing treatment plans and calculating treatment times;

(iii) Using administrative controls to prevent misadministrations;

(iv) Implementing emergency procedures to be followed in the event

§ 32.74 Manufacture and distribution of sources or devices containing byproduct

(iv) Implementing emergency procedures to be followed in the event of the abnormal operation of a teletherapy unit or console; and

(v) Checking and using survey meters.

(3) To satisfy the requirement for a period of supervised clinical experience, training must include one year in a formal training program approved by the Residency Review Committee for Radiology of the Accreditation Council for Graduate Medical Education or the Committee on Postdoctoral Training of the American Osteopathic Association and an additional two years of clinical experience in therapeutic radiology under the supervision of an authorized user at a medical institution. The supervised clinical experience must include:

(i) Examining individuals and reviewing their case histories to determine their suitability for teletherapy treatment, and any limitations or contraindications;

(ii) Selecting the proper dose and how it is to be administered;

(iii) Calculating the teletherapy doses and collaborating with the authorized user in the review of patients' progress and consideration of the need to modify originally prescribed doses as warranted by patients' reaction to radiation; and

(iv) Post-administration followup and review of case histories.

§ 35.961 Training for qualified teletherapy calibration expert.

The licensee shall require the qualified teletherapy calibration expert to:

(a) Be certified by the American Board of Radiology in:

(1) Therapeutic radiological physics;

(2) Roentgen ray and gamma ray physics;

(3) X-ray and radium physics; or

(4) Radiological physics; or

(b) Hold a master's or doctor's degree in physics, biophysics, radiological physics, or health physics, and have completed one year of full time training in therapeutic radiological physics and also one year of full time work experience under the supervision of a qualified teletherapy calibration expert at a medical institution. To satisfy this requirements, the neophyte qualified teletherapy calibration expert must have performed the tasks listed in §§ 35.59, 35.632, 35.633, and 35.641 of this part under the supervision of a qualified teletherapy calibration expert during the year of work experience.

§ 35.970 Training for experienced authorized users.

Physicians, dentists, or podiatrists identified as authorized users for the human use of byproduct material on a Commission or Agreement State license on [*insert effective date of final rule*] who perform only those methods of use for which they were authorized on that date need not comply with the training requirements of Subpart J.

§ 35.971 Physician training in a three month program.

A physician who, before July 1, 1984, began a three month nuclear medicine training program approved by the Accreditation Council for Graduate Medical Education and has successfully completed the program need not comply with requirements of §§ 35.910 or 35.920.

§ 35.972 Recentness of training.

The training and experience specified in this subpart must have been obtained within the five years preceding the date of application or the individual must have had continuing experience since the required training and experience was completed.

Subpart K—Enforcement

§ 35.990 Violations.

(a) An injunction or other court order may be obtained to prohibit a violation of any provision of:

(1) The Atomic Energy Act of 1954, as amended;

(2) Title II of the Energy Reorganization Act of 1974, as amended; or

(3) Any rule, regulation, or order issued under these Acts.

(b) A court order may be obtained for the payment of a civil penalty imposed for violation of:

(1) Sections 53, 57, 62, 63, 81, 82, 101, 103, 104, 107, or 109 under section 234 of the Atomic Energy Act of 1954;

(2) Section 206 of the Energy Reorganization Act of 1974;

(3) Any rule regulation, or order issued under these Acts;

(4) Any term condition, or limitation of any license issued under these Acts; or

(5) Any violation for which a license may be revoked under section 186 of the Atomic Energy Act of 1954.

(c) Any person who willfully violates any provision of the Atomic Energy Act of 1954, as amended, or any rule, regulation, or order issued under the Act may be guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both as provided by law. Regulations issued under the Act include regulations issued under section 161, and cited in the authority citation at the beginning of this part for the purposes of section 223.

§ 35.999 Resolution of conflicting requirements during transition period.

If the rules in this part conflict with the licensee's radiation safety program as identified in its license, and if that license was approved by the Commission before [*insert effective date of final rule*] and has not been renewed, then the requirements in the license will apply.

PART 30—RULES OF GENERAL APPLICABILITY TO DOMESTIC LICENSING OF BYPRODUCT MATERIAL

2. The authority citation for Part 30 continues to read as follows:

Authority: Sec. 161, as amended (42 U.S.C. 2201); sec. 201, as amended (42 U.S.C. 5481).

3. Section 30.4 is amended by revising paragraphs (h) and (l) to read as follows and by adding new paragraphs (y) and (z) as follows:

§ 30.4 Definitions.

* * * * *

(h) "Medical use" means the intentional internal or external administration of byproduct material, or the radiation therefrom, to human beings in the practice of medicine in accordance with a license issued by a State or Territory of the United States, the District of Columbia, or the Commonwealth of Puerto Rico in the practice of medicine.

* * * * *

(l) "Physician" means a medical doctor or doctor of osteopathy licensed by a State or Territory of the United States, the District of Columbia, or the Commonwealth of Puerto Rico to prescribe drugs in the practice of medicine;

* * * * *

(y) "Dentist" means an individual licensed by a State or Territory of the United States, the District of Columbia, or the Commonwealth of Puerto Rico to practice dentistry on humans.

(z) "Podiatrist" means an individual licensed by a State or Territory of the United States, the District of Columbia, or the Commonwealth of Puerto Rico to practice podiatry on humans.

4. Section 30.34 is amended by revising paragraph (g) to read as follows:

§ 30.34 Terms and conditions of licenses.

* * * * *

(g) A licensee may prepare technetium-99m radiopharmaceuticals only with technetium-99m that contains less than 0.15 microcuries of molybdenum-99 per millicurie of technetium-99m. The licensee shall perform tests and maintain the records required by § 35.204.

PART 31—GENERAL DOMESTIC LICENSES FOR BYPRODUCT MATERIAL

5. The authority citation for Part 31 continues to read as follows:

Authority: Sec. 161, as amended (42 U.S.C. 2201); sec. 201, as amended (42 U.S.C. 5481).

6. Section 31.11 is amended by revising paragraph (b) to read as follows:

§ 31.11 General license for use of byproduct material for certain in vitro clinical or laboratory testing.

* * * * *

(b) No person shall receive, acquire, possess, use, or transfer byproduct material pursuant to the general license established by paragraph (a) of this section unless that person:

(1) Has filed Form NRC–483, "Registration Certificate—In Vitro Testing with Byproduct Material Under General License," with the Director of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555 and received from the Commission a validated copy of Form NRC–483 with a registration number assigned;

(2) Has a license that authorizes the medical use of byproduct material and that expires before [*insert five years after effective date of final rule*]; or

(3) Has a license that authorizes the medical use of byproduct material and also authorizes the use of byproduct material consistent with the requirements of this section.

* * * * *

PART 32—SPECIFIC DOMESTIC LICENSES TO MANUFACTURE OR TRANSFER CERTAIN ITEMS CONTAINING BYPRODUCT MATERIALS

7. The authority citation for Part 32 continues to read as follows:

Authority: Sec. 161, as amended (42 U.S.C. 2201); sec. 201, as amended (42 U.S.C. 5481).

§ 32.70 [Removed]

8. Section 32.70 is removed.

9. In § 32.72 the introductory text of paragraph (a) and paragraph (a)(4)(i) are revised to read as follows:

§ 32.72 Manufacture and distribution of radiopharmaceuticals containing byproduct material for medical use under group licenses.

(a) An application for a specific license to manufacture and distribute radiopharmaceuticals containing byproduct material for use by persons authorized pursuant to Part 35 of this chapter will be approved if:

* * * * *

(4)(i) The label affixed to each package of the radiopharmaceutical contains information on the radionuclide, quantity, and date of assay, and the label, or the leaflet or brochure that accompanies each package, contains a statement that the radiopharmaceutical is licensed by the U.S. Nuclear Regulatory Commission for distribution to persons licensed to use byproduct material listed in §§ 35.100, 35.200, or 35.300, as appropriate, or under an equivalent license of an Agreement State.

* * * * *

10. In § 32.73 paragraph (a)(5)(ii) is revised to read as follows:

§ 32.73 Manufacture and distribution of generators or reagent kits for preparation of radiopharmaceuticals containing byproduct material.

(a) * * *

(5) * * *

(ii) A statement that this generator or reagent kit (as appropriate) is approved for distribution to persons licensed by the U.S. Nuclear Regulatory Commission to use byproduct material identified in § 35.200 or under an equivalent license of an Agreement State.

* * * * *

11. In § 32.74 the introductory text of paragraph (a) and paragraph (a)(3) are revised to read as follows:

§ 32.74 Manufacture and distribution of sources or devices containing byproduct material for medical use.

(a) An application for a specific license to manufacture and distribute sources and devices containing byproduct material to persons licensed pursuant to Part 35 of this chapter for use as a calibration or reference source or for the uses listed in §§ 35.400 and 35.500 of this chapter will be approved if:

* * * * *

(3) The label affixed to the source or device, or to the permanent storage container for the source or device, contains information on the radionuclide, quantity and date of assay, and a statement that the (name of source or device) is licensed by the U.S. Nuclear Regulatory Commission for distribution to persons licensed to use byproduct material identified in §§ 35.58, 35.400, or 35.500, as appropriate, or under an equivalent license of an Agreement State.

* * * * *

PART 40—DOMESTIC LICENSING OF SOURCE MATERIAL

12. The authority citation for Part 40 continues to read as follows:

Authority: Sec. 161, as amended (42 U.S.C. 2201); sec. 201, as amended (42 U.S.C. 5481).

13. Section 40.4 is amended by revising paragraph (g) to read as follows:

§ 40.4 Definitions.

* * * * *

(g) "Physician" means a medical doctor or doctor of osteopathy licensed by a State or Territory of the United States, the District of Columbia, or the Commonwealth of Puerto Rico to prescribe drugs in the practice of medicine;

* * * * *

Dated at Washington, D.C., this 22nd day of July 1985.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Northwest Conservation and Electric Power Plan; Proposed Model Conservation Standard Amendments, Hearings, and Public Comment Period

AGENCY: Pacific Northwest Electric Power and Conservation Planning Council (Northwest Power Planning Council), DOE.

ACTION: Notice of proposed amendments, hearings, and opportunity to comment.

SUMMARY: On April 27, 1983, the Pacific Northwest Electric Power and Conservation Planning Council (Council) adopted a Northwest Conservation and Electric Power Plan (Plan) including model conservation standards (MCS) (48 FR 24493, June 1, 1983). The Council now proposes to amend portions of the Plan relating to the MCS. This notice describes the proposed amendments and explains how to participate in the amendment process. Because the matters being considered would affect upcoming implementation schedules, these MCS-related amendments are being considered separately from the current revision of the Plan which will be the subject of a separate hearing and comment process. Following that process, the MCS provisions adopted by the Council may be the subject of further technical and nonsubstantial amendments necessary to ensure that the format, numbering and other editorial aspects of the MCS provisions are then consistent with the revised plan. Nevertheless, those interested in commenting on the MCS should expect to do so only in the hearings on the MCS described in this notice. MCS comments will not be relevant or timely in the Council's process on the revised plan as a whole, as the Council expects to have completed its decisionmaking on the MCS in September, 1985, well in advance of its decision on the revision of the plan which is currently not scheduled until December, 1985.

DATES AND ADDRESSES: The public comment period regarding the proposed amendments to the MCS closes at 5 p.m. Pacific time on August 26, 1985. Public hearings on the proposed amendments to the MCS will be held at the following places and times:

- Spokane, Washington, 3:30 p.m. to 5:00 p.m., August 20, 1985, Spokane Convention Center, Meeting Room A, W. 334 Spokane Falls Blvd., Spokane, Washington.
- Seattle, Washington, 9:00 a.m. to 11:00 a.m., August 20, 1985, at the Federal Building, Room 2866, 915 Second Avenue, Seattle, Washington.
- Burley, Idaho, 1 p.m., August 22, 1985, at the Burley Inn, 800 N. Overland Ave., Burley, Idaho.
- Portland, Oregon, 9 a.m., August 6, 1985, at the Council's Central Office, 850 S.W. Broadway, Suite 1100, Portland Oregon.
- Missoula, Montana, 10 a.m., August 23, 1985, at the Missoula Sheraton, 200 South Pattee Street, Missoula, Montana.

The Council currently expects to take final action on proposed MCS-related amendments at its September 18–19, 1985 meeting in Portland, Oregon. The actual date on which the Council will make its final decision will be announced in accordance with applicable law and in accordance with the Council's practice of providing notice of its meeting agendas.

Guidelines for Presenting Oral Comments at Hearings

1. To reserve a time period for presenting oral comments at a hearing, contact Ruth Curtis, Information Coordinator, at the Council's central office (850 S.W. Broadway, Suite 1100, Portland, Oregon 97205 or (503) 222–5161, toll free 1–800–222–3355 in Idaho, Montana, and Washington or 1–800–452–2324 in Oregon) no later than two work days before the hearing.

2. Those who do not reserve time periods will be permitted to present oral comments as time permits.

3. Use the hearing to *summarize* written comments. The comments themselves should not be read.

4. If possible, ten (10) copies of written comments should be submitted to the Council recorder at the hearings. This person will be sitting at a table near the Council members and will be identified at the start of the hearing by the hearing chairman. When preparing these copies, refer to the instructions below for written comments.

5. Comment time may be limited on those occasions when the number of people signed up to testify is sufficiently large that it will be necessary to impose limits in order to allow all commenters a hearing. A 15-minute guideline is suggested.

6. Appearance at more than one hearing is unnecessary. At each hearing, scheduling preference will be given to individuals and groups which have not testified at other hearings.

Guidelines for Submitting Written Comments

1. All written comments must be received in the Council's central office, 850 S.W. Broadway, Suite 1100, Portland, Oregon, 97205 by 5 p.m. Pacific time on Monday, August 26, 1985. Comments should be submitted to the attention of Dulcy Mahar at this address.

2. *Comments should be clearly marked "Model Conservation Standard Comments"*

3. Written comments should be specific and concise and refer to sections or page numbers in the proposed MCS amendments.

4. If appropriate, submit a "marked up" copy of the proposed MCS (or appropriate sections) indicating suggestions and/or revisions. Suggested deletions should be lined out and placed in parentheses. Suggested new language should be underlined.

5. Please type (double-spaced) comments, if possible. Use only one side of the paper.

6. Provide ten (10) copies of all comments and supporting materials if at all possible.

FOR FURTHER INFORMATION CONTACT: Dulcy Mahar, Director of Public Information and Involvement, at the address and telephone numbers listed above.

SUPPLEMENTARY INFORMATION: As directed by the Northwest Power Act (16 U.S.C. 839 *et seq.*, "the Act"), the Council adopted a plan including MCS for new structures and for existing structures which are converted to electric space heating/conditioning. The MCS were designed to produce all electric power savings that are cost effective for the region and economically feasible for consumers. The standards for new residential structures are set forth in section 2 of the Council's current Two Year Action Plan (Chapter 10 of the Plan) and establish annual performance budgets for electric space heating for each of the Pacific Northwest's climate zones.[1] The standard for new commercial construction is described in section 6 of the current Two-Year Action Plan and is a modified version of the most recent model energy code of the American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), ASHRAE 90–80. The standards for existing residential structures which

[1] In January, 1985, the Council amended the MCS to correct two technical, nonsubstantial errors. These corrections changed the energy performance budgets for single family residences in climate zones 2 and 3. (50 FR 5021, Feb. 5, 1985). In August, 1984, the Council made technical, nonsubstantial amendments to the MCS, pursuant to settlement of a lawsuit filed by representatives of the natural gas industry, to clarify that the MCS applied only to residential structures using electric space heating and to commercial structures using electric space heating or space conditioning (49 FR 34118, August 28, 1984).

convert to electric space heating and for existing commercial structures which convert to electric space heating and/or conditioning are described in section 3 and 7 of the Council's current Two-Year Action Plan, respectively.

The Act also authorized the Council to recommend that the Bonneville Power Administration (BPA) impose a minimum 10 percent rate surcharge upon electric utilities for those portions of their loads within jurisdictions which do not, or upon utilities which do not, implement the MCS or achieve comparable savings. In the Plan, the Council set a January 1, 1986 deadline for adoption of all aspects of the MCS or comparable programs and recommended that BPA impose surcharges after that date. This deadline applied to the MCS for new residential and commercial structures and for existing structures converted to electric heating or space conditioning.

The Plan also called on BPA to implement various educational, technical and financial assistance programs to further adoption of the MCS. One of these programs, the Residential Standards Demonstration Program (RSDP) was designed to provide designers, builders, subcontractors, materials suppliers and building code officials with experience in the construction of residences meeting the MCS. The RSDP involves more than 400 residences across the region built to the energy efficiency requirements of the MCS, as well as a "control group" of homes built to current practice. All RSDP buildings are metered to allow comparison of the amount of electricity each consumes for space heating, water heating and other uses.

As a result of incentive efforts called for in the Plan and implemented by BPA, several jurisdictions in the region (including the City of Tacoma, Washington) have already adopted and begun to enforce the MCS. Also, largely in response to the Council's Plan, the State of Washington recently authorized its Building Code Council to promulgate for adoption a statewide energy code incorporating a number of the efficiency requirements of the MCS.

BPA also initiated a marketing program, Super Good Cents, aimed at achieving a target of 5,000 houses being built to the Council's standard during fiscal year 1986. Houses built and marketed through the Super Good Cents program will be certified as energy efficient by electric utilities. Certification is designed to encourage lenders, sellers and buyers to view the certification as adding value to the house because it is less expensive to heat. Also, through development of a surcharge policy, BPA is establishing a procedure to test the compliance of utility-designed programs in gaining savings of electricity equivalent to the MCS. Finally, BPA has a continuing program to help train and educate the building industry to construct more efficient buildings.

Based upon its review of preliminary data and builder experience resulting from the RSDP and the early-adopting jurisdictions, the Council now believes that some amendment of the Plan may be necessary to permit additional time for the regional transition from current building practice to the levels of energy efficiency called for in the MCS. At a Council meeting held on March 13, 1985, Council staff presented an issue paper ("Model Conservation Standards Review") which concluded that, while the preliminary cost data from the RSDP support the efficiency levels called for in the MCS, some delay in implementation of the MCS may be necessary to provide additional time to resolve difficulties encountered by some builders in making the transition to the energy-efficient building practices called for by the MCS.

The Council now seeks public comment on the proposed amendments described below. The Council particularly encourages submission of comments addressing the following issues:

- the MCS as "lost opportunity resources" (i.e., the value to the region of acting promptly to acquire cost-effective electric power savings that may not be available as inexpensively later, if at all);
- indoor air quality;
- achievable market share rates for the 1989 MCS for new structures, both before and after the January 1, 1989 deadline; and
- appropriate levels of incentive payments for construction of new structures to the requirements of the 1989 MCS.

Proposed Amendments

If adopted by the Council, the proposed amendments would amend Volume I, Chapter 10, Section 2 of the Plan, "Residential Sector-New Building Standard"; Section 3, "Residential Sector-Conversion Standard"; Section 6, "Commercial Sector-New Building Standard"; Section 7, "Commercial Sector-Conversion Standard"; Section 8, "Commercial Sector-Demonstration Program"; Action Item 12.1, dealing with BPA reimbursement to state and local governments for the cost of adopting the MCS; and Section 25, "Method for Calculating Surcharges," by deleting the existing text and related appendices and replacing them with the following.

Model Conservation Standards for New Electrically Heated Residential Structures and New Electrically Space Conditioned Commercial Buildings and Buildings That Are Converted to Electric Space Heating and Conditioning

The model conservation standards described below may be adopted and enforced by a state or local government or by utilities where utilities are legally authorized to do so. For those jurisdictions which choose not to adopt and enforce the applicable standards, affected electric utilities should prepare by the dates provided in Section E of this rule a description of an alternative program for achieving savings of electricity that are comparable to those achievable through the use of the standards. The alternative program may employ marketing and incentive programs, electric service requirements, rate designs, or other techniques for achieving conservation. Some pre-approved alternative plans are included here and in BPA's currently proposed surcharge policy. Failure to implement the standards or achieve comparable savings of electricity will subject utilities to the Council's surcharge provisions (see Method for Calculating Surcharges, Appendix A to this rule).

A. *Level and Timing of the Model Conservation Standards*

The proposed amendments described below do not represent a radical departure from the MCS the Council formulated in its 1983 Plan. No changes are proposed to the level of the commercial standard for new buildings, the conversion standard for existing residential and commercial buildings, or the full residential standard for new buildings required by 1989. The only change in level is the interim standard for new residential buildings required by 1987. The proposed amendments would, if adopted, change the timing of the standards. Rather than requiring that all the standards be adopted by January 1, 1986 in order to avoid the surcharge, the deadline for adoption of the full residential standards for new structures would be January 1, 1989, and an interim residential standard for new structures would be required by January 1, 1987. The deadline for adoption of the standard for new commercial buildings would be January 1, 1987. The deadline for adoption of the conversion standard for existing residential and commercial structures would be January 1, 1989. A summary of the level and timing of the standards which would result from the

proposed amendments appears in Exhibit A

TABLE 1.—ILLUSTRATIVE PRESCRIPTIVE PATH

- To meet the model conservation

VOL 50 ISS 144 JL 26 1985 UMI

proposed amendments appears in Exhibit A.

Exhibit A.—Summary of Model Conservation Standards and Their Effective Dates

Effective date	New residential buildings	New commercial buildings	Residential buildings converted to electric heating	Commercial buildings converted to electric heating or air conditioning
Jan. 1, 1987	Component prescriptive standard for three climate zones. Component tradeoffs allowed via a point system similar to the one used by BPA in the Residential Standards Demonstration Program (RSDP) (see Table 1 for details).	Modified ASHRAE 90-80 with lighting budgets from the Seattle Energy Code, except for office and retail buildings which have lighting budgets of 1.5 watts per square foot. An additional allowance for spot and task lighting of 1.5–3.0 watts per square foot is provided for retail buildings less than 20,000 sq. ft.	No requirement	No requirement.
Jan. 1, 1989	Component prescriptive standard comparable to Council's 1983 standard (see Table 2 for more details).	do	Structures receiving building permits before Jan. 1, 1989 must be weatherized to the regionally cost-effective level defined in the Council's plan. Structures receiving building permits after Jan. 1, 1989 must be weatherized to the level indicated in Table 2.	Buildings receiving building permits before Jan. 1, 1987 must undergo an energy audit and meet certain efficiency standards. Commercial buildings receiving a building permit after Jan. 1, 1987 must be upgraded to the level of the commercial standard effective on Jan. 1, 1987.

1. New Residential Buildings (Single and Multifamily) [1]

New buildings present one of the most significant opportunities for achieving cost-effective conservation. The installation of measures is far less expensive at the time of construction, and many conservation measures can be incorporated at the time of construction but cannot be installed later without making structural changes to the building. With residential buildings lasting 50 years or more, it is vital to ensure that any building using electric space heating is built to efficient standards—even during periods of a surplus of electric power. Unless all cost-effective measures are installed at the time of construction, an important energy-saving resource may be lost to the region forever. The Council's model conservation standards are intended to capture these "lost opportunity" resources while they are available.

The Council's model standards for new residential buildings are specified for three climate zones [2] in the form of a generalized prescriptive path. The standard which should be in effect in each climate zone by January 1, 1987 is that level of electric energy efficiency which would be realized through the use of the illustrative prescriptive path shown in Table 1 below. The standard which should be in effect in each climate zone by January 1, 1989 is that level of electric energy efficiency which would be realized through the use of the illustrative prescriptive path shown in Table 2 below. The Council believes that designers and builders should be permitted to select any means to achieve savings of electricity comparable to those that would be realized through the use of these generalized paths. For example, a dwelling could attain the Council's standard by containing a lower level of insulation, while containing more efficient windows or a heat pump.

The Council, after carefully reviewing all of the data available to it on the MCS, has determined that these standards represent regionally cost-effective investments in electric space heating conservation in new dwellings and at the same time are economically feasible for consumers, taking into account BPA incentives available under Section C of this rule.[3] The Council has not analyzed the economic feasibility or cost-effectiveness of these standards for consumers of other space heating fuels. The Council's standards for new residential construction apply only to locally regulated structrues. They do not apply to structures regulated by the U.S. Department of Housing and Urban Development's Federal Manufactured Home Construction and Safety Standards for manufactured housing.

• To meet the model conservation standard for new residences, a state, local government or utility should:

(a) By January 1, 1987, take actions through codes, alternative programs or combinations thereof which will achieve electric power savings from new residences comparable to those savings which would be achieved if new electrically heated residences included the conservation measures described in Table 1 below. These measures have been demonstrated to be cost effective for the region because they are reliable and available within the time needed and because they reduce the electric power demand of regional consumers at a system cost which is less than the least-cost similarly reliable and available alternative resource. They have been found by the Council to be economically optimal for the average regional residential consumer of electricity, and to require no additional time to improve necessary building practices. Typical new residences could comply with the standard by including the conservation measures shown in Table 1 below.

TABLE 1.—ILLUSTRATIVE PRESCRIPTIVE PATH FOR MCS TO BE IMPLEMENTED BY JANUARY 1, 1987.

Component	Level of Efficiency	
	Climate zone 1	Climate zones 2 and 3
Ceiling:		
Attic	R-38 (U-0.032)	R-38 (U-0.032).
Vaults	R-30 (U-0.035)	R-30 (U-0.035).
Walls	R-19 (U-0.057)	R-19 (U-0.057).
Underfloor crawlspace and unheated basements.	R-19 (U-0.040)	R-30(U-0.030).
Perimeter (exterior) slab-on-grade and heated basemens. or	R-10	R-15.
Perimeter (interior) heated basement.	R-19	R-19.
Glazing	R-2.5 (U-0.40 tested at 15 mph using procedures consistent with AAMA 1503.1-80.*	
Maximum glazed area (% floor area).	15	15.
Doors	No requirement	R-7 (U-0.16).
Infiltration Control	Current Practice (Approximately 0.6 air changes per hour.	
Mechanical ventilation with heat recovery.	Current Practice	Current Practice.

* American Architectural Manufacturers Association 1503.1–1980 Voluntary Test Method for Thermal Transmittance of Windows, Doors and Glazed Wale Sections.

As an alternative, a state or local government or utility may meet this standard by implementing a program that ensures that a certain percentage of new residences meet the higher level required by the 1989 MCS described immediately below (i.e., achieve a specified minimum share of all electrically heated new residences). Assuming that the remainder of the residences in each state are built to current practice, the necessary shares per state would be as follows:

State	Market share (percent)
Washington	10
Oregon	* 25
Idaho	42
Montana	28

*Assumes adoption of current Building Code Division proposed revisions to Chapter 53 of the Oregon Building Code. If the existing code remains in effect without revisions, the minimum market share required for utilities serving consumers in Oregon would be 50%.

(b) By January 1, 1989, take actions through codes, alternative programs, or a combination thereof which will achieve electric power savings from new residences comparable to those savings that would be achieved if new electrically heated residences included the conservation measures described in Table 2 below. These measures are forecast by the Council to meet the Act's requirements that they be designed to produce all electric power savings that are cost effective for the region and economically feasible for consumers, taking BPA financial assistance into account. Typical new residences could comply with the standard by including the measures shown in Table 2 below.

Other illustrative approaches to building to this standard are described in those portions of the Council's *Model Conservation Standards Equivolent Code* dated February 1985, as may be subsequently amended or revised, which are applicable to low-rise residential buildings.

TABLE 2.—ILLUSTRATIVE PRESCRIPTIVE PATHS FOR MCS TO BE IMPLEMENTED BY JANUARY 1, 1989 [4]

Component	Climate zone		
	Zone 1	Zone 2	Zone 3
Ceiling:			
Attic	R-38(U-0.032)	R-38(U-0.032)	R-38(U-0.032).
Vaults	R-38(U-0.028)	R-38(U-0.028)	R-38(U-0.028).
Walls	R-19(U-0.057)	R-25(U-0.045)	R-31(U-0.035).
Underfloors crawlspaces and	R-19(U-0.040)	R-30(U-0.030	R-30(U-0.030).
Perimeters (exterior) slab-on-grade and heated basements. or	R-12	R-10	R-15.
Perimeters (interior) heated basement.	R-19	R-19	R-25.
Glazing	R-2.5 (U-0.40 tested at 15 mph using procedures consistent with AAMA 1503.1-80).		
Maximum glazed area (percent floor area)	15	15	15.
Exterior Doors	R-7(U-0.16	R-7(U-0.16)	R-7(U-0.16).
Infiltration Control	0.1 ach*	0.1 ach.	0.1 ach.
Mechanical ventilation w/heat recovery	0.5 ach.	0.5 ach.	0.5 ach.

*ach—air changes per hour.
[4] The electric power savings represented by inclusion of these measures are estimated to be equivalent to those which would be produced by the performance standards as set forth and as amended in the Council's 1983 energy plan.

2. New Commercial Buildings

For the same reasons described above regarding new residential construction, it is vital to ensure that commercial (i.e., nonresidential) buildings using electric space conditioning and/or lighting are built to efficient standards—even during periods of surplus. This commercial building standard was developed to ensure that new commercial buildings are built to produce savings of electricity that are cost effective for the region and economically feasible for the consumer. The level of the standard for new commercial buildings is unchanged from that in the Council's 1983 Plan. However, to allow adequate time for adoption and implementation of this standard, the Council is proposing that the standard apply to those commercial buildings that receive building permits on or after January 1, 1987.

• To meet the model conservation standard for new commerical buildings, a state, local government or utility should, by January 1, 1987, take actions through codes, alternative programs, or a combination thereof which will achieve electric energy savings from new commercial buildings comparable to that which would be achieved if new commercial buildings met the energy efficiency requirements described below in the following paragraph. Illustrative approaches for building to meet this standard are described in those portions of the Council's *Model Conservation Standards Equivalent Code* dated February 1985, as may be subsequently amended or revised, which are applicable to all buildings except low-rise residential buildings.

The Council's model conservation standard for new commerical buildings is a modified version of the most recent model energy code of the American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), ASHRAE 90–80, except for those sections dealing with ventilation and lighting. The ventilation requirements are those set forth in ASHRAE Standard 62–81. The lighting efficiency requirements are comparable to those now required by the City of Seattle's Energy Code, with the exception of office and retail buildings. The lighting standard for all office buildings and for those retail buildings containing over 20,000 square feet is 1.5 watts per square foot. This is equivalent to the office building lighting standard adopted by the California Energy Commission. The lighting efficiency requirements for other retail buildings are as follows:

Size	Lighting Efficiency Requirement (maximum installed wattage, including ballast)
Less than 1,000 [1]	[2] 4.5
1,000 to 6,000 [1]	[2] 3.5
6,000 to 20,000 [1]	[2] 2.5

[1] Square feet.
[2] Watts/square feet.

3. Residential and Commercial Conversions

It does little good to require that all new buildings with electric space heating/space conditioning satisfy model conservation standards if existing buildings that are not built with electric space heating/space conditioning can be converted to electricity freely. The region would be inviting consumers to circumvent the new building standards.

[1] Single family residences are defined to include duplexes. Multifamily residences include triplexes and larger structures up to and including 4-story low-rise residential structures.

[2] These climate zones, developed to reflect climatic differences within the region, are based on the number of heating degree days in a particular location. Zone 1 experiences less than 6,000 heating degree days, Zone 2 from 6,000 to 8,000 and Zone 3 more than 8,000.

[3] The Council's March 13, 1985 issue paper, "Model Conservation Standards Review," and additional materials analyzing the data are available on request.

On the other hand, it would be unreasonable to require that buildings

C. Programs To Assist MCS Implementation

to the degree of efficiency represented

i. Financial incentives for homebuyers

continue as long as enforcement of the

On the other hand, it would be unreasonable to require that buildings receiving permits prior to the effective date of the Council's standard meet the new building standard before they can be converted to electric space heating/space conditioning. To reconcile these differences, the Council has developed separate model conservation standards for buildings that are granted building permits before January 1, 1989 for residential buildings and before January 1, 1987 for commercial buildings and that are later converted to electric space heating or conditioning and for commercial and residential buildings that are granted building permits after January 1, 1987 and January 1, 1989, respectively, and are later converted to electric space heating/conditioning.

The Council's model standard for residential buildings that receive permits prior to January 1, 1989 and that later are converted to electric space heating requires that a dwelling install all conservation measures that are regionally cost effective, as described in the Council's Plan, prior to conversion. The conversion standard for commercial buildings that receive permits prior to January 1, 1987 and are later converted to electric heating/conditioning, requires that, prior to installation of electric space heating or conditioning, the building should undergo a comprehensive energy audit and install all conservation measures that are regionally cost effective and economically feasible, as described in the Council's Plan,[5] prior to conversion.

These conversion standards are at the same level as in the Council's 1983 Plan. The only change is in their timing. Commercial and residential buildings that are granted building permits after January 1, 1987 and January 1, 1989, respectively, will be required to be upgraded to Council's model energy standards for new electrically heated/space conditioned buildings if and when they are converted to electric space heat/space conditioning. These conversion standards will ensure that buildings converted to electric space heat from other fuels will meet minimum electric energy-efficiency requirements.

• To meet the model conservation standards for commercial and residential buildings that receive building permits prior to January 1, 1987 and January 1, 1989, respectively, and that convert to electric space heating (or space conditioning, in the case of commercial buildings) a state, local government or utility should, by January 1, 1989, take actions through codes, alternative programs or a combination thereof to achieve electric power savings from such buildings comparable to those savings that would be achieved by compliance with the conversion standards described above. Buildings that receive building permits after January 1, 1987 for commercial and January 1, 1989 for residential buildings must comply with standards for new buildings if they convert to electric heating/conditioning.

[5] The Council's 1983 Plan established this level to be a levelized life cycle cost of 4.0 cents per kilowatt hour (in 1983 dollars) for each measure. The Council staff's recommendation for the 1985 Plan is to revise this figure to 5.5 cents per kilowatt hour (in 1985 dollars).

B. Acceptable Alternative Programs for Achieving the Model Conservation Standards

1. Development of Alternative Programs

As alternative programs for achieving savings comparable to those which would be obtained under the MCS, state or local governments or utilities may use marketing programs, provide for financial incentives to buyers or builders of new electrically heated dwellings and/or commercial structures, or use other measures to encourage electric energy-efficient construction achieving savings comparable to those achievable through the MCS. Each alternative plan should specify at least the following:

—Thermal efficiency specifications per building.
—Target market share.
—Marketing plan (e.g. Super Good Cents, Super Good Cents with incentives, etc.).
—Contingency plans for achieving targets with alternative marketing strategy.
—Compliance certification strategy (e.g. utility inspection).

Each alternative will be evaluated by BPA to establish that its implementation will achieve savings comparable to the MCS. BPA is now developing pre-approved alternative plans under its proposed surcharge policy.

2. Time for Declaration of Alternative Programs

By January 1, 1986, utilities should submit to BPA a plan declaring how they intend to meet the 1987 MCS for new residential buildings and MCS for new commercial buildings or declaring how these standards will be met or have been met by state or local governments. By January 1, 1988, utilities should submit to BPA their plans for meeting the 1989 MCS for new residences and the MCS for residences and commercial buildings converting to electric space heat and/or space conditioning.

C. Programs To Assist MCS Implementation

Even though the benefits of building to the MCS are clear, homebuyers, builders, state and local governments and utilities need technical and financial assistance to make the transition to constructing buildings as efficiently as is required by the standards. Achieving the improved levels of building efficiency envisioned in the MCS is the goal of the Council. This goal can be achieved by a variety of ways, including new building codes, education and training, marketing programs, incentives, or any combination of the above activities.

BPA has a key leadership role in achieving the goal of constructing more efficient buildings in the region. In this role, BPA should offer technical and financial assistance to those entities that can effect a change in current building practice. In particular, BPA's assistance is important to achieve the following four fundamental objectives.

1. Improved Building Codes

BPA should provide assistance to state and local jurisdictions as they make the transition to more efficient building practice through changes in building codes. BPA has offered and should continue to offer two specific programs that will facilitate the adoption of building codes by state and local governments. The first programmatic effort by BPA has been the offering of technical and financial assistance to "early adopters" of the MCS. Communities such as Tacoma, Washington which have taken a leadership role by implementing a local building code to the level of the MCS greatly facilitate the development of the necessary market infrastructure that is ultimately needed to achieve a change in the region's building practice. The second programmatic effort by BPA is financial assistance to reimburse state and local governments for the increased costs of inspection and enforcement associated with more energy efficient buildings.

2. Utility Based Programs

Recognizing that not all jurisdictions within the region will adopt energy efficient building codes to the level of the MCS, the Council has specified other programs to bring about changes in building practice. These programs have focused on two sub-objectives: (1) To provide marketing assistance to homebuilders and buyers of new homes to facilitate consumer decisions to build more efficient housing, and (2) to provide incentives to individual homebuyers who purchase homes built

to the degree of efficiency represented by the MCS.

3. Model Conservation Standards Research and Development

BPA should continue to provide additional research and development for new building techniques that can reduce the cost to the homeowner of achieving levels of efficiency represented by the MCS and beyond. These research and development programs focus on two specific areas. First, considerable improvements can be made with respect to building techniques and practices. BPA has provided substantial assistance to builders by providing recommendations on the most cost efficient ways to achieve the MCS. Second, BPA should continue with research on technology that at least maintains indoor air quality at the level attained in houses built to current practice.

4. Provide Training and Technical Information

BPA should continue activities that will assist homebuyers, state and local governments, homebuilders, utilities, realtors, lenders, and appraisers accurately evaluate building techniques that will achieve improved levels of building efficiency. This training and technical information is fundamental to allowing all of the decisionmakers involved in purchasing new buildings to make an informed decision, one that recognizes the importance of energy efficient buildings in the total costs of owning and heating or cooling the building.

To meet the Council's overall goal and to achieve the specific objectives listed above, BPA should maintain and/or establish several programs. These programs should be developed in consultation with the Council and other interested and affected parties. As BPA gains more experience with implementing the MCS, these programs may be expanded and changed to be more responsive to achieving the Council's overall goal of moving the region to more energy efficient building practices. The BPA programs structured by the four key objectives listed above are listed below.

1. *Programs to Encourage More Efficient Building Codes.* (a) Refine the Code Adoption Demonstration Program which encourages utilities, states and local governments to achieve the 1989 MCS through adoption of equivalent codes prior to January 1, 1989. This "early adopter" program should be available throughout the region and should include the following elements:

i. Financial incentives for homebuyers sufficient to cover the incremental cost of construction between current (October 1, 1985) practice and the 1989 MCS. The Council estimates this cost will range from $1.50 to $3.00 per square foot of heated space, and will provide exact estimates to Bonneville.

Continue to provide financial incentives to commercial building owners in "early adopter" jurisdictions.

ii. Reimbursement to utilities, states and local governments for the cost of code adoption and enforcement. Reimbursement for the cost of enforcement of codes should be provided only if such enforcement activities produce at least an 85 percent code compliance rate.

iii. Systematic evaluation of construction cost, fuel share impacts, thermal performance, occupant satisfaction, indoor air quality, and overall compliance with code targets and cost for both residential and commercial buildings.

iv. Education and training programs for builders, consumers, architects, designers, energy code enforcement officials, mechanical ventilation system designers, installers and servicing contractors, realtors, lenders and appraisers, and other appropriate participants in the design, purchase, and construction of new buildings.

v. Shelter industry training which focuses on the most cost efficient means of achieving the MCS.

(b) By January 1, 1986, refine the point system used in the Residential Standards Demonstration Program. The generalized prescriptive paths shown in Table 2 should be used as a basis. At a minimum, component trade-offs should be included to account for variations in building thermal mass, heating system efficiency, solar orientation, envelope thermal efficiency and heating degree days.

(c) Establish and maintain a program to reimburse states or local governments for the costs of enforcing codes. Code enforcement reimbursement should be provided for the cost of one inspection per building for any jurisdiction that substantially improves its residential energy conservation code. This reimbursement should be provided between the time of adoption and January 1, 1989, and should be offered throughout the region.

(d) Continue with the Model Conservation Standards Implementation Program (MCSIP) to reimburse state and local governments throughout the region for the incremental costs of adopting and enforcing all model conservation standards. Reimbursement should continue as long as enforcement of the standards remains regionally cost effective.

2. *Programs With or For Utilities.* (a) Maintain an aggressive energy efficient new home marketing program (e.g. Super Good Cents). This program should include, as a condition of participation in the program, monitoring of indoor air quality and employment of specific pollutant source control measures in houses constructed under the program, and should be focused on "site-built" residential buildings.

(b) Explore the possibilities and feasibility of an aggressive energy-efficient new commercial buildings marketing program similar to the Super Good Cents program for residential buildings. If a program appears to be desirable, design and implement the program.

(c) Continue development of an implement a procedure to measure compliance with the Council's standards and to review alternative plans for achieving savings comparable to the MCS for new residential and commercial buildings. This procedure should be incorporated into Bonneville's surcharge policy scheduled for completion in January 1986.

(d) Develop and implement a procedure to measure compliance with the Council's standard and to review alternative plans to achieve savings comparable to the MCS for existing residential and commercial buildings converting to electric space heating/space conditioning. This procedure is to be available on or before January 1, 1988, and at that time should be incorporated into Bonneville's surcharge policy.

3. *Model Conservation Standards Research and Development.* (a) Continue the New Commercial Buildings Field Test Demonstration program conducted pursuant to the Council's 1983 plan. This program is designed to achieve approximately 30 new commercial buildings constructed to be about 30% more efficient than the Council's standard.

(b) Continue to collect and analyze data regarding energy use, structural specifications and operation of residences and commercial buildings through the existing End-use Load and Conservation Assessment Project (ELCAP).

(c) Collect and evaluate data on new energy efficient commercial buildings built under the "early adopter" program or elsewhere. These data should be maintained and updated as is necessary so they can be used in future planning

and be used in information brochures on efficient building techniques.

as the MCS remain regionally cost-effective.

VOL 50 ISS 144 JL 26 1985 UMI

and be used in information brochures on efficient building techniques.

(d) Expand Bonneville's existing Indoor Air Quality Research Program to:

i. Gather information on the distribution of ventilation rates in single family and multifamily dwellings constructed to existing and newly adopted codes and standards by climate zone in the region.

ii. Assess the relative effectiveness of alternative source reduction and mechanical ventilation systems and strategies for minimizing potential pollutant build up, including but not limited to spot ventilation, whole house exhaust-only ventilation, ductless heat recovery ventilation, and whole house heat recovery ventilation.

iii. Evaluate the effectiveness of natural ventilation (i.e., infiltration) compared to mechanical ventilation in maintaining clean air, given the same source strength and whole house ventilation rate.

iv. Identify any indoor pollutants that may be significantly reduced or eliminated through source reduction actions that might be effected through building codes and product standards.

(e) Establish, maintain and disseminate the results of an ongoing research and demonstration effort which focuses on the refinement of new residential and commercial building conservation technologies, construction techniques and products. This program should initially concentrate in the residential sector, identifying and/or developing more cost effective approaches to:

i. Reducing uncontrolled air leakage,

ii. Providing more reliable ventilation both with and without heat recovery, and

iii. Constructing highly insulated exterior walls.

4. *Training and Technical Assistance.* (a) Develop for commercial buildings an energy efficiency certification program focusing on lighting. This program should be available by January 1, 1987 and be designed to influence the financing terms available to developers of energy efficient commercial buildings.

(b) Continue to provide technical and financial assistance to builders, insulation contractors, architects, designers, real estate appraisers and salespersons and code officials for the implementation of a uniform, regionwide energy efficiency certification and rating system for new residential buildings designed to influence the financing terms available to homebuyers.

(c) Education and training programs for builders, consumers, architects, designers, energy code enforcement officials, mechanical ventilation system designers, installers and servicing contractors, realtors, lenders and appraisers, and other appropriate participants in the design, purchase, and construction of new buildings. This education and training program should continue beyond 1989 if necessary.

D. Public Utility Regulatory Commission Activities

The Council recommends that the region's public utility commissions consider providing appropriate rate treatment for investor-owned utility expenditures (e.g. market program costs, consumer/builder incentives) made to encourage the construction of more electrical energy efficient structures built to achieve savings comparable to those specified for the 1987 and 1989 MCS for new residences and commercial buildings.

E. Surcharge Method and Recommendation

The Act requires the Council to provide a method in the Plan which the administrator is to use in imposing surcharges. The Council's method for calculating surcharges is presented in Appendix A.

1. *Timing*—The Council recommends that BPA impose a rate surcharge upon utilities for those portions of their loads within the region that are in jurisdictions which do not, or on utilities which do not:

(a) achieve, by January 1, 1987, electric power savings comparable to 85 percent [6] of the savings which would be achieved by the 1987 MCS for new residential buildings;

(b) achieve, by January 1, 1987, electric power savings comparable to 85 percent of the savings which would be achieved by the MCS for new commercial buildings;

(c) achieve, by January 1, 1989, electric power savings comparable to 85 percent of the savings which would be achieved by the 1989 MCS for new residential buildings, unless the Council determines on or before July 1, 1988 that the 1989 MCS is not cost-effective, reliable or commercially available;

(d) achieve, by January 1, 1989, electric power savings comparable to 85 percent of the savings which would be achieved by the MCS for residential buildings which are converted to electric space heating; and

(e) achieve, by January 1, 1989, savings comparable to 85 percent of the savings which would be achieved by the MCS for existing commercial buildings which are converted to electric space heating and/or conditioning.

A utility meeting the January 1, 1986 and January 1, 1988 filing deadlines described in Section B.2 above will not be subject to surcharge until BPA completes an evaluation of compliance plans submitted by the utility.

After January 1, 1989, achievement of the MCS for new residences should be a joint responsibility of BPA, state and local governments, utilities, and homebuyers. BPA should assume responsibility for dwellings built beyond what is economically optimal for consumers but still regionally cost effective. If a jurisdiction achieves electric energy savings equivalent to what would be saved by buildings built to the consumer optimal level as identified by the Council in Table 1 above, BPA should not surcharge the utility serving that jurisdiction. Instead, BPA should pay an incentive equal to the difference in net present value cost between the consumer optimum and the 1989 MCS. If a jurisdiction does not achieve comparable savings to what would be achieved at the consumer optimum, then the utility serving that jurisdiction should be surcharged. In making its calculation, BPA should use cost data from the Residential Standards Demonstration Program and other cost data systematically collected and evaluated from jurisdictions which adopt the 1989 MCS before January 1, 1989. Such incentives should be paid on the basis of dollars per square foot of a residence's electrically heated floor area. Currently, the Council estimates this cost to be between $0.25 and $0.35 per square foot. The Council will provide to BPA an estimate of this life cycle cost difference.

2. *Exemptions*—The MCS are one of the most cost effective resources in the Council's resource portfolio, and failure to adopt them imposes upon the region the cost of ultimately building additional higher-cost generating resources. The availability of alternative programs allows a number of ways for utilities to avoid a surcharge. If BPA believes that existing conditions or hardships excuse specific utilities from achieving savings equivalent to 85 percent of savings which would be achieved by the MCS, then BPA should pay for the cost of attaining the MCS to the 85 percent level in those utilities' service areas, so long as the MCS remain regionally cost-effective.

[6] The 85 percent requirement represents the compliance rate the Council expects would result from an incentive-based marketing program.

Edward Sheets,
Executive Director.

Appendix A

Section 4(f)(2) of the Act provides for Council recommendation for surcharges on customers for those portions of their loads within the region that are within states or political subdivisions which have not, or on customers which have not, implemented conservation measures that achieve savings of electricity comparable to the model conservation standards. The Council is reponsible for drafting a "methodology" for the calculation of surcharges. The Council, in Action 25 of Chapter 10 of this Plan, has recommended to the Administrator that he impose a surcharge on customers serving jurisdictions which do not adopt the model conservation standards or achieve comparable savings. The purpose of the surcharge is twofold: (1) to recover costs imposed on the region's electric system by failure to adopt the model conservation standards or achieve comparable savings, and (2) to provide a strong incentive to utilities and state and local jurisdictions to adopt and/or enforce the standards or comparable alternatives. The following is the "methodology" for calculating surcharges:

1. The following model conservation standards must be adopted or comparable savings must be achieved in order to avoid surcharges:

- Model Standards for new residential buildings, Action 2;
- Model Standards for new commercial buildings, Action 6;
- Model Standards for conversion to electric space heat in residential buildings, Action 3; and
- Model Standards for conversion to electric space conditioning in commercial buildings, Action 7.

2. The Administrator shall identify those customers, states, or political subdivisions which have not:

a. implemented each of the model standards listed in paragraph 1; or

b. achieved comparable savings of electricity through other conservation methods, such as utility electric service requirements, incentive programs or rate designs.

3. The surcharge shall then be calculated by the Bonneville Administrator as follows:

a. If the customer is purchasing firm power from Bonneville under a Power Sales Contract and is not exchanging under a Residential Purchase and Sales Agreement, the surcharge is calculated to be 10 percent of the cost to the customer of all firm power purchased from Bonneville under the Power Sales Contract.

b.If the customer is not purchasing firm power from Bonneville under a Power Sales Contract, but is exchanging under a Residential Purchase and Sales Agreement, the surcharge is calculated to be 10 percent of the cost to the customer of the power purchased from Bonneville in the exchange.

c. If the customer is purchasing firm power from Bonneville under a Power Sales Contract and also is exchanging under a Residential Purchase and Sales Agreement, the surcharge is calculated to be (a) 10 percent of the cost to the customer of firm power purchased under the Power Sales Contract *plus*, (b) 10 percent of the cost to the customer of power purchased from Bonneville in the exchange multiplied by the fraction of the utility's exchange load that is served by the utility's own resources.

This calculation of the surcharge is designed to eliminate the possibility of surcharging a utility twice on the same load. In the calculation, the portion of a utility's exchange resource that is purchased from Bonneville and already surcharged under the power sales contract is subtracted from the exchange resources before establishing a surcharge on the exchange load.

d. If only a portion of a utility's service area has not adopted the model standards or achieved comparable savings, the surcharge calculated under a, b, or c above is to be multiplied by the non-complying jurisdiction's share of the utility's total load.

e. The surcharge shall be removed when model conservation standards have been adopted and enforced or alternative programs, estimated by the Administrator in consultation with the Council to save an equivalent amount of electricity, have been implemented.

4. A utility electric service requirement that results in construction of electrically space conditioned buildings which are the equivalent of buildings in compliance with the model conservation standards constitutes an alternative plan that achieves comparable electricity savings. The Council intends to continue analyzing alternatives to building codes to achieve the construction of energy-efficient buildings to obtain cost-effective resources for the region.

5. Any entity that chooses not to adopt a particular model conservation standard within the allotted period for adoption and wishes to avoid a surcharge must declare, before that period expires, how it intends to achieve comparable savings. In addition, that entity must indicate how it intends to demonstrate attainment of comparable savings.

To assist Bonneville in estimating comparable electricity savings from alternative plans, the entity should present its best estimate of new residential and commercial building construction in the non-complying jurisdictions within its service territory. Bonneville shall determine, in consultation with the Council, whether the alternative conservation plan of an entity will achieve comparable savings. When determining electricity savings that would have occurred had the standards been adopted, jurisdiction-specific weather data and construction estimates, where available, should be used along with the Council's residential and commercial heat loss models.

The Council recognizes that in many cases data will not be available. In these cases Bonneville should rely on average electricity savings estimated by building type and climate zone and included in the Plan. For residential buildings, Bonneville should assume the following regarding houses built to the model conservation standards: (1) Houses in climate zone 1 would save, on average, 5,130 kWh per year; (2) houses in climate zone 2 would save, on average, 8,508 kWh per year; and (3) houses in climate zone 3 would save, on average, 7,830 kWh per year. For commercial buildings and where good estimates are not available for the number of new houses, the savings should be determined by multiplying total expected regional average megawatt savings by sector from the standards, as shown in the Plan, by the utility's share of total regional load in the applicable sectors. Estimates of savings from conversion standards should be made on a case-by-case basis. The Council recognizes that these estimates will be difficult to make, but also that estimated savings from conversion standards probably will be small relative to savings from building standards. The Council will work with Bonneville on these estimates as requested.

If only a portion of a utility's service area has not adopted the standards, the lost electricity savings calculated in the above paragraph should be multiplied by the non-complying area's share of the utility's total applicable load.

If the Bonneville Administrator determines that the alternative plan will not achieve comparable savings, he shall notify the entity that its alternative plan has been judged to be not equivalent to the model conservation standards and that Bonneville will begin adding a surcharge to the entity's bill on a date certain. The surcharge will be calculated as described in Paragraph 3 of this method. If subsequent modifications to the entity's alternative plan bring it into compliance with the stated goals of the standards, then the surcharge shall be removed.

A general method of determining the electric energy savings of an alternative conservation plan shall be developed in consultation with the Council and included in Bonneville policy to implement the surcharge. Also, a method shall be included in the policy for terminating the surcharge once model standards have been adopted and enforced or comparable savings have been achieved."

DEPARTMENT OF JUSTICE

Bureau of Justice Assistance

Criminal Justice Discretionary Grants

AGENCY: Bureau of Justice Assistance, Department of Justice.

ACTION: Final notice.

SUMMARY: The Bureau of Justice Assistance is publishing a final notice to implement the criminal justice discretionary grant program authorized by the Justice Assistance Act of 1984. This notice describes procedures and requirements for applying for and administering discretionary grant funds.

EFFECTIVE DATE: This notice is effective on July 26, 1985.

FOR FURTHER INFORMATION CONTACT: For general questions about the priorities and range of discretionary grant programs and relationship to Block Grants: Eugene Dzikiewicz, Acting Deputy Director, Bureau of Justice Assistance, 633 Indiana Avenue NW., Washington, D.C. 20531, 202/272–6838.

ADDRESS FOR APPLICATIONS: All final applications should be addressed to: Control Desk, Office of Controller, Room 948, Bureau of Justice Assistance, OJP, 633 Indiana Avenue NW., Washington, D.C. 20531.

SUPPLEMENTARY INFORMATION: The Justice Assistance Act of 1984 established the Bureau of Justice Assistance within the Office of Justice Programs. The Act authorizes the award of discretionary grants to public and nonprofit agencies. Four purposes are specified for which discretionary grants can be made: (1) Demonstration programs; (2) education and training programs for criminal justice personnel; (3) technical assistance to states and local governments; and (4) national or multistate projects.

The discretionary grant program is intended to complement and enhance the program of criminal justice Block Grants administered by the Bureau of Justice Assistance pursuant to Part D of the Act. These latter grants are designed to carry out state and local programs with a high probability of improving the criminal justice system, with emphasis on violent crime and serious offenders. Of the total amount of funds appropriated for both block and discretionary grants, 20 percent is reserved for the discretionary grant program. For fiscal year 1985, the amount available is $13.8 million. Because many program activities will begin during the latter part of fiscal year 1985 and because State supported block grant activities will be starting up during the final quarter of calendar year 1985, the priorities set now will continue into fiscal year 1986. Subject to the availability of actual appropriations (anticipated by the close of the first quarter of FY '86) the plan and priorities encompass approximately one fourth of the FY '86 projected funding. To accommodate the actual funding cycles of the States in this initial year of block grant activity, this notice establishes a range of funding for each portion of the overall discretionary funding priorities.

The Bureau published proposed discretionary grant regulations on March 18, 1985 in the **Federal Register** to provide for public comments. Comments from criminal justice agencies and organizations nationwide have been largely favorable. Respondents taking issue with the priorities have been individually answered. Overall, the comments may be characterized as suggestions for the funding of particular projects or types of projects. For example, information systems were favored, especially automated fingerprint identification systems and basic entry level training. For the present, we are not making provision for these types of projects on the practical ground of overall cost. The decision to fund any of these areas would require more funds than are available.

Criminal Justice discretionary Grants

Subpart I—Demonstration Programs
Purpose
Due Dates
Evaluation Component
Programs:
—Effective Prosecution of Child Physical and Sexual Abuse Cases
—Law Enforcement Crime Prevention
—Family Violence Intervention
Subpart II—Technical Assistance/Training Priorities
Purpose
A. Community Crime Prevention Programs
B. Corrections Related Programs
C. Adjudication Related Programs
D. Law Enforcement Related Programs
E. Victim Assistance
F. Other Statutory Purposes
G. Technical Assistance for Demonstration Programs
Subpart III—National/Multi-State Programs
Purpose
National Victims of Crime Program
National Crime Prevention Campaigns
Law Enforcement Accreditation
Support of Prison Industries Enhancement Program.
Appendix A—Technical Assistance Format and Training Format

SUBPART I—DEMONSTRATION PROGRAMS

Purpose

Demonstration programs provide a means of testing state-of-the-art knowledge in priority criminal justice areas at a variety of sites. The models are based on substantial research and program documentation. All demonstration programs will be independently evaluated. Programs that prove successful may be certified in future years for state Block Grant funding.

Demonstrations will be initiated in the following three areas:

1. Effective Prosecution of Child Sexual Abuse Cases;
2. Law Enforcement crime Prevention;
3. Family Violence Intervention.

Interested jurisdictions must submit concept papers of no more than 10 pages plus a summary budget. Concept papers will be screened by inter-Bureau panels and rated. The top candidates will be invited to submit formal applications. Estimated total funding for Demonstration Programs will range from 2.3 million to 3 million dollars.

Due Dates

Concept papers and application due dates can be summarizes as follows:

	Concept papers	Application
Demonstration site applications.	Aug. 30, 1985.....	Oct. 15, 1985.
Evaluation of Demonstrations.	Sept. 15, 1985.....	Oct. 30, 1985.

Evaluation Component

One evaluation grant in an amount of approximately $250,000 will be negotiated for all three Demonstration Programs. Nonprofit organizations or public agencies should submit general statements of intent and evaluation experience in related criminal justice fields by September 15, 1985. The proposals should also summarize the proposed staffing pattern, and an eighteen-month workplan for conducting the evaluations. BJA will negotiate a final agreement with the best rated applicant as determined by a review panel. The successful applicant will be notified by September 30th.

Note. Since there will be insufficent funding for independent data collection, each demonstration project will be required to maintain core data elements and to cooperate with the evaluator. The evaluator will assist in selecting the core data elements.

The BJA contact for additional information on this project is: Nicholas Demos, (202) 724–5974

Effective Prosecution of Child Physicol and Sexual Abuse Coses

Goal

The goal of this program is to develop a range of pilot projects located within prosecutors offices that effectively prosecute those accused of physically and sexually abusing children, while reducing the trauma to the child victims and their families.

Background

Both the President's Task Force on Victims of Crime and the Attorney General's Task Force on Family Violence strongly held that physical and sexual assault of children are very serious crimes that have a profound impact on the child victim. Both task forces also recognized that children who are victims of these crimes are different from adult victims. Children are often revictimized by the insensitivity of a criminal justice system designed for adults. Children are traumatized by having to repeat their story of victimization again and again to social workers, police, prosecutors, probation officers, defense attorneys and judges, who usually have no training in interviewing child victims.

- In many jurisdictions, children are unnecessarily required to present testimony at preliminary hearings with the defendant present. In addition the taking of evidence through depositions can be traumatic to the child if the prosecutor is not sufficiently experienced to protect the child.
- Unnecessary continuances increase the trauma, and prolong the recovery period for the child.
- Children are forced to leave the home (i.e. placed in foster care) while the abuser remains.
- Finally, the adversarial process can make the child feel guilty for his/her actions.

Physical and emotional needs of the child as well as his or her treatment needs may be inconsistent with the traditional legal requirements for prosecution.

The special legal requirements in these cases must be balanced against needs of children from the initial investigation interview through case development and prosecution, and imposition of sentence. To be successful and to reduce trauma to the child victims, prosecutions must be carried out by trained prosecutors who are sensitive to the needs of the child victims, and must be coordinated with the other agencies which have responsibility.

Program Description

A range of four to six prosecutorial pilot projects will be funded. Each project will be designed to improve the prosecution of child sexual and physical abuse cases. Emphasis will be on the development of, or expansion of, prosecutor units which specialize in child physical and sexual abuse cases. However, these units also must develop written guidelines and protocols with mental health, law enforcement and child protective services for the processing of all child abuse cases. The guidelines and protocols should cover all facets of the case from reporting to final disposition. The goal of these guidelines and protocols should be protection of the child from further abuse, reduction of trauma to the child victim caused by the criminal justice system, streamlined investigative processes and improved cooperation and coordination among all interested organizations. Each of the special units should develop and adopt policies and procedures for child victims. These could include, but are not limited to:

- Using legislative reforms that have been passed by state legislatures.
- Presenting hearsay evidence at preliminary hearings.
- Interviewing children in a non-threatening environment.
- Use by trained prosecutors of anatomically correct dolls and drawings to describe abuse.
- Use of special child advocates, to explain court processes to the child and to stay with the child during the entire judicial proceeding.

The special units are also strongly encouraged to use vertical prosecution and to experiment with various techniques such as videotaping, closed-circuit T.V., and one way mirrors to reduce the trauma of confrontation and public trials.

This program will only fund the prosecution of child abuse cases. The prevention and treatment aspects of child abuse should be coordinated with existing community resources. The Bureau of Justice Assistance will provide technical assistance to each site during the planning and implementation phases.

Applications

Applicants are requested to submit concept papers on or before August 30, 1985.

Grant Period, Award Amounts, and Eligibility Criteria

Projects will be funded for eighteen months, with the expectation that they will go through a three month organization and planning phase, and a fifteen month implementation phase. The planning phase should involve gradual build-up of staff, and coordination with other service agencies. There is a potential for an additional six–twelve months of funding in FY 1987 if funds are available. Four to six project awards will be made in the range of $75,000–$125,000 for the initial eighteen months.

Concept papers should provide detailed descriptions of how the applicant intends to meet the following criteria.

- Provides for specialized training of prosecutors in areas related to child abuse.
- Provides for development of special distinct unit to process child abuse cases.
- Utilizes vertical prosecution.
- Has or has plans for developing and utilizing, special procedures and policies for child victims.
- Has, or has plans for developing, protocols for coordinating and working with:

victim assistance providers
child protection workers
law enforcement community
social service system
mental health system
family and/or juvenile court

- Effectively utilizes its own resources in the development of this unit.

Law Enforcement Crime Prevention

Goal

To demonstrate the importance of crime prevention as a major policy activity of equal professional statute to patrol and investigation activities in the

country's major police and sheriffs department.

Background

Submission Deadlines: Applicants must submit a concept paper by August

prosecutors office defining how cases are to be identified, charges filed,

Insitute of Justice publications

This guideline solicits applications

VOL 50 ISS 144 JL 26 1985 UMI

country's major police and sheriffs department.

Background

Although police-managed crime prevention has not been specifically evaluated apart from community crime watch programs, there are significant studies of crime prevention activities in such cities as Seattle, Hartford, and Portland. According to a study of the Police Executive Research Forum, *"Solving Crimes,"* investigators seldom review cases with other investigators to exchange information or detect patterns that could be used for crime prevention.

Program Description

Despite the growing evidence of success by neighborhood watch activities, most law enforcement agencies devote mimimal resources to the crime prevention function, organizing their resources around patrol and investigation instead. Few command or rank and file staff specialize in crime prevention, opting instead for more traditional career paths. Those cities whose crime prevention programs are the most successful—e.g., Detroit, Seattle, Santa Ana—have defined crime prevention as a major police function for all officers. With improved citizen reporting, better crime data and analysis, crime prevention can play a major role. Police leadership in organizing crime prevention activities is crucial. The Detroit Police Department model is particularly well known. Houston has patterned its approach after that of Detroit, as has Scotland Yard in London. All of these cities are finding new ways to increase the crime control activities of police through citizen involvement.

This program is aimed at integrating crime prevention activities into routine daily operations throughout the department by a combination of command initiatives and restructuring, incentives for line officers, changed manpower allocations and special training.

Applicants are required to dicuss specific issues in their proposed approach:

- Willingness to identify crime prevention as a major area of emphasis for patrol and investigation, with case follow-up.
- The redefinition of the crime prevention unit's mission from one of service delivery solely to a new combination of program management and special case follow-up.
- Some effort at integrating crime prevention principles into major zoning, rezoning and construction applications that will have a long-term impact on crime.

Applications

Police departments could expand their crime prevention roles by a combination of the following elements: (i) Increased emphasis on developing or expanding neighborhood or block groups by trained crime prevention specialists, including the training and use of volunteers; (ii) the ongoing maintenance of these community organizations by patrol officers; (iii) extension of the present case screening/case assignment systems to include follow-up by crime prevention specialists; (iv) the use of a department's crime analysis capability to assist patrol in planning crime prevention tactics and to inform neighborhood watch organizations; and (v) expanding officer performance reporting to include efforts at citizen contact and crime prevention activities, either as part of directed patrol or officer-initiated actions.

Grant Period, Award Amounts, and Eligibility Criteria

In FY 1985, $600,000 has been allocated for demonstrations of this program over a 12 month period.

Up to four (4) programs will be awarded as a result of a review of applications from local law enforcement agencies. Interested applicant's should be familiar with the model crime prevention activities being conducted by the Seattle, Santa Ana, and Detroit, Police Departments. Each project will be awarded $150,000 to $200,000 to address the specific issues noted.

Concept papers should provide detailed descriptions on how applicant intends to meet the following criteria:

—Departmental organization plan for addressing community crime prevention needs;
—The extent to which uniformed patrol and other officers will be involved in crime prevention activities;
—The extent to which the department has established working arrangements for crime prevention activities with various civic and community groups;
—Existing and proposed reward systems within department for implementing effective crime prevention activities;
—Existing and proposed training programs for uniformed officers in crime prevention techniques.

Submission Deadlines: Applicants must submit a concept paper by August 30, 1985.

Final applications for jurisdictions selected are due by October 15, 1985.

The BJA contact for additional information on this program is: Ron Steger, Community Crime Prevention Program Team, (202) 724–5974.

Family Violence Intervention

Background

The Attorney General's Task Force on Family Violence found that family violence is a major problem in this country. Battery is a major cause of injury to women in America. Nearly a third of female homicide victims are killed by their husbands or boyfriends. Almost 20 percent of all murders involve family relationships. These intentional, purposeful acts of physical abuse by one family member against another must be defined and recognized by the criminal justice agencies as serious criminal offenses. A strong commitment by law enforcement officials, prosecutors, and courts in responding to family violence as a crime can aid in deterring, preventing and reducing violence within the family.

Goal

To intervene in and reduce battering in adult relationships by instituting an effective law enforcement and criminal justice intervention program in domestic violence cases. The objectives of the program are to test and demonstrate in several jurisdictions methods and techniques for implementing those recommendations of the Attorney General's Task Force on Family Violence that address domestic violence intervention.

Program Description

A total of four to five pilot projects will be funded to develop and implement a comprehensive community response to reduce the crime of domestic assault. Emphasis will be on the establishment of a multi-disciplinary approach, i.e., a cooperative effort between law enforcement, prosecutors, shelter providers, social services, and the courts. Each project should establish a model that includes written policy for law enforcement's response to domestic violence cases including reporting requirements, enforcement of restraining or no-contact orders, guidelines for determining misdemeanor vs. felony offenses, assigning a high priority to domestic violence calls by dispatchers, and a provision for training. It should include the protocols between the law enforcement agencies and the prosecutors office defining how cases are to be identified, charges filed, complaints issued, and cases assigned. The courts should note jurisdictional determinations, arraignment procedures, how no-contact orders are obtained, issued and enforced, and establish sentencing guidelines. The probation department should establish written policy on intake and supervision of domestic violence cases, presentence investigation guidelines, formulation of treatment plans, referral mechanisms, and monitoring requirements. The model should also include the types of services to victims and offenders that are available or planned, including shelter facilities, and how networking and cooperation will be achieved. The chief executive of the jurisdiction must provide a written commitment on behalf of the city or county.

Grant Period, Award Amounts, and Eligibility Criteria

Projects will initially be funded for eighteen months in two phases: a three month organization and planning phase and a fifteen month implementation phase. There is a potential for an additional six to twelve months funding in FY 1987 if funds are available. Four to five awards will be made in the range of $125,000 to $150,000 for the initial 18 months. Jurisdictions with a minimum population of 100,000 will be eligible.

Concept papers should provide detailed descriptions of how applicant intends to meet the following criteria:

- Applicant policy or proposed policy with respect to use of arrest as preferred intervention in domestic violence cases.
- Use of special prosecution unit and established policy for handling domestic violence cases.
- The availability or planned availability of a wide range of dispositional alternatives for use by judges in sentencing.
- Special advocacy for spouse abuse victims that includes coordination with other assistance units in the community especially shelters and victim compensation programs and provision for involvement in and notice of all steps in the processing of the case.
- Existence of strong leadership from appropriate political, community service and criminal justice segments, including written commitments where possible.
- Extent of the potential project scope in terms of total population served, existing domestic violence reporting levels, and projected case loads.

References

Many of the issues and programmatic components described above are discussed in forthcoming National Insitute of Justice publications describing the criminal justice system's response to spouse abuse in Seattle, Duluth, and San Francisco. In addition, the National Institute of Justice is expected to release soon a publication in its "Issues and Practice" Series entitled, "Improving the Community Response to Spouse Abuse." The final report of the Attorney General's Task Force on Family Violence is available and highly recommended.

These documents will be part of an application kit available from the Bureau of Justice Assistance.

Due Dates

Concept papers are due by August 30, 1985. Final applications for selected jurisdictions are due by October 15, 1985.

The BJA contact for additional information on this program is: James Swain, Courts and Victims Assistance Program Team, (202) 724–5974.

SUBPART II—TECHNICAL ASSISTANCE/TRAINING PRIORITIES

Purpose

Through the provisions of the Justice Assistance Act of 1984, Congress has clearly intended to fund programs that will have a profound and immediate effect on violent crime. To insure that the block grant programs mandated by Congress have every means of successful implementation, technical assistance and training support will be provided. This assistance will be extended to those projects funded under the state Block Grants, as well as those which fit within the Congressional mandate but for which no block funds can be allocated. Fortunately, many jurisdictions have their own resources to dedicate to sound programs if the experience of other communities can be brought to bear through technical assistance and training. We thus view the following programs of assistance as a key element in carrying out the Congressional purposes.

Technical assistance and training will be provided at the lowest cost possible, emphasizing the use of short-term practitioner-consultants from states, and the regional grouping of assistance whenever possible. Technical assistance and training support will involve: (1) The use of staff specialists from the Office of Justice Programs; (2) individual purchase orders for expert services; (3) expansion of current grants and contracts when cost effective to do so; and (4) cooperative agreements to engage nonprofit agencies experienced in technology transfer concepts.

This guideline solicits applications and concept papers from organizations interested in supplying the technical assistance and training in the areas noted. Application deadlines and dollar amounts are noted in the individual criminal justice segments. Estimated total funding for technical assistance and training programs will range from $6.1 million to $7.5 million. An important selection criterion will be the relative distribution of funds between delivery of technical assistance and training services on the one hand, and applicant's administrative costs on the other (i.e., fringes, indirect cost rates, etc.). Applicants with the largest proportion of their funding dedicated to the actual delivery of technical assistance will be chosen if other factors among the competitors are considered equal.

Formats for technical assistance and training activities are presented in *Appendix A*

Cooperative Agreements and grants will be at 100 percent of project costs.

Eligibility: Public agencies and private non-profit organizations are eligible to apply.

Program Area A: Community Crime Prevention Programs

Assistance is to be provided in support of programs and projects within the following legislative purpose:

—Community and neighborhood programs that enable citizens and police to undertake initiatives to prevent and control neighborhood crime.

An approved program is the Community Crime Prevention Program, for which a BJA Program Brief is available. Technical assistance and training will be provided to Block Grant projects and a limited range of non-block grant projects through expansion of the current grant to the National Crime Prevention Council. Council staff will evaluate requests for assistance and recommend the most cost effective method of technical assistance delivery. Resources to be developed will include:

a. A resource library featuring written and media materials from existing and past crime prevention programs, to include implementation guides, brochures, pamphlets and other reproducible documents;

b. Two video tapes describing how to implement crime prevention programs, which will be available to state and local governments;

c. Documentation of four state-of-the-art crime prevention program models,

for distribution to all block grant recipients;

B–1: State and local units of government may indicate an interest in

applicants in developing automated information systems, and their

BJA staff in screening and use of

Funding: Maximum funding for

Program. Local jurisdictions will fund

for distribution to all block grant recipients;

d. A computerized listing of crime prevention projects, to be used to match existing projects with similar new efforts, and to select technical assistance sites in geographic proximity;

e. Updating and translation into Spanish of the thirteen basic crime prevention booklets (under sub-contract to Encyclopedia Britanica);

On-site technical assistance will be provided by a core group of experienced practitioners who will be trained and used as a team to assist state and local governments. All on-site assistance will be approved by the BJA monitor and implemented under established procedures by the director of the National Crime Prevention Council staff.

Two regional project "cluster" conferences will be conducted to distribute the above and other pertinent information, and to exchange experiences on implementing crime prevention projects. A cluster conference will be held for eastern states and another for western states during 1985.

Evaluation: The Council will sub-contract with an independent third party to conduct evaluations of the technical assistance and training efforts, and to recommend modifications or elimination of those elements that are not cost effective.

Funding: This effort will expand on the current capabilities of the National Crime Prevention Council, which is already heavily involved in a number of the described components. The current Council grant will be supplemented in the amount of $550,000 on October 1, 1985.

The BJA contact for additional information on this program area is: Ron Steger, Community Crime Prevention Program Team, (202) 724–5974.

Program Area B: Corrections Related Programs

Assistance is to be provided in support of programs within the following legislative purposes:

—Programs which alleviate prison overcrowding, and which identify existing state and Federal facilities suitable for prison use; and, the Federal Surplus Property Transfer Program;
—Prison industry projects designed to place inmates in a realistic working and training environment, enabling them to acquire marketable skills and make financial contributions to victims, their families, and the correctional institutions; and the Private Sector/Prison Industry Enhancement Certification Program.

B–1: State and local units of government may indicate an interest in obtaining Federal Surplus Real Property suitable for use in support of the care and rehabilitation of offenders and which may alleviate prison overcrowding. To assist state and local governments to achieve this purpose, Bureau staff will assist state and local correctional agencies:

—By disseminating information on the availability of Federal Surplus Real Property;
—By assisting in preparation of state and local correctional agency applications for transfer of federal surplus real property;
—By gathering, analyzing and reporting information data describing the effectiveness of alleviating prison crowding; and,
—By maintaining liaison with the General Service Administration, which controls Federal properties.

B–2: To assist state and local units of government to establish prison industry projects, the Bureau will accept applications for the following technical assistance services.

B–2a: Automated Information System for Prison Industries:

The Bureau will award a 12-month grant, up to $375,000, for the development/design and implementation of an Automated Information System (AIS) for the Private Sector/Prison Industry Enhancement (PS/PIE) Program which will accumulate, review, categorize, and distribute actual working materials from correctional administrators across the country. Information to be included in the AIS will be in the following areas: (1) *Correction administration*—which will include rules, procedures, administrative guidelines, personnel policies, job descriptions, information processing procedures, forms, evaluation and review criteria related to the administration of prison industries; and (2) *program description*—which will include project descriptions and other special needs for program purposes (i.e., collecting application information which involves formatting data into computer readable information; collecting performance information which involves developing questionnaire and schedule formats; developing coding formats for on-going automated data base update as new entries are received; developing automated capability to analyze the prison industry impact on the states' correctional environment, on related private industry, and on Federal agencies procurement.

Applications are due by September 30, 1985, covering the experience of applicants in developing automated information systems, and their background in working with corrections and prison industry data. Applications kits detailing specific tasks and application deadlines will be available no later than September 1, 1985.

B–2b: One cooperative agreement will be funded for technical assistance and training to support prison industry projects. The Cooperative Agreement shall provide the use of expert personnel from previously certified projects who have demonstrated skill in achieving administrative, correctional and business objectives. These experienced prison industry officials will help upgrade other project management systems, assist in resolving operational problems, and enhance communication and sharing among project participants. Depending on interest expressed by State and local governments, up to 20 on-site technical assistance visits are anticipated.

The Cooperative Agreement shall also support a series of specialized training sessions (up to six) for state and local corrections agency personnel responsible for the planning, development, operation and administration of prison industry projects. State and local project staff will pay their own per diem costs during training.

Funding: Maximum funding for this cooperative agreement will be in the range of $150,000–$175,000 for a period of 15 months.

Application Timetable: The application deadline for this cooperative agreement will be August 30, 1985. An agency review board will make award recommendations based on the quality of task performance plans, the expertise of applicant staff, and the proposed use of funds to achieve a maximum delivery of assistance. The BJA Director will announce selections in mid-September, 1985. The terms of the Cooperative Agreements will be negotiated with the winning applicants to insure a mutual understanding of responsibilities. Awards are projected for October 30, 1985.

The BJA contact for additional information on this program area is: Tom Tubbs, Correctional Services Program Team, (202) 724–5974.

The following three program areas will use a uniform format: Adjudication, Law Enforcement, and Victims. These program areas will use cooperative agreements, rather than grants or contracts. A cooperative agreement insures a distribution of responsibilities between BJA staff and the recipient agency, with substantial involvement of BJA staff in screening and use of resources. (See *Appendix A* for technical assistance and training formats.)

Program Area C: Adjudication Related Programs

Assistance is to be provided in support of programs and projects within the following legislative purposes:

—Identifying criminal cases involving persons with a history of serious criminal conduct; expediting case processing and improving court system management and sentencing practices and procedures; also implementing programs which provide assistance to jurors. Examples of approved programs include: Career Criminal Program, and Court Delay Reduction Program;
—Providing programs which alleviate jail overcrowding, and provide alternatives to pretrial detention for persons who pose no danger to the community. An example of an approved program is: Jail Overcrowding/Alternatives to Pretrial Detention.

BJA Program Briefs are available for each of the approved programs.

One cooperative agreement will be funded for technical assistance to the above programs, and one cooperative agreement will be funded for training in program techniques.

C–1: Adjudication Technical Assistance:

The major purpose of this Cooperative Agreement shall be to provide expert, consultative services to state agencies, courts, prosecutors, and related local government officials through on-site studies. It is estimated that up to 150 such studies will be undertaken. Assistance shall focus primarily upon statewide court delay reduction, expansion of career criminal prosecution projects, and relieving severe jail crowding.

Funding: Maximum funding for technical assistance for Area C–1 will be in the range of $700,000/$750,000 for a period of eighteen months. A minimum of fifty percent (50%) of the budget must be reserved for practitioner fees, travel and per diem.

C–2 Adjudication Training:

An estimated twelve—thirteen regional or state workshops will be required to assist beginning Block Grant projects in Court Delay Reduction, Jail Overcrowding, and Career Criminal programs. Each of the programs will require between three and six workshops over a period of fifteen months. State and local project staffs will pay their own travel and per diem costs.

Funding: Maximum funding for training will be in the range of $350,000 to $400,000 for a period of fifteen months.

Application Timetable: The application deadline for Adjudication programs will be August 30, 1985. An agency review board will make award recommendations based on the quality of task performance plans, the expertise of applicant staff, and the proposed use of funds to achieve a maximum delivery of assistance. The BJA Director will annouce selections early in September, 1985. The terms of the cooperative agreements will be negotiated with the winning applicants to insure a mutual understanding of responsibilities. Awards are projected for October 30, 1985.

The BJA contact for additional information on this program is: Nicholas Demos, Courts and Victims Assistance Program Team, (202) 724–5974.

Program Area D: Law Enforcement Related Programs

Assistance is to be provided in support of programs and projects within the following legislative purposes:

• Disrupting illicit commerce in stolen goods and property;
• Combatting arson;
• Effectively investigating and bringing to trial white collar crime, organized crime, public corruption crimes, and fraud against the Government;
• Improving the operational effectiveness of law enforcement by integrating and maximizing the effectiveness of police field operations and the use of crime analysis techniques; and
• Other law enforcement initiatives certified by BJA as successfully addressing critical problems of crime.

Examples of approved programs include the Property Crime (STING) Program, the Arson Prevention and Control Program, and the Integrated Criminal Apprehension Program (ICAP). Program Briefs are available for these programs.

A single cooperative agreement will be funded for combined technical assistance and training for all law enforcement related programs. It is projected that three Implementation Guides and Manuals will be required within a six month period; that up to 250 telephonic inquiries will be handled; that 100 on-site technical assistance visits will be required; and that six regional and state training sessions will be held for programs dealing with Integrated Criminal Apprehension Program, the Property Crime Program, and the Arson Prevention and Control Program. Local jurisdictions will fund their own travel and per diem costs.

Funding: Up to $1,000,000 is available for delivery of technical assistance and training to law enforcement programs over a period of 18 months.

Application Timetable: The application deadline for law enforcement technical assistance and training will be August 30, 1985. An agency review board will make award recommendations based on the quality of task performance plans, the expertise of applicant staff, and the proposed use of funds to achieve a maximum delivery of assistance. The BJA Director will announce selections early in September, 1985. The terms of the cooperative agreement will be negotiated with the selected applicant to insure a mutual understanding of responsibilities. Award is projected for October 30, 1985. Formats for technical assistance and training activities are presented in Attachment A.

The BJA contact for additional information on this program area is: Jules Tesler, Law Enforcement Services Program Team, (202) 724–5974.

Program Area E: Victim Assistance

Assistance is to be provided in support of programs and projects within the following legislative purpose:

—Development and implementing programs which provide assistance to victims of crimes;

The Victim Assistance Program is an approved program and a Program Brief is available. Technical assistance and training will be provided to block grant victims projects and a limited number of national-scope victims technical assistance activities will be conducted through a cooperative agreement.

The Recipients of this technical assistance and training will include:

—State legislative and executive branch officials engaged in law reform on victims issues;
—National, State, and local organizations addressing problems of violence within the family such as abuse of children, spouse and elderly members;
—Law enforcement officers, prosecutors, judges seeking changes in procedures that presently work against the interests and concerns of victims;
—Non-criminal justice agencies such as community based victim service organizations which are pursuing efforts to ameliorate the sufferings of crime victims:

It is estimated that approximately 100 on-site technical assistance visits will

be made in serving the above clients. Approximately eight training sessions

—Programs which address the problem of serious offenses committed by

transfers; and regional or national training sessions. The Prosecutors

Application Timetable: Applications should be submitted by August 30, 1985

interagency agreement], and law enforcement and other criminal justice

Task 2—Selection of Consultants—

be made in serving the above clients. Approximately eight training sessions clustered on a regional basis will be completed.

Funding: Maximum funding for this training and technical assistance program is $600,000 for a period of 18 months.

Application Timetable: The application deadline for this program area will be August 30, 1985.

An agency review board will make award recommendations based on the quality of task performance plans, the expertise of applicant staff, and the proposed use of funds to achieve a maximum delivery of training and technical assistance.

Selection will be announced by September 15, 1985.

The grant will be processed for award by October 30, 1985 so that technical assistance delivery can begin on November 1, 1985. Interested applicants should be familiar with the recommendations of the President's Task Force on Victims of Crime, and the Attorney General's Task Force on Family Violence. These reports may be obtained from the National Victim Resource Center at 202/724–6234, or by writing the National Victims Resource Center, Office for Victims of Crime, 633 Indiana Avenue, NW., Washington, D.C. 20531.

In addition, a $400,000 grant to the National Sheriffs' Association (NSA) will provide technical assistance to State sheriffs' associations which assist local law enforcement officials in meeting victims' needs. A $254,000 grant to the National District Attorneys Association (NDAA) will provide technical assistance to prosecutors to establish or enhance their services to victims. A $231,000 grant to the National College of District Attorney's will fund five regional workshops for prosecutorial executives and state training directors on key concepts and proven techniques to meet victims needs.

The BJA contact for additional information on this program area is: James Swain, Courts and Victims Assistance Program Team, (202) 724–5974.

Program Area F: Other Statutory Purposes

Assistance is to be provided in support of programs and projects within the following legislative purposes:

—Programs which identify and meet the needs of drug-dependent offenders;
—Operational information systems and workload management systems which improve the effectiveness of criminal justice agencies;
—Programs which address the problem of serious offenses committed by juveniles; and
—Programs addressing problems of crime committed against the elderly, and which assist State and local law enforcement in rural areas.

The certified programs in this area are: (1) Treatment Alternatives to Street Crime (TASC), which deals with screening and treatment for drug dependency; (2) Prosecution Management Support System, which deals with automated management information; and (3) the Juvenile Restitution Program, which deals with restitution as a basis for offender accountability and victim compensation. BJA Program Briefs are available for these three programs.

A series of cooperative agreements and purchase orders will be utilized to provide technical assistance and training.

F–1: Treatment Alternatives to Street Crime (TASC)—Two purchase orders in the range of $20,000–$25,000 will be awarded. One purchase order will be to the national organization of TASC directors to develop a resource catalogue which identifies experts in each TASC element. A second purchase order will be issued to a non-profit agency to develop a national data base for TASC activities, clients outcomes, statistics and performance standards. These purchase orders are expected to be awarded by September 15, 1985.

A cooperative agreement in the range of $240,000–$250,000 will be issued on a negotiated bid basis to an organization that will provide on-site technical assistance, develop an implementation manual including performance standards for critical elements, design a model training curriculum, and assess the utility of internships as a method for TASC training. General statements of intent and summaries of experience with drug-related projects should be submitted by interested agencies by August 30, 1985. A cooperative agreement award is projected by October 15, 1985.

F–2: Criminal Justice Information Systems—BJA will expand the existing SEARCH, Inc. grant to support additional transfers of criminal justice information systems. The grant extensions will be negotiated to involve other appropriate organizations and individuals to accomplish a number of purposes, including: design of additional information systems Program Briefs; design of systems manuals; priority access to software index searches; onsite assistance for systems requirements analysis and software transfers; and regional or national training sessions. The Prosecutors Management Support System will receive priority in onsite technical assistance. Approximately $300,000 will be obligated for these purposes by October 30, 1985.

F–3: Restitution for Juvenile Offenders—BJA will expand the existing technical assistance and training program of the Office of Juvenile Justice and Delinquency Prevention to support Block Grant projects. The emphasis will be on access to program documentation, technical assistance experts, host sites, and regional training activities. The grantee will also refine critical elements for successful juvenile restitution projects, and recommend performance standards. For this purpose, $150,000 will be awarded. A negotiated amendment to the current grant is projected by October 1, 1985.

F–4: Crimes Against the Elderly and Rural Law Enforcement—A cooperative agreement in the range of $200,000 is earmarked for these program areas to provide on-site technical assistance, design and training curriculum, and conduct training sessions. General statements of intent and summaries of experience with the subject area should be submitted by interested agencies by August 16, 1985. A cooperative agreement award is projected by September 30, 1985.

The BJA contact for additional information on this program area is: John Gregrich, Drug Control and Special Program Team (202) 272–6838.

Program Area G: Technical Assistance for Demonstration Programs

Three program concepts will be funded as Demonstration Programs at twelve to fourteen local sites around the country. Each site will be required to implement the new concept, test its transferability, and participate in an evaluation.

Technical assistance will be provided to each site to insure a sound start and to make necessary revisions throughout the 18 month life of the test.

The technical assistance provider will need to secure expert advice in the three program areas:

(1) Effective Prosecution of Child Physical and Sexual Abuse Cases;
(2) Law Enforcement Crime Prevention; and
(3) Intervention Strategies in Family Violence Cases.

The critical project elements for introduction of each concept and reference materials to be used by each site can be obtained by writing the Bureau of Justice Assistance.

Application Timetable: Applications should be submitted by August 30, 1985. Selections will be made on or before September 30th and awards made on or before October 30, 1985.

Funding: A technical assistance cooperative agreement will be awarded in the range of $350,000 to $400,000.

The BJA contact for additional information on this project is: Nicholas Demos, (202) 724–5974.

SUBPART III—NATIONAL/MULTI-STATE PROGRAMS

National/Multi-State programs address national priorities and initiatives that cannot be met through the state Block Grants. They reflect administration priorities or gaps in criminal justice funding that cannot be met from other sources. Many of these projects continue on-going commitments, while others support new national coalitions and support networks. While funding for national scope projects emphasizes four program areas this fiscal year, similar initiatives will be announced from time to time during the next fiscal year. The four program areas of emphasis this fiscal year are:

(a) National Victims of Crime Program
(b) National Crime Prevention Campaign
(c) Law Enforcement Accreditation, and
(d) Support of Prison Industries Enhancement Program.

The estimated range of total funding for National/Multi-state programs will be approximately 4.8 to 6.7 million dollars through the first quarter of next fiscal year.

A. National Victims of Crime Program

Several projects have been funded or will be funded to enhance the capabilities of state and local criminal justice agencies and community-based service organizations to assist crime victims. It is estimated that $3.4 million will be allocated for projects in this program area. Specific projects include: National Organization for Victim Assistance (NOVA), $761,000; American Bar Association (ABA) (supplement) $28,000; and The National Association of Attorneys General, (NAAG) (supplement) $42,000; the Illinois' Attorney General's Office $55,000. Up to $2,500,000 of the above total is earmarked for awards to be made during the next six months for various national scope victim improvement efforts. These additional projects would include activities of the National Victims Resource Center, a child sexual abuse prosecution center, medical/mental health victim protocols (Federal interagency agreement), and law enforcement and other criminal justice system efforts to improve the service for treatment of crime victims.

B. National Crime Prevention Campaigns

OJP will continue to fund the highly successful Citizens Crime Prevention Campaign ("Take a Bite out of Crime"), as well as Crime Stoppers. $621,000 is being awarded to the National Crime Prevention Council, and $83,000 is being awarded to the Crime Stoppers campaign.

The National Crime Prevention Council operates on a number of fronts, providing public education through national mass media, operating a computerized information center on crime prevention activities and resources, and producing and distributing crime prevention materials for state and local agencies. The Council works in cooperation with the Advertising Council, Inc., and the Crime Prevention Coalition.

C. Law Enforcement Accreditation

One grant of $499,000 has been awarded to continue the work of the Commission on Accreditation for Law Enforcement Agencies, which provides an assessment process and certification for law enforcement agencies which meet the standards developed by the professional law enforcement community.

D. Support of Prison Industries Enhancement Program

One grant of $211,000 is being provided to Criminal Justice Associates, Inc. to assist applicant state departments of correction to develop joint ventures with private enterprise under the terms of Sec. 319 of the Justice Assistance Act, as well as to work with previously certified projects. Upon expiration of this grant on December 30, 1985, a new cooperative agreement will be awarded on a competitive basis (See Sec. B–2b of the Corrections component, TA and Training).

The BJA contact for additional information on national scope programs is: Eugene H. Dzikiewicz, Acting Deputy Director (202) 272–6838.

Appendix A—Technical Assistance Format and Training Format

Technical Assistance Format

Task 1—Staff Organization and Orientation—Establish an operating staff of three—five persons (no more than five full-time equivalent). The operating staff will serve primarily as technical assistance brokers for individual consultants.

Task 2—Selection of Consultants—Select consultants, in consultation with the BJA Grant Monitor, from operational criminal justice agencies which have successfully implemented projects in the approved program areas.

Task 3—Handling Requests for Technical Assistance—Receive requests for technical assistance from the BJA Monitor and proceed in the following sequence:

a. Analyze the technical assistance requests to insure a clear definition of the problem and issues involved;
b. Review the proposed scope of technical assistance and the proposed consultant with the requesting agency;
c. Arrange for consultant travel to site and coordination with local agencies;
d. Review and approve consultant reports, insuring that they meet standards of quality and format;
e. Evaluate technical assistance quality and impact through questionnaires submitted to recipients; and
f. On a case by case basis, arrange for revisits by consultants or TA staff to follow-up on initial recommendations and actions required to implement the project.

Task 4—Performance of Special Tasks at BJA Direction—Perform tasks to include draft publications and analysis of BJA program activities as requested by the BJA Monitor. Such requests will not surpass ten percent of available technical assistance funding.

Periodic status reports will be required on pending and completed technical assistance assignments, usually on a monthly basis.

Training Format

Activities to be accomplished include: The development and validation of curriculum, trainer guides and trainee guides, selection of training sites, selection of trainers, and oversight of training sessions.

Task 1—Development and Validation of Training Curriculum—A training curriculum will be developed, validated and adjusted as determined by post-training evaluations.

Task 2—Development of Trainer and Trainee Guides—Guides shall include sufficient background materials and step-by-step project activities to serve as a reference tool during the implementation of local projects.

Task 3—Selection of Training Sites—Appropriate regional or state training sites will be selected to meet program needs. Model sites within a region will be utilized whenever it is cost effective.

Task 4—Trainers will be selected from experience operating staffs within

the region to the maximum extent

VOL 50 ISS 144 JL 26 1985 UMI

the region to the maximum extent possible. The grantee will be responsible for screening and orienting trainers, and for evaluating their performance.

Task 5—Oversight of the Delivery of Training—Grantee will be responsible for implementing the training, for evaluating impact, and for periodic reports to BJA.

Richard B. Abell,

Deputy Assistant Attorney General.

Student Assistance General Provisions

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the Student Assistance General Provisions Regulations to implement in the 1986–87 award year an integrated system for the verification of information reported by students, their spouses, and their parents when the students apply to have their expected family contribution calculated for the Pell Grant Program, campus-based programs [National Direct Student Loan [NDSL], College Work-Study [CWS], Supplemental Educational Opportunity Grant [SEOG]), and Guaranteed Student Loan (GSL) Program. The Secretary is proposing these regulations, in part, to respond to the severe and persistent problem, identified in recent quality control studies, of high error rates in data reported by applicants in the Pell Grant Program. The same data are used in the other programs covered by these proposed regulations. The Secretary, therefore, intends that the integrated verification system assure, to the maximum extent possible, that eligible applicants receive the correct amount of student financial assistance.

DATE: Comments must be received on or before September 24, 1985.

ADDRESS: All comments concerning these proposed regulations should be addressed to Mr. Fred Sellers, Office of Student Financial Assistance, U.S. Department of Education, Room 4318, Regional Office Building 3, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: Fred Sellers (202) 472–4300.

SUPPLEMENTARY INFORMATION:

Background

Under the Pell Grant, GSL, and campus-based programs, an applicant receives financial assistance, including interest benefits under the GSL Program, if the applicant has financial need for such assistance. In general, financial need is defined as the difference between the applicant's cost of attendance and expected family contribution (EFC). An expected family contribution is an amount that the applicant and his or her family should reasonably be expected to contribute toward his or her cost of attendance.

In order for an applicant to have his or her expected family contribution calculated, the applicant must apply to the Secretary, to an institution, or to an approved need analysis system. The Secretary, institution, or system calculates an applicant's expected family contribution based upon the information provided in the application.

While verification (validation) of student aid application information for selected applicants has been required in the Pell Grant Program since February 1979, there has been no Departmental requirement for verification of application information under the other need-based student assistance programs. In addition, even though the Student Assistance General Provisions, 34 CFR 668.16, require institutions to use information obtained during the Pell Grant verification when determining campus-based awards, the suggested GSL loan amount, and eligibility for GSL interest benefits, the Department has not required verification for applicants of campus-based or GSL aid who are not eligible for a Pell Grant. The Secretary proposes to require verification for all such applicants and requests comments on whether the verification requirement should apply to applicants for campus-based aid.

The General Accounting Office [GAO], in Report No. 79–16, dated May 1979, entitled "Inconsistencies in Awarding Financial Aid to Students Under Four Federal Programs," reported that no Departmental verification requirement existed for those applicants receiving only campus-based aid. This report recommended requiring verification of applicant- and parent-supplied data for these programs.

Since that time, the Secretary has received three quality control reports from the Office of Student Financial Assistance in 1979, 1981, and 1983 that document in the Pell Grant Program large numbers of applicants and their parents misreporting information regarding their family and financial status. This misreporting, whether intentional or not, significantly and adversely affects the amount of aid available to truly needy students and unjustifiably raises the cost of the program to Federal taxpayers. Based on a 1983 quality control study, an estimated 39 percent of the Pell Grant recipients received an inaccurate award for the 1982–83 award year because of applicant error on the application form.

The majority of applicants applying for campus-based aid or a Guaranteed Student Loan use the same forms as the forms used to apply for a Pell Grant. Therefore, by definition, the same misreporting of applicant information occurs in the campus-based and Guaranteed Student Loan programs. Consequently, this proposed rule, by extending verification to the campus-based awardees and GSL applicants, helps to assure that applicants receive the correct amount of aid under the campus-based programs and that GSLs are made only to eligible applicants.

Initially, the Secretary consulted with the postsecondary education financial aid community regarding the development of a verification system for the campus-based, GSL, and State Student Incentive Grants (SSIG) programs. The Secretary also sought involvement by requesting comments on a proposed system of verification for these programs. The Secretary has incorporated in these proposed regulations many of the comments received.

On March 15, 1985, the Secretary published final regulations for the Pell Grant Program which specified in 34 CFR 690.77 the information and documentation requirements for that program for applicants selected for verification. These proposed regulations require that selected applicants verify the same items and use similar documentation as provided for in 34 CFR 690.77. When the Secretary publishes final regulations for the integrated verification system, he will amend the Pell Grant Program regulations by deleting § 690.77.

In addition, the Secretary has reviewed other models and techniques for verification of applicant information. One model reviewed by the Secretary is the set of principles adopted by the National Association of Student Financial Aid Administrators (NASFAA) and the NASFAA monograph, "Standards for the Verification of Information to Determine Financial Aid Eligibility." The Secretary believes that these proposed regulations are in accord with most of the NASFAA principles and with many features of the NASFAA monograph. The Secretary also reviewed the verification techniques used in Federal programs of income support for applicability to the student assistance programs.

Exclusions From Verification

The Secretary is not including the PLUS and SSIG Programs under these proposed regulations. The PLUS Program does not currently require the use of need analysis to determine applicant eligibility, and, therefore, the provisions of these proposed regulations

are not applicable. Although the SSIG Program is a need-based program, institutions in many States do not know whether an applicant's State grant includes SSIG funds. In those cases where the institution knows or can be reasonably expected to know that an applicant's State grant includes SSIG funds, the provisions of § 668.16(f) of the Student Assistance General Provisions regulations are applicable, and for any such applicant selected for verification under these proposed regulations, the institution must consider the verified data to determine the applicant's SSIG.

The principal source for verification of applicant's information under these proposed regulations is the United States Individual Income Tax Return or a comparable State income tax return. Since foreign institutions participating in the GSL Program do not have the requisite knowledge of U.S. tax laws, it is unreasonable to expect those institutions to comply with the requirements in these proposed regulations. Therefore, the Secretary proposes to exclude participating institutions located outside the United States and its territories from the requirements in these proposed regulations.

Institutional Error

Although these proposed regulations are concerned with reducing the error rate in student aid application information, the Secretary is also concerned about institutional error in the administration of the Federal student assistance programs. A 1983 quality control study showed that institutions made errors in awards for a substantial number of recipients in the Pell Grant Program.

The Secretary believes that institutions should include a quality control system in their administration of the student assistance programs to reduce both institutional and student error rates. A quality control system monitors the accuracy of an institution's own administration of its student aid programs. The essential element of any quality control system is its capability to detect, prevent, and correct errors and tendencies toward errors that occur in an operational setting. In a pilot project during the 1985 calendar year, the Secretary with the participation of several institutions is testing different quality control systems and subsequently expects to propose regulations under which institutions will be required to implement a quality control system.

Policies and Procedures (§ 668.53)

The Secretary proposes that an institution shall have written policies and procedures for verifying applicant information and that these policies and procedures provide for the proper administration of the verification system used by the institution.

The Secretary is proposing to require that an institution include procedures for reporting to State or local law enforcement agencies for investigation any instance in which it has reason to believe that an applicant has applied for student assistance under false pretenses. This proposed requirement is in furtherance of the Secretary's concern for preventing fraud and abuse in the student assistance programs and is in accordance with § 668.14(g) of the notice of proposed rulemaking to amend the Student Assistance General Provisions regulations published in the Federal Register on December 12, 1984.

Selection of Applicants for Verification (§ 668.54)

The Secretary proposes that an institution verify all applications that edits select for verification. These edits are a set of preestablished factors that are used to identify student aid applications for verification based upon indications that the information contained in the application may be erroneous. The edits also select a random sample of applications for verification. The random sample provides an appropriate level of quality assurance and assures an adequate sample for evaluation.

Similar to the current Pell Grant regulations requirement in 34 CFR 690.77(c), applicants under these proposed regulations must verify all of the applicable items specified in § 668.56 if the edits select their applications for verification. In addition, the Secretary propose to continue the current requirement in 34 CFR 690.77(b) of the Pell Grant Program regulations, and extend it to the campus-based and GSL programs, that an institution must require an applicant to verify any application information that the institution believes incorrect.

The edit selection process in these proposed regulations is comparable to the current Pell validation system. With the inclusion of the campus-based and GSL programs, however, the Secretary is proposing to enter into agreements with agencies or organizations with approved need analysis systems for the campus-based programs to provide them with the edits for selecting applicants to verfiy their application information.

In cooperation with representatives of the financial aid community, the Secretary developed common edits for 1985–86 that are optional for the campus-based and GSL programs for 1985–86 and will cooperatively develop the mandatory edits for use in 1986–87. Each year the Secretary will evaluate and change the edits as necessary. The Secretary will provide these edits to the Pell Grant Program Central Processor and to any State agency, Multiple Data Entry servicer, or other organization that has a need analysis system approved by the Secretary for the award year if that agency, servicer, or organization agrees to use the edits as specified.

While the Pell Grant processing system and organizations that enter into agreements with the Secretary may use the common edits, the Pell Grant processing system may include additional edits that select applicants for verification. Thus, the Pell processing system may supplement the total number of applicants selected for verification.

Some applicants do not apply for a Pell Grant, and their applications for campus-based or GSL assistance may not be submitted to an agency or organization using the edits. The Secretary is proposing that an institution shall require all of these applicants to verify their application information. For an applicant applying *only* for a GSL, an insitution must require the applicant to verify the applicable information in accordance with § 668.57(b) if (1) the institution determines the applicant's need by using the GSL Needs Test Tables and the applicant does not apply on the student aid application form of an approved need analysis system to have his or her EFC calculated, or (2) the applicant reports an adjusted gross family income of $30,000 or less.

The Secretary proposes to exclude categories of applicants from verification. The Secretary bases his decision to exclude these applicants upon the difficulties the individuals would face in attempting to provide the documents necessary for verification. The Secretary also excludes from verification those individuals who apply for, but do not receive, assistance under the programs covered by this subpart.

Updating Information (§ 668.55)

If the applicant's household size or the number of family members in the applicant's household enrolled in postsecondary educational institutions changes between the time the applicant applied for assistance and the date that the institution verifies the information, the applicant must update this

information to reflect the change. For Pell Grant applicants not selected for

in reporting accurate information on the application, the Secretary will propose

that institutions must verify veterans educational benefits. Under § 668.16(f)

VOL 50 ISS 144 JL 26 1985 UMI

information to reflect the change. For Pell Grant applicants not selected for verification, the Secretary is proposing to include in these regulations the current requirement of the Pell Grant Program contained in 34 CFR 690.14(b). Under this provision, these applicants update their household size and number of family members in postsecondary institutions as of the date the first submit their Student Aid Report (SAR) to the institution or the Secretary. Morever, the Secretary is adding a requirement that these applicants sign the statement on the SAR certifying that this information on the SAR is still accurate. In the case of applicants for campus-based aid or a GSL who are not selected for verification, the Secretary proposes to continue each program's current policy of permitting institutions to require applicants to update this information or any other application information throughout the award year.

Except for the following two exceptions, if a student's dependency status changes at any time after the student has applied for assistance, he or she must revise that status. By definition, a student's dependency status changes whenever a change in the projected dependency criteria for the first calendar year of the award year affects the student's dependency status. One exception is that if the institution has already certified a GSL for the applicant, the applicant is not required to update the dependency status on his or her GSL application. The other exception is that if a student's marital status changes after he or she has applied for assistance, the change in marital status will not be updated and, therefore, will not affect a student's dependency status.

Items To Be Verified (§ 668.56)

The Secretary's purpose in publishing these proposed regulations is to ensure that eligible students receive the correct amount of assistance. Therefore, the Secretary's objective is for all students to submit accurate data on their applications for assistance. However, for these proposed regulations, the Secretary is focusing on certain specific requirements as part of the development of a more comprehensive plan to reduce institutional and student error in the student assistance programs.

The Secretary proposes a specific set of items that institutions must verify similar to the set of items published in § 668.77 of the Pell Grant Program regulations. If the Secretary must change any of these items because of the addition or deletion if items in the tax forms, or because of an increase or decrease in the severity of the problems in reporting accurate information on the application, the Secretary will propose amendments to these regulations revising the list of items that institutions must require applicants to verify in subsequent award years.

The Secretary proposes that an applicant shall verify, if applicable, the following items:

- Adjusted gross income (AGI) and U.S. income tax paid as reported on the U.S. Individual Income Tax Return.
- Household size.
- Number in the household enrolled in postsecondary educational institutions.
- Independent student status.
- Untaxed income and benefits.

If an applicant is applying for a GSL and the applicant's adjusted gross family income is $30,000 or less, the applicant must verify that income and if an independent student, independent student status. If the applicant's income exceeds $30,000 and the institution uses the GSL Needs Test Tables, the applicant must verify the adjusted gross family income, the household size, the number in the household in postsecondary educational institutions, and if an independent student, independent student status. If the institution uses an approved system of need analysis to determine an applicant's EFC, the applicant must verify all the items listed above that were used to calculate the applicant's EFC.

Because of the differing methods and information used to determine each applicant's EFC, each applicant may not be verifying the same items.

Acceptable Documentation (§ 668.57)

The documentation that applicants must provide for the items to be verified under these proposed regulations is similar to the documentation required for those items in the Pell Grant Program regulations. The Secretary seeks comments concerning whether the proposed documentation is adequate and whether other sources of data of comparable or better quality are available that do not place undue burdens on institutions.

The Secretary proposes the U.S. income tax return or comparable State income tax return as the principal source of data for verifying most information on the application form. The Secretary also proposes the use of the IRS transcript of tax account information, that a taxpayer may request and receive from the Internal Revenue Service, as an alternative to a tax return.

Not all State income tax returns are comparable to the U.S. income tax return. The Secretary has determined that a comparable State income tax return is one that includes the amount of adjusted gross income and U.S. income tax paid as reported on the U.S. Individual Income Tax Return. However, the responsibility for assuring that the State income tax return is comparable to the U.S. Individual Income Tax Return rests with the institution.

For documenting independent student status, the Secretary proposes that institutions shall require that, except as described below, an *unmarried applicant* verify independent student status by relying on the Federal or comparable State income tax return of the applicant's parents for the calendar year preceding the first calendar year of the award year (e.g., 1985 for the 1986–87 award year) and a written statement signed by the parents concerning whether the parents will claim the applicant as an exemption on their U.S. income tax return for the first calendar year of the award year (e.g., 1986 for the 1986–87 award year) and concerning for both relevant years the amount of assistance provided to the applicant by the parents and the number of days that the applicant lived with the parents. If the applicant is *married*, the parents need to provide only a written statement regarding the income tax exemption, support, and residency in the first calender year of the award year.

If the institution has conflicting documentation with regard to any of the three factors used to determine independent student status, i.e., tax exemption, the receipt of $750 worth of support, or six weeks residence, only the documentation described above may verify an applicant's independent student status.

If the institution does not have conflicting documentation with regard to an applicant, the following rules apply:

1. For the Pell Grant Program, the institution shall not require any documentation if the applicant will be 23 or older on May 31 of the award year for which aid is requested (e.g., May 31, 1987 for the 1986–87 award year). If a *married applicant* will not be 23 or older on May 31 of the award year for which aid is requested, the institution shall consider that the applicant has verified his or her independent student status if the institution determines that the applicant's parents are unable or unwilling to provide the required statement.

If an *unmarried applicant* will not be 23 or older on May 31 of the award year for which aid is requested, the institution shall consider that the applicant has verified his or her independent student status if the institution determines that—

a. The applicant's parents are unable or unwilling to provide the required tax return and statement, and

b. The applicant had sufficient income to support himself or herself and any dependents in the calendar year preceding the first calender year of the award year.

2. For the campus-based and GSL Programs, the institution has the option of (a) requiring the applicant's parents to provide the requested tax returns and statements unless the institution determines that the parents are unable to do so, or (b) following the rules set forth for the Pell Grant Program.

If an institution needs to determine whether the applicant's parents are unable or unwilling to provide the required tax return statements, the institution shall make a reasonable effort to obtain the tax returns or statements directly from the applicant's parents. The Secretary considers that the parents are "unable" to provide the required documentation if the institution determines that circumstances identical or similar to the following apply: (1) the responsible parents are deceased; (2) it is not possible to contact the responsible parents because the parents are currently absent from the United States and inaccessible and are expected to remain absent and inaccessible beyond a reasonable period of time for completing the verification process; (3) the responsible parents' address cannot be determined; or (4) the responsible parents' physical or mental state prevents them from providing the required documentation. The Secretary considers the parents "unwilling" to provide the required documentation if the parents do not provide the documentation but are not unable to do so.

As in the 1985–86 award year, the Secretary will notify institutions on an unmarried applicant's SAR if he has conflicting documentation concerning the three factors used to determine independent student status. For example, the Secretary will notify the institution concerning whether the applicant was claimed as an exemption by his or her parents in the base year of an award year (i.e., the calender year preceding an award year, 1985 for the 1986–1987 award year). The Secretary determines if he has this information by comparing the application information filed by an applicant for an award year with the application information filed by the applicant for the previous award year.

If verification results in a change from independent student status to dependent student status, the applicant must submit a new student aid application providing parental data in order to recalculate the applicant's EFC. As a selected applicant, the applicant must verify the parental data provided on the new application.

The Secretary recognizes that the proposed documentation requirements for verifying independent student status are complex. However, the Secretary believes that the magnitude of the error in awards made on the basis of incorrect dependency status, as found in the quality control reports in the Pell Grant Program, require substantially enhanced vertification efforts in this area.

The Secretary further proposes that institutions obtain signed statements from applicants and parents, as appropriate, to verify certain items. However, for number in household, the institution need not obtain a signed statement to resolve a discrepancy between the number of exemptions claimed on the tax return and number in household on the student aid application if the institution has other documentation on file which explains the difference. For the number of family members in postsecondary educational institutions, the institution need not obtain a separate written statement if the applicant's student aid application provides the names of the household members who are or will be attending postsecondary institutions as at least half-time students, their ages, and the names of the institutions that they are planning to attend, and this information is still accurate as of the date of verification. The Secretary is proposing that institutions verify untaxed income and benefits by obtaining, in addition to a tax return, a copy of the student aid application worksheet for untaxed income and benefits which is part of an application package or comparable listing of that information and a signed statement certifying that the information on the worksheet or listing is correct. The institution need not obtain a copy of the worksheet or comparable listing if the applicant's student aid application provides a listing of this information and the applicant, and the applicant's parent in the case of a dependent student, certify that this information is still accurate as of the date of verification.

The Secretary is deleting the requirement in the Pell Grant Program that institutions must verify veterans educational benefits. Under § 668.16(f) of the Student Assistance General Provisions, institutions shall develop an adequate system to verify the consistency of the information they receive from different sources. This provision applies to all veterans at an institution who receive benefits.

If the institution determines that it has any reason to doubt the information supplied by the student for the number in postsecondary institutions or an untaxed income or benefit, a signed statement is not sufficient documentation to verify the accuracy of the data. In these cases, the institution must require additional documentation. For number in postsecondary institutions, the applicant must provide a statement from the institution the other family member is attending, indicating the individual is enrolled as at least a half-time student, unless the institution the student is attending certifies that such a statement is unavailable or not obtainable in a reasonable period of time. For untaxed income and benefits, the applicant must submit a statement from the agency supplying the untaxed benefit of the amount of the benefits provided unless the institution determines that such a statement is not available.

While the Secretary has received comments suggesting that processing agencies should verify tax return information through an identifiable tape match with the Internal Revenue Service (IRS), the Secretary has determined that this is not a viable option at this time. The Department is currently exploring this issue with the Treasury Department.

Applicable Items To Be Verified

Generally, four factors determine whether an applicant selected for verification must verify a particular item on his or her application. These factors are—

- The dependency status of the applicant;
- The need analysis system used to calculate the applicant's EFC;
- The item to be verified; and
- The documentation requirements for each item.

Based on these factors, the following charts for dependent and independent students show the applicable items if these proposed regulations applied to the 1985–86 award year:

Interim Disbursements (§ 668.58)

Under 34 CFR 690.77(a)(2) of the Pell Grant Program regulations, the Secretary may require an institution to withhold payment of a student's grant until verification is completed and the institution determines that the information contained on the SAR is correct. In furtherance of this provision, the Secretary has notified institutions in the Pell Grant *Validation Handbook* to withhold payment of an applicant's Pell Grant until the applicant has provided the correct information unless the institution wishes to assume liability for any overpayment.

Under the integrated verification system, verification of applicant information will apply not only to the Pell Grant Program but also to the GSL and campus-based programs. The Secretary, therefore, is proposing that with regard to the Pell Grant and campus-based programs, an institution may, before an applicant completes the verification process, either (1) withhold all payments or (2) make one disbursement to an applicant of a Pell Grant, SEOG, and NDSL in the applicant's first payment period and employ the applicant under CWS for the summer before and for sixty (60) days after the applicant is enrolled in that first payment period. However, if the institution chooses the second approach, it will be liable for any overpayment it makes to a student that is discovered as a result of the verification process. Ever though an institution will be liable for any such overpayment, its exposure to liability will be minimal because most overpayments are small and can be adjusted during the award year. If the applicant misreports data and receives an overpayment, the institution must follow the procedures for each program described below in "Recovery of Funds" and contained in § 668.61.

With regard to the GSL Program the institution may not certify a GSL application until the selected applicant completes verification. In some instances, however, an institution may certify a GSL application and later select that applicant for verification in the course of making an award under the campus-based or Pell Grant programs. In these cases, if the GSL check is sent to the institution, the institution may not endorse the check unless verification shows that the applicant is eligible for that loan amount and related benefits. The institution may not hold the check for more than 30 days and must return it to the lender if the applicant has not yet completed the verification process.

The Secretary proposes that when corrections result in a change in the suggested GSL loan amount, an institution use the following procedures:

1. If the difference in the approved loan amount is less than $200, no adjustment is necessary.
2. If the error in the suggested loan amount is $200 or more, the institution must notify, within 30 days of its determination of the correct suggested loan amount, the borrower, the lender, and the appropriate guarantee agency of the ineligible loan amount and of the correct amount the borrower is eligible to receive and return any GSL checks in its possession to the lender.

Consequences of an Inaccurate Application (§ 668.59)

The Secretary believes that there may be many cases where the difference in the amounts reported on an application and on an income tax return and other documents will not significantly affect the amount of assistance the applicant is eligible to receive. In these cases, the reprocessing of aid applications or the re-packaging of aid awards would be burdensome to applicants, institutions, lenders, and guarantee agencies and would not result in a substantial savings to the Federal government or a major reallocation of funds to applicants. Therefore, the Secretary proposes error levels (tolerances) below which the recalculation of an applicant's EFC will not be required.

The Secretary is proposing for the Pell Grant Program that no recalculation of an applicant's EFC (Student Aid Index) will be required if the net change in the dollar items verified is less than $100. For the campus-based and GSL Programs the Secretary is proposing that no recalculation of an applicant's applicable EFC will be required if the net change in the dollar items verified is less than $600 unless the institution uses the Pell Grant Student Aid Index as the applicant's EFC. In that case, no recalculation will be required if the net change in dollar items verified is less than $100. An institution must recalculate the EFC if nonfinancial data (e.g., the number in the household or in postsecondary educational institutions) are in error.

To determine the net change in dollar items verified, the institution first determines the amount of change in each dollar item by subtracting the amount originally reported from the amount verified. If the amount verified is greater than the amount originally reported, the amount of change has a positive numerical value. If the amount verified is less than the amount originally reported, the amount of change has a negative numerical value. After making this determination for each item, the numerical value of the change in each item verified that decreases the EFC (e.g., U.S. income tax paid and the married couple deduction) is reversed from positive to negative or negative to positive as appropriate. The institution then adds all the changes in value to arrive at the net change in dollar items verified. If an applicant's net change in dollar items exceeds a positive or negatives $100 for the Pell Grant Program or a positive or negative $600 for the campus-based and GSL programs, the applicant's EFC is recalculated to determine if his or her award changes.

The following is an example of determining an applicant's net change in dollar items verified. An institution determines under the verification process that an applicant's AGI is $18,300 instead of $18,000 reported on the application, that the U.S. income tax paid is $1,100 instead of $1,000, and that the applicant's married couple deduction is $300 instead of $500. Therefore, the institution determines that the change in value of these items is respectively a positive $300 for AGI, a positive $100 for tax paid, and a negative $200 for the married couple deduction. Before adding these three amounts, the values of the changes in U.S. income tax paid and the married couple deduction are reversed to a negative $100 and a positive $200. Thus, the net change in dollar items after adding these three amounts is a positive $400, and only the applicant's Student Aid Index for the Pell Grant Program must be recalculated as described below.

The Secretary recognizes that the proposed tolerance level of $100 for the Pell Grant Program is more rigorous than the current tolerances provided for in that program. However, the quality control study in 1983 found that the current tolerances do not required the correction of all consequential errors. 72 percent of the verified applications within those tolerances would have had a Student Aid Index change if corrections had been required. Two-thirds of these Student Aid Index changes would have resulted in overpayments had corrections been required, and the total of the overpayments and underpayments would have yielded an unacceptably high net payment changes estimated to be $26 million in overpayments.

For the approved need analysis systems based on the Uniform Methodology that are used in the campus-based and GSL programs, the Secretary proposes as a tolerance $600.

This amount corresponds to a change in EFC that parallels the $200 overaward exception in the campus-based program.

(Catalog of Federal Domestic Assistance: No. 84.007, Supplemental Educational Opportunity Grants; No. 84.032, Higher

(c) *Foreign schools.* The Secretary exempts from the provisions of this

VOL 50 ISS 144 JL 26 1985 UMI

This amount corresponds to a change in EFC that parallels the $200 overaward exception in the campus-based program regulations, 34 CFR 674.14, 675.14, and 676.14.

When an institution determines that the application dollar errors exceed the tolerance levels or there are errors in nonfinancial data, the institution, or in the case of the Pell Grant Program the institution or Secretary, must determine whether there is any change in the applicant's assistance by recalculating the applicant's EFC. If the applicant has applied for a Pell Grant and the institution either does not recalculate the applicant's EFC (Student Aid Index) or recalculates the applicant's EFC and determines that the applicant's Pell Grant has changed, the applicant must resubmit his or her Student Air Report (SAR) for correction. The institution then adjusts the applicant's aid to reflect the new EFC. If the applicant applied for a GSL and reported an adjusted gross family income of $30,000 or less and the correction of a misreported item causes the adjusted gross family income to exceed $30,000, the institution must calculate the applicant's EFC and determine the applicant's need for a loan.

For a Pell Grant applicant whose Student Aid Index (SAI) equals zero on the SAR presented for verification, the Secretary proposes to continue to provide the "Zero SAI Charts" previously published in the Pell Grant Validation Handbook so that the applicant's SAI need not be recalculated. A school may use the charts in those cases where the SAI is zero and the SAI will remain at zero after using verified information. The Zero SAI Charts rely on a simplified version of the Pell Grant eligibility formula that compares income offsets with household size and effective family income. If after calculating the correct effective family income the institution finds that it is less than the amount corresponding to the correct household size, the student's SAI will remain zero and the amount of the scheduled award remains the same. If the student's SAI remains zero, the SAR does not need to be reprocessed. If the institution determines it cannot use the Zero SAI Charts or if the verified effective family income exceeds the effective family income for the correct household size, the school must use the net $100 tolerance. The Secretary will publish the Zero SAI Charts for each award year in a notice in the **Federal Register**.

If verification results in a change from independent student status to dependent student status, the applicant must submit a new student aid application providing parental data in order to recalculate the applicant's EFC. The applicant must verify the parental data provided on the new application.

Failure To Provide Documentation (§ 668.60)

The Secretary proposes that for the campus-based and GSL programs, an institution shall determine what a reasonable period of time is for its applicants to provide documentation for verification. The Secretary believes that this provision allows institutions the flexibility to set a time period that is appropriate for their particular circumstances. Except as described below, if an applicant fails to complete verification within the time period set by the institution, the institution must not disburse any additional assistance to that applicant or certify any GSL for that applicant for that award year, and the applicant is responsible for returning any NDSL or SEOG payments. If the applicant provides the requested documentation after the time set by the institution, the institution may consider the applicant's application for campus-based aid for GSL and the applicant need not return any funds for which he or she is eligible.

For the Pell Grant Program, the Secretary has included the provisions currently in 34 CFR 690.77 of the Pell Grant Program regulations regarding the submission of a verified SAR after deadlines established in 34 CFR 690.61 and in notices in the **Federal Register**.

The Secretary proposes that if the Secretary or an institution is aware that an applicant has not provided requested documentation to the Secretary, the institution, or another institution that the student previously attended, neither the Secretary in the case of a Pell Grant, nor the Secretary or the institution in the case of campus-based aid or a GSL, shall process for the current or any future years any other application for a Pell Grant, campus-based aid, or a GSL until the applicant provides the requested documentation or the Secretary determines that the documentation is no longer needed. This requirement already exists for the Pell Grant Program, and the Secretary is proposing to extend it to the campus-based and GSL programs.

The Secretary is requesting comments on whether he should revise the requirements for the financial aid transcript in Subpart A of these regulations to include information regarding whether an applicant failed to provide documentation for verification of an application for a Pell Grant, campus-based aid, or a GSL. This revision would assure that institutions would have sufficient information to treat applicants for campus-based or GSL assistance similarly to Pell Grant applicants.

Recovery of Funds (§ 668.61)

If an institution chooses to make a disbursement before the verification process is complete, it is liable for any overpayments. The Secretary proposes to require an institution to make a reasonable effort to recover any funds to which an applicant is not entitled either by making adjustments to subsequent disbursements in the award year or by requiring applicants to return these funds if the institution cannot make corrections later in the award year. In the latter case, if the institution is unable to recover Pell Grant, NDSL, or SEOG funds after making a reasonable effort, the institution must reimburse the appropriate program account.

The Secretary proposes that if after verifying the applicant's information for an award year, an institution determines that an applicant previously received a GSL of $200 or more in excess of the applicant's financial need for that award year, the institution must notify the lender of the change in the suggested loan amount and return any GSL check in its possession. The Secretary is publishing separately in proposed regulations for the GSL Program a description of those actions that the lender takes once notified by an institution of a change in a borrower's eligibility for a GSL.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the Order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities. Small entities affected by these regulations are small institutions of higher education. Under these proposed regulations, all institutions of higher education shall require selected applicants to verify student aid application information. All institutions, including small institutions which participate in the Pell Grant Program, already verify applicant information under the Pell validation system.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Regional Office Building 3, Room 4318, 7th and D Streets, S.W., Washington, D.C., between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, public comment is invited on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

Paperwork Reduction Act of 1980

Sections 668.53, 668.54, 668.55, 668.56 and 668.57 contain information collection requirements. As required by section 3504(h) of the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these proposed regulations to the Office of Management and Budget (OMB) for its review. Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, Room 3002, New Executive Office Building, Washington, D.C. 20503; Attention: Joseph F. Lackey, Jr.

All comments regarding these proposed regulations should be sent to the Department of Education at the address given at the beginning of this preamble.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 668

Administrative practice and procedure, Colleges and universities, Consumer protection, Education loan programs—education, Grant programs—education, Student aid.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

(Catalog of Federal Domestic Assistance: No. 84.007, Supplemental Educational Opportunity Grants; No. 84.032, Higher Education Act Insured Loans (Guaranteed Student Loans); No. 84.033, College Work-Study Program; No. 84.038, National Direct Student Loans; and No. 84.063, Pell Grant Program)

Dated: July 24, 1985.

William J. Bennett,

Secretary of Education.

The Secretary proposes to amend Part 668 of Title 34 of the Code of Federal Regulations as follows:

PART 668—STUDENT ASSISTANCE GENERAL PROVISIONS

1. The authority citation for Part 668 continues to read as follows:

Authority: 20 U.S.C. 1094.

2. The table of contents of Part 668 is amended by adding a new Subpart E to read as follows:

Subpart E—Verification of Student Aid Application Information

Sec.

668.51 General.
668.52 Definitions.
668.53 Policies and procedures.
668.54 Selection of applicants for verification.
668.55 Responsibilities of applicants for updating information.
668.56 Items to be verified.
668.57 Acceptable documentation.
668.58 Interim disbursements.
668.59 Consequences of an inaccurate application.
668.60 Consequences of the failure to provide documentation.
668.61 Recovery of funds.

3. Part 668 is amended by adding a new Subpart E to read as follows:

Subpart E—Verification of Student Aid Application Information

§ 668.51 General.

(a) *Scope and purpose.* (1) The regulations in this subpart govern the verification by institutions of information submitted by applicants in connection with the calculation of their expected family contributions (EFC) for the Pell Grant, the campus-based, and the Guaranteed Student Loan (GSL) programs.

(2) The regulations also cover the verification by institutions of information submitted under the GSL Program by applicants whose adjusted gross family income is $30,000 or less.

(b) *Applicant responsibility.* If the Secretary or the institution requests documents or informaton from an applicant under this subpart, the applicant must provide the specified documents or information.

(c) *Foreign schools.* The Secretary exempts from the provisions of this subpart institutions participating in the GSL Program that are not located in a State.

(20 U.S.C. 1094)

§ 668.52 Definitions.

The following definitions apply to this subpart:

"Approved need analysis system" means a need analysis system which the Secretary has approved for an award year for determining an EFC under the campus-based programs.

"Comparable State income tax return" means a State income tax return which requires the filer to provide the adjusted gross income and the amount of U.S. income tax paid as reported on the U.S. income tax return.

"Edits" means a set of preestablished factors for identifying—

(a) Student aid applications that may contain incorrect, missing, illogical, or inconsistent information; and

(b) Randomly selected student aid applications.

"Expected family contribution (EFC)" means the amount an applicant and his or her spouse and family are expected to contribute toward the applicant's cost of attendance.

"GSL Needs Test Tables" means the tables in Appendix B to 34 CFR Part 682 used to calculate a GSL applicant's EFC.

"Student aid application (application)" means the application which a person submits to have his or her EFC determined under the Pell Grant, campus-based, or GSL programs.

(20 U.S.C. 1094)

§ 668.53 Policies and procedures.

(a)(1) An institution shall establish and use written policies and procedures for verifying information contained in an application to have an EFC calculated in accordance with the provisions of this subpart. These policies and procedures must include—

(i) The time period within which the applicant shall provide the documentation;

(ii) The consequences of the failure to provide the required documentation within the specified time period;

(iii) The approved need analysis system the institution uses to recalculate an EFC;

(iv) The method by which the institution notifies the applicant of the results of verification;

(v) The procedures the institution requires an applicant to follow to correct application information; and

(vi) The procedures for referring any instance in which the institution has

reason to believe that an applicant has applied for Pell Grant, campus-based, or GSL program funds under false

(3) In addition to the applicants selected under paragraphs (a)(1) and (a)(2) of this section, if an institution

(c) Except as provided in paragraph (d) of this section, if an applicant's dependency status changes after the

reason to believe that an applicant has applied for Pell Grant, campus-based, or GSL program funds under false pretenses to State or local law enforcement agencies for investigation as required under § 668.14(g) of this part.

(2) If the institution selects applications for verification in addition to those applications that the Secretary selects, the policies and procedures must include—

(i) The method the institution uses to select those applications;

(ii) The items on the student aid application that the institution requires applicants to verify; and

(iii) The documents the institution requires to verify any items.

(b) The institution's procedures must provide that it furnish, in a timely manner, to each applicant selected for verification—

(1) A clear explanation of the documentation needed to satisfy the verification requirements; and

(2) The applicant's rights and responsibilities with respect to the verification of his or her application information including the deadlines for the applicant's completion of any actions required of the applicant under this subpart and the consequences of failing to complete any required action.

(20 U.S.C. 1094)

§ 668.54 Selection of applicants for verification.

(a) *General requirements.* (1) Except as provided in paragraph (b) of this section, an institution shall require an applicant to verify all of the applicable items specified in § 668.56 if the edits specified by the Secretary select that applicant for verification. The Secretary may enter into agreements with agencies or organizations with approved need analysis systems under which the Secretary provides the edits to the agencies or organizations and the agencies and organizations indicate to institutions the applications that the edits select for verification.

(2) The institution shall require every applicant to verify the applicable items specified in § 668.56 if the applicant—

(i) Is selected by the institution to receive an award under the campus-based programs or requests the institution to certify his or her application for a GSL loan; and

(ii) Does not—

(A) Apply for a Pell Grant;

(B) Submit an "Application for Federal Student Aid" (ED Form 255); or

(C) Submit a student aid application to have an EFC calculated to an agency or organization that has an agreement with the Secretary described under paragraph (a)(1) of this section.

(3) In addition to the applicants selected under paragraphs (a)(1) and (a)(2) of this section, if an institution believes that any information on an application used to calculate an EFC is inaccurate, it shall require that the applicant verify the information that it believes is inaccurate.

(b) *Exclusions from verification.* Unless the institution has documentation that conflicts with information reported by an applicant or believes that the information reported by the applicant is incorrect, it does not have to verify applications of the following applicants:

(1) An applicant who is an independent student and who is a legal resident of the Trust Territory of the Pacific Islands (which includes the Marshall Islands and the Caroline Islands), Guam, American Samoa, or the Northern Mariana Islands.

(2) An applicant who is a dependent student and who is a legal resident of, and whose family are legal residents of, the Trust Territory of the Pacific Islands (which includes the Marshall Islands and the Caroline Islands), Guam, American Samoa, or the Northern Mariana Islands.

(3) An applicant who is incarcerated at the time of verification.

(4) An applicant who is a dependent student whose parents are citizens of, and currently reside in, a country other than the United States.

(5) An applicant who dies during the award year.

(6) An applicant who is an immigrant and who arrived in the United States during either calendar year of the award year.

(7) An applicant who does not receive assistance under the programs covered by this subpart.

(20 U.S.C. 1094)

§ 668.55 Responsibilities of applicants for updating information.

(a) If an applicant is selected for verification, the applicant shall update the information described in § 668.56(a)(3) and (4) and § 668.56(b)(2)(ii) and (iii) so that this information is accurate as of the date that the institution verifies the information.

(b)(1) If an applicant for a Pell Grant is not selected for verification, the applicant shall update the information described in § 668.56(a)(3) and (4) so that this information is accurate as of the date that the applicant submits his or her first Student Aid Report (SAR) to the institution or the Secretary.

(2) The applicant shall sign the statement, certifying that the applicable information has been updated, that is contained on the SAR.

(c) Except as provided in paragraph (d) of this section, if an applicant's dependency status changes after the applicant applies to have his or her EFC calculated for an award year, the applicant must change that status by filing a new application for that award year reflecting the applicant's new dependency status.

(d)(1) If an applicant's change in dependency status results from a change in marital status, the applicant is not required to update his or her dependency status.

(2) If the institution has previously certified a GSL loan application for an applicant, the applicant is not required to update his or her dependency status on the GSL loan application.

(20 U.S.C. 1094)

§ 668.56 Items to be verified.

(a) Except as provided in paragraph (b) of this section, an institution shall require an applicant selected for verification under § 668.54(a)(1) and (2) to submit acceptable documentation described in § 668.57 that will verify or update the following information used to determine the applicant's EFC:

(1) Adjusted gross income (AGI) for the calendar year preceding the first year of the award year.

(2) U.S. income tax paid for the calendar year preceding the first year of the award year.

(3) The number of family members in the household of the applicant and his or her spouse, or in the household of the applicant's parents if the applicant is a dependent student.

(4) The number of family members in postsecondary educational institutions as at least half-time students in the household of the applicant and his or her spouse, or in the household of the applicant's parents if the applicant is a dependent student.

(5) The factors relating to an applicant's independent student status.

(6) Untaxed income and benefits for the calendar year preceding the first year of the award year including—

(i) U.S. income tax deduction for a married couple when both work;

(ii) Social security benefits if required by a comment on the applicant's SAR;

(iii) Payment made to an individual retirement account (IRA) or Keogh account; and

(iv) Other untaxed income and benefits included on the student aid application.

(b) For the GSL Program—

(1) If a GSL applicant's adjusted gross family income is $30,000 or less, the institution shall require the applicant to

submit acceptable documentation described in § 668.57 that verifies—

(i) The adjusted gross family income; and

(ii) The factors relating to an applicant's independent student status;

(2) If a GSL applicant's adjusted gross family income exceeds $30,000 and the institution uses the GSL Needs Test Tables, the institution shall require the applicant to submit acceptable documentation described in § 668.57 that verifies—

(i) The adjusted gross family income;

(ii) The number of family members in the household of the applicant and his or her spouse, or in the household of the applicant's parents if the applicant is a dependent student;

(iii) The number of family members in postsecondary educational institutions as at least half-time students in the household of the applicant and his or her spouse, or in the household of the applicant's parents if the applicant is a dependent student; and

(iv) The factors relating to an applicant's independent student status; or

(3) If the GSL applicant's adjusted gross family income exceeds $30,000 and the institution does not use the GSL Needs Test Tables, the institution shall require the applicant to submit acceptable documentation described in § 668.57 that verifies the applicable items set forth in paragraph (a) of this section.

(20 U.S.C. 1094)

§ 668.57 Acceptable documentation.

(a) *AGI, U.S. income tax paid, and number in household.* (1) An institution shall require an applicant selected for verification to submit to it to verify adjusted gross income (AGI), U.S. income tax paid, and number in household—

(i) A copy of the U.S. income tax return or comparable State income tax return signed by the filer of the return or by one of the filers if a joint return;

(ii) The IRS listing of tax account information from the Internal Revenue Service;

(iii) If the applicant or the applicant's parents filed an income tax return with a central government outside the United States, a copy of that tax return signed by the filer; or

(iv) If no return was filed or will be filed, a statement signed by the applicant and the applicant's parent in the case of a dependent student and by the applicant in the case of an independent student certifying that no tax return was filed or will be filed and providing—

(A) The sources of income earned from work stated on the application;

(B) The amount of income from each source; and

(C) A list of the household members and their relationship in each relevant household.

(2) If the number of exemptions claimed on the U.S. or comparable State income tax return, minus any exemptions for age or blindness, differs from the number in the household on the student aid application, the institution shall require a statement signed by the applicant and the applicant's parent in the case of a dependent student, or by the applicant in the case of an independent student, which—

(i) Lists the names of the household members and their relationship; and

(ii) Explains any difference between the information included on the student aid application and the tax returns unless other information in the institution's records explains that difference.

(b) *Number in postsecondary educational institutions.* An institution shall require an applicant selected for verification to submit to it to verify the number of family members in the household in postsecondary educational institutions, the following:

(1) If the institution does not believe that the information provided is inaccurate, a statement signed by the applicant and the applicant's parent in the case of a dependent student, or by the applicant in the case of an independent student, which lists—

(i) The names of the household members who are or will be attending postsecondary institutions as at least half-time students;

(ii) Their ages; and

(iii) The names of those institutions.

(2) If the institution believes the information is inaccurate—

(i) The information listed in paragraph (b)(1) of this section; and

(ii) A statement from each institution named by the applicant in response to the requirement of paragraph (b)(1)(iii) of this section that the household member in question is or will be attending the institution on at least a half-time basis, unless the institution the student is attending determines that such a statement would not be available because the household member in question has not yet registered at the institution he or she is planning to attend.

(c) *Independent student status. (1) Unmarried applicant.* For an unmarried applicant, except as provided in paragraphs (c)(3) and (c)(4) of this section, an institution shall require an applicant selected for verification to submit to it a written statement signed by the applicant and the applicant's parent(s) certifying that—

(i) The parent(s) will not claim the applicant as an exemption on their U.S. income tax return for the first calendar year of the award year;

(ii) The parent(s) did not and will not provide the applicant with financial assistance of more than $750 in the first calendar year of the award year or the preceding calendar year; and

(iii) The applicant did not and will not live with the parent(s) for more than forty-two days in that year.

(2) *Married applicant.* For a married applicant, except as provided in paragraphs (c)(3) and (c)(4) of this section, an institution shall require an applicant selected for verification to submit to it a written statement signed by the applicant and the applicant's parent(s) certifying that—

(i) The parent(s) will not claim the applicant as an exemption on their U.S. income tax return for the first calendar year of the award year;

(ii) The parent(s) did not and will not provide the applicant with financial assistance of more than $750 in the first calendar year of an award year or the preceding calendar year; and

(iii) The applicant did not and will not live with the parent(s) for more than forty-two days in either of those years.

(3) *Pell Grant Program.* For purposes of the Pell Grant Program, if the Secretary or an institution does not have conflicting documentation regarding any of the three factors used to determine independent student status—

(i) No documentation or statements are required of an applicant who is 23 years of age or older as of May 31 of the award year for which aid is requested to verify his or her independent student status;

(ii) The institution shall consider the independent student status of a married applicant who is under 23 years of age on May 31 of the award year for which aid is requested to be verified if the institution determines that the applicant's parents are unable or unwilling to provide the required statements; or

(iii) The institution shall consider the independent student status of an applicant selected for verification to submit to it—

(i) A copy of the Federal or comparable State income tax return of the applicant's parent(s) signed by the filer, or by one of the filers if a joint return, for the calendar year preceding the first calendar year of an award year, or if the parent(s) did not file and will not file a tax return for that year, a statement to that effect signed by the parent(s); and

(ii) A statement signed by the applicant and the applicant's parent(s) certifying that—

(A) The parent(s) will not claim the applicant as an exemption on their U.S. income tax return for the first calendar year of the award year;

(B) The parent(s) will not and did not provide the applicant with financial assistance of more than $750 in the first calendar year of an award year or the preceding calendar year; and

(C) The applicant did not and will not live with the parent(s) for more than forty-two days in either of those years.

(4) *Married applicant.* For a married applicant, except as provided in paragraphs (c)(3) and (c)(4) of this section, an institution shall require an applicant selected for verification to submit to it a written statement signed by the applicant and the applicant's parent(s) certifying that—

(i) The parent(s) will not claim the applicant as an exemption on their U.S. income tax return for the first calendar year of the award year;

(ii) The parent(s) did not and will not provide the applicant with financial assistance of more than $750 in the first calendar year of an award year; and

(iii) The applicant did not and will not live with the parent(s) for more than forty-two days in that year.

(3) *Pell Grant Program.* For purposes of the Pell Grant Program, if the Secretary or an institution does not have conflicting documentation regarding any of the three factors used to determine independent student status—

(i) No documentation or statements are required of an applicant who is 23 years of age or older as of May 31 of the award year for which aid is requested to verify his or her independent student status;

(ii) The institution shall consider the independent student status of a married applicant who is under 23 years of age on May 31 of the award year for which aid is requested to be verified if the institution determines that the applicant's parents are unable or unwilling to provide the required statements; or

applicant's EFC, a net change in dollar items of less than $100

(1) If an applicant fails to provide the

paragraph (b)(1) of this section, the

(iii) The institution shall consider the independent student status of an unmarried applicant who is under 23 years of age on May 31 of the award year for which aid is requested to be verified if the institution determines that—

(A) The applicant's parents are unable or willing to provide the required tax returns or statements; and

(B) The applicant had sufficient income to support himself or herself including any dependents for the calendar year preceding the first calendar year of the award year.

(4) *Campus-based and GSL programs.* For purposes of the campus-based and GSL programs—

(i) If the Secretary or an institution does not have conflicting documentation regarding any of the three factors used to determine independent student status and the institution determines that the applicant's parents are not unable to provide the requested information and documentation, the institution may either—

(A) Require an applicant to provide to it the documents specified in paragraph (c)(1) of this section if the applicant is unmarried, or specified in paragraph (c)(2) of this section if the applicant is married, regardless of the circumstances concerning the age of the applicant or the willingness of the applicant's parents to provide the required tax return and statement; or

(B) Follow the requirements contained in paragraph (c)(3) of this section; or

(ii) If the Secretary or an institution does not have conflicting documentation regarding any of the three factors used to determine independent student status and the institution determines that the applicant's parents are unable to provide the requested information and documentation, the institution must follow the requirements contained in paragraph (c)(3) of this section.

(d) *Untaxed income and benefits.* An institution shall require an applicant selected for verification to submit to it to verify—

(1) Untaxed income and benefits described in § 668.56(a)(6)(i), (iii), and (iv)—

(i) A copy of the U.S. or comparable State income tax return signed by the filer or one of the filers if a joint return, if collected under paragraph (a) of this section, or the IRS listing of tax account information from the Internal Revenue Service if collected by the institution to verify adjusted gross income; and

(ii)(A) If the institution does not believe that the information provided is inaccurate—

(1) The worksheet for untaxed income and benefits from the student aid application, or a comparable listing of the untaxed income and benefits specified in § 668.56(a)(6)(iv) accompanied by a written statement signed by the applicant and the applicant's parent in the case of a dependent student, or by the applicant in the case of an independent student, certifying that the information on the worksheet or listing is correct; and

(2) If the applicant is a dependent student whose income for the calendar year preceding the first year of the award year is used to calculate the applicant's EFC (Student Aid Index) for the Pell Grant Program, a separate listing of the applicant's untaxed income and benefits specified in § 668.56(a)(6) for that year accompanied by a written statement signed by the applicant certifying that the information on the listing is correct; or

(B) If the institution believes that the information provided for an untaxed income or benefit is inaccurate—

(1) The documentation required in paragraph (d)(1)(ii)(A) of this section; and

(2) A statement from the agency or provider that supplied the benefits indicating the amount of those benefits, unless the institution determines that such a statement is not available.

(2) Social security benefits—

(i) If the applicant's SAR requires that the applicant verify his or her social security benefits, a document from the Social Security Administration showing the amount of benefits received in the appropriate calendar year by the applicant's parents, the applicant, and the parent's children in the case of a dependent student, or by the applicant, the applicant's spouse, and the applicant's children in the case of an independent student; or

(ii) If the applicant does not receive an SAR, the document in paragraph (d)(2)(i) of this section or, at the institution's option, a statement signed by the applicant and the applicant's parent in the case of a dependent student or by the applicant in the case of an independent student certifying that the amount listed on the applicant's aid application is correct.

(20 U.S.C. 1094)

§ 668.58 Interim disbursements.

(a) Until an applicant selected by the Secretary or the institution verifies or corrects the information on his or her application, the institution or the Secretary—

(1)(i) May withhold payment of Pell Grant and campus-based funds; or

(ii)(A) May make one disbursement of any combination of Pell Grant, NDSL, or SEOG funds for the applicant's first payment period; and

(B) May employ an eligible student under the CWS Program until sixty (60) days after the date the applicant enrolled in that award year; and

(2) Shall not certify the applicant's GSL loan application or endorse a GSL loan check for any previously certified GSL loan application.

(b) If an institution chooses to make disbursement under paragraph (a)(1)(ii) of this section, it shall be liable for any overpayment discovered as a result of the verification process.

(c) An institution may not hold any GSL check under paragraph (a)(2) of this section for more than thirty (30) days. If the applicant does not complete the verification process within the thirty (30) day period, the institution must return the check to the lender.

(20 U.S.C. 1094)

§ 668.59 Consequences of an inaccurate application.

(a)(1) Except as provided in paragraph (b) of this section, an institution shall follow the procedures set forth in paragraphs (c) and (d) of this section.

(2) For the Pell Grant Program, if the institution uses the Zero SAI Charts published by the Secretary in the **Federal Register** for an applicant who submits a SAR with a Student Aid Index (SAI) of zero and the Zero SAI Charts show that the applicant's SAI remains zero, the institution is not required to follow the procedure in paragraphs (c)(2) and (d)(1) of this section.

(b)(1) An institution need not recalculate an applicant's EFC for the Pell Grant Program or otherwise follow the procedures set forth in paragraphs (c) and (d) of this section for a Pell Grant Program applicant if, as a result of the verification process, the institution finds—

(i) No errors in nondollar items used to calculate the applicant's EFC; and

(ii) A net change in dollar items of less than $100.

(2) An institution need not recalculate an applicant's EFC for the campus-based or GSL program or otherwise follow the procedures set forth in paragraphs (c) and (d) of this section for a campus-based or GSL program applicant if, as a result of the verification process, the institution finds—

(i) No errors in nondollar items used to calculate the applicant's EFC; and

(ii)(A) A net change in dollar items of less than $600; or

(B) If the institution uses the Pell Grant Program Student Aid Index as the applicant's EFC, a net change in dollar items of less than $100.

(c)(1) For the campus-based and GSL programs, the institution shall recalculate the applicant's EFC.

(2) For the Pell Grant Program, the institution shall require the applicant to resubmit his or her SAR to the Secretary if—

(i) The institution recalculates the applicant's EFC (Student Aid Index) and determines that the applicant's Pell Grant award has changed; or

(ii) The institution does not recalculate the applicant's EFC.

(d)(1) For purposes of the Pell Grant Program, if the applicant's EFC (Student Aid Index) changes, the institution shall recalculate the applicant's Pell Grant award.

(2) For purposes of the campus-based and GSL programs, if the applicant's applicable EFC changes, the institution shall adjust the applicant's financial aid package for the campus-based and GSL aid to reflect the new EFC.

(e) If a GSL applicant reports an adjusted gross family income of less than $30,000 and verification shows that the adjusted gross family income is over $30,000, the institution shall calculate an EFC for the applicant and determine his or her financial need for a loan.

(f) If the institution selects an applicant for verification for an award year who previously received a loan under the GSL Program for that award year, and as a result of verification, the suggested loan amount is reduced by $200 or more, the institution shall comply with the procedures for notifying the borrower, lender, and appropriate guarantee agency specified in § 668.61(b).

(g) If the student has received funds based on information which may be incorrect and the institution has made a reasonable effort to resolve the alleged discrepancy, but cannot, the institution shall forward the student's name, social security number, and other relevant information to the Secretary.

(20 U.S.C. 1094)

§ 668.60 Consequences of the failure to provide documentation.

(a) For purposes of the campus-based and GSL programs—

(1) If an applicant fails to provide the requested documentation within a reasonable time period established by the institution—

(i) The institution shall not—

(A) Disburse any additional NDSL or SEOG funds to the applicant;

(B) Continue to employ the applicant under CWS;

(C) Certify the applicant's GSL application; or

(D) Endorse a GSL check to the applicant;

(ii) The institution must return to the lender any GSL check payable to the applicant; and

(iii) The applicant must repay to the institution any NDSL or SEOG payments received for that award year;

(2) If the applicant provides the requested documentation after the time period established by the institution, the institution may, at its option, award aid to the applicant notwithstanding the prescriptions listed in paragraph (a)(1)(i) of this section; and

(3) An institution may not hold any GSL check under paragraph (a)(1) of this section for more than thirty (30) days. If the applicant does not complete verification within the thirty (30) day period, the institution must return the check to the lender.

(b) For purposes of the Pell Grant Program—

(1) An applicant may submit a verified SAR to the institution after the appropriate deadline specified in 34 CFR 690.61 but within an established additional time period set by the Secretary through publication in the **Federal Register**. If a verified SAR is submitted to the institution during the period permitted by the Secretary after the appropriate deadline specified in 34 CFR 690.61, payment must be based on—

(i) The original SAR, if the student aid index on the verified SAR is lower than the student aid index on the original SAR; or

(ii) The verified SAR, if the student aid index on the verified SAR is the same or higher than the student aid index on the original SAR; and

(2) If the applicant does not provide the requested documentation, and if necessary, a reprocessed verified SAR, within the period established in paragraph (b)(1) of this section, the applicant—

(i) Forfeits the Pell Grant for the award year; and

(ii) Shall return any grant payments previously received for that award year to the Secretary.

(c) The Secretary in the case of a Pell Grant, or the Secretary or an institution in the case of campus-based aid or a GSL, shall not process any other application for a Pell Grant, campus-based aid, or a GSL for an applicant who has been requested to provide information until the applicant provides the information or the Secretary decides that there is no longer a need for the documentation.

(20 U.S.C. 1094)

§ 668.61 Recovery of funds.

(a) If an institution discovers, as a result of the verification process, that an applicant received more than he or she was eligible to receive under the Pell Grant, NDSL, or SEOG programs, the institution shall eliminate the overpayment by—

(1) Adjusting subsequent financial aid payments in the award year in which the overpayment occurred;

(2) Reimbursing the appropriate program account by—

(i) Requiring the applicant to return the overpayment to the institution if the institution cannot correct the overpayment under paragraph (a)(1) of this section; or

(ii) Making restitution from its own funds.

(b) If the institution determines as a result of verification that an applicant received for an award year a GSL of $200 or more in excess of the student's financial need for the loan, the institution shall notify the student, the lender, and the appropriate guarantee agency of the excess amount within thirty (30) days of the institution's determination that the borrower is ineligible for such amounts.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR Part 20

Financial Assistance and Social Services Program

July 22, 1985.

AGENCY: Bureau of Indian Affairs, Department of the Interior.

ACTION: Proposed rule.

SUMMARY: The Bureau is amending existing Financial Assistance and Social Services Program regulations in response to a congressional directive in "The Department of the Interior and Related Agencies Appropriations Act," Fiscal Year 1985, Pub. L. 98–473. The Act provides that:

. . . after September 30, 1985, no part of any appropriation (except trust funds) to the (BIA) may be used directly or by contract for general or other welfare assistance (except child welfare assistance) payments (1) for other than essential needs (specifically identified in regulations of the Secretary or in regulations of the State public welfare agency adopted by reference in the Secretary's regulations) which could not be reasonably expected to be met from financial resources or income (including funds held in trust) available to the recipient individual which are not exempted under law from consideration in determining eligibility for or the amount of Federal financial assistance or (2) for individuals who are eligible for general public welfare assistance available from a State except to the extent the Secretary of the Interior determines that such payments are required under sections 6(b)(2), 6(i), and 9(b) of the Maine Indian Claims Settlement Act of 1980 . . .

In order to insure that the limitations in the statutory language are applied to the Bureau's general assistance program it is necessary to amend 25 CFR Part 20 to:

—More precisely define key terms within the regulations, i.e., "need", "essential needs", "resources", and "general assistance."
—Further delineate what constitutes a general assistance program and in what circumstances the Bureau provides general assistance payments to Indian citizens.
—Further identify and support a uniform standard for the determination of assistance payments; and,
—Make additional revisions which may support any of the above and which further strengthen the management and effectiveness of the general assistance program.

DATE: Comments must be received on or before August 26, 1985.

ADDRESS: Comments may be mailed to: Bureau of Indian Affairs, Division of Social Services, Code 450, Room 312–S, 1951 Constitution Avenue, NW., Washington, D.C. 20245.

FOR FURTHER INFORMATION CONTACT: Eddie F. Brown or Larry Blair of the Bureau's Division of Social Services at: 1951 Constitution Avenue, NW., Room 312, Telephone number (202) 343–6434.

SUPPLEMENTARY INFORMATION: In proposing these amendments, the Bureau of Indian Affairs seeks to define with greater clarity its program of general assistance to Indian people. Accordingly, it is the Bureau's primary intent in publishing this proposed rule to:

(1) Identify those instances in which the Bureau will operate a general assistance program.

(2) Indentify those needs essential to the well being and support of Indian individuals and families and for which Bureau general assistance payments will be made.

(3) Provide for Bureauwide uniformity in the operation of the Bureau general assistance program.

Other amendments are proposed which support and clarify the above three goals and which enhance the Bureau's ability to make accurate payments to eligible Indian individuals and families.

In pursuit of the foregoing objectives, the following changes are proposed:

1. Section 0.1 Definitions.

The Bureau proposes to revise definitions of (m) "General Assistance," (s) "Need," (t) "Public Assistance," and (w) "Resources," and to add definitions (cc) "Essential Needs," (dd) "Household," (ee) "Tribal Work Experience Program (TWEP)," (ff) "Recipient" and (gg) "Case" to reflect changes to be made in § 20.21.

A. Paragraph 20.1(m) is amended to read, "BIA General Assistance" and makes clear that BIA general assistance is a secondary or residual source of financial assistance available to eligible Indian people. This means that BIA general assistance may be available to eligible Indian individuals and households if all other forms of financial aid are insufficient.

B. Paragraph 20.1 (cc) defines, as required by Pub. L. 98–473, those essential needs for which BIA general assistance may be paid. The regulations identify as minimum essential needs shelter, food, clothing, and utilities. These are commonly recognized as basic to individual well-being and have long been utilized by most public welfare agencies to establish maintenance costs at minimum subsistence levels. The definition of "essential needs" also includes additional need items for which Bureau payments will be made because of the alignment of BIA general assistance with payment standards established under the Aid to Families With Dependent Children Program (AFDC). Most State standards generally include other needs in addition to shelter, food, clothing and utilities, such as transportation and personal care items; other states have "flat grants" that do not identify dollar amounts for the need components of their standards. Therefore, while the Bureau shall not provide general assistance in any State having a general assistance program which meets the four essential needs identified above, in those States where the Bureau provides general assistance, payments will be made to meet the needs identified in the AFDC standard even if that standard includes needs in addition to the minimum four.

C. Paragraph 20.1 (ff) and (gg) are added to assure that data is uniformly reported.

2. Section 20.20 General.

Section 20.20(c) is revised to clarify that authorization by the Deputy Assistant Secretary for assistance to Indians, not otherwise eligible for Bureau Social Services under these regulations, refers only to emergency short term assistance.

3. Discussion of Major Provisions

A. Criteria for determining whether the Bureau will administer a general assistance program in a State. The rules propose criteria to determine whether or not the Bureau will administer a general assistance program in a State. Pub. L. 98–473 specifically precludes the Bureau from using Bureau funds to provide general assistance for "individuals who are eligible for general public welfare assistance available from a State." The Bureau interprets this to mean that there must be a State law which authorizes a statewide general assistance program and that the State must regularly appropriate funds to make payments under the State program. Therefore, the proposed rules do not recognize county or locally administered and funded general assistance as "assistance available from a State" unless there is a State law requiring all counties to have a general assistance program. The Bureau requires that State programs, as opposed to county programs, be funded with a regular appropriation because certain States' laws, while authorizing a statewide general assistance program, do not appropriate funds to administer the program or actually make payments to State residents. On the other hand, under a State law requiring counties to have a general assistance program, counties do provide some assistance even though payments may fluctuate subject to the limited availability of funds.

A second criterion used to determine whether or not the Bureau will administer a BIA general assistance program is whether the State general assistance program is one which provides financial assistance on a continuing basis to meet monthly minimum essential needs. A program which only meets emergency needs on a one-time-only basis is not considered a general assistance program which meets the needs of Indians who reside on or near a reservation. In developing these criteria, the Bureau looked to the two primary Federal income maintenance programs—namely, AFDC and Supplemental Security Income (SSI)—for fundamental characteristics that denote the mission and the limitations of effective, equitable income maintenance programming. Each of these programs provides monthly cash payments for food, shelter, clothing and utilities.

Although the Bureau will not operate a BIA general assistance program in any State that has a statewide general assistance program meeting the criteria as described above, the rules provide that where the Bureau provides general assistance on a reservation in one state and that reservation extends into a border State, the Bureau will provide general assistance to eligible members of the tribe in the bordering State.

The rules propose that the Bureau will not provide general assistance to any tribe that formally requests through final governing body action that the Bureau not operate a general assistance program. It further provides that if a Tribe seeks later to revoke such a request, it must also be done formally through final governing body action.

B. Redeterminations. The proposed rule codifies existing Bureau practice that eligibility and the amount of the payment must be determined based on the best estimate of income and circumstances which will exist in the month for which the payment is made. That estimate may be based on income and circumstances in past months if there is reasonable expectation that circumstances have not changed or based on current or future circumstances if there is new information.

The rules also propose that recipients are required to inform the Bureau within 15 days of any changes in status which may affect their eligibility or the amount of assistance. Additionally, the rules propose that eligibility must be redetermind whenever there is an indication of a change in circumstances, but not less frequently than once every six months for all households. However, this requirement does not preclude redeterminations being conducted at more frequent intervals at the discretion of local program administrators. In order to assure that all individuals who are not exempt under paragraph 20.21 are actively seeking and accepting employment, the Bureau proposes to redetermine eligibility not less frequently than every three months for this category of cases. The Bureau also proposes that a redetermination for all cases include a home visit or other personal contact at least once a year.

C. Standards of Assistance. This rule does not change but restates regulations recently published for inclusion in 25 CFR 20.1 in the **Federal Register** on March 29, 1985 (Vol. 50, No. 61, page 12527). Those regulations implemented changes in the general assistance program to bring payments into conformance with State payments in those States where the standard of need exceeds actual payments.

The rule makes clear that the Bureau adopts as its standard of assistance the AFDC payment standard in the State where the applicant or recipient lives. Thus, whenever there is reference to the Bureau's standard of assistance, it is the AFDC payment standard. The AFDC payment standard reflects the same basic and special need items that are included in the AFDC standard of assistance. In a State that meets 100 percent of the need standard, the payment standard and the need standard are the same. In a State that does not meet need in full and applies a rateable reduction to the need standard, the payment standard is the rateably reduced amount.

This proposed rule does, however, establish a standard for one adult for use in States that do not have a standard for single adult individuals. The rules provide that the Bureau standard for one adult will be the difference between its standard for one child and its standard for a household of two which includes an adult, or one-half the amount of a standard for a household of two, whichever is greater.

D. *Resources.* The rule proposes that the Bureau shall consider all income and liquid assets available for support and maintenance unless otherwise disregarded under regulation or by Federal statute. The regulations distinguish between liquid assets and other resources which include earned income and unearned income.

However, these regulations do not change existing policies which do not require that Indian individuals and families divest themselves of trust, real and personal property holdings. Trust funds, however, subject to the provisions of § 20.21(f) will be considered as part of the individuals' liquid assets.

Liquid assets are defined at § 20.1(w) as properties in the form of cash or other financial instruments which can be converted to cash, such as savings or checking accounts, promissory notes, etc. This means that the Bureau will count as income available to support an individual or household those assets which can be liquidated for that purpose.

The rules primarily codify current Bureau policy as to what constitutes income. However, two additional categories of unearned income are proposed: the Bureau will count, as income-in-kind, the value of shelter provided at no cost to the individual or household. The Bureau, therefore, will add to other income the amount included in its standard for shelter, if identifiable. If the standard is a flat standard which does not assign values to the components of the standard, the Bureau will count as income-in-kind an amount equal to 25 percent of the Bureau standard of assistance. This percentage is based on regulations of the Department of Housing and Urban Development (HUD) which specify that HUD will charge as rent for public housing, the higher of 10 percent of gross income or 30 percent of adjusted income. Adjusted income for an AFDC family with no other income is the AFDC payment less HUD disregards. The Bureau chooses to reduce the percentage applied for rent rather than apply the disregards.

The rules require that an individual or household apply for assistance from other Federal, State, county or local assistance programs for which they may be eligible concurrent with their application to the Bureau for assistance. The Bureau proposes to count as income any assistance received in determining eligibility for and the amount of the BIA general assistance payment. However, the rules propose that individuals eligible to receive or receiving AFDC or SSI are only eligible for BIA general assistance payments for the period following application and until they begin receiving payments under those programs.

Although current Bureau regulations do not address proration of income, Bureau policy requires that payments be denied to "furloughed employees"

whose annual income, when divided by 12 months, would exceed its monthly

language which requires BIA general

major rule under Executive Order 12291

(t) "Public assistance" means those

§ 20.21 General Assistance.

(1) Whenever there is an indication of

VOL 50 ISS 144 JL 26 1985

whose annual income, when divided by 12 months, would exceed its monthly standard of assistance. Furloughed employees generally work for school systems and are paid an annual salary even though they may receive that salary only during a 9 or 10 month period. It is the Bureau's position that such individuals should not be eligible for BIA general assistance solely because they do not receive that income during the summer when school is not in session. The rules, therefore, provide that the Bureau will prorate such income over a 12-month period. The monthly amount will be considered as income during the summer months unless the recipient provides evidence that the income will not continue in the future, e.g., a notice of termination of employment. The Bureau will also prorate income received by individuals employed on a contractual basis over the period of the contract, and intermittent income received quarterly, semiannually or yearly shall be prorated over the period covered by the income unless there is evidence that the income will not continue.

E. *Payments.* The proposed rule clarifies that the BIA general assistance payment will equal the difference between the Bureau standard of assistance and the individual's or household's resources limited by a maximum on the payment or limited by a percentage reduction. The rule further provides that the Bureau will round the payment down to the next lower whole dollar. This provision is adopted to conform with other assistance programs funded under the Social Security Act.

F. *Employment.* Consistent with existing Bureau policies, these proposed amendments include language requiring applicants and recipients of BIA general assistance to actively seek employment and to accept available local employment. However, § 20.21(i) of these amendments strengthen that requirement by identifying specific categories of individuals who are exempt from seeking and accepting employment as a condition of general assistance eligibility including exemption for a person for whom employment is not accessable in a commuting time that is reasonable and comparable with others in similar circumstances. The exemptions are based on Federal regulations at 45 CFR 224.20(b) which are used to exempt applicants and recipients from the requirement to register for employment as a condition of eligibility for AFDC.

In order to more effectively promote the use and coordination of available Bureau services, § 20.21(i) also contains language which requires BIA general assistance applicants and recipients to participate in Bureau-funded employment assistance services and Tribal Work Experience Program when available.

G. *Quality Assurance and Record Keeping.* The Bureau is developing a quality assurance system to provide on-going evaluation of the administration of the Bureau of Indian Affairs general assistance program in accordance with established Bureau policies and procedures. The quality assurance system will include but not be limited to: (1) The development of a sampling strategy and plan and the determination of an error rate which will measure the degree of overpayment and underpayments which were made; (2) the conduct of field investigations (including personal interviews) in accordance with the sampling strategy and plan; (3) the conduct of field investigations (including personal interviews) in response to unconfirmed perceived errors; (4) the taking of appropriate actions to remedy improper authorization or denied assistance; and (5) the taking of appropriate actions to correct the causes of improper actions. Regulatory requirements and standards for operation of the quality assurance system will be proposed by the Bureau in a future notice of proposed rulemaking.

The Bureau plans to strengthen and update its requirements in 66 BIAM pertaining to the maintenance of records necessary for the proper and efficient operation of the BIA general assistance program. Examples of the kinds of information to be retained are facts about applicants and recipients which would permit the Bureau to draw a recipient profile; date of application; length of time on assistance; number in household; status of recipient, i.e. single, married, employed, exempt from employment, etc.

Given information needs and the complexities of exisiting processes, requirements and constituents, an indepth examination of reporting and information requirements is warranted and expected to occur over the next year. Thereafter amendments to record keeping requirements will also be the subject of a proposed rulemaking.

The policy of the Department of the Interior is, whenever practical, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions, or objections regarding this proposed rule. The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601).

The information collection requirements contained in this part have been submitted to the Office of Management and Budget for approval under 44 U.S.C. 3501 *et seq.* The collection of this information will not be required until it has been approved by the Office of Management and Budget.

This proposed rule is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary-Indian Affairs by 209 DM 8.

The Department of the Interior has determined that this document does not constitute a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1983.

The primary author of this document is Eddie F. Brown, Chief, Division of Social Services, Bureau of Indian Affairs, telephone number (202) 343–6434.

List of Subject in 25 CFR Part 20

Administrative practice and procedure, Child welfare, Indians-Social welfare, Public assistance programs.

For reasons set out in the preamble Part 20 of Subchapter D, Chapter I of Title 25, Code of Federal Regulations, is proposed to be amended as follows.

1. The authority for 25 CFR Part 20 is revised to read as follows:

Authority: 25 U.S.C. 13; § 20.21 also issued under Pub. L. 98–473.

PART 20—[AMENDED]

2. Section 20.1 is amended by revising paragraphs (m) (s), (t), and (w) and adding paragraphs (cc), (dd), (ee), (ff) and (gg) to read as follows:

§ 20.1 Definitions.

* * * * *

(m) "BIA General assistance" is a secondary, or residual source of assistance for Indian people and means financial aid payments to eligible Indian individuals and households for assistance in meeting the cost of essential needs.

* * * * *

(s) "Need" means the deficit after consideration of income and other liquid assets necessary to meet the cost of basic need items and special need items as defined by the Bureau standard of assistance for the State in which the applicant or recipient resides.

(t) "Public assistance" means those programs of assistance provided under Title IV of the Social Security Act (49 Stat. 620), as amended and includes the Aid to Families with Dependent Children (AFDC) Program provided under Title IV–A.

* * * * *

(w) "Resources" means income and other liquid assets available to an Indian person or household to meet current living costs, unless otherwise specifically excluded by Federal statute. Liquid assets are those properties in the form of cash or other financial instruments which can be converted to cash, such as savings or checking accounts, promissory notes, mortgages and similar properties.

* * * * *

(cc) "Essential needs" include at a minimum shelter, food, clothing and utilities, but do not include needs beyond those basic and special needs included in the Bureau standard of assistance for the State where the Indian individual or household lives.

(dd) "Household" means persons living together with the 'head of household' who are related to or accepted by the 'head of household' and who function as members of the family.

(ee) "Tribal Work Experience Program (TWEP)" means a program operated by tribal contract which provides eligible participants with work experience and training that promotes and preserves work habits and develops work skills.

(ff) "Recipient" means an individual to whom or for whom a BIA general assistance payment is made for the month.

(gg) "Case" includes all individuals in the household as defined in § 20.1 (dd) whose needs are included in the BIA general assistance payment made for the month.

3. Section § 20.20(c) is revised to read as follows:

§ 20.20 General.

* * * * *

(c) Upon written request of an appropriate tribal governing body, the Deputy Assistant Secretary may authorize emergency short term assistance and services to Indians, not otherwise eligible in this part, who reside on a reservation or in near reservation designated areas, when necessary to prevent hardship in accordance with fundings and exceptions published in the Federal Register.

4. Section § 20.21 is revised in its entirety to read as follows:

§ 20.21 General Assistance.

The Bureau will not provide general assistance:

(a) to those tribal members of tribes which formally request, through final governing body action, that the Bureau not operate a general assistance program. If a tribe seeks to revoke that request, it must also be done formally through final governing body action. Such request for BIA general assistance should be timed with the Bureau's next fiscal year for the General Assistance program; and,

(b) in any State having a general assistance program available to meet the needs of eligible citizens, including the needs of Indians. A State general assistance program is available if payments are:

(1) Available statewide to eligible individuals and families, including Indians on reservations; and,

(2) Authorized by State law with funds regularly appropriated to make such payments, or if State law requires all county governments or localities to make such payments; and,

(3) For the purpose of meeting monthly minimum essential needs on a continuing basis.

(c) In States where the Bureau provides general assistance, Indians, in order to be considered eligible for general assistance under this part, must meet the requirements prescribed in § 20.20(a); and the following conditions:

(1) Do not receive financial assistance from AFDC or Supplemental Security Income (SSI);

(i) Indians eligible to receive AFDC or SSI will be allowed to receive BIA general assistance once they have applied for and until they begin to receive assistance payments from AFDC or SSI.

(ii) The Bureau will not make payments for any month for which AFDC or SSI payments are made.

(2) Have insufficient resources to meet the basic and special need items defined by the Bureau standard of assistance.

(3) Must apply for assistance from other Federal, State, county, or local programs for which they may be eligible concurrent with application to the Bureau for general assistance.

(d) *Redeterminations.* The Bureau shall determine eligibility and the amount of the BIA general assistance payment based on its best estimate of income and circumstances which will exist in the month for which the Bureau is to provide assistance. Recipients are required to inform the Bureau within 15 days of any changes in status which may affect their eligibility or amount of assistance. The Bureau shall redetermine eligibility:

(1) Whenever there is an indication of a change in circumstances;

(2) Not less frequently than every three (3) months for individuals who are not exempt under paragraph 20.21(i) from seeking or accepting employment;

(3) Not less frequently than once every six (6) months for all households.

The redetermination process shall include personal contact with the recipient, preferably a home visit, not less than once a year to evaluate changes in living circumstances and household composition, and to assess the need for continued assistance.

(e) *Standards of Assistance.* (1) Where the Bureau operates a general assistance program, its standard of assistance shall be the AFDC payment standard used in the State where the applicant or recipient resides. In a State that meets 100 percent of the need standard, the Bureau standard is the need standard. In a State that does not meet need in full and applies a ratable reduction to the need standard, the Bureau standard is the ratably reduced amount. The AFDC payment standard incorporates the same basic and special need items as the AFDC standard of assistance, and is the amount from which the Bureau will subtract net income and liquid assets to determine eligibility for and the amount of the Bureau's general assistance payment.

(2) In the event the State has no standard for one adult, the Bureau standard for one adult shall be the difference between the standard for one child and the standard for a household of two which includes an adult or one half the amount of the standard for a household of two, whichever is greater.

(3) The Bureau shall uniformly apply its standard of assistance in determining eligibility for and the amount of the general assistance payment for all applicants and recipients residing in the State.

(f) *Resources.* In determining eligibility for and the amount of the general assistance payment, the Bureau shall consider all types of income and other liquid assets available for support and maintenance unless otherwise disregarded as provided at § 20.21(g) or specifically excluded by Federal statute. Resources are considered available both when actually available and when the applicant or recipient has a legal interest in a liquidated sum, as defined at 25 CFR 20.1(w), and has the ability to make such sum available for support and maintenance.

(1) "Earned income" means income in cash or in-kind earned by an individual through the receipt of wages, salary, commissions, or profit from activities in

which he is engaged as a self-employed individual or as an employee.

(i) Federal, State and local taxes;

(ii) Social Security (FICA);

general assistance. These requirements do not apply to:

Reader Aids

Federal Register

which he is engaged as a self-employed individual or as an employee.

(i) Earned income includes earnings over a period of time for which settlement is made at one given time, as in the instance of the sale of farm crops, livestock, etc.

(ii) With respect to self-employment, "earned income" means total profit from business enterprise, i.e., gross receipts after subtracting business expenses directly related to producing the goods or services and without which the goods or services could not be produced. Business expenses do not include items such as depreciation, personal business and entertainment expenses, personal transportation, purchase of capital equipment and payments on the principal on loans for capital assets or durable goods.

(2) "Unearned income" includes but is not limited to:

(i) Income from: interest; oil and gas and other mineral royalties; rental property; cash contributions such as child support and alimony; retirement, disability and unemployment benefits; per capita payments not excluded by Federal statute; sale of land with trust status and real or personal property; Federal and state tax refunds. All of the above shall be counted to the extent they are not disregarded by Federal statute.

(ii) Income-in-kind contributions providing shelter at no cost to the individual or household. In establishing the amount of the in-kind contribution, the Bureau shall use the amount for shelter included in the standard, if identifiable, or 25 percent of the standard unless there is evidence provided that the value of free shelter is less; and,

(iii) General assistance provided by a State, county or local agency.

(3) The Bureau shall prorate: (i) Over a 12-month period recurring annual income received by individuals, such as teachers whose regular employment does not engage them on a year-round basis; (ii) income received by individuals employed on a contractual basis over the period of the contract; and (iii) intermittent income received quarterly, semiannually or yearly over the period covered by the income. The Bureau will prorate the income unless there is evidence that the income will not continue to be received in the future.

(g) *Disregards.* (1) The Bureau shall disregard, from the gross amount of earned income, amounts deducted for:

(i) Federal, State and local taxes;

(ii) Social Security (FICA);

(iii) Health insurance;

(iv) Work related expenses, including reasonable transportation costs;

(v) Child care costs except where the other parent in the home is not working and is not disabled; and

(vi) The cost of special clothing, tools and equipment directly related to the individual's employment. All of the above, as appropriate, will be disregarded from self-employment income after deducting costs of doing business.

(2) The Bureau shall disregard as income, or other liquid assets:

(i) Any home produce from garden, livestock and poultry utilized by the applicant or recipient and his/her household for their consumption.

(ii) Resources specifically excluded by Federal statute.

(h) *Payments.* (1) The Bureau shall make assistance payments in the amount not to exceed the difference between the Bureau standard of assistance and all resources not otherwise disregarded. In the event the State in which the individual or household lives applies a rateable reduction to that difference or maintains a system of dollar maximums on the payment, the Bureau shall also apply the rateable reduction and/or the maximum to the payment.

(2) If there is more than one household living in the dwelling and the household(s) receiving general assistance contribute to shelter expenses, the Bureau shall prorate the actual shelter cost, but the amount in the payment for shelter will not exceed the amount in the Bureau standard of assistance for shelter, or if not identifiable, the prorated amount, in addition to other needs, cannot exceed the total amount in the standard for individuals or households in similar circumstances.

(3) The Bureau will round the payment down to the next lower whole dollar;

(4) In no case shall the Bureau provide retroactive payments of general assistance for any period prior to the date of application for assistance.

(i) An applicant or recipient must actively seek employment, including use of available Bureau-funded employment assistance services. The individual is also required to accept available local employment. An individual who does not comply will not be eligible for general assistance. These requirements do not apply to:

(1) A person under the age of 16 years;

(2) A full-time student under the age of 19 who is attending an elementary or secondary school or vocational or technical school equivalent to a secondary school;

(3) A person suffering from an illness, when determined on the basis of medical evidence or on another sound basis that the individual's illness or injury is serious enough to temporarily prevent entry into employment;

(4) An incapacitated person when verified that a physical or mental impairment, determined by a physician or licensed or certified psychologist, by itself or in conjunction with age, prevents the individual from engaging in employment;

(5) A person responsible for a person in the home who has a verified physical or mental impairment that requires the individual in the home on a substantially continuous basis, and there is no other appropriate household member available;

(6) A parent or other individual who personally provides full time care of a child under the age of 6;

(7) A parent of a minor living in the household if the other parent is not exempt from seeking or accepting employment;

(8) A person who is working 30 hours or more per week in unsubsidized employment expected to last a minimum of 30 days. This exemption continues to apply if there is a temporary break in full-time employment expected to last no longer than 10 work days;

(9) A person for whom employment is not accessible in a commuting time that is reasonable and comparable with others in similar circumstances.

Where the tribe administers a Tribal Work Experience Program (TWEP), the nonexempt individual shall be available to participate. However, participation does not relieve the individual from seeking or accepting employment. Individuals not exempt under one of the preceding clauses of this section must, in seeking employment, provide evidence of efforts to obtain employment.

John W. Fritz,

Deputy Assistant Secretary—Indian Affairs.

LIST OF PUBLIC LAWS

Last List July 25, 1985

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

H.J. Res. 342/Pub. L. 99–71
Making an urgent supplemental appropriation for the fiscal year ending September 30, 1985, for the Department of Agriculture. (July 24, 1985; 99 Stat. 169)
Price: $1.00

S.J. Res. 40/Pub. L. 99–72
To designate the month of October 1985 as "National Down's Syndrome Month". (July 24, 1985; 99 Stat. 170)
Price: $1.00

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 50, No. 145
Monday, July 29, 1985

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 85-CE-14-AD; Amdt. 39-5107]

Airworthiness Directives; Pilatus Aircraft Ltd., and Fairchild-Hiller Model PC-6 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to Pilatus Aircraft Ltd., Model PC-6 Porter and Turbo-Porter (up to and including Serial Number 844) and Fairchild-Hiller Model PC-6 (Serial Numbers 2001 up to and including 2092) airplanes which requires inspection for cracks in the areas adjacent to the vertical stabilizer rudder hinge attachment points, horizontal stabilizer elevator bearing bracket attachment points and the horizontal stabilizer front spar rectangular cutout. Pilatus Aircraft Ltd. has received reports of cracks being found in those areas. Inspection of these areas on the vertical and horizontal stabilizers will insure the contained control system integrity and thus prevent the possible loss of airplane control.

EFFECTIVE DATE: August 31, 1985.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Pilatus Aircraft Ltd. Service Bulletins (S/B) No. 142 dated December, 1984, S/B No. 143 dated December, 1984, and S/B No. 144 dated December, 1984, applicable to this AD may be obtained from Pilatus Aircraft Ltd., CH6370-Stans, Switzerland. Fairchild-Republic (formerly Fairchild-Hiller) Service Letters PC6–55–2, dated April 9, 1985, PC6–55–3, dated April 9, 1985, and PC6–55–4, dated April 9, 1985, applicable to this AD may be obtained from Fairchild-Republic Corporation, Showalter Road, Hagerstown, Maryland 21740. A copy of this information is also contained in the Rules Docket, FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. H. Chimerine, Aircraft Certification Staff, AEU–100, Europe, Africa and Middle East Office, FAA c/o American Embassy, 1000 Brussels, Belgium; Telephone 513.38.30; or Mr. H.C. Belderok, Foreign FAR 23 Section, Federal Aviation Administration, ACE–109, 601 East 12th Street, Kansas City, Missouri 64106; Telephone (816) 374–6932.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD requiring inspection for: (a) Cracked Left Hand (LH) and Right Hand (RH) cap angles adjacent to the rudder hinge attachment points on the vertical stabilizer; (b) cracked upper and lower cap angles adjacent to the elevator bearing bracket attachment points of the horizonal stabilizer; and (c) cracks propagating from the corners, in particular the upper corners, of the rectangular cutout in the front spar of the horizontal stabilizer adjacent to the elevator control cables pulley assembly on certain Model PC–6 airplanes was published in the **Federal Register** on May 16, 1985 (50 FR 20430). The proposal resulted because both Pilatus Aircraft Ltd. and Fairchild-Republic (formerly Fairchild-Hiller) who manufactured PC–6 model airplanes under license from Pilatus, has received reports of cracks in the above described areas. Inspection of these areas on the vertical and horizontal stabilizers will insure the continued control system integrity and thus prevent the possible loss of airplane control.

The Swiss Federal Office of Civil Aviation (FOA), who has responsibility and authority to maintain the continuing airworthiness of these airplanes in Switzerland, classified these Service Bulletins and the actions recommended therein by the manufacturer as mandatory to assure the continued airworthiness of the affected airplanes.

On airplanes operated under Swiss registration, this action has the same effect as an AD on airplanes certificated for operation in the United States. The FAA relies upon the certification of the FOA combined with FAA review of pertinent documentation in finding compliance of the design of these airplanes with the applicable United States airworthiness requirements and the airworthiness and conformity of products of this design certificated for operation in the United States.

The FAA examined the available information related to the issuance of S/B Nos. 142, 143 and 144 all dated December, 1984 (Fairchild-Republic Service Letters PC6–55–2, PC6–55–3 and PC6–55–4 are the U.S. equivalent) and the mandatory classification of these Service Bulletins by the FOA and concluded that the condition addressed by these Service Bulletins is an unsafe one that may exist on other airplanes of this type certificated for operation in the United States. Accordingly, the FAA proposed an amendment to Part 39 of the FAR to include an AD on this subject. Interested persons have been afforded an opportunity to comment on the proposal.

No comments of objections were received on the proposal or the FAA determination of the related cost to the public. Accordingly, the proposal is adopted without change.

The FAA has determined that this regulation involves 22 (11 Swiss and 11 U.S.) airplanes at an approximate fleet cost of $4,235 ($192.50 per airplane based upon 5.5 manhours for the inspection @ $35/manhour for each airplane). This cost is so small that compliance with the directive will not have a significant financial impact on any small entities owning affected airplanes. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

Air transportation, Aviation safety, Aircraft, Safety.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new AD:

Pilatus Aircraft, Ltd., and Fairchild-Hiller: Applies to Model(s) PC-6 (S/N 1 to and including 844, and S/N 2001 to and including 2092) airplanes certificated in any category.

Note.—Service Bulletin (S/B Numbers (No.) 142, 143, and 144 all dated December, 1984, are applicable to Pilatus Aircraft Ltd., built airplanes which are identified by Serial Numbers (S/N) below 1000, and Service Letters (S/L) PC6-55-2, PC6-55-3 and PC6-55-4 all dated April 9, 1985, are applicable to Fairchild-Hiller built airplanes which are identified by S/N's above 2000.

COMPLIANCE: Required as indicated after the effective date of this AD, unless already accomplished.

To prevent a possible loss of airplane control, accomplish the following:

(a) Within the next 25 hours time-in-service (TIS) after the effective effectie date of this AD:

(1) On airplanes S/N 1 to and including 826 and 2001 to and including 2092 (except 524, 676, 707, 710 and 816), perform the required inspection and corrective action if needed in accordance with paragraph (b), (c) and (d) of this AD, and

(2) On airplanes S/N 827 to and including 844 perform the required inspection and corrective action if needed in accordance with paragraph (d) of this AD.

(b) Using a dye penetrant test method, inspect the Left Hand and Right Hand cap angles adjacent to the rudder hinge attachment points on the vertical stabilizer for cracks, in accordance with S/B No. 142 Section 2, "ACCOMPLISHMENT INSTRUCTIONS", PARAGRAPH (para.) A "INSPECTION" OR S/L PC6-55-2.

If cracks are found, prior to further flight replace the defective cap angle and modify the vertical stabilizer in accordance with S/B No. 142, Section 2, "ACCOMPLISHMENT INSTRUCTIONS" para. B "MODIFICATION", or S/L PC6-55-2.

(c) Using a dye penetrant test method inspect the upper and lower cap angles adjacent to the elevator bearing bracket attachment points on the horizontal stabilizer in accordance with S/B No. 143, Section 2 "ACCOMPLISHMENT INSTRUCTIONS", para. A "INSPECTION", or S/L PC6-55-3.

(1) If cracks are found, prior to farther flight, repair in accordance with the repair scheme of S/B No. 143 or S/L PC6-55-3, and in addition;

(2) If the bolt hole is less than 0.120 inches (in.) (3mm) from the edge of the cap angle, modify the horizontal stabilizer prior to further flight in accordance with S/B No. 143, Section 2 "ACCOMPLISHMENT INSTRUCTIONS", para. B "MODIFICATION" or S/L PC6-55-3.

(d) Visually inspect the area around the rectangular cutout located in the front spar of the horizontal stabilizer, adjacent to the elevator control cables pulley assembly, in accordance with S/B No. 144, Section 2 "ACCOMPLISHMENT OF INSTRUCTIONS", para. B "CRACK INSPECTION", or S/B PC6-55-4. If cracks are found and;

(1) If no crack is longer than 0.20 inches (5mm) install within the next 50 hours TIS standard repair plate [P/N 113.45.06.027] in accordance with S/B No. 144, Section 2 "ACCOMPLISHMENT INSTRUCTIONS", para. D "INSTALLATION OF STANDARD REPAIR PLATE" or S/L PC6-55-4.

(2) If any crack is longer than 0.20 inches (5mm) but less than 0.60 inches (20mm), prior to further flight install standard repair plate (P/N 113.45.06.027) in accordance with para. (d)(1) of this AD.

(3) If any crack is longer than 0.60 inches (20mm), prior to further flight repair the horizontal stabilizer in accordance with S/B No. 144, Section 2 "ACCOMPLISHMENT INSTRUCTIONS", para. C "SPECIAL PROCEDURES" or S/L PC6-55-4.

(e) Each 100 hours TIS after the initial inspection:

(1) On airplanes S/N 1 to and including 826 and 2001 to and including 2092 (except 524, 676, 707, 710 and 816) repeat the inspection required by para. (b) of this AD, until the modification described in S/B No. 142, para. 2.B "MODIFICATION" or S/L PC6-55-2 is complied with, at which time this repetitive inspection is no longer required.

(2) On airplanes S/N 1 to and including 844 and S/N 2001 to and including 2092, repeat the inspection required by para. (d) of this AD.

(f) The intervals between the repetitive 100 hours TIS inspections required by para. (e) of this AD may be adjusted up to 10 per cent of the specified interval to allow accomplishment of these inspections concurrent with other scheduled maintenance of the airplane.

(g) Aircraft may be flown in accordance with Federal Aviation Regulation 21.197 to a location where this AD can be accomplished.

(h) An equivalent method of compliance with this AD, if used, must be approved by the Manager, Aircraft Certification Staff, AEU-100, Europe, Africa, and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium.

All persons affected by this directive may obtain copies of the documents referred to herein upon request to Pilatus Aircraft, Ltd., CH6370-Stans, Switzerland, or Fairchild-Republic Corp., Showalter Road, Hagerstown, Maryland 21740, or FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment becomes effective on August 31, 1985.

Issued in Kansas City, Missouri, on July 17, 1985.

William H. Pollard,
Acting Director, Central Region.

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 85-AWP-7]

Amendment to the Santa Barbara, California, Transition Area Description

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: An amendment to the existing description of the Santa Barbara Municipal Airport (lat. 34°25'35" N., long. 119°50'20" W.) Transition Area is necessary to provide a correction in the legal description. This action will provide only editorial amendments to reference points used in the description to provide a contiguous border with Restricted Area R2517.

EFFECTIVE DATE: 0901 G.m.t., September 26, 1985.

FOR FURTHER INFORMATION CONTACT: Curtis Alms, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, Hawthorne, California 90261; telephone number (213) 536-6649.

History

On April 3, 1985, the Federal Aviation Administration published an amendment to §71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) which revised the description of the Santa Barbara, California, Transition Area. (50 FR 13186). An error in that description has since been identified, in that coordinates along the contiguous border with Restricted Area R2517 were not the same as those used in the description of R2517. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6 dated January 2, 1985.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) will correct the coordinates of the legal description to provide a border consistent with the eastern edge of Restricted Area R2517.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in CFR Part 71

Control zones, Transition areas.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a) and 1354(a); 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Santa Barbara, California

Transition Area—[Revised]

"That airspace extending upward from 700 feet above the surface within 2 miles each side of the Santa Barbara ILS localizer west course, extending from a point lat. 34°25'31" N., long. 119°57'29" W. to 2 miles west of that point, between the arcs of a 5-mile radius circle and 8.5-mile radius circle centered on the Santa Barbara Municipal Airport (lat. 34°25'35" N., long. 119°50'20" W.), extending clockwise from a line 2 miles north of the 089° bearing from the Santa Barbara LMM to a line 2.5 miles south of the 115° bearing from the LMM; and within 2 miles east and 7 miles west of the Santa Barbara VORTAC 196° radial, extending from a 5-mile radius circle centered on the Santa Barbara Municipal Airport to 15.5 miles south of the VORTAC; and that airspace extending upward from 1,200 feet above the surface bounded by a line beginning at lat. 35°35'00" N., long. 120°05'00" W.; to lat. 35°05'00" N., long. 120°05'00" W.; to lat. 35°05'00" N., long. 119°30'00" W.; to lat. 34°20'00" N., long. 119°30'00" W.; to lat. 34°20'00" N., long. 120°00'00" W.; to lat. 34°08'00" N., long. 120°00'00" W.; to lat. 34°08'00" N., long. 120°26'00" W.; to lat. 34°08'15" N., long. 120°30'00" W.; to lat. 34°24'00" N., long. 120°30'00" W.; to lat. 34°25'00" N., long. 120°27'00" W.; to lat. 34°35'00" N., long. 120°32'00" W.; to lat. 34°38'35" N., long. 120°31'20" W.; to lat. 34°42'00" N., long. 120°30'00" W.; to lat. 34°46'00" N., long. 120°27'00" W.; to 34°50'00" N., long. 120°32'00" W.; to lat. 35°00'00" N., long. 120°42'00" W.; to lat. 35°10'00" N., long. 120°56'00" W.; to lat. 35°21'00" N., long. 121°03'00" W.; to lat 35°33'00" W., to lat 121°08'00" W.; to lat. 35°33'00" N., long. 120°40'30" W.; to lat. 35°22'25" N., long. 120°31'30" W.; to lat. 35°31'40" N., long. 120°15'00" W.; to lat. 35°35'35" N., long. 120°18'10" W.; thence to the point of beginning."

Issued in Los Angeles, California on July 12, 1985.

H.C. McClure,
Director, Western-Pacific Region.

BILLING CODE 4910-13-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 154, 270, and 273

[Docket No. RM83-53-001]

Obligations of Sellers and Purchasers of First-Sale Natural Gas for Refunds Owed for Collections in Excess of Maximum Lawful Prices Under the Natural Gas Policy Act of 1978

Issued July 24, 1985.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order Granting Rehearing for Purposes of Further Consideration.

SUMMARY: On May 30, 1985, the Federal Energy Regulatory Commission issued a final rule which, among other things, permits the use of billing adjustments to recover interim collection refunds under 18 CFR 273.302 (1984). In this order, the Commission grants rehearing of its decision solely for the purpose of further consideration.

EFFECTIVE DATE: July 24, 1985.

FOR FURTHER INFORMATION CONTACT: Richard Howe, Jr., Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 (202) 357-8308.

SUPPLEMENTARY INFORMATION:

Before Commissioners: Raymond J. O'Connor, Chairman; A. G. Sousa and Charles G. Stalon.

In the matter of Obligations of Sellers and Purchasers of First-Sale Natural Gas for Refunds Owed for Collections in Excess of Maximum Lawful Prices Under the Natural Gas Policy Act of 1978, Docket No. RM83-53-001.

Issued July 24, 1985.

On May 30, 1985, the Commission issued its Order No. 423, 50 FR 23669 (June 5, 1985), amending its regulations to permit purchasers to use billing adjustments to recover interim collection refunds under 18 CFR 273.302 (1984). On June 27, 1985, Tennessee Gas Pipeline Company filed a request for rehearing of that order.

In order to afford additional time for consideration of the issues raised in the request for rehearing, the Commission grants rehearing of Order No. 423 for the limited purpose of further consideration.

This Order is effective on the date of issuance. This action does not constitute a grant or denial of the petition on its merits, either in whole or part. As provided in Rule 713(d) of the Commission's Rules of Practice and Procedure, no answers to the request for rehearing are permitted because this order does not grant rehearing on any substantive issue.

By the Commission.

Kenneth F. Plumb,
Secretary.

18 CFR Part 271

[Docket No. RM79-76-221 (Louisiana—6 Addition) Order No. 424]

High-Cost Gas Produced From Tight Formations; Louisiana

Issued July 24, 1985.

AGENCY: Federal Energy Regulatory Commission, Energy.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703 (1984)). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This order adopts the recommendation of the State of Louisiana Office of Conservation that an additional area of the Smackover "C" Zone in the East Dykesville Field in Webster Parish, Louisiana, be designated as a tight formation.

EFFECTIVE DATE: This rule is effective August 23, 1985.

FOR FURTHER INFORMATION CONTACT: W. Thomas Rosemond, Jr., Office of the

General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, (202) 357-8033.

SUPPLEMENTARY INFORMATION:

(68) *Smackover C Zone in Louisiana.* RM79-76-221 (Louisiana 5 and 5 Addition)

(CDB): FDA is revising § 5.31 *Petitions under Part 10* (21 CFR 5.31) and § 5.80

for those drug products listed in § 314.440(b), are authorized to issue responses to citizen petitions submitted

uses already approved for the marketed product(s):

ACTION: Final rule.

SUMMARY: The Food and Drug

General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 (202) 357-9118.

SUPPLEMENTARY INFORMATION:

Before Commissioners: Raymond J. O'Connor, Chairman; A. G. Sousa and Charles G. Stalon.

Final Rule

The Commission hereby amends § 271.703(d) of its regulations to include an additional area of the Smackover "C" Zone in the East Dykesville Field in Webster Parish, Louisiana, as a designated tight formation eligible for incentive pricing under 18 CFR 271.703. The amendment is based on a recommendation of the State of Louisiana Office of Conservation (Louisiana) submitted to the Commission on November 9, 1983. Notice of the proposal was published in the **Federal Register** on January 5, 1984 (49 FR 644). No comments were filed in response to the notice and no public hearing was requested.

Evidence submitted by Louisiana supports the assertion that the additional area of the Smackover "C" Zone in the East Dykesville Field in Webster Parish, Louisiana, meets the guidelines contained in § 271.703(c)(2) of the Commission's regulations. Accordingly, the Commission adopts Louisiana's recommendation.

This amendment shall become effective August 23, 1985.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

In consideration of the foregoing, Part 271 of Subchapter H, Chapter I, *Code of Federal Regulations*, is amended as set forth below.

By the Commission.

Kenneth F. Plumb,

Secretary.

PART 271—[AMENDED]

Section 271.703 is amended as follows:

1. The authority citation for Part 271 continues to read as follows:

Authority: Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.*; Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432; Administrative Procedures Act, 5 U.S.C. 553.

2. Section 271.703 is amended by revising paragraph (d)(68) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(68) *Smackover C Zone in Louisiana.* RM79–76–221 (Louisiana 5 and 5 Addition).

(i) *Delineation of formation.* The Smackover C Zone is found within the East Dykesville Field in Clairborne and Webster Parishes, Louisiana, in the area of Township 22 North, Range 8 West, Sections 3–10, 15–18; Township 22 North, Range 9 West, Sections 1–18; Township 23 North, Range 8 West, Sections 30–34; and Township 23 North, Range 9 West, Sections 25–36.

(ii) *Depth.* The Smackover C Zone occurs between the measured depths of 11,290 feet and 11,340 feet on the induction electrical log of the Wheless Industries—Pelto Oil—Guy Lewis *et al.* No. 1 well and between 11,534 feet and 11,568 on the electric log of the Cities Service Oil and Gas Corporation—Hearn No. 1 well.

BILLING CODE 6717-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 5

Delegations of Authority and Organization; New Drug Applications and Biological Product Licenses

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the regulations for delegations of authority relating to new drug applications (NDA's) and petitions according to the NDA regulations. In addition, FDA is amending the regulations to redelegate authority to issue notices of opportunity for a hearing on proposals to deny issuance of or to revoke licenses for biological products and to issue certain notices of revocation of licenses.

EFFECTIVE DATE: July 29, 1985.

FOR FURTHER INFORMATION CONTACT: Melissa M. Moncavage, Office of Management and Operations (HFA–340), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4976.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of February 22, 1985 (50 FR 7452), FDA issued revised regulations for NDA submissions. Under the new regulations, new drug applications and abbreviated new drug applications for drugs listed in § 314.440(b) shall be submitted directly to the Office of Biologics Research and Review, Center for Drugs and Biologics (CDB). FDA is revising § 5.31 *Petitions under Part 10* (21 CFR 5.31) and § 5.80 *Approval of new drug applications and their supplements* (21 CFR 5.80) to clarify who has authority to act on related matters concerning drugs listed in § 314.440(b).

Because the new drug regulations were recently revised, FDA is also correcting the citations to the NDA regulations in § 5.82 *Issuance of notices relating to proposals to refuse approval or to withdraw approval of new drug applications and their supplements* (21 CFR 5.82).

Additionally, FDA is adding new § 5.67 *Issuance of notices of opportunity for a hearing on proposals for denial of approval of applications for licenses or revocation of licenses, and certain notices of revocation of licenses* to redelegate to the Director and Deputy Director, CDB, authority to issue notices of opportunity for a hearing under Part 12 on proposals to deny issuance of, or revoke, licenses for biological products issued by FDA under section 351 of the Public Health Service Act (42 U.S.C. 262). Authority has also been redelegated to the Director and Deputy Director, CDB, to issue notices of revocation of licenses when manufacturers have requested such revocation.

Further redelegation of the authority delegated is not authorized. Authority delegated to a position by title may be exercised by a person officially designated to serve in such position in an acting capacity or on a temporary basis.

List of Subjects in 21 CFR Part 5

Authority delegations (Government agencies), Organization and functions (Government agencies).

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 5 is amended as follows:

PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

1. The authority citation for 21 CFR Part 5 continues to read as follows:

Authority: Sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a)); 21 CFR 5.10.

2. In § 5.31 by revising paragraph (f)(2) and adding new paragraph (f)(3), to read as follows:

§ 5.31 Petitions under Part 10.

* * * * *

(f) * * *

(2) The Director and Deputy Director, Office of Drug Standards, CDB, except for those drug products listed in § 314.440(b), are authorized to issue responses to citizen petitions submitted under § 10.30 of this chapter seeking a determination of the suitability of an abbreviated new drug application for a drug product.

(3) The Director and Deputy Director, Office of Biologics Research and Review, CDB, for those drug products listed in § 314.440(b), are authorized to issue responses to citizens petitions submitted under § 10.30 of this chapter seeking a determination of the suitability of an abbreviated new drug application for a drug product.

3. By adding new § 5.67, to read as follows:

§ 5.67 Issuance of notices of opportunity for a hearing on proposals for denial of approval of applications for licenses or revocation of licenses and certain notices of revocation of licenses.

The Director and Deputy Director, Center for Drugs and Biologics, are authorized to issue:

(a) Notices of opportunity for a hearing on proposals to deny approval or filing of applications for establishment or product licenses under § 601.4(b) of this chapter.

(b) Notices of opportunity for a hearing on proposals to revoke establishment or product licenses under § 601.5(b) of this chapter.

(c) Notices of revocation, at the manufacturer's request, of establishment or product licenses under §§ 601.5(a) and 601.8 of this chapter.

4. In § 5.80 by revising the introductory text of paragraph (b) and by revising paragraphs (c) (1) and (2), to read as follows:

§ 5.80 Approval of new drug applications and their supplements.

* * * * *

(b) The following officials, for drugs under their jurisdiction, are authorized to perform all functions of the Commissioner of Food and Drugs with regard to approval of supplemental applications to approved new drug applications for drugs for human use that have been submitted under § 314.70 of this chapter and new drug applications for drug products that contain the identical active drug ingredient (e.g., the same salt of the same therapeutic moiety), or identical combination of active drug ingredients in the same dosage form and strength, of an approved drug product already marketed in the United States by another firm, and that has, in its labeling, at least some of the therapeutic uses already approved for the marketed product(s):

* * * * *

(c) The following officials are authorized to perform all of the functions of the Commissioner of Food and Drugs with regard to approval of abbreviated new drug applications and supplements thereto for drugs for human use and new drug applications for drugs with a 5C classification whose clinical safety and efficacy may be supported by appropriate literature citations in view of submission of data from original proprietary studies:

(1) For drugs submitted under §§ 314.50, 314.55, and 314.70 of this chapter, except for those drug products listed in § 314.440(b):

(i) The Director and Deputy Director, Office of Drug Standards, CDB.

(ii) The Director and Deputy Director, Division of Generic Drugs, Office of Drug Standards, CDB.

(2)(i) For drug products listed in § 314.440(b) and submitted under §§ 314.50, 314.55, and 314.70 of this chapter:

(ii) The Director and Deputy Director, Office of Biologics Research and Review, CDB.

* * * * *

5. By revising § 5.82, to read as follows:

§ 5.82 Issuance of notices relating to proposals to refuse approval or to withdraw approval of new drug applications and their supplements.

The Director and Deputy Director, Center for Drugs and Biologics, are authorized to issue notices of an opportunity for a hearing on proposals to refuse approval or to withdraw approval of new drug applications and abbreviated new drug applications and supplements thereto on drugs for human use that have been submitted under section 505 of the Federal Food, Drug, and Cosmetic Act and Subpart B of Part 314 of this chapter, and to issue notices refusing approval or withdrawing approval when opportunity for hearing has been waived.

Dated: July 22, 1985.

Mervia H. Shumate,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

---

21 CFR Part 74

[Docket No. 84N-0083]

Color Additives; D&C Blue No. 6

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the color additive regulations by removing the provision that bars the migration of D&C Blue No. 6 from sutures to the surrounding tissues under conditions of use. FDA is taking this action because the restriction is not necessary to assure the safety or suitability of the use of D&C Blue No. 6 in sutures.

DATES: Effective August 29, 1985, except as to any provisions that may be stayed by the filing of proper objections; objections by August 28, 1985.

ADDRESS: Written objections may be sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Blondell Anderson, Center for Food Safety and Applied Nutrition (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5740.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of July 25, 1984 (49 FR 29970), FDA proposed that 21 CFR Part 74 be amended in § 74.3106 *D&C Blue No. 6* by removing paragraph (c)(3). That paragraph contains the provision that bars the migration of D&C Blue No. 6 from a suture to the surrounding tissues under conditions of use. FDA is taking this action because the restriction is not necessary to assure the safety or suitability of the use of D&C Blue No. 6 in sutures. Also, the restriction is ambiguous when referring to absorbable sutures.

In the proposed rule, FDA gave interested persons until September 24, 1984, to file comments. The agency did not receive any comments on the proposed rule. Therefore, FDA is publishing the final rule without change.

The agency has previously considered the environmental effects of this rule as announced in the proposed rule (July 25, 1984; 49 FR 29970). No new information or comments have been received that would affect the agency's previous determination that there is no significant impact on the human environment and that an environmental impact statement is not required.

In accordance with the Regulatory Flexibility Act, the agency previously considered the potentiel effects that this rule would have on small entities, including small businesses. In accordance with section 605(b) of the Regulatory Flexibility Act, the agency has determined that no significant impact on a substantial number of small

entities would derive from this action. FDA has not received any new information or comments that would

21 CFR Part 808

[Docket No. 83P-0125]

nationwide regulatory policy would be more effective and would better serve the needs of the hearing impaired than

possible benefit to children from such a requirement outweighs the possible

in effect while preempting other parts of that regulation.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

entities would derive from this action. FDA has not received any new information or comments that would alter its previous determination.

Any person who will be adversely affected by this regulation may at any time on or before August 28, 1985, file with the Dockets Management Branch (address above) written objections thereto. Objections shall show wherein the person filing will be adversely affected by the regulation, specify with particularity the provisions of the regulation deemed objectionable, and state the grounds for the objections. Objections shall be filed in accordance with the requirements of 21 CFR 71.30. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Three copies of all documents shall be filed and should be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday. Notice of the filing of objections or lack thereof will be given by publication in the Federal Register.

List of Subjects in 21 CFR Part 74

Color additives, Cosmetics, Drugs, Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 74 is amended as follows:

PART 74—LISTING OF COLOR ADDITIVES SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR Part 74 continues to read as follows:

Authority: Secs. 701, 706, 52 Stat. 1055–1056 as amended, 74 Stat. 399–407 as amended (21 U.S.C. 371, 376); 21 CFR 5.10.

§ 74.3106 [Amended]

2. In § 74.3106 *D&C Blue No. 6* by removing paragraph (c)(3).

Dated: July 22, 1985.

Mervin H. Shumate,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160–01–M

21 CFR Part 808

[Docket No. 83P–0125]

Medical Devices; Application for Exemption From Federal Preemption of State and Local Hearing Aid Requirements

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is granting exemption from Federal preemption for certain of Hawaii's hearing aid device requirements and denying exemption for other of its requirements. This action responds to an application from the government of Hawaii.

EFFECTIVE DATE: August 28, 1985.

FOR FURTHER INFORMATION CONTACT: Les Weinstein, Center for Devices and Radiological Health (HFZ–84), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4874.

SUPPLEMENTARY INFORMATION: In the Federal Register of October 1, 1984 (49 FR 38646), FDA published a proposed rule responding to an application from Hawaii for exemption from Federal preemption of certain of Hawaii's hearing aid device requirements. Interested persons were given until November 30, 1984, to submit written comments on the proposal. In the same issue of that Federal Register (49 FR 38645), FDA issued a notice providing an opportunity for interested persons to request an oral hearing.

Although FDA received two written comments on the proposal, the agency did not receive any requests for an oral hearing.

As noted in the preamble to the October 1, 1984 proposal, the agency published a final rule in the Federal Register of October 10, 1980 (45 FR 67326), responding to applications from 18 other States and the District of Columbia for exemption from preemption of their hearing aid requirements. Some of the issues raised in that proceeding are similar to the issues raised in the comments received on this rule. The agency therefore refers interested persons to the preamble to the Octobr 10, 1980 final rule for a more detailed discussion of these issues, and incorporates that discussion by reference herein.

1. Both comments received on the October 1, 1984 proposal stated that the current Federal hearing aid device requirements are satisfactory and that exemptions from the current requirements should not be granted to Hawaii or to any other State. Both comments also stated that a uniform nationwide regulatory policy would be more effective and would better serve the needs of the hearing impaired than would various State policies.

FDA disagrees with these commments. The agency does not believe that the effectiveness of the Federal requirements will be compromised by granting exemptions from preemption of State and local hearing aid requirements. Furthermore, the agency does not believe that the needs of the hearing impaired will be compromised by granting States selected exemptions from preemption of State and local hearing aid requirements.

2. One comment specifically supported FDA's proposal to deny exemption from preemption of the provision in §14.1, subsection (a) of chapter 451A of the Hawaii Revised Statutes, requiring medical evaluation without providing for a waiver of that requirement by the user.

Although FDA believes that, before purchasing a hearing aid, all prospective hearing aid users should obtain a medical evaluation to ensure that the organic causes of hearing loss are diagnosed and treated properly, the agency believes that any informed adult who objects to medical evaluation for personal reasons should be permitted to waive the medical evaluation requirement. Therefore, FDA denies exemption from preemption of the Hawaii provision failing to permit waiver of the medical evaluation.

3. One comment objected to FDA's proposal to grant exemption from preemption of that portion of § 14.1, subsection (a) of chapter 451A of the Hawaii Revised Statutes which prohibits the sale of a hearing aid to a child under the age of 10 who does not have written authorization from an otorhinolaryngologist. The comment argued that requiring authorization from an otorhinolaryngologist would: (a) Create a burdensome and expensive impediment to the receipt of proper and timely hearing health care by certain minors residing in Hawaii, and (2) irrationally divide minors within the State into two distinct groups and subject them to different requirements in connection with the sale of a hearing aid.

FDA disagrees with the comment. As noted in the preamble to the October 10, 1980 final rule, FDA believes that hearing loss in children can be treated medically or surgically more often than in adults and that otorhinolaryngologists are more knowledgeable about such treatment than are other physicians. FDA continues to believe that the possible benefit to children from such a requirement outweighs the possible burden and expense of locating an otorhinolaryngologist. FDA notes that the comment did not provide any data to substantiate its arguments not did it include any basis for FDA to change its belief that mandatory audiological evaluation of a minor will serve an important public health purpose (45 FR 67330).

4. One comment specifically supported FDA's proposal to deny exemption from preemption for the Hawaii provision requiring that medical authorization be signed within 90 days prior to the sale of a hearing aid.

Section 801.421 of FDA's regulation provides that the medical evaluation shall have taken place within the preceding 6 months. FDA concludes that the 3-month time limit specified in § 14.1, subsection (b) of chapter 451A of the Hawaii Revised Statutes should not be exempted from preemption for the reasons stated in the preamble to the proposed rule. See 49 FR 38647, October 1, 1984.

5. One comment objected to FDA's proposal to grant exemption from preemption for § 14.1, subsection (c) of chapter 451A of the Hawaii Revised Statutes, which requires hearing aid dispensers to keep the physician's written authorization on file for 5 years. The comment argued that this extended recordkeeping is unjustified.

FDA disagrees with the comment and is exempting subsection (c) from preemption. Hawaii's requirement is more stringent than the provisions in § 801.421(d) of FDA's regulations governing conditions for sale of hearing aid devices (21 CFR 801.421(d)). Section 801.421(d) requires dispensers to maintain copies of medical clearance statements for only 3 years. FDA concludes that the more stringent requirement will assist Hawaii in enforcing its statute.

Executive Order 12291

FDA has carefully reviewed the final rule under Executive Order 12291 and concludes that it does not meet any of the criteria of a major regulation. Therefore, a regulatory impact analysis is not required. The rule merely applies Part 808 of the regulations to an application from the government of Hawaii. The rule does not impose any new Federal requirements on any person. Similarly, no new requirements are established at the State level because the rule allows part of an existing Hawaiian regulation to remain in effect while preempting other parts of that regulation.

Regulatory Flexibility Act

FDA certifies that the final rule will not have a significant economic impact on a substantial number of small entities because it does not impose any new requirements on any person. Therefore, a regulatory flexibility anaylsis, as provided in the Regulatory Flexibility Act, is not required.

List of Subjects in 21 CFR Part 808

Exemption of specific State requirements, Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 808 is amended as follows:

PART 808—EXEMPTIONS FROM FEDERAL PREEMPTION OF STATE AND LOCAL MEDICAL DEVICE REQUIREMENTS

1. The authority citation for Part 808 is revised to read as follows:

Authority: Secs. 521, 701, 52 Stat. 1055–1056 as amended, 90 Stat. 574 (21 U.S.C. 360k, 371); 21 CFR 5.10.

2. In Subpart C by adding new § 808.61, to read as follows:

§ 808.61 Hawaii.

(a) The following Hawaii medical device requirements are enforceable notwithstanding section 521 of the act, because the Food and Drug Administration has exempted them from preemption under section 521(b) of the act: Hawaii Revised Statutes, chapter 451A, § 14.1(a) with respect to medical examination of a child 10 years of age or under, and subsection (c).

(b) The following Hawaii medical device requirements are preempted by section 521(a) of the act, and the Food and Drug Administration has denied them exemption from preemption: Hawaii Revised Statues, chapter 451A, § 14.1(a) to the extent that it requires a written authorization by a physician and does not allow adults to waive this requirement for personal, as well as religious reasons, and subsection (b).

Dated: June 26, 1985.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160–01–M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1620

Investigations and Compliance Assistance

AGENCY: Equal Employment Opportunity Commission.

ACTION: Final Rule; amendment.

SUMMARY: The Equal Employment Opportunity Commission hereby amends 29 CFR 1620.19(c) to insert the words, "in confidence," following the phrase, ". . . persons giving information . . ." The purpose of the amendment is to make confidentiality policy under the Equal Pay Act (EPA) (29 U.S.C. 206(d)) consistent with the policy utilized by the Commission under Title VII of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000e et seq.), and the Age Discrimination in Employment Act (29 U.S.C. 621, et seq). The amendment changes the Commission's confidentiality policy under the EPA from one where witnesses and complainants are *automotically* granted confidentiality to one where complainants and witnesses may *elect* to keep their identity and identifying details confidential.

EFFECTIVE DATE: July 29, 1985.

FOR FURTHER INFORMATION CONTACT: Frederick W. Ford, Staff Attorney, Office of Legal Counsel, Legal Services, EEOC, 2401 E Street, NW., Washington, D.C. 20507; telephone: (202) 634–6690.

SUPPLEMENTARY INFORMATION: At its meeting of June 4, 1985, the Commission voted to adopt a single consistent policy regarding the scope of confidentiality that the Commission will grant to charging parties, complainants, and witnesses during its investigation of charges and complaints filed under the three statutes that the Commission enforces, i.e., Title VII of the Civil Rights Act of 1964, 42 U.S.C. 2000e et seq., The Age Discrimination in Employment Act (ADEA), 29 U.S.C. 621 et seq., and the Equal Pay Act (EPA), 29 U.S.C. 206(d). The new policy is to notify charging parties, complainants and third party witnesses under all three statutes that they will be granted confidentiality upon request and, where confidentiality is requested, to provide a statement explaining the precise scope of that confidentiality.

Until adoption of the new policy, the Commission had utilized a policy of "selective," or "elective," confidentiality for charging parties and witnesses under Title VII and the ADEA. *See* 29 CFR 1601.7(a) and 29 CFR 1626.4 and

1626.15(b). That is, the Commission would not disclose the identity or

For the Commission.

Clarence Thomas,

State of Connecticut would not allow this event to be held. It was learned that

1. The authority citation for Part 100

(ii) $500 for the owner of a vessel

notice of this annual powerboat race by

VOL 50 ISS 145 JL 29 1985 UMI

1626.15(b). That is, the Commission would not disclose the identity or identifying details of persons providing information *in confidence* as to violations of the respective acts unless necessary in a court proceeding. Under Title VII and ADEA, the Commission provides confidentiality where it is requested or where it is necessary to secure information from a person. However, the Commission does not promise confidentiality automatically to all witnesses.

When the Commission published its Final Recordkeeping and Administrative Regulations under the Equal Pay Act, 29, CFR Part 1620 46 FR 4888 (January 19, 1981), following the transfer of EPA enforcement authority from the Department of Labor in 1979 [Reorganization Plan No. 1 of 1978, 43 FR 19807 (May 9, 1978) and E.O. 12144, 44 FR 37193 (June 26, 1979)], it adopted the confidentiality policy followed by the Department of Labor in equal pay cases. [See also, 44 FR 38671 (July 2, 1979)]. That policy *automatically* granted confidentiality to any person giving information on an EPA violation regardless of whether the person requested confidentiality or not. See 29 CFR 800.164.

The inconsistency between the EPA policy and the Title VII and ADEA policy has created difficulties for the Commission in investigating charges under the three statutes, especially in mixed cases containing charges under both the EPA and either Title VII or ADEA, resulting in confusion for both Commission investigators and witnesses regarding the application of confidential treatment. The amendment provides consistency between the three statutes by amending the EPA regulations to make clear that a charging party or witness' identity will be protected when that person gives information "in confidence," i.e., when the person requests confidentiality.

The Commission has determined that this document is not a significant rule and does not require a regulatory analysis under Executive Order 12291.

List of Subjects in 29 CFR Part 1620

Equal employment opportunity, Investigations, Penalities, Reporting and recordkeeping requirements, Sex discrimination, Wages.

Accordingly, § 1620.19(c) of Part 1620 of Title 29, Code of Federal Regulations is amended as set forth below.

Signed at Washington, D.C., this 12th day of July, 1985.

For the Commission.

Clarence Thomas,

Chairman, Equal Employment Opportunity Commission.

PART 1620—THE EQUAL PAY ACT

1. The authority citation for Part 1620 continues to read as follows:

Authority: Sec. 1–19, 52 Stat. 1060, as amended; Sec. 10, 61 Stat. 84; Pub. L. 88–38, 77 Stat. 56 [29 U.S.C. 201 et seq.]; sec. 1, Reorg. Plan. No. 1 of 1978, 43 FR 19807; Pub. L. 98–532; Executive Order No. 12144, 44 FR 37193.

2. 29 CFR Part 1620 is amended by revising § 1620.19(c) to read as follows:

§1620.19 Investigations and compliance assistance.

BILLING CODE 6570–06–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD3 85–28]

Special Local Regulations; Gateway Powerboat Regatta, Long Island Sound

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: Special Local Regulations are being adopted for the Gateway Powerboat Regatta. This powerboat race is sponsored by the Gateway Powerboat Association. The event will be held on August 3, 1985, on Long Island Sound, off Greenwich, Connecticut. This regulation is needed to provide for the safety of participants and spectators on navigable waters during this event.

EFFECTIVE DATES: This regulation becomes effective on August 3, 1985 from 11:00 a.m. to 2:30 p.m.

FOR FURTHER INFORMATION CONTACT: Mary J. Robinson, (212) 668–7974.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rule Making has not been published for this regulation and it is being made effective in less than 30 days from the date of publication. Following normal rulemaking procedures would have been impractical. The application to hold this event was not received until May 3, 1985. There was some concern that the State of Connecticut would not allow this event to be held. It was learned that the State law limiting noise levels is not applicable on Long Island Sound. There was not sufficient time remaining to publish proposed rules in advance of the event or to provide for a delayed effective date.

Drafting Information

The drafters of this regulation are LT D.R. Cilley, Project Officer, Third Coast Guard District Boating Safety Division, and Ms. MaryAnn Arisman, Project Attorney, Third Coast Guard District Legal Office.

Discussion of Regulations

The Gateway Powerboat Regatta is sponsored by the Gateway Powerboat Association of Greenwich, Connecticut. This powerboat race will be held on Long Island Sound in an area south of Greenwich, Connecticut. This event has been held for the past nine years and is consequently well known to boaters and residents in the area. This is the first year in which a special local regulation has been issued for this event. Approximately 40 powerboats ranging from 20 to 50 feet in length will race 6 laps around a 11 mile rectangular course at speeds between 75-110 miles per hour (mph). This National Power Boat Association (NPBA) sanctioned race will start at 12:00 noon. Race headquarters is located at the Showboat Inn in Greenwich Harbor. The race participants will transit to the race course area under Coast Guard escort at approximately 20 m.p.h. The race course area will be marked by sponsor provided patrol craft displaying orange day glow flags. Spectator vessels will be kept outside of the regulated area and a buffer zone will be maintained by the sponsor's 20+ patrol vessels. Coast Guard and local authority patrol vessels will also be on scene to help control this event. The Coast Guard will issue a safety voice broadcast to notify boaters of this event. The Coast Guard recommends that all vessels transiting the Sound use extreme caution and pass to the south of the regulated area. In order to provide for the safety of life and property on navigable waters, the Coast Guard will regulate the movement of vessels in this area during this event.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

Regulations

In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations, is amended as follows:

1. The authority citation for Part 100 continues to read as follows:

Authority: 33 U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

PART 100—[AMENDED]

2. Part 100 is amended by adding a temporary § 100.35–317 to read as follows:

§ 100.35–317 Gateway Powerboat Regatta, Long Island Sound.

(a) *Regulated Area:* Long Island Sound, off Greenwich, Connecticut in the rectangular area described by the following points:

Latitude: 40 degrees, 56 minutes, 33 seconds North
Longitude: 73 degrees, 37 minutes, 48 seconds West
Latitude: 40 degrees, 58 minutes, 08 seconds North
Longitude: 73 degrees, 32 minutes, 50 seconds West
Latitude: 40 degrees, 59 minutes, 45 seconds North
Longitude: 73 degrees, 33 minutes, 28 seconds West
Latitude: 40 degrees, 57 minutes, 35 seconds North
Longitude: 73 degrees, 38 minutes, 00 seconds West

(b) *Effective Period:* This regulation will be effective from 11:00 a.m. to 2:30 p.m. on August 3, 1985.

(c) *Special Local Regulations:*

(1) All persons or vessels not registered with the sponsor as participants or not part of the regatta patrol are considered spectators.

(2) The regulated area is closed to all spectators during the effective period.

(3) Race participants shall not exceed 20 mph when transiting between race headquarters and the regulated area.

(4) All spectator vessels shall remain at least 50 yards from the participants when they are transiting to or from the regulated area and the race headquarters.

(5) All persons and vessels shall comply with the instructions of U.S. Coast Guard patrol personnel. Upon hearing five or more blasts from a U.S. Coast Guard vessel, the operator of a vessel shall stop immediately and proceed as directed. U.S. Coast Guard patrol personnel include commissioned, warrant and petty officers of the Coast Guard. Members of the Coast Guard Auxiliary may be present to inform vessel operators of this regulation and other applicable laws.

(6) For any violation of this regulation, the following maximum penalties are authorized by law:

(i) $500 for any person in charge of the navigation of a vessel.

(ii) $500 for the owner of a vessel actually on board.

(iii) $250 for any other person.

(iv) Suspension or revocation of a license for a licensed officer.

Dated: July 18, 1985.

P. A. Yost,

Vice Admiral, U.S. Coast Guard Commander, Third Coast Guard District.

[FR Doc. 85–17899 Filed 7–26–85; 8:45 am]

BILLING CODE 4910–14–M

33 CFR Part 100

[CGD3 85–31]

REGATTA: National Sweepstakes Regatta, Redbank, NJ

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: Special Local Regulations are being adopted for the National Sweepstakes Reggata. The purpose of this regulation is to provide for the safety of participants and spectators on navigable waters during the event.

EFFECTIVE DATE: This regulation becomes effective on August 17, 1985.

FOR FURTHER INFORMATION CONTACT: Mary J. Robinson, (212) 668–7974.

SUPPLEMENTARY INFORMATION: On June 13, 1985, the Coast Guard published a notice of proposed rule making in the **Federal Register**. for this regulation (50 FR 24783). Interested persons were requested to submit comments, and no comments were received. The regulation is being made effective in less than 30 days from the date of publication. There was no sufficient time remaining in advance of the event to provide for a delayed effective date.

Drafting Information

The drafters of this regulation are LT D.R. Cilley, Project Officer, Third Coast Guard District Boating Safety Division, and Ms. MaryAnn Arisman, Project Attorney, Third Coast Guard District Legal Office.

Discussion of Regulations

The annual National Sweepstakes Regatta is a powerboat race event to be held on the Navesink River. The event is sponsored by the National Sweepstakes Regatta Association of Red Bank, N.J. This two day event is traditionally held each year on the third weekend (Saturday and Sunday) in August. Because of the annual nature of this event, the Coast Guard has decided to promulgate a permanent amendment to Part 100 of Title 33, Code of Federal Regulations. Each year the Coast Guard will provide the public full and adequate notice of this annual powerboat race by publication in the Third District Local Notice to Mariners. It is sanctioned by the American Powerboat Association and is well known to the boaters and residents of this area. The race track oval will be approximately 1.25 miles in length. Races will be held on both days on a section of the Navesink River just east of the N.J. Route 35 Bridge. Race heats will run both days from approximately 10:00 a.m. to 6:00 p.m. with up to 100 inboard/hydroplane powerboats participating each day. The sponsor will place several temporary buoys on the river to mark both the race course and spectator areas. There will be 2 race committee boats anchored within the oval course, one on each end with turn judges and press onboard. The U.S. Coast Guard will assist the sponsor and local authorities in providing a safety patrol during this event. In order to provide for the safety of life and property, the Coast Guard will restrict vessel movement and establish spectator areas prior to and during the races. Vessels desiring to transit the area will be given an opportunity to do so several times during each day in between race heats as directed by the Coast Guard Patrol Commander.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. This event will draw a large number of spectator craft into the area for the duration of the races. This should have a favorable impact of commercial facilities providing services to the spectators. This area is used primarily by recreational boaters; any impact on commercial traffic in the area will be negligible. The Coast Guard shall ensure that the regulated area is opened periodically to allow transiting vessels to pass through without undue delay.

Since the impact of this regulation is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant ecnomic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water)

VOL 50 ISS 145 JL 29 1985 UMI

PART 100—[AMENDED]

Final Regulation

In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations is amended as follows:

1. The authority citation for Part 100 continues to read as follows:

Authority: 33 U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

2. Part 100 is amended by addding § 100.307 to read as follows:

§ 100.307 National Sweepstakes Regatta, Redbank, N.J.

(a) *Regulated Area:* That portion of the Navesink River in Redbank, N.J. between the N.J. Route 35 Bridge and a line running across the Navesink River connecting Guyon and Lewis Points.

(b) *Effective Period:* This regulation will be effective from 8:00 a.m. to 6:00 p.m. on both August 17 and 18, 1985, and thereafter annually on the third weekend (Saturday and Sunday) in August unless otherwise specified in the Third District Local Notice to Mariners and in a **Federal Register** notice.

(c) *Special Local Regulations:*

(1) The regulated area shall be intermittently closed to all vessel traffic during the effective period, except as may be allowed by the Coast Guard Patrol Commander.

(2) No person or vessel shall enter or remain in the regulated area while it is closed unless participating in or authorized by the event sponsor or Coast Guard patrol personnel.

(3) Vessels awaiting passage through the regulated area shall be held in unmarked anchorages in the area to the east of the N.J. Route 35 Bridge and in the vicinity of Lewis Point.

(4) No transiting vessels shall be allowed out onto or across the regulated area without Coast Guard escort.

(5) All persons or vessles not registered with the sponsor as participants or not part of the regatta patrol are considered spectators. Spectator vessels must be at anchor within a designated spectator area or moored to a waterfront facility in a way that will not interfere with the progress of the event. The following are established as spectator areas:

(i) Spectator vessels shall be held behind (north of) a line of buoys provided by the sponsor running approximately west to east starting .25 mile east of the N.J. Route 35 Bridge.

(ii) A second spectator area shall be marked by a curved line of sponsor provided buoys centered on a line drawn approximately due south from Jones Point, running through Can Buoy #21. All spectator craft shall stay to the east of this string of buoys.

(6) All persons and vessels shall comply with the instructions of U.S. Coast Guard patrol personnel. Upon hearing five or more blasts from a U.S. Coast Guard vessel, the operator of a vessel shall stop immediately and proceed as directed. U.S. Coast Guard patrol personnel include commissioned, warrant, and petty officers of the Coast Guard. Members of the Coast Guard Auxiliary may be present to inform vessel operators of this regulation and other applicable laws.

(7) For any violation of this regulation, the following maximum penalties are authorized by law:

(i) $500 for any person in charge of the navigation of a vessel.

(ii) $500 for the owner of a vessel actually on board.

(iii) $250 for any other person.

(iv) Suspension or revocation of a license for a licensed officer.

Dated: July 18, 1985.

P.A. Yost,

Vice Admiral, U.S. Coast Guard Commander, Third Coast Guard District.

BILLING CODE 4910-14-M

---

33 CFR Parts 100 and 165

[CGD 85-055]

Safety and Security Zones

AGENCY: Coast Guard, DOT.

ACTION: Notice of Temporary Rules Issued.

SUMMARY: This document gives notice of temporary safety zones, security zones, and special local regulations. Periodically the Coast Guard must issue safety zones, security zones, and special local regulations for limited periods of time in limited areas. Safety Zones are established around areas where there has been a marine casualty or when a vessel carrying a particularly hazardous cargo is transiting a restricted or congested area. Security zones are temporarily established in response to a risk to national security present in a particular area. Special local regulations are issued to assure the safety of participants and spectators of regattas and other marine events.

DATES: The following list includes safety zones, security zones, and special local regulations that were established between April 1, 1985 and June 30, 1985 and have since been terminated. Also included are several zones established earlier but inadvertently omitted from the last published list.

ADDRESS: The complete text of any temporary regulations may be examined at, and is available on request from, Executive Secretary, Marine Safety Council (G-CMC), U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593.

FOR FURTHER INFORMATION CONTACT: Mr. Bruce Novak, Deputy Executive Secretary, Marine Safety Council at (202) 426-1477.

SUPPLEMENTARY INFORMATION: The local Captain of the Port must be immediately responsive to the safety needs of the waters within his jurisdiction; therefore, he has been delegated the authority to issue these regulations. Since Marine events and emergencies usually take place without advance notice or warning, timely publication of notice in the **Federal Register** is often precluded. However, the affected public is informed through Local Notices to Mariners, press releases, and other means. Moreover, actual notification is frequently provided by Coast Guard patrol vessels enforcing the restrictions imposed in the zone to keep the public informed of the regulatory activity. Because mariners are notified by Coast Guard officials on scene prior to enforcement action, **Federal Register** notice is not required to place the special local regulations, security zone, or safety zone in effect. However, the Coast Guard, by law, must publish in the **Federal Register** notice of substantive rules adopted. To discharge this legal obligation without imposing undue expense on the public, the Coast Guard publishes a periodic list of these temporary special local regulations, security zones, and safety zones. Permanent safety zones are not included in this list. Permanent zones are published in their entirety in the **Federal Register** just as any other rulemaking. Temporary zones are also published in their entirety if sufficient time is available to do so before they are placed in effect or terminated.

Non-major safety zones, special local regulations, and security zones have been exempted from review under E.O. 12291 because of their emergency nature and temporary effectiveness.

The following regulations were placed in effect temporarily during the period April 1, 1985 through June 30, 1985 unless otherwise indicated:

Docket No.	Location	Type	Date
1-85-IR	Marina Bay, MA	Safety Zone	June 29, 1985.

BILLING CODE 4910-14-M

VOL 50 ISS 145 JL 29 1985 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 81

[Region II Docket No. 54 A-2-FRL-2870-4]

Designation of Areas for Air Quality Planning Purposes; Revision to Section 107 Attainment Status Designations for New York State

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This notice announces the Environmental Protection Agency's approval of a request from New York State to revise the air quality designation of the Town of Waterford in the Hudson Valley Air Quality Control Region from "does not meet national standards" to "better than national standards" with regard to the carbon monoxide national ambient air quality standards. Such designations are required by section 107(d) of the Clean Air Act and may be revised at the request of a state. This action will mean that air quality in all of New York State, except the New York City Metropolitan Area, and a small protion of Syracuse, will be designated as being "better than" the carbon monoxide standards.

EFFECTIVE DATE: This action becomes effective July 29, 1985.

ADDRESSES: Copies of the proposal submitted by New York State are available for public inspection during normal business hours at the following addresses:

Environmental Protection Agency, Air Programs Branch, Room 1005, 26 Federal Plaza, New York, New York 10278

New York State Department of Environmental Conservation, Division of Air, 50 Wolf Road, Albany, New York, 12233

FOR FURTHER INFORMATION CONTACT: William S. Baker, Chief, Air Programs Branch, Environmental Protection Agenoy, Region II Office, 26 Federal Plaza, New York, New York 10278, (212) 264-2517.

SUPPLEMENTARY INFORMATION: Section 107(d) of the Clean Air Act directed each state to submit to the Administrator of the Environmental Protection Agency (EPA) a list of national ambient air quality standard attainment status designations for all areas within the state. EPA received such designations from the states and promulgated them on March 3, 1978 (43 FR 8962). As authorized by the Clean Air Act, these designations have been revised from time to time at a state's request.

On August 13, 1984, the New York State Department of Environmental Conservation submitted a request to revise the air quality designation of the Town of Waterford in the Hudson Valley Air Quality Control Region from "does not meet national standards" to "better than national standards" with regard to attainment of the carbon monoxide national ambient air quality standards.

In the February 25, 1985 issue of the **Federal Register** (50 FR 7620) EPA advised the public that, based on its review of the technical material submitted by the State, it was proposing to approve the requested redesignation. The reader is referred to this February 25, 1985 notice for a detailed description of the State's submittal and EPA's criteria for review. No comments were received by EPA during its comment period, which ended on March 27, 1985.

EPA is today approving the redesignation request submitted by New York State. The request has been found to meet the requirements of sections 107 and 301 of the Clean Air Act and applicable EPA guidelines.

Today's action is being made effective immediately because a redesignation to attainment imposes no new or additional regulatory requirements and delay would serve no useful purpose.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit within sixty days of today. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

List of Subjects in 40 CFR Part 81

Air pollution control, National parks, Wilderness areas.

Dated: July 22, 1985.

Lee M. Thomas,

Administrator, Environmental Protection Agency.

PART 81—DESIGNATION OF AREAS FOR AIR QUALITY PLANNING PURPOSES

Title 40, Chapter I, Subchapter C, Part 81, Code of Federal Regulations is amended as follows:

Subpart C—Section 107 Attainment Status Designations

1. The authority citation for Part 81 is revised to read as set forth below and the authority citations following all the sections in Part 81 are removed:

Authority: 42 U.S.C. 7401-7642.

2. Section 81.333 is amended by revising the carbon monoxide attainment status designation table as follows:

In the table labeled "New York—CO" revise the entire entry for the Hudson Valley AQCR as follows:

NEW YORK—CO

Designated area	Does not meet primary standards	Cannot be classified or better than national standards
Hudson Valley AQCR.	.....	X

[FR Doc. 85-17876 Filed 7-26-85; 8:45 am]

BILLING CODE 6560-50-M

40 CFR Part 81

[A-3-FRL-2870-6]

Designation of Areas for Air Quality Planning Purposes; Commonwealth of Pennsylvania; Section 107 Redesignation

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: EPA is today announcing the approval of a request from the Commonwealth of Pennsylvania to redesignate Allegheny County from "Cannot Be Classified" to a "Better than National Standards" status with respect to the National Ambient Air Quality Standards (NAAQS) for nitrogen dioxide (NO_2). This change is based upon eight consecutive quarters of air quality monitoring data showing attainment.

EFFECTIVE DATE: This rule will become effective August 28, 1985.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours at the following offices:

U.S. Environmental Protection Agency, Region III, Air Programs Branch, 841 Chestnut Building, Philadelphia, PA 19107, Attn: Denis M. Lohman

Commonwealth of Pennsylvania, Department of Environmental Resources, Bureau of Air Quality Control, 18th Floor Fulton Building, Harrisburg, PA 17120, Attn: Gary L. Triplett

Allegheny County Health Department, Bureau of Air Pollution Control, 301 Thirty-ninth Street, Pittsburgh, PA 15201, Attn: Roger C. Westman

FOR FURTHER INFORMATION CONTACT: Denis Lohman (3AM11) at the EPA, Region III address above or telephone (215) 597-8375.

SUPPLEMENTARY INFORMATION: Under section 107(d) of the Clean Air Act, the Administrator of EPA has promulgated the NAAQS attainment status for all areas within each state (see, 43 FR 8962 (March 3, 1978)). These area designations are subject to revision whenever sufficient data become available to warrant a redesignation.

Background

Allegheny County is presently designated as "Cannot Be Classified" for NO_2. This designation was promulgated because there were no NO_2 monitors in the County upon which an attainment designation could be based. The Allegheny County Bureau of Air Pollution Control (BAPC) installed and operated two monitors at locations approved by EPA. One location (Downtown) selected was the central business district of Pittsburgh. The second location (Lawrenceville) was an area of mixed residential, commercial and industrial character outside of and downwind of the central business district.

By the end of the third quarter of 1984 eight consecutive quarters of data, meeting the EPA completeness criteria, had been collected at Lawrenceville. At the Downtown site the latest five quarters of data met the completeness criteria. The remaining data were slightly less complete than required. The data at both sites were consistent with all quarterly averages were well below the NAAQS for NO_2.

On December 24, 1984, the Pennsylvania Department of Environmental Resources submitted a request to redesignate Allegheny County to "Better Than National Standards" with respect to NO_2. Also submitted for consideration was the fact that emissions of nitrogen oxides, from mobile sources, were expected to decrease with implementation of the Federal Motor Vehicle Control Program. In addition, there were no known plans for expansion or construction of major NO_2 emission sources.

EPA, on March 28, 1985, published a Proposed Rulemaking Notice at 50 FR 12341 approving the redesignation request and soliciting public comment. No comment for or against the proposed redesignation have been received.

Conclusion

EPA has determined that the requirements for redesignation under section 107 have been satisfied. Therefore, EPA is today approving Pennsylvania's request to redesignate Allegheny County to "Better Than National Standards" status for NO_2 (40 CFR 81.339). All other section 107 redesignations for the Commonwealth of Pennsylvania remain intact.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291. Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by 60 days from today. This action may not be challenged later in proceedings to enforce its requirements (See 307(b)(2)).

BILLING CODE 6560-50-M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101-41

[FPMR Amdt. G-73]

Transportation Documentation and Audit: Revision of Government Bill of Lading Forms

AGENCY: Office of the Comptroller, GSA.

ACTION: Final rule.

SUMMARY: This rulemaking adopts changes to the U.S. Government Bill of Lading (GBL). Three changes are made to Standard Form (SF) 1103, two changes to SF 1109, and one change is made to SF 1203.

Regarding the revised content and format of SF 1103 and SF 1109, there have been many changes in transportation practices and data collection procedures since thes forms were last revised (March 1977). The new GBL eliminates obsolete information blocks, adds new information blocks, and revises format to provide Federal agencies with a form which will be more useful both as a transportation document and as a computer source document.

Regarding the changed sequence of Memorandum Copies in the GBL set and SF 1109 set, fiscal and administrative officers have informed the General Services Administration (GSA) that memorandum copies (SF 1103-A and SF 1109-A) are illegible and unsuitable for photo copying and microfilming. One copy of SF 1103-A and SF 1109-A have been moved to the third position, to permit clearer copies that will yield more legible photo copies and microfilm images.

Regarding the Revised Terms and Conditions section of SF 1103 and SF 1203, the Terms and Conditions section of SF 1103 and SF 1203 are amended by adding a statement that interest on overcharges will accrue from the voucher payment date.

EFFECTIVE DATE: July 29, 1985.

FOR FURTHER INFORMATION CONTACT: John W. Sandfort, Chief, Regulations, Procedures and Review Branch, Office of Transportation Audits, (202) 786-3014 or (FTS) 786-3014.

SUPPLEMENTARY INFORMATION:

Background

A Notice of Proposed Rulemaking (NPRM) to change the content and format of SF 1103, SF 1109, and SF 1131 was published in the **Federal Register** (FR) of August 24, 1981 (46 FR 42886). Subsequent to that date, GSA proposed cancelling SF 1131 because of low usage by Federal agencies. A NPRM was published on October 13, 1983 (48 FR 46554), and absent negative comments, a final rule was published on April 10, 1984 (49 FR 14105), cancelling SF 1131 effective the same date. A NPRM to change the order of forms in the GBL set by moving the last SF 1103-A, Memorandum Copy, to the third position in the set was pubished on April 22, 1983 (48 FR 17360). SF 1109 is a continuation form (§ 101-41.302-2(d)), used for listing information when there is no room left on the SF 1103. It was inadvertentiy omitted from the NPRM and is included in this regulation change.

A NPRM to amend the Terms and Conditions section of SF 1103 by adding

a statement that interest on overcharges will accrue from the voucher payment (block 26B's intended purpose). Since associations questioned the propriety of

payment, reducing the probability of post payment claims. However, section 322 of the Transportation Act of 1940, as

from the regulations pertaining to SF 1103 (Revised 3-77), SF 1109 (Revised 3-

(1) SF 1103 (original), which refers to Subpart 101-41.3 for the terms and

VOL 50 ISS 145 JL 29 1985 UMI

a statement that interest on overcharges will accrue from the voucher payment date was published on April 10, 1984 (49 FR 14147). The NPRM did not mention SF 1203 which is often substituted for the SF 1103 in the movement of privately owned personal property. It, too, has been included in this regulation change.

Amendment G–68 to 41 CFR 101–41 cancelled SF 1172, Certificate in Lieu of Lost U.S. Government Transportation Request in Section 101–41.202. This amendment deletes an SF 1172 listing which had been inadvertently retained.

The General Services Administration has determined that this rule is not a major rule for the purposes of E.O. 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. Therefore, a Regulatory Impact Analysis has not been prepared. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and the consequence of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

Discussion of Major Comments. The following summarizes major comments, suggestions, and our determinations and actions taken.

Four responses were received from Federal agencies, and one response was received from a carriers' association concerning the NPRM changing the format of SF 1103. One agency response asked that the GBL be revised to permit consignees to certify carrier performance of special services. Both the current and proposed SF 1103's already instruct the carrier to annotate if special services are ordered and not performed. In addition, carrier self certification of delivery, a practice which has been in effect for many years, removes the consignee from the certification process. This, in our opinion, makes the suggester's proposal impractical, and it has not been adopted. Another agency response asked that several terms used on the front of the GBL be defined on the back of that form. Because of limited space on the GBL, we will publish these definitions in an updated instruction manual after this final rule becomes effective. A third agency response asked that we change the caption of block 26B from "PER" to "PCS" because carriers sometimes use this block to indicate the number of pieces in a shipment instead of entering the carrier agent's initials (block 26B's intended purpose). Since the agent's initials are useful in establishing legal custody of the shipment, this suggestion has not been adopted. The fourth response from Federal agencies suggested enlarging various data blocks to accommodate more information. We have adopted this suggestion. The carriers' association proposed numerous changes to the size and location of data blocks. We have adopted all of the carriers' association's proposed changes except for those concerning blocks 22, 23, and 24. The association asked that these three blocks be kept in the same location as on the current GBL so as not to confuse carrier employees familiar with the standard layout of current GBL's and commercial bills. GSA has resdesigned the GBL so that transportation management data can be processed by Government agencies in a more orderly and efficient manner. The layout of information on the proposed GBL corresponds to the order in which that information is to be entered into DOD's automated data management system. For that reason, DOD (the largest user of GBL's) opposes moving blocks 22, 23, and 24 back to their original location. DOD believes carrier employees will adapt to the new GBL format without causing any significant delays or misroutings of Government shipments. We believe there will be sufficient time between adoption of this rule and the printing and distribution of the revised SF 1103 for carriers to train their employees on how to handle the revised GBL, and that relocating the three blocks in question to their former positions is not in the best interest of the Government.

No responses were received to that portion of our NPRM changing the format of SF 1109, and we are adopting that change as proposed.

We received no responses to our NPRM changing the sequence of Memorandum Copies in SF 1103. We are adopting that change as proposed and are making a similar change to SF 1109.

We received five timely comments to our NPRM adding interest assessment provisions to the Terms and Conditions section of SF 1103/1203: three carriers' associations (associations), one household goods carrier (carrier), and one Federal agency..

One association objected to GSA assessing interest on overcharges, arguing that the Debt Collection Act of 1982 (the Act), Pub. L. 97–365, *et seq.*, provides for a waiver of interest payment if the claim is paid by the debtor within (30) days after the date from which interest accrues (Paragraph 5 of Section 11 of the Act). All three associations questioned the propriety of assessing interest from the voucher payment date. They contended that GSA has misapplied the Act by assessing interest from the voucher payment date instead of the date of the notice of overcharge (claim) is mailed to the carrier (Paragraph 5 of Section 11 of the Act (96 Stat. 1755–56), (31 U.S.C. 3717(b)(2)). GSA's position is that under the contract terms of the revised GBL form, as provided in accordance with Paragraph 3 of Section 11 of the Act, the contract terms of the revised GBL form and not Paragraph 5 of Section 11 of the Act will apply as to interest on overcharges on transportation services whenever the revised GBL form is used. However, the provisions of Paragraph 5 of Section 11 will apply when the old GBL form is used. Since the GBL, as revised in this rulemaking, explicitly fixes assessment of interest charges, it is specifically excepted from the interest and penalty provisions of the Act. See 31 U.S.C. 3717(g)(1).

One association further alleged that our proposal exceeds GSA's identified statutory authority under the terms of Administrative Procedure Act (5 U.S.C. 553), does not comply with the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*), and does not establish which interest rate published by the Secretary of the Treasury will apply. GSA believes this rulemaking is clearly within its identified statutory authority and that arguments to the contrary, based on the Administrative Procedure Act (5 U.S.C. 553), have no merit because of the exemption for government contract matters in that Act (5 U.S.C. 553(a)(2)). Similarly this rulemaking is exempt from the requirements of the Regulatory Flexibility Act (5 U.S.C. 603 (a)) since its applicability is subject to the contract exception provisions of 5 U.S.C. 553(a)(2).

A question may exist as to when interest accrues under the Terms and Conditions statement specified in our NPRM. To make the interst dates specific, we have revised the statement by adding:

> Interest shall accrue from the voucher payment date on overcharges made hereunder and shall be paid at the same rate *in effect on thot date as* published by the Secretary of the Treasury pursuant to the Debt Collection Act of 1982.

Two associations argued that a combination of interest from voucher payment date plus GSA's backlog of unaudited documents would work an economic hardship on the transportation industry. Normal commercial business practices permit disbursing offices to examine and amend bills before

payment, reducing the probability of post payment claims. However, section 322 of the Transportation Act of 1940, as amended, 31 U.S.C. 3726, requires Government finance offices to pay bills for the transportation of persons or property upon presentation and prior to audit or settlement. This unique provision enables carriers to receive immediate payment for transportation services. Therefore, the delay in auditing, cited by the associations as an argument against assessing interest from voucher payment date, presently works in the carrier's favor by permitting them the use of amounts collected through overcharges without financial penalty, from the voucher payment date, until such time as the Government presents a claim.

The household goods carrier recommended that refunds (negative currency adjustments) not be subject to interest assessment until 90 days after the effective date of applicable tariff charges. This, it was argued, would allow carriers time to receive currency adjusted tariffs issued by the Government and post audit billing documents. The carrier also asked that reweigh and negative currency adjustments recognized by the carrier in supplemental billings or payments not be subject to interest charges. The carrier's concern that it be assessed interest on the adjusted amount rather than the original amount billed is beyond the scope of this rulemaking. GSA matches supplemental bills with original paid bills during its audit and bases its overcharge claims on the adjusted amounts. Any questions the carrier may have on specific overcharges will be handled directly with the carrier, separate from this rulemaking. Finally, the carrier expressed the opinion that any funds withheld based upon erroneous set-off action taken by the Government against a carrier should be returned to the carrier with interest. Consideration of that suggestion is beyond the scope of this rulemaking. There is no provision of law which permits payment of interest under such circumstances.

The Federal agency, in endorsing the proposed rulemaking, noted that the rule would protect the Government from situations where, as a result of overcharges, carriers have free use of the Government's money for considerable periods of time.

Exception to regulations. 41 CFR 101–11.806 states that any exception or deviation granted to a Standard Form is voided when that Standard Form is revised. Therefore, agencies that have been granted an exception to deviate from the regulations pertaining to SF 1103 (Revised 3–77), SF 1109 (Revised 3–77), and SF 1203 (7–79) must refile for an exception with GSA (BWC), if they wish to continue their exception with these new revisions of SF 1103, SF 1109, and SF 1203.

List of Subjects in 41 CFR Part 101–41

Air carriers, Accounting, Claims, Freight, Freight forwarders, Government property management, Moving of household goods, Railroads, Transportation.

Title 41, Part 101–41 of the Code of Federal Regulations is amended as follows:

PART 101–41—TRANSPORTATION DOCUMENTATION AND AUDIT

1. The authority citation for Part 101–41 continues to read as follows:

> **Authority:** 31 U.S.C. 3726, and 40 U.S.C. 486(c).

2. The table of contents for Part 101–41 is amended by revising the entries for §§ 101–41.302–2 and 101–41.302–5 as follows:

Sec.
101–41.302–2 Description and distribution of Government bills of lading.
101–41.302–5 Pickup and delivery services.

Subpart 101–41.2—Passenger Transportation Services Furnished for the Account of the United States.

3. Section 101–41.202 is amended by revising the introductory and paragraph and removing paragraph (h) as follows:

§ 101–41.202 Standard Forms related to passenger transportation.

The Standard Forms listed in paragraphs (a) through (g) of this section are prescribed for use in connection with the procurement of passenger transportation services for the account of the United States.

* * * * *

Subpart 101–41.3—Freight Transportation Services Furnished for the Account of the United States

4. Section 101–41.302–2 is revised as follows:

§ 101–41.302–2 Description and distribution of Government bills of lading.

(a) The U.S. Government bill of lading (GBL) consists of six basic forms and is available in sets of seven or nine parts, depending on the number of memorandum copies needed. The sets are carbon-interleaved for simultaneous preparation. The GBL set is arranged in the following order.

(1) SF 1103 (original), which refers to Subpart 101–41.3 for the terms and conditions of the contract of transportation and contains both the description of the articles comprising the shipment and the certificate of delivery is given to the carrier upon tender of shipment for use as supporting documentation with the voucher covering the transportation charges involved.

(2) SF 1104 (shipping order) is retained by the carrier's agent at the shipping point.

(3) SF 1103–A (memorandum copy) for use by the shipper for fiscal or administrative purposes.

(4) SF 1105 (freight waybill (original)) accompanies the shipment or is otherwise sent to destination in compliance with origin carrier's instructions. It also serves as the substitute billing document when the original GBL is lost.

(5) SF 1106 (freight waybill (carrier's copy)) is for disposition by the carrier.

(6) SF 1103–A (memorandum copy), of which there are two or four copies, is for use by the shipper for fiscal and administrative purposes.

(7) SF 1103–B (memorandum copy-consignee) is sent to the consignee immediately after surrender of the original to the initial carrier.

(b) [Reserved]

(c) The U.S. Government bill of lading, privately owned personal property, is a nine-part form available in either snapout or computer pinfeed formats. This set (SF 1203 through SF 1206) is arranged in the same order as the GBL set, except that the first of the SF 1203–A's (memorandum copies) is in the fifth position rather than the third position of the set. Distribution of the individual parts of SF 1203 is the same as that for SF 1103, except for the memorandum copy-consignee (property owner) which is furnished to the consignee (property owner) by the origin carrier or its agent at the time of pickup of the shipment.

(d) The GBL continuation sheets (SF 1109 through 1112) are also available in seven- or nine-part sets and are arranged in order corresponding to the GBL sets. The continuation sheets are for use with the regular GBL and the personal property GBL.

(e) Separate sheets of the memorandum copy (SF 1203–A) are available to Government agencies for addition to the nine-part SF 1203 set.

5. Section 101–41.302–4 is amended by revising paragraph (c)(1) as follows:

§ 101–41.302–4 General instructions for the preparation of GBL's and common problem areas.

§ 101–41.303–2 Conversion of commercial bills of lading.

(a) * * *

concerned with a check for any amount due the United States.

10. Section 101–41.306 is amended by

Billing" section on the face of SF 1103 or SF 1203.

§ 101–41.4901–1103–B Standard Form 1103–B, U.S. Government Bill of Lading

§ 101–41.4901–1112 Standard Form 1112, U.S. Government Freight Waybill

§ 101–41.302–4 General instructions for the preparation of GBL's and common problem areas.

* * * * *

(c) *Common problem areas.* (1) The "For Use of Billing Carrier Only" section is reserved for recording certain data by the accounting officer of the billing carrier and must not be covered by marks or writing by others handling the GBL. This boxed section on the memorandum copies of the GBL form is available to the issuing officer for showing estimated transportation charges and such accounting classifications as may be required.

* * * * *

6. Section 101–41.302–5 is revised as follows:

§ 101–41.302–5 Pickup and delivery services.

(a) Pertinent sections on the GBL indicating that the carrier furnished pickup service at origin shall be completed and initialed by the shipper or shipper's agent. In certain instances the tariff covering this service provides charges that are in addition to the line-haul rate or charges.

(b) When a shipper or consignee so requests and if the carrier furnishes delivery service at destination in connection with a less-than-carload or an any-quantity rail shipment or on shipments by other modes of transportation, the carrier shall check the appropriate box in the "Certificate of Carrier Billing" section on the GBL.

7. Section 101–41.302–6 is amended by revising paragraph (a) as follows:

§ 101–41.302–6 Special services.

(a) Additional information or facts necessary to support higher charges resulting from accessorial or special services ordered and furnished incident to the line-haul transportation shall be inscribed on the face of the GBL in the section designated "Marks and Annotations" or on the reverse side of the GBL beneath the caption "Special Services Ordered." The inscription shall contain the name of the carrier upon whom the request was made and the kind and scope of services ordered and shall be signed by or for the person ordering the services. If such an inscription is impractical, a statement containing the information and bearing the number of the covering GBL and signed by or for the person who ordered the services will be acceptable.

* * * * *

8. Section 101–41.303–2 is amended by revising paragraph (a)(1) and (a)(2) as follows:

§ 101–41.303–2 Conversion of commercial bills of lading.

(a) * * *

(1) When the origin carrier requires the original commercial document, the shipper shall surrender it to the initial carrier's agent for his certification as follows:

INITIAL CARRIER'S AGENT, BY SIGNATURE BELOW, CERTIFIES THAT HE RECEIVED THE ORIGINAL OF THIS DOCUMENT

The certification shall be written on the original and all copies of the commercial bill of lading or commercial express receipt, and a memorandum copy thereof shall be returned to the shipper for forwarding to the authorizing agency. The authorizing agency receiving the properly certified memorandum copy of the commercial bill of lading or commercial express receipt shall issue or cause to be issued a GBL, forward the GBL promptly to the origin carrier for transmittal to the billing carrier, and retain the memorandum copy of the commercial document. The billing carrier, having received both the original commercial document and the GBL from the origin carrier, shall execute the "Certificate of Carrier Billing" on the GBL, cross-reference both original documents, securely attach them together, and use the documents to support its billing.

(2) When the origin carrier does not require the original commercial document, the shipper shall obtain the signature of the origin carrier's agent on the original and all copies and immediately forward the original to the agency that authorized the shipment. The authorizing agency shall issue or cause to be issued a GBL for the shipment involved. The original commercial document and the issued GBL, properly cross-referenced and securely attached together, shall then be forwarded to the origin carrier for transmittal to the billing carrier for execution of the "Certificate of Carrier Billing" and preparation of the SF 1113.

* * * * *

9. Section 101–41.305–3 is revised to read as follows:

§ 101–41.305–3 GBL's covering free or surrendered transit.

A GBL covering free or surrendered transit is issued for use with an outbound shipment from the transit installation where the line-haul charge to the transit installation equals or exceeds the through transportation charge plus the transit charge. After completing the "Certificate of Carrier Billing" section of the GBL covering free transit, the billing carrier shall attach the GBL to an SF 1113 bearing the carrier's bill number and submit both forms to the paying office of the agency concerned with a check for any amount due the United States.

10. Section 101–41.306 is amended by revising paragraphs (a) and (c) as follows:

§ 101–41.306 Disposition of GBL forms upon delivery of property to carrier for shipment.

(a) The shipper (issuing officer or contractor) shall surrender the original GBL, shipping order, freight waybill (original), freight waybill (carrier's copy), and comparable copies from continuation sheets, if any, to the initial carrier's agent at the time the shipment is tendered. The carrier's agent shall acknowledge receipt of the shipment and of the original GBL and copies by inserting in the designated spaces on the lower left side of the original GBL and on all copies of the GBL the pickup date and his signature. The initials of the agent's representative shall be entered under the "Per" heading if appropriate.

* * * * *

(c) On local or single-line movements, the carrier shall retain the original GBL for use as support for billing of charges after properly executing the "Certificate of Carrier Billing." On interline or intermodal movements, except those falling under the procedures in § 101–41.312, the origin and the interline carriers shall transmit the original GBL to the last line-haul carrier authorized to bill the charges for execution of the "Certificate of Carrier Billing" on the basis of the delivery documents and for billing of the charges. Carriers must not delay movement or delivery of Government shipments because they have not received the original GBL from the origin or interline carriers.

11. Sections 101–41.307–1 and 101–41.307–2 are revised as follows:

§ 101–41.307–1 Substitute document.

When the original GBL (SF 1103) or original personal property GBL (SF 1203) is lost or destroyed, the billing carrier must use the freight waybill (original) (SF 1105 or SF 1205), properly certified by the carrier, as a substitute document for billing charges. Execution of the "Certification of Carrier Billing" on the substitute document is not required for charges billed under the exception procedures in § 101–41.312.

§ 101–41.307–2 Certification of substitute document.

The billing carrier shall enter on the reverse side of the substitute document a properly executed certificate of delivery showing all information required in the "Certificate of Carrier Billing" section on the face of SF 1103 or SF 1203.

12. Section 101–41.313–1 is amended by revising paragraph (a) as follows:

§ 101–41.313–1 GBL forms.

(a) Agencies may obtain supplies of the individual snapout GBL sets by submitting a requisition in FEDSTRIP/MILSTRIP format to the GSA regional office providing support to the requesting activity. Agencies having facilities for computer preparation of GBL's may order them in continous fanfold format with pinfeed strips attached to the sides, but such forms must conform to all other specifications on the GBL, including overall size, wording, arrangement, color, construction, and grade of paper. Minor adjustments in spacing to accommodate differences in alignment of computer line printing are permissible, but all copies in the GBL sets must register from part to part. Agency orders for continuous fanfold GBL's shall be executed and processed in accordance with § 101–26.302 of this chapter. The National Capital Region, regional office of Federal Supply and Services, Supply Division (WFSI) Washington, D.C. 20407 of GSA maintains records of the serial numbers of all GBL and personal property GBL sets furnished and the names and mailing addresses of the receiving agencies.

* * * * *

13. Section 101–41.401 is amended by revising paragraph (d)(1) as follows:

§ 101–41.401 Payment upon presentation of bills.

* * * * *

(d) * * *

(1) For freight transportation (other than that excepted under § 101–41.312 of this part), the "Certificate of Carrier Billing" on the GBL has been properly executed by the carrier; and

* * * * *

14. Sections 101–41.4901–1103 through 101–41.4901–1112 are revised as follows:

§ 101–41.4901–1103 Standard Form 1103, U.S. Government Bill of Lading (Original).

(a) Page 1 of Standard Form 1103.

(b) Page 2 of Standard Form 1103.

Note.—The form illustrated in this § 101–41.4901–1103 is filed with the original document and does not appear in this volume.

May 8, 1985.

Dwight Ink,

Acting Administrator of General Services.

[FR Doc. 85–17590 Filed 7–26–85; 8:45 am]

BILLING CODE 6820–AM–M

41 CFR Part 101–41

[FPMR Amdt. G–74]

Transportation Documentation and Audit: Revision of Standard Form 1169, U.S. Government Transportation Request

AGENCY: Office of the Comptroller, GSA.

ACTION: Final rule.

SUMMARY: This rulemaking amends the Federal Property Management Regulations (FPMR) Part 101–41 by changing the "CONDITIONS" section on the back of the Standard Form (SF) 1169, U.S. Government Transportation Request (GTR) (Original): (1) To incorporate a reference to the Code of Federal Regulations (CFR) as part of the contract of carriage, (2) to delete the non-discrimination clause reference to "Executive Order 11375" as the amending authority and substitute "as amended," and (3) to add a provision to advise the carrier industry that interest will be assessed on overcharges issued by the Office of Transportation Audits in connection with GTR procured travel. Incorporation of the CFR reference is to make clear that the CFR governs the use of the GTR. Specific reference to Executive Order 11375 is considered unnecessary because the basic document has been amended many times and the term "as amended" is considered sufficient for legal purposes. This revision incorporates interest assessment provisions on the GTR.

EFFECTIVE DATE: July 29, 1985.

FOR FURTHER INFORMATION CONTACT: John W. Sandfort, Chief, Regulations, Procedures, and Review Branch, Office of Transportation Audits (202) 786–3014 or (FTS) 786–3014.

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in: an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. Therefore, a Regulatory Impact Analysis has not been prepared. The General Services Administration has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society. This amendment expressly incorporates a reference (which was previously implied) to Title 41 of the Code of Federal Regulations (CFR) on the GTR. The regulation will now become a part of the contract of carriage which results when the GTR is utilized.

Background

A Notice of Proposed Rulemaking (NPRM) to revise the "Conditions" section of SF 1169 (GTR) was published in the **Federal Register** (FR) of April 10, 1984 (49 FR 14147).

Discussion of Major Comments

The following summarizes major comments, suggestions, and our determination and action taken.

No comments were received concerning the incorporation of a reference to the CFR and the deletion of the reference to "Executive Order 11375."

We received three timely comments to that portion of our NPRM adding interest assessment provisions to the Terms and Conditions section of SF 1169, two from carriers' associations (associations) and one from a Federal agency.

One association objected to GSA assessing interest on overcharges, arguing that the Debt Collection Act of 1982 (the Act), 31 U.S.C. 3716, et seq., provides for a waiver of interest payment, if the claim is paid by the debtor within thirty (30) days after the date from which interest accrues (31 U.S.C. 3717(d)). Both associations questioned the propriety of assessing interest from the voucher payment date. They contended that GSA has misapplied the Act by assessing interest from the voucher payment date instead of the date the notice of overcharge (claim) is mailed to the carrier (31 U.S.C. 3717(b)(2)). GSA's position is that under the contract terms of the revised GTR form, as provided in accordance with 31 U.S.C. 3717(g)(1), the contract terms of the revised GTR form and not 31 U.S.C. 3717(d) will apply as to interest on overcharges on transportation services whenever the revised GTR form is used. However, the provisions of 31 U.S.C. 3717(d) will apply when the old GTR form is used. Since the GTR, as revised in this rulemaking, explicitly fixes assessment of interest charges, it is specifically excepted from the interest and penalty provisions of the Act. See 31 U.S.C. 3717(g)(1). One association further alleged that our proposal violates the Administrative Procedure Act (5 U.S.C. 553), and does not comply with the Regulatory Flexibility Act (5 U.S.C. 601, et seq.). GSA believes this rulemaking does not contravene the Administrative Procedure Act (5 U.S.C. 553), because of the exemption for Government contract matters in that Act (5 U.S.C. 553(a)(2)). Similarly this rulemaking is exempt from the requirements of the Regulatory Flexibility Act (5 U.S.C. 603(a)) since its applicability is subject to the contract exception provisions of 5 U.S.C. 553(a)(2).

The Federal agency, in endorsing the proposed rulemaking, noted that the rule would protect the Government when it is overcharged, because carriers now have free use of the Government's money for considerable periods of time.

We believe a question may exist as to the rate of interest intended to apply to specific overcharges under the Terms and Conditions statement specified in our NPRM. To make the interest rates intended specific, we have revised the interest statement by adding the italicized words. The interest statement will now read:

"Interest shall accrue from the voucher payment date on overcharges made hereunder and shall be paid at the same rate *in effect on that date as* published by the Secretary of the Treasury pursuant to the Debt Collection Act of 1982."

Exception to regulations. 41 CFR 101–11.806–1(a) states that any exception or deviation granted to a Standard form is voided when that Standard form is revised. Therefore, agencies that have been granted an exception to deviate from the regulations pertaining to SF 1169 (Revised 3–77) must refile for an exception with GSA (BWC), if they wish to continue their exception with this new revision of SF 1169.

List of Subjects in 41 CFR Part 101–41

Air carriers, Accounting, Claims, Freight, Freight forwarders, Government property management, Maritime carriers, Moving of household goods, Passenger services, Railroads, Transportation.

Title 41, Part 101–41 of the Code of Federal Regulations is amended as follows:

PART 101–41—TRANSPORTATION DOCUMENTATION AND AUDIT

1. The authority citation for part 101–41 continues to read as follows:

Authority: 31 U.S.C. 3726, and 40 U.S.C. 486(c).

Subpart 101–41.49—Illustrations of Forms

2. Section 101–41.4901–1169 is revised and a new § 101–41.4901–1169–A is added to read as follows:

§ 101–41.4901–1169 Standard Form 1169, U.S. Government Transportation Request (Original).

(a) Page 1 of Standard Form 1169.
(b) Page 2 of Standard Form 1169.

§ 101–41.4901–1169–A Standard Form 1169–A, U.S. Government Transportation Request (Memorandum Copy).

(a) Page 1 of Standard Form 1169–A.
(b) Page 2 of Standard Form 1169–A.

Note.—The forms illustrated in §§ 101–41.4901–1169 and 101–41.4901–1169–A are filed with the original document and do not appear in this volume.

Dated: June 26, 1985.

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Parts 5 and 6

Freedom of Information Act and Privacy Act Fee Schedules

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: The Federal Emergency Management Agency (FEMA) is amending its fee schedules for processing Freedom of Information Act and Privacy Act requests.

EFFECTIVE DATE: August 28, 1985.

FOR FURTHER INFORMATION CONTACT: Linda Keener, FOIA/Privacy Specialist, (202) 646–3961.

SUPPLEMENTARY INFORMATION: A proposed rule to revise the fee schedule for processing Freedom of Information Act and Privacy Act requests was published on May 9, 1985, at 50 FR 19551. No comments were received. There is no change in this document from that published in the notice of proposed rulemaking.

This document is not a major rule within the term of Executive Order 12291, nor does it have a significant economic impact on a substantial number of small entities. Hence, no regulatory analyses have been prepared. It deals with administrative matters and has no impact on the environment, and is within categorical exemptions to the preparation of environmental documents required under 44 CFR Part 10. This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 et seq.

List of Subjects in 44 CFR Parts 5 and 6

Freedom of Imformation Act, Privacy Act.

Accordingly, 44 CFR Chapter 1, Subchapter A, is amended as set forth below:

PART 5—PRODUCTION OR DISCLOSURE OF INFORMATION

1. The authority citation for Part 5 is revised to read as follows:

Authority: 5 U.S.C. 552, Reorganization Plan No. 3 of 1978; and E.O. 12127.

2. In § 5.46, paragraphs (a)(1), (b)(1) and (b)(2) are amended by revising them to read as follows:

§ 5.46 Fee Schedule.

* * * * *

(a) *Reproduction Fees.* (1) For copies of documents reproduced on a standard office copying machine in sizes up to 8½" × 14", the charge will be $.15 per page. Preprinted materials will be made available at a charge of $.03 per page.

* * * * *

(b) *Search Fee.* (1) The standard search fee for searches spent by employees in the GS–1 to GS–8 grade levels shall be $9.00 per hour or fraction thereof. No search fee will be applicable if the employee spends less than one hour locating relevant records.

(2) When professional staff must be used to search for the requested records because clerical staff would be unable to locate relevant records, the search fee for employees in the GS–9 to GS/GM–14 grade levels shall be $17.00 per hour or fraction thereof and the search fee for employees in the GS/GM–15 and above grade levels shall be $30.00 per hour or fraction thereof. No search fee will be applicable if the employee spends less than one hour locating relevant records.

* * * * *

PART 6—IMPLEMENTATION OF THE PRIVACY ACT OF 1974

3. The authority citation for Part 6 is revised to read as follows:

Authority: 5 U.S.C. 552a, Reorganization Plan No. 3 of 1978; and E.O. 12127.

4. In § 6.85, paragraph (a) is amended by revising it to read as follows:

§ 6.85 Reproduction fees.

(a) For copies of documents reproduced on a standard office copying machine in sizes 8½" × 14", the charge will be $.15 per page. Preprinted materials will be made available at a charge of $.03 per page.

LEGAL SERVICES CORPORATION

45 CFR Part 1601

By-Laws of the Legal Services Corporation

AGENCY: Legal Services Corporation.

ACTION: Final Rule; amendment.

SUMMARY: On March 22, 1985, the Legal Services Corporation published, for comment, the proposed amendments to its By-Laws. The comment period ended on April 22, 1985. No comments were received. On May 24, 1985, the Corporation's Board of Directors unanimously voted to adopt, as final, the proposed amendments. The amendments make two major changes to the By-Laws and six minor or technical changes to the By-Laws. The major changes regard the scheduling of meetings, the use of telephonic participation in meetings and special meetings, and emergency proceedings. Six minor changes have been made, including the term of Directors, compensation of Directors and the President of the Corporation, general notice of meetings, executive sessions, and public participation in meetings of the Board.

EFFECTIVE DATE: August 28, 1985.

FOR FURTHER INFORMATION CONTACT: Richard N. Bagenstos, Acting General Counsel, (202) 272–4010.

SUPPLEMENTARY INFORMATION: Due to comments received by the Legal Services Corporation since September, 1984, the Board of Directors, after due deliberation, decided to republish the Corporation's By-Laws that had become effective on May 19, 1984. The By-Laws were republished for comment on January 4, 1985, at 50 FR 495. Comments were received and considered. On March 8, 1985, the Board, acting upon recommendations of its Operations and Regulations Committee, approved proposed amendments of the By-Laws. The proposed amendments were published for comment on March 22, 1985, 50 FR 11518. No comments were received. On May 24, 1985, the Corporation's Board of Directors voted, unanimously, to adopt, as final, the proposed amendments. The exact amendments are noted below on a section-by-section basis.

Section 1601.8(c)

The expiration date of Directors'

addition, the first sentence of § 1601.16 is no longer necessary.

letter and the spirit of the Government in the Sunshine Act

notice shall specify the place, date, and hour of the rescheduled meeting," after

§ 1601.38 [Amended]

13. Section 1601.38 is amended by

final decision within thirty days after completion of the hearing.

VOL 50 ISS 145 JL 29 1985 UMI

Section 1601.8(c)

The expiration date of Directors' terms has been amended. The date July 13, 1984, following the words "the terms of six Directors of the Board shall expire" is changed to July 13, 1987. This change is technical in nature. It recognizes that the date July 13, 1984, has passed and that Directors were not confirmed to fill vacant seats.

Section 1601.14 Compensation

The proposed amendment adds language that recognizes the fact that, presently, compensation of Directors is restricted by language in the appropriations acts under which the Corporation has been funded in recent years. The amendment further recognizes that future appropriations acts or authorizing acts may also contain restrictions on compensation of Directors not contained in the Legal Services Corporation Act of 1974, as amended.

Section 1601.15 Meetings

Three additions have been made, one technical and two substantive.

The technical addition adds the letter "s" to the word "agree" in the first sentence. This change reflects the proper English form of verbs following singular subjects.

Two new sentences have been added to § 1601.15(b). These sentences allow the Board, by majority vote, to reschedule a meeting in advance of the scheduled date of the meeting notice. Notice of such a change must be mailed to each Director at least twenty-one days before the rescheduled date or telegraphed at least fifteen days before such rescheduled date. The notice must specify the place, date, and hour of the rescheduled meeting.

A new paragraph (c) has been added to § 1601.15. This new paragraph allows Directors to participate in meetings by way of conference telephone if a quorum of the Directors are physically present at the meeting. Participation under this section must be by telephone conference call or by any means of communication by which all members of the board may hear one another and by which interested members of the public are able to hear and identify all persons participating in the meeting.

This section allows telephonic participation in all meetings. However, the safeguard of a physically present quorum is added to prevent possible abuse.

Section 1601.16 Special Meetings

The first sentence of this section has been deleted. The deletion reflects the addition of § 1601.15(c). Because of that addition, the first sentence of § 1601.16 is no longer necessary.

Section 1601.19(c)

The amendment provides that general notice of meetings must also be sent to program directors. This addition reflects the Corporation's present practice and is in response to comments received. It ensures that programs will receive timely notice of meetings.

Section 1601.22 Public Meetings; Executive Sessions

The words "to close a meeting or any portion of a meeting" in the first sentence has been replaced with the words "that consideration of a specific matter should be closed". This change is made in response to previous comments received by the Corporation regarding executive sessions. The change clarifies that consideration of specific matters may be closed under the Government in the Sunshine Act.

Section 1601.23 Public Participation

Two additions have been made. The sentence "The Board welcomes written and other communications from members of the public." has been added to the beginning of the section. The word "Other" has been added to the beginning of the last sentence of the section. Both changes respond to previous comments received and reflect the Board's desire to have public input at its meetings. The second change recognizes the Chairman's ability to allow members of the public to address the Board even if they have not been able to request to do so in writing.

Section 1601.24 Emergency Proceedings

This section has been entirely rewritten. Previous comments received expressed the opinion that the section, as originally passed, violated the Government in the Sunshine Act. Several commentators recommended the removal of disrupting members of the public if the disruption prevents the Board from conducting its business. The proposed amendment is the result of a combination of alternatives offered to the Board. The revised section allows the Board, by majority vote, to give the Chairman or presiding officer the authority to have disrupting members of the public removed from the meeting if in the opinion of the Chairman, the Directors are rendered incapable of conducting a meeting by the acts or conduct of such members of the public present.

This proposed amendment give the Board the ability to conduct its business free of disruption while still obeying the letter and the spirit of the Government in the Sunshine Act.

Section 1601.38 Compensation

The words "Except as otherwise provided by Pub. L. 98–166 or subsequent legislation," have been added to the beginning of the section. This addition recognizes the additional restrictions on compensation of the President of the Corporation placed by the appropriations acts under which the Corporation has been operating and that future legislation may contain further restrictions not contained in the Legal Services Corporation Act of 1974, as amended.

List of Subjects in 45 CFR Part 1601

Administrative practice and procedure, Organization and functions (government agencies), Seals and insignias.

PART 1601—[AMENDED]

For the reasons set out above, 45 CFR Part 1601 is amended as follows:

1. The Authority citation for Part 1601 reads as follows:

Authority: Sec. 1006(e), 88 Stat. 387 (42 U.S.C. 2996g(e)).

§ 1601.8 [Amended]

2. Paragraph (c) of § 1601.8 is amended by removing the numeral "1984" after "the terms of six Directors of the Board shall expire on July 13," and inserting in its place the numeral "1987."

§ 1601.14 [Amended]

3. Section 1601.14 is amended by inserting the words "Except to the extent Legal Services Corporation is restricted by Pub. L. 98–166 and 98–411 or subsequent appropriation or authorizing acts," at the beginning of the section before the words "Directors shall be entitled".

§ 1601.15 [Amended]

4. Paragraph (b) of § 1601.15 is amended by adding the letter "s" to the word "agree" following the words "Directors of the Board" in the first sentence.

5. Paragraph (b) of § 1601.15 is further amended by inserting the sentences "In the event a majority of the members of the Board agrees to reschedule a meeting to a date in advance of the scheduled date for such meeting, notice of such rescheduling shall be mailed to each Director at least twenty-one days before the rescheduled date for such meeting or shall be telegraphed or delivered at least fifteen days before such rescheduled date. Every such notice shall specify the place, date, and hour of the rescheduled meeting." after the last sentence of paragraph (b).

6. Section 1601.15 is further amended by adding a new paragraph (c) which reads as follows:

* * * * *

(c) If a quorum of the Directors are physically present at a meeting of the Board, other Directors may participate in a meeting of the Board by means of conference telephone or by any means of communication by which all persons participating in the meeting are able to hear one another and by which interested members of the public are able to hear and identify all persons participating in the meetings.

§ 1601.16 [Amended]

7. Section 1601.16 is amended by removing in its entirety the first sentence of the section.

§ 1601.19 [Amended]

8. Paragraph (c) of § 1601.19 is amended by inserting the words "and the program director" before the words "of every recipient." in the second sentence.

§ 1601.22 [Amended]

9. Section 1601.22 is amended by removing the words "to close a meeting or any portion of a meeting" before the words "to public observation" in the first sentence and inserting in their place the words "that consideration of a specific matter should be closed".

§ 1601.23 [Amended]

10. Section 1601.23 is amended by inserting the sentence "The Board welcomes written and other communication from members of the public." at the beginning of the section.

11. Section 1601.23 is further amended by inserting the word "Other" before the word "Members" in the last sentence of the section and by replacing the capital "M" in "Member" with a lower case "m".

12. Section 1601.24 is revised to read as follows:

§ 1601.24 Emergency proceedings

If, in the opinion of the Chairman, the Directors are rendered incapable of conducting a meeting by the acts or conduct of any members of the public present at the meeting, the Directors may thereupon determine by a recorded vote of the majority of the number of Directors present at the meeting that the Chairman or presiding officer of the Board shall have the authority to have such members of the public who are responsible for such acts or conduct removed from the meeting.

§ 1601.38 [Amended]

13. Section 1601.38 is amended by replacing the initial capital "T" with a lower case "t" and inserting the words "Except as otherwise provided by Pub. L. 98–166, 98–411 or subsequent legislation," at the beginning of the section.

Dated: July 25, 1985.

Richard N. Bagenstos,

Acting General Counsel.

BILLING CODE 6820–35–M

45 CFR Part 1606

Procedures Governing Termination of Financial Assistance

AGENCY: Legal Services Corporation.

ACTION: Amendment of rule.

SUMMARY: The Corporation's regulation governing termination of financial assistance is amended to conform to the requirements of Pub. L. 98–411, the appropriations bill under which the Corporation is presently funded. The amendments change the time limits in the current rule to conform to the time limits mandated by the appropriations bill. The amendments are technical in nature. Because the amendments are mandated by an act of Congress, the changes merely bring the regulations into conformity with current law, and no comments are required. Therefore, the amendments shall become effective thirty days from publication.

EFFECTIVE DATE: August 28, 1985.

FOR FURTHER INFORMATION CONTACT: Richard N. Bagenstos, Acting General Counsel, (202) 272–4010.

SUPPLEMENTARY INFORMATION: Pub. L. 98–411, which appropriates the Corporation's funding for 1985, incorporated language from Pub. L. 98–166, which set new requirements for termination of financial assistance proceedings. The Corporation has been following the time limits established by Congress in practice. These technical amendments are adopted to conform the language of the rule to the mandate of Congress, and to the practice of the Corporation.

The appropriations bill requires that a request for a hearing shall be made within thirty days after receipt of notice to terminate financial assistance, deny an application for refunding or suspend financial assistance and that the hearing shall be conducted within thirty days after receipt of such request for a hearing. The appropriations bill also requires that the Corporation make its final decision within thirty days after completion of the hearing.

These Congressional mandated require three changes in the existing regulation. The first amendment occurs in § 1606.4(b). The recipient is given thirty days within which to request a hearing after receiving the preliminary determination to defund. The second amendment occurs in § 1606.9(a). The time limit for setting the hearing is reduced from forty-five days to thirty days after the notice required by § 1601.6. Finally, § 1606.13(c) is amended to require the President to make his final decision within thirty days of the completion of the hearing.

Because these amendments are mandated by Congress, the Corporation has no discretion in amending its rules. Publishing the amendments in proposed form and soliciting comments thereon would be a meaningless exercise. Therefore, the technical amendments are being published in final form to become effective thirty days from date of publication.

List of Subjects in 45 CFR Part 1606

Administrative practice and procedure, Legal Services.

For the reasons set forth in the preamble, 45 CFR Part 1606 is amended as follows:

PART 1606—[AMENDED]

1. The Authority citation for Part 1606 continues to read as follows:

Authority: Sec. 1006(b) (1) and (3), 1007(a)(1), 1007(a)(3), 1007(a)(9), 1007(d), 1006(e), 1011 Legal Services Corporation Act of 1974, as amended (42 U.S.C. 2996e(b) (1) and (3), 2996f(a) (1), (3), and (9), 2996f(d), 2996g(e), 2996j); and Pub. L. 98–411.

§ 1606.4 [Amended]

2. Section 1606.4(b) introductory text is amended by removing the numeral "10" and inserting in its place the numeral "30" before the words "days of receipt of the preliminary determination".

§ 1606.9 [Amended]

3. Section 1606.9(a) is amended by removing the numeral "45" and inserting in its place the numeral "30" before the words "days after the notice required by § 1606.16".

§ 1606.13 [Amended]

4. Section 1606.13(c) is amended by removing the words "and normally within 30 days" and inserting in their place the words "but not later than 30

days after the completion of the hearing."

BILLING CODE 6820-35-M

45 CFR Part 1622

Public Access to Meetings Under the Government in the Sunshine Act

AGENCY: Legal Services Corporation.

ACTION: Final rule; amendment.

SUMMARY: On March 25, 1985, the Legal Services Corporation published proposed amendments to Part 1622 of its regulations for public comment. The comment period ended on April 24, 1985. No comments were received. On May 24, 1985, the Board of Directors unanimously voted to adopt the proposed amendments as final. Four amendments are made. Of these amendments only one, a revision of the section providing for emergency proceedings, makes a major, substantive change. The other three amendments are of a technical nature. The minor amendments provide for sending notice of meetings to program directors, deletion of the word "all" from the first sentence of paragraph (b) of § 1622.6, and reference to specific exemptions and a statement of reasons why specific discussions closed to public observation come within the cited exemption.

EFFECTIVE DATE: August 28, 1985.

FOR FURTHER INFORMATION CONTACT: Richard N. Bagenstos, Acting General Counsel (202) 272-4010.

SUPPLEMENTARY INFORMATION: On March 25, 1985, the Legal Services Corporation published proposed amendments to Part 1622 of its regulations for public comment. (50 FR 11740). No comments were received. On May 24, 1985, the Corporation's Board of Directors unanimously voted to adopt, as final, the proposed amendments to Part 1622 of the Regulations. The specific amendments are discussed on a section-by-section basis, below.

Section 1622.3 Open Meetings.

The amendment effects paragraph (c) of § 1622.3. The words "and the program director" are to be inserted after the words "governing body" in the two places these words appear in paragraph (c). This addition reflects the Corporation's present practice and is in response to previous comments received that expressed concern that unless notice was provided to the programs, the programs would not receive timely notice of meetings. This amendment ensures that timely notice is sent to programs.

Section 1622.6 Procedure for Closing Discussion or Withholding Information.

In paragraph (b) of § 1622.6 the word "all" has been removed after the words "A separate vote of". The deletion of the word "all" in the paragraph does not change the requirement that action closing a meeting or withholding information requires a recorded vote of a majority of all of the Directors of the Corporation. Here, the word "all" is removed to avoid a misinterpretation that a vote to close a meeting or withhold information may be defeated if one Director is unable to participate in the vote. Such an interpretation could result in an absudity. The amendment avoids the possible absudity. However, it does not relieve the Board of the responsibility of seeking the vote of every Director on the question.

In paragraph (e)(2) of § 1622.6, the words "together with" following the words "or series of meetings," has been replaced with the words "with reference to the specific exemption listed in § 1622.5, including a statement of reasons as to why the specific discussion comes within the cited exemption and". This change clarifies what information must be included in the full written explanation of the action closing the meeting. However, the new language does not add any additional requirement. The existing language is from the Government in the Sunshine Act. The legislative history of the Government in the Sunshine Act indicates that the written explanation requires references to specific exemptions, including a statement of reasons why the specific discussion comes within the cited exemption. Therefore, the change merely clarifies that which is already required.

Section 1622.9 Emergency Proceedings

This section has been completely revised. Previous comments received expressed the opinion the existing emergency proceedings provision violated the Government in the Sunshine Act. Many commentators stated that the disruptive members of the audience should be removed. The revised section allows the Board, by recorded vote of the majority of the Directors present, to authorize the Chairman or presiding officer of the meeting to cause disruptive members of the public to be removed from the meeting. This new provision enables the Board to conduct its meeting free from disruption, yet also follows the letter and spirit of the Government in the Sunshine Act.

List of Subjects in 45 CFR Part 1622

Legal services, Sunshine Act.

PART 1622—[AMENDED]

For the reasons set out in the preamble, 45 CFR Part 1622 is amended as follows:

1. The authority citation for Part 1622 continues to read as follows:

Authority: Sec. 1004(g), Pub. L. 95-222, 91 Stat. 1619. (42 U.S.C. 2996c(g)).

§ 1622.4 [Amended]

2. Paragraph (c) of § 1622.4 is amended by inserting the words "and the program director" after the words "counsel and the governing body" and after the words "meeting to the governing body".

§ 1622.6 [Amended]

3. Paragraph (b) of § 1622.6 is amended by removing the word "all" after the words "A separate vote of".

4. Paragraph (e)(2) of § 1622.6 is amended by removing the words "together with" following the words "or a series of meetings," and inserting in their place the words "with reference to the specific exemptions listed in § 1622.5, including a statement of reasons as to why the specific discussion comes within the cited exemption and".

5. Section 1622.9 is revised to read as follows:

§ 1622.9 Emergency Procedures.

If, in the opinion of the Chairman, the Directors are rendered incapable of conducting a meeting by the acts or conduct of any members of the public present at the meeting, the Directors may thereupon determine by a recorded vote of the majority of the number of Directors present at the meeting that the Chairman or presiding officer of the Board shall have the authority to have such members of the public who are responsible for such acts or conduct removed from the meeting.

Dated: July 24, 1985.

BILLING CODE 6820-35-M

45 CFR Part 1625

Denial of Refunding

AGENCY: Legal Services Corporation.

ACTION: Amendment of rule.

SUMMARY: The Corporation's regulation governing the denial of refunding is amended to conform with the requirements of Pub. L. 98-411, the appropriations bill under which the Corporation is presently funded. The amendments change the time limits in the current rule and shift the burden of proof in the proceedings to conform with the mandates of the appropriations bill. Because the amendments are mandated by an Act of Congress, the changes merely bring the regulations into conformity with current law, and no comments are required. Therefore, the amendments shall become effective thirty days from publication.

EFFECTIVE DATE: August 28, 1985.

FOR FURTHER INFORMATION CONTACT: Richard N. Bagenstos, Acting General Counsel, (202) 272-4010.

SUPPLEMENTARY INFORMATION: Pub. L. 98-411, which appropriates the Corporation's funding for 1985, incorporated language from Pub. L. 98-166, which set new requirements for denial of refunding proceedings. The Corporation has been following the time limits established by Congress in practice. These amendments are adopted to conform the language of the rule with the mandate of Congress, and the practice of the Corporation.

The appropriations bill requires that a request for a hearing shall be made within thirty days after receipt of notice to terminate financial assistance, deny an application for refunding or suspend financial assistance and that the hearing shall be conducted within thirty days after receipt of such request for a hearing. The appropriations bill also requires that the Corporation make its final decision within thirty days after completion of the hearing.

The appropriations bill also mandates that the recipient bear the burden of proof in the hearing to show cause why refunding should not be denied.

These Congressional mandates require three changes in the existing regulation. The first amendment occurs in § 1625.4(b). The recipient is given thirty days within which to request a hearing after receiving the preliminary determination not to refund. The second amendment occurs in § 1625.9. This section is revised to place the burden of proof on the recipient as mandated by Congress. Finally, § 1625.11(c) is amended to require the President to make his final decision within thirty days of the completion of the hearing.

Because these amendments are mandated by Congress, the Corporation has no discretion in amending its rules. Publishing the amendments in proposed form and soliciting comments thereon would be a meaningless exercise. Therefore, these amendments are being published in final form to become effective thirty days from date of publication.

List of Subjects in 45 CFR Part 1625

Administrative practice and procedure, Legal Services.

For the reasons set forth in the preamble, 45 CFR Part 1625 is amended as follows:

PART 1625—[AMENDED]

1. The Authority citation for Part 1625 is revised to read as follows:

Authority: Sec. 1006(b) (1) and (3), 1007(a)(1), 1007(a)(3), 1007(a)(9), 1007(d), 1006(e), 1011 Legal Services Corporation Act of 1974, as amended (42 U.S.C. 2996e(b) (1) and (3), 2996f(a) (1), (3), and (9), 2996f(d), 2996g(e), 2996j, and Pub. L. 98-411.

§ 1125.4 [Amended]

2. Section 1625.4(b) is amended by removing the numeral "10" and inserting in its place the numeral "30" before the words "days of receipt of the preliminary determination."

3. Section 1625.9 is revised as follows:

§ 1625.9 Burden of proof.

The recipient shall have the burden of showing cause why the Corporation's proposed action to deny refunding should not be taken.

§ 1625.11 [Amended]

4. Section 1625.11(c) is amended by removing the words "and normally within 10 days" and inserting in their place the words "but not later than 30 days after the completion of the hearing."

Dated: July 24, 1985.

Richard N. Bagenstos,

Acting General Counsel.

Proposed Rules

Federal Register
Vol. 50, No. 145
Monday, July 29, 1985

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Foreign Agricultural Service

7 CFR Part 1540

Emergency Relief From Certain Perishable Products Imported From Israel

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule establishes the procedure by which an entity representative of a U.S. industry producing perishable products can submit a request to the Department of Agriculture for emergency relief from increased, injurious imports of certain perishable products from Israel if such products are entering the United States at a reduced rate of duty or duty-free pursuant to a trade agreement between the United States and Israel entered into under section 102(b) of the Trade Act of 1974, as amended by Section 401 of the Trade and Tariff Act of 1984.

DATE: Comments must be received on or before August 28, 1985.

ADDRESS: Mail comments to Director, Asia, Africa & Eastern Europe Division, Foreign Agricultural Service, USDA, Room 5546–S, 14th and Independence Ave., SW., Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Lyle Sebranek, Director, Asia, Africa & Eastern Europe Division, International Trade Policy, Foreign Agricultural Service, U.S. Department of Agriculture, Washington, D.C. 20250, Tel: (202) 382–1289.

SUPPLEMENTARY INFORMATION: Section 401 of the Trade and Tariff Act of 1984, Pub. L. 98–573 (98 Stat. 3016) ("1984 Trade Act") amended the Trade Act of 1974 to authorize the President to negotiate a trade agreement with Israel to provide for the reduction or elimination of duties on imports between the two countries. Pursuant to that authority, the Agreement on the Establishment of a Free Trade Area between the Government of the United States of America and the Government of Israel was entered into on April 29, 1985. The Agreement was subsequently approved and implemented by the United States-Israel Free Trade Area Implementation Act of 1985, Pub. L. 99–47, June 11, 1985.

Section 404 of the 1984 Trade Act, as amended (19 U.S.C. 2112 note), provides, in part, that if a petition is filed with the U.S. International Trade Commission under the provisions of Section 201 of the Trade Act of 1974, as amended, alleging injury from imports from Israel of certain perishable products which are subject to any reduction or elimination of a duty imposed by the United States under a trade agreement entered into with Israel under section 102(b) of the Trade Act of 1974, as amended by section 401 of the 1984 Trade Act, then the petition may also be filed with the Secretary of Agriculture with a request that emergency relief be granted by the President.

Under the proposed rule, a U.S. entity seeking emergency relief from imports of perishable products from Israel would submit a request to the Administrator, Foreign Agricultural Service, of the Department of Agriculture providing such information as is necessary to permit the Secretary of Agriculture to make a determination as to whether a recommendation should be made to the President that emergency action should be taken. The request should provide identification of the perishable product concerned, evidence that the product was imported from Israel, evidence that increased imports of such perishable product are the substantial cause of serious injury or threat of serious injury to a U.S. industry producing a perishable product like or directly competitive with the imported product, and a statement indicating why emergency action would be warranted.

Section 404(e)(6) of the 1984 Trade Act, as amended, defines a "perishable product" for the purposes of the emergency relief provisions of section 404 to include concentrated citrus fruit juice provided for in items 165.25 and 165.35 of the Tariff Schedules of the United States (the "TSUS"). However, section 117 of that act reclassified the articles previously assigned TSUS item number 165.35 by splitting those articles into two categories and assigning them TSUS item numbers 165.29 and 165.36. The definition of a perishable product in § 1540.21(6) of the proposed rule reflects this change in classification.

The public is invited to submit comments and suggestions regarding the proposed rule to the above address. Each person submitting comments and suggestions regarding the proposed rule should include his/her name and address and should give reasons for suggested changes. Copies of all communications received will be available for examination by interested persons in Room 5546 South Building, USDA, during regular business hours.

This proposed rule has been reviewed under USDA procedures required by Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "not major" since the proposed rule, if made final, would not have any of the effects specified in those documents.

The Administrator, Foreign Agricultural Service certifies that this proposed rule will not, if promulgated, have a significant economic impact on a substantial number of small entities. Consequently, no regulatory flexibility analysis is required under the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The public is invited to comment on the impact of this proposed rule on small entities.

An assessment of the impact of this rule on the environment was made and, based on this evaluation, this action is not a major federal action and will have no foreseeable significant effects on the quality of the human environment. Consequently, no environmental impact statement is necessary for this proposed rule. The environmental assessment is available for review in Room 5546, South Building, USDA during normal business hours.

The paperwork requirements imposed by this rule have been approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 and assigned number 0551–0023.

List of Subjects in 7 CFR Part 1540

International agricultural trade, Israel, Perishable products.

PART 1540—[AMENDED]

In accordance with the above, it is proposed to amend 7 CFR Part 1540 by adding the following new Subpart B—Emergency Relief from Certain Perishable Products Imported from Israel:

Subpart B—Emergency Relief From Certain Perishable Products Imported From Israel

Sec.
1540.20 Applicability of subpart.
1540.21 Definition.
1540.22 Who may file request.
1540.23 Contents of request.
1540.24 Determination of the Secretary of Agriculture.
1540.25 Information.

Authority: Sec. 404, Pub. L. 98–573, 98 Stat. 3016, as amended (19 U.S.C. 2112 note); 5 U.S.C. 301.

Cross Reference: For U.S. International Trade Commission regulations concerning investigations of import injury and the rules pertaining to the filing of a Section 201 petition, see 19 CFR Part 206.

Subpart B—Emergency Relief From Certain Perishable Products Imported From Israel

§ 1540.20 Applicability of subpart.

This subpart applies to requests filed with the Department of Agriculture under section 404 of the Trade and Tariff Act of 1984, Pub. L. 98–573, for emergency relief from imports of certain perishable products from Israel entering the United States at a reduced rate of duty or duty-free pursuant to a trade agreement between the United States and Israel entered into under section 102(b)(1) of the Trade Act of 1974, as amended.

§ 1540.21 Definition.

"Perishable product" means:

(a) Live plants provided for in subpart A of part 6 of schedule 1 of the 1985 Tariff Schedules of the United States (the "TSUS");

(b) Fresh or chilled vegetables provided for in items 135.03 through 138.46 of the TSUS;

(c) Fresh mushrooms provided for in item 144.10 of the TSUS;

(d) Fresh fruit provided for in items 146.10, 146.20, 146.30, 146.50 through 146.62, 146.90, 146.91, 147.03 through 147.44, 147.50 through 149.21 and 149.50 of the TSUS:

(e) Fresh cut flowers provided for in items 192.17, 192.18, and 192.21 of the TSUS; and

(f) Concentrated citrus fruit juices provided for in items 165.25, 165.29 and 165.36 of the TSUS.

§ 1540.22 Who may file request.

A request under this subpart may be filed by an entity, including a firm, or group of workers, trade association, or certified or recognized union which is representative of a domestic industry producing a perishable product like or directly competitive with a perishable product that such entity claims is being imported from Israel into the United States at a reduced duty or duty-free under the provisions of a trade agreement between the United States and Israel entered into under section 102(b)(1) of the Trade Act of 1974, as amended, in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to such domestic industry.

§ 1540.23 Contents of request.

A request for emergency action under section 404 of the Trade and Tariff Act of 1984 shall be submitted in duplicate to the Administrator, Foreign Agricultural Service, United States Department of Agriculture, Washington, D.C. 20250. Such request shall be supported by appropriate information and data and shall to the extent possible: A description of the imported perishable product(s) allegedly causing, or threatening to cause, serious injury; data showing that the perishable product allegedly causing, or threatening to cause, serious injury is being imported from Israel in increased quantities as compared with imports of the same product from Israel during a previous representative period of time (including a statement of why the period selected by the petitioner should be considered to be representative); evidence of serious injury or threat thereof to the domestic industry substantially caused by the increased quantities of imports of the product from Israel; and a statement indicating why emergency action would be warranted under section 404 (including all available evidence that the injury caused by the increased quantities of imports from Israel would be relieved by the withdrawal of the reduction of the duty or elimination of the duty-free treatment provided to the product under the trade agreement). A copy of the petition and the supporting evidence filed with the United States International Trade Commission under section 201 of the Trade Act of 1974, as amended, must be provided with the request for emergency action.

§ 1540.24 Determination of the Secretary of Agriculture.

If the Secretary of Agriculture has reason to believe that the perishable product(s) which is the subject of a petition under this subpart is being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing a perishable product like or directly competitive with the imported perishable product and that emergency action is warranted, the Secretary, within 14 days after the filing of the petition under § 1540.23 shall recommend to the President that the President take emergency action. If the Secretary determines not to recommend the imposition of emergency action, the Secretary, within 14 days after the filing of the petition, will publish in the Federal Register a notice of such determination and will so advise the petitioner.

§ 1540.25 Information.

Person desiring information from the Department of Agriculture regarding the Department's implementation of section 404 of the Trade and Tariff Act of 1984 should address such inquiries to the Administrator, Foreign Agricultural Service, United States Department of Agriculture, Washington, D.C. 20250.

Issued at Washington, D.C., this 8th day of July 1985.

Richard A. Smith,
Administrator, FAS.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 832 3138]

Service One International Corp., et al.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require a Chatsworth, Calif. credit counseling service and two corporate officers, among other things, to cease misrepresenting that they will obtain credit or credit cards for applicants; have developed working relationships with any creditors; or will provide a full or partial refund of any fees paid by consumers seeking credit or credit cards. Additionally, respondent woud be prohibited from misrepresenting the likelihood of any consumer obtaining credit or credit cards; the extent to which it can help consumers seeking credit or credit cards; or the conditions under which it will furnish refunds. Further, respondent would be required to send to all customers who paid for the service and did not receive a credit card, a notice that gives them the option of

receiving a full refund within 30 days or participating in respondent's new credit-counseling service without additional

attorney, and counsel for the Federal Trade Commission that:

may, without further notice to proposed respondents, (1) issue its complaint

(b) Have developed any working or other relationship with any credit card

face type: "First Credit Services—Refund Offer."

III

It is further ordered that respondents

UMI

receiving a full refund within 30 days or participating in respondent's new credit-counseling service without additional charge.

DATE: Comments must be received on or before September 27, 1985.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th St. and Pa. Ave., NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: John F. Lefevre, FTC/I–500, Washington, D.C. 20580. (202) 724–1185.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

List of Subjects in 16 CFR Part 13

Consumer credit, Credit cards, Trade practices.

Service One International Corporation, a corporation, also trading and doing business as Service One Corporation and First Credit Services, and Reza Fayazi and Ali Fayazi, individually and as officers of said corporation.

[File No. 832–3138, Agreement Containing Consent Order To Cease and Desist]

The Federal Trade Commission having initiated an investigation of certain acts and practices of Service One International Corporation, a corporation, also trading and doing business as Service One Corporation and First Credit Services, and Reza Fayazi and Ali Fayazi, individually and as officers of said corporation, and it now appearing that Service One International Corporation, a corporation, and Reza Fayazi and Ali Fayazi individually and as officers of said corporation, hereinafter sometimes referred to as proposed respondents, are willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between Service One International Corporation, by its duly authorized officer, and Reza Fayazi and Ali Fayazi, individually and as officers of said corporation, and their attorney, and counsel for the Federal Trade Commission that:

1. Proposed Respondent Service One International Corporation is a corporation organized, existing and doing business under and by virtue of the laws of the State of California with its principal office and place of business located at 21032 Devonshire Street, Suite 215, Chatsworth, California 91311. Service One International Corporation trades and does business as Service One Corporation and First Credit Services.

Proposed respondents Reza Fayazi and Ali Fayazi have been officers of said corporation. They have formulated, directed and controlled the policies, acts and practices of said corporation and their address is the same as that of Service One International Corporation.

2. Proposed respondents admit all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondents waive:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to settle or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim they may have under the Equal Access to Justice Act, 5 U.S.C. 50 *et seq.*

4. This agreement shall not become part of the public record of the proceedings unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondents, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondents that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondents, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondents' address as stated in this agreement shall constitute service. Proposed respondents waive any right they may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondents have read the proposed complaint and order contemplated hereby. They understand that once the order has been issued, they will be required to file one or more compliance reports showing that they have fully compiled with the order. Proposed respondents further understand that they may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is hereby ordered that respondents Service One International Corporation, a corporation, its successors and assigns, and its officers, and Reza Fayazi and Ali Fayazi individually and as officers of said corporation, and respondents' agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale and distribution of any service or material purporting to secure, or to assist in securing, credit or a credit card for any consumer(s) or to assist any consumer(s) in obtaining credit or a credit card, do forthwith cease and desist from:

1. Representing directly or by implication, in any manner, contrary to fact, that they:

(a) Will obtain credit or a credit card for, or will send a credit card to, any member of the public;

(b) Have developed any working or other relationship with any credit card issuer or other creditor that issues or will issue credit cards or grants or will grant credit;

(c) Will provide a full or partial refund of any fee paid to secure or obtain credit or a credit card.

2. Misrepresenting in any manner:

(a) The conditions under which any consumer can secure or obtain credit or a credit card or the likelihood that any consumer will secure or obtain credit or a credit card, including, but not limited to, the percentage or number of credit applicants who receive credit and whether bankruptcy, no credit history or a prior, adverse credit history make it more difficult to secure or obtain credit or a credit card;

(b) The extent to which help will be given any consumer to secure or obtain credit or a credit card;

(c) The conditions under which any refund will be furnished to any consumer.

II

It is further ordered that respondent Service One International Corporation shall:

1. Within twelve months after the date of service of this Order, send by first class mail in the manner described below, a copy of the notice that is affixed hereto as Attachment A, to each person who between February 1, 1982, and the date of service of this Order paid money to First Credit Services in connection with its credit card program and has not received a refund of the full amount paid. If ninety percent or more of the customers to whom the notice is sent within the first three months after the date of service of this Order return the notice within six months after the date of service of this Order, the words "twelve months" in the first line of subparagraph 1 are changed to "eighteen months." The notice shall appear by itself in not less than 12 point bold face type, on one side of a sheet of paper not less than 8½ inches by 11 inches. The print shall be black and the color of the paper shall be yellow. The notice shall be accompanied by a postage-prepaid, addressed return envelope. The notice may be accompanied by not more than 3 other pieces of paper, none of which shall be larger than the notice or the same color as the notice. The notice shall be mailed to the customer at the last known address shown in respondent's records for said customer. The face of the envelope in which the notice is mailed to the customer shall contain the following phrase printed in 12 point bold face type: "First Credit Services—Refund Offer."

2. Send by first class mail a refund check to each customer who returns the notice with Option 1 checked. Service One International Corporation shall also mail a refund check to each such customer who requests a refund by any other method. In each case the refund check shall be made payable to the customer for the total amount the customer paid, less any refund previously provided the customer and be mailed within 30 days of receipt of the notice or other request to the address the customer provides. If the customer does not provide an address, the check shall be mailed to the address to which the notice described in II(1) was mailed or to the customer's last known address, whichever is most recent.

3. Within thirty days of receipt of the notice, send by first class mail to each customer who returns the notice with Option 2 checked, to the address the customer provides:

(a) (1) A letter stating that the customer has been approved for a Visa or MasterCard credit card together with the name and address of the institution to which the customer should send the $250 to serve as a minimum balance for the savings account; and

(2) A postage prepaid envelope made out to that name and address; or

(b)(1) A letter stating that the customer has not been approved for a Visa or MasterCard credit card (which letter shall be in addition to the adverse action notice required by the Equal Credit Opportunity Act, 15 U.S.C. 1691 *et seq.*, and § 202.9 of Regulation B, 12 CFR Part 202); and

(2) A refund check payable to that customer for the total amount the customer paid, less any refund previously provided the customer.

If the customer does not provide an address, the items shall be mailed to the address to which the notice described in Paragraph 1 of Section II was mailed or to the customer's last known address, whichever is most recent.

4. Within thrity days after receipt of $250 by the card issuing institution on behalf of each customer described in Subparagraph 3(a), above, send such customer by first class mail a Visa or MasterCard credit card in that customer's name, which that customer may use in connection with a credit card account opened in his or her name. The address to which the card shall be sent shall be determined in the manner described in Paragraph 3, above.

III

It is further ordered that respondents shall maintain for at least three (3) years and, upon request, make available to the Federal Trade Commission for inspection and copying:

1. Copies of all advertising and promotional materials concerning any service or material offered to help secure or obtain credit or a credit card.

2. Copies of all advertising and promotional materials concerning any offer of a refund.

3. Copies of all requests made for a refund and of all correspondence and other records relating to such requests, as well as evidence of what refunds are made.

IV

It is further ordered that respondents shall notify the Federal Trade Commission at least thirty (30) days prior to any proposed changes such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporate structure of respondents that may affect compliance obligations arising out of this Order.

V

It is further ordered that respondents shall deliver a copy of this Order to each present and future employee engaged in preparing or making any oral or written representations to consumers concerning the securing or obtaining of credit or a credit card or the making of any refund offer or engaged in the granting or denying of refund requests and obtain from such person a signed statement acknowledging receipt of a copy of this Order.

VI

It is further ordered that respondents herein shall within sixty (60) days after the date of service upon them of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this Order.

Previous Subscribers of First Credit Services

Note This Refund Offer

If you previously paid money to First Credit Services to get a credit card, you may choose either Option 1, or Option 2, as part of an agreement with the Federal Trade Commission.

Option 1. If you decide not to participate in Service One Corporation's new credit offer outlined below, Service One will refund to you the money you

VOL 50 ISS 145 JL 29 1985 UMI

paid to First Credit Services, if you so request.

Option 2. You may apply for a Visa/Mastercard credit card through Service One Corporation, using the enclosed application, and you pay *no processing fee.* To obtain a card, from us you must establish and maintain a savings account with a minimum balance of $250 with the card issuer and you will be billed for a $35 annual card fee. If your application is rejected, we will automatically refund in full any fee you paid to First Credit Services when you previously applied to First Credit Services for credit.

Check the Appropriate Box, Fill in your Name and Address, and Return This Form In the Enclosed Business Reply Envelope

Option 1 ( ) Please refund the money I paid to First Credit Services.

Option 2 ( ) Please accept my enclosed application for a Visa or Mastercard credit card with no procesaing fee.

Attachment A

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Service One International Corporation, also trading and doing business as Service One Corporation and First Credit Services, and Reza Fayazi and Ali Fayazi, individually and as officers of the corporation.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposd order.

The proposed complaint alleges that respondents violated section 5 of the Federal Trade Commission Act, 15 U.S.C. sec. 45, by:

• Misrepresenting that they will obtain credit cards for consumers for a fee.

• Misrepresenting that they have working relationships with banks that will issue credit cards to consumers regardless of past credit experience.

• Misrepresenting that consumers who have paid a fee to respondents to obtain a credit card but do not receive a credit card will obtain a full refund of the fee paid.

The proposed order prohibits respondents from misrepresenting:

• That they will obtain credit or credit cards for, or send them to, consumers.

• That they have developed relationships with credit card issuers or other creditors that issue credit cards or grant credit.

• The conditions under which consumers can secure credit or credit cards or the likelihood that consumers will secure credit or credit cards.

• The conditions under which refunds will be furnished to consumers.

The proposed order also requires respondents to offer restitution to their prior customers whose fees have not been refunded. Such customers are to be given the option of receiving a refund or receiving approval for a Visa or MasterCard credit card account. The account would require payment of a $35 annual card fee and maintenance of a minimum balance of $250 in a saving account with the card issuer.

The purpose of this anaysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,
Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 920

Amendment to the Maryland Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Reopening and extension of the public comment period.

SUMMARY: OSM is reopening and extending the comment period for 15 days on Maryland's program amendment as a modification to its permanent regulatory program which was conditionally approved by the Secretary of the Interior under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The Maryland amendment consists of proposed regulation changes to the State requirements governing the use of explosives. The submissionn is intended to satisfy a required amendment to the State's program and also makes certain additional changes to the State's proposed regulations approved by the Director on January 22, 1985.

OSM published a notice in the **Federal Register** on March 11, 1985, announcing receipt of the amendment and inviting public comment on its adequacy (50 FR 9679). The public comment period ended April 10, 1985. During its review of Marlands' proposed provisions, OSM identified a provision which was inconsistent with the Federal regulations. OSM notified Maryland of its concern, and in a letter dated July 10, 1985, Maryland responded by submitting revised provision to the proposed amendment amendment (Administrative Record MD–317).

OSM is reopening and extending the comment period for 15 days to provide the public an opportunity to reconsider the adequacy of Maryland's proposed amendment in light of the additional information.

This notice sets forth the times and locations that the Maryland proposed amendment are available for public inspection, and the comment period during which interested persons may submit written comments on the proposed amendment.

DATE: Written comment must be received on or before 4:00 p.m., on August 13, 1985 to be considered. Comments received after August 13, 1985, will not necessarily be considered in the Director's decision to approve or disappove the proposed program modifications.

ADDRESSES: Written comments should be mailed or hand delivered to:

Office of Surface Mining Reclamation and Enforcement, Charleston Field Office, 603 Morris Street, Charleston, West Virginia 25301, Attention: Maryland Administrative Record, Telephone: (304) 347–7158

Copies of the Maryland program, the proposed amendment, and all written comments received in response to this notice will be available for review at the OSM offices and the Office of the State regulatory authority listed below,

Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays. Each requestor may receive, free of charge, one single copy of the proposed amendment from OSM's Charleston Field Office listed below.

Office of Surface Mining Reclamation and Enforcement, Charleston Field Office, 603 Morris Street, Charleston, West Virginia 25301, Telephone: (304) 347–7158

Office of Surface Mining Reclamation and Enforcement, 1100 "L" Street, NW., Room 5124, Washington, D.C. 20240, Telephone: (202) 343–7896

Maryland Bureau of Mines, 69 Hill Street, Frostburg, Maryland 21532, Telephone: (301) 689–4136

FOR FURTHER INFORMATION CONTACT: Mr. James Blankenship, Field Office Director, Charleston Field Office, Office of Surface Mining, 603 Morris Street, Charleston, West Virginia 25301; Telephone (304) 347–7158.

SUPPLEMENTARY INFORMATION: The Maryland program was conditionally approved by the Secretary of the Interior on December 1, 1980 (45 FR 79430–79451). Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Maryland program can be found in the December 1, 1980 **Federal Register.** On February 18, 1982, following submission of program amendments to satisfy the conditions of program approval, the Maryland program was fully approved by the Secretary (47 FR 7214–7217).

On May 28, 1984, Maryland submitted statute and regulations and other material which would establish requirements for the training, examination and certification of blasters working in surface mining operations and revise the State's performance standards for the use of explosives. Addtional information was submitted on June 13, 1984. These materials were later supplemented by additional information submitted by the State on October 5, 1984. These proposed modifications were approved by the Director on January 22, 1985 (50 FR 2782–2785). The Director's approval required that one provision of the proposed requirements for the use of explosives be revised and submitted as a program amendment by March 25, 1985. The required amendment related to the provisions of 30 CFR 816.62(a) which requires information on how to request a preblasting survey to be provided to residents or owners of dwellings or other structures within ½ mile of the permit area at least 30 days prior to blasting. The proposed regulations which are currently being considered are intended to address this required amendment and make other revisions as desired by the State. Most of the revisions are editorial in nature and have no effect on the requirements approved by the Director on January 22, 1985. All of the changes are identified in the January 30 submission.

On March 11, 1985, OSM announced procedures for a public comment period and hearing on the proposed amendment submitted by the State of Maryland. During its review of Maryland's proposed amendment, OSM identified the following concern:

Maryland's proposed rules at COMAR 08.13.09.25C(2) requires that copies of the blasting schedule must be distributed to local governments, public utilities, and residents or owners of dwellings or other structures within ½ mile of the permit area. Certain portions of the permit area—haul roads, coal preparation and loading facilities, and transportation facilities were excluded. This would be inconsistent with current Federal regulations located at 30 CFR 816.64(b)(2).

OSM notified Maryland of the concern and Maryland responded in a letter dated July 10, 1985, informing OSM that it would revise its regulations by deleting the sentence at its regulation .25C(2) which had excluded haul or access roads, coal preparation and loading facilities, and other transportation facilities from the meaning of permit area.

The full text of the proposed amendment and additional material are available for review at the locations listed above under **"ADDRESSES".** Accordingly, OSM is seeking public comments on the adequacy of the State's submission. The public comment period is extended to August 13, 1985. All comments should be submitted to the location shown above under **"ADDRESSES"** in order to be considered by the Director in his decision on the program amendments.

BILLING CODE 4310-05-M

30 CFR Part 934

Public Comment and Opportunity for Public Hearing on Modified Portions of the North Dakota Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing procedures for the public comment period and for a public hearing on the adequacy of proposed amendments to the North Dakota permanent regulatory program which was approved by the Secretary of the Interior pursuant to the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments submitted by North Dakota for the Secretary's approval include modifications to the State statute and regulations intended to satisfy the remaining three program conditions concerning the following: (1) Revised definition of "valid existing right"; (2) requirement that permit applicants shall identify all outstanding violations of SMCRA and any other State law or rule; (3) compensation to landowners for damage to structures or facilities that occurs as result of subsidence. North Dakota also submitted, as part of the amendment package, several revisions to the statute and regulations unrelated to the program conditions.

DATE: Written comments not received on or before 4:00 p.m. August 28, 1985 will not necessarily be considered.

A public hearing on the proposal will be held, if requested on August 23, 1985 at the address listed below under **"ADDRESSES."** Any person interested in making an oral or written presentation at the hearing should contact Mr. William Thomas at the address listed below by August 19, 1985. If no person has contacted Mr. Thomas by this date to express an interest in the hearing, the hearing will not be held. If only one person has so contacted Mr. Thomas, a public meeting rather than a public hearing may be held and the results of the meeting included in the Administrative Record.

ADDRESSES: The public hearing will be held at the North Dakota Capitol Building, Bismarck, North Dakota 58505.

Written comments should be mailed or hand-delivered to Mr. William Thomas, Office of Surface Mining Reclamation and Enforcement, Freden Building, 935 Pendell Boulevard, Mills, Wyoming 82644.

See **"SUPPLEMENTARY INFORMATION"** for address where copies of the North

VOL 50 ISS 145 JL 29 1985 UMI

Dakota program amendment and administrative record on the North Dakota program are available. Each requestor may receive, free of charge, one single copy of the proposed program amendment by contacting the OSM Casper Field Office listed above.

FOR FURTHER INFORMATION CONTACT: Mr. William Thomas, Office of Surface Mining Reclamation and Enforcement, Freden Building, 935 Pendell Boulevard, Mills, Wyoming 82466; Telephone: (307) 261–5824.

SUPPLEMENTARY INFORMATION: Copies of the North Dakota program amendment, the North Dakota program and the administrative record on the North Dakota program are available for public review and copying at the OSM offices and the office of the State regulatory authority listed below, Monday through Friday, 9:00 a.m. to 4:00 p.m., excluding holidays.

Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5124, 1100 "L" Street, NW., Washington, D.C. 20240.

Office of Surface Mining Reclamation and Enforcement, Freden Building, 935 Pendell Boulevard, Mills, Wyoming 82466.

North Dakota Public Service Commission, Reclamation Division, Capitol Building, Bismarck, North Dakota 58505 Wyoming 82644.

Background

The North Dakota program was approved by the Secretary of the Interior on December 15, 1980, conditioned on the correction of 13 minor deficiencies. Information pertinent to the general background, revisions modifications and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and detailed explanation of the conditions of approval of the North Dakota program can be found in the December 15, 1980 **Federal Register** (45 FR 82214), February 9, 1983 **Federal Register** (48 FR 8902), November 9, 1983 **Federal Register** (48 FR 51458), July 19, 1984 **Federal Register** (49 FR 29214), and January 3, 1985 **Federal Register** (50 FR 260).

The three remaining conditions on the Secretary's approval of the North Dakota program are as follows:

(e) The Secretary requires North Dakota to amend its program by adopting provisions which prohibit the issuance of a permit to an applicant with outstanding violations in any State in a manner no less stringent than sections 507 and 510 of SMCRA;

(m) The Secretary requires North Dakota to enact provisions revising the date for establishment of valid existing rights to be consistent with section 552(e) of SMCRA; and

(n) The Secretary requires North Dakota to amend its program to address compensation to an owner of a structure or facility damaged by subsidence in manner which is no less effective than the compensation provided by 30 CFR 819.17 and 817.121.

Proposed Amendments

On June 18, 1985, the State of North Dakota submitted to OSM amendments to its permanent regulatory program. The amendment package is intended primarily to address the three remaining conditions of approval by the Secretary of the Interior on the North Dakota program.

The State revised its statute at sections 38–14.1–14 and 38–14.1–21 and regulations at sections 69–05.2–10–03 and 69–05.2–06–02 to require all applicants for a permit to identify all permits held by the applicant within the last five years in any State. The revised provisions also requires applicants to identify all outstanding violations in all States prior to permit issuance. This revision is intended to satisfy condition (e).

The State has revised its definition of "valid existing rights" at section 38–14.1–07 of the North Dakota Century Code and section 69–05.2114 of the North Dakota Administrative Code by reflecting August 3, 1977 as the date by which the regulatory authority will evaluate and make valid existing rights determinations. This satutory and rule change is intended to satisfy condition (m).

The State also submitted material intended to address condition (n). The proposed language at section 69–05.2–13–12(4) of the North Dakota Administrative Code provides for compensation to owners of structures or facilities damaged by underground mine subsidence.

In addition to the above revisions, North Dakota submitted to OSM the following proposed program amendments not associated with program conditions (e), (m), or (n): (1) Repeal of all language concerning cultural resources from sections 69–05.2–08–03 and 69–05.2–09–08 of the North Dakota rules and consolidation of all cultural resources provisions in the North Dakota Century Code at sections 38–14.1–10, 38–14.1–14.1. u. and q., 38–14.1–21. and 38–14.1–30.1.; (2) revision to North Dakota Century Code at section 38–14.1–14.1. r., and the implementing regulations at section 69–05.2–09–02 allowing qualified registered land surveyors to prepare and certify maps, cross-sections and plans. This proposed revision is in response to similar changes made to section 507(b)(4) of SMCRA: (3) minor revision to sections 38–14.1–04.2 and 38–14.1–04.3 of the North Dakota statute concerning responsibilities of the North Dakota reclamation advisory committee; and (4) revision to language at section 69–05.2–16–09 of the rules concerning sedimentation pond certification requirements. This change is proposed in light of similar revisions to 30 CFR 816.46(b)(3).

OSM is seeking comment on whether North Dakota's proposed revisions to its statute and regulations are no less stringent than SMCRA and no less effective than the requirements of the revised Federal regulations and satisfy the criteria for approval of State program amendments at 30 CFR 732.15 and 732.17.

The full text of the proposed program modifications submitted by North Dakota for OSM's consideration is available for public review at the addresses listed under **"SUPPLEMENTARY INFORMATION."**

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et. seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

Paperwork Reduction Act: This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

BILLING CODE 4310–05–M

30 CFR Part 944

Consideration of Amendments to the Utah Permanent Program Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Reopening of public comment period.

SUMMARY: OSM is reopening the period for public comment on the adequacy of proposed amendments to the Utah Permanent Regulatory Program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). On August 13, 1984, Utah submitted proposed program amendments for OSM's approval pertaining to the definition of "affected area," enforcement and penalty requirements and bonding and insurance requirements (Administrative Record UT–336). The public was invited to comment on these provisions for 30 days (49 FR 40421, October 16, 1984.) In a letter to the State dated January 28, 1985, OSM informed Utah of deficiencies in its proposed program amendments (Administrative Record UT–353). On March 6, 1985, Utah submitted additional materials to address the deficiencies identified by OSM. (Administrative Record No. UT–355). The public was invited to comment on these revised provisions for 15 days (50 FR 12834, April 1, 1985). In a letter to the State dated May 6, 1985, OSM informed Utah of additional deficiencies in its proposed amendments. On July 5, 1985, Utah submitted additional material to address the conerns identified by OSM.

OSM is reopening the period for 15 days to provide the public an opportunity to comment on additional material submitted by the State on July 5, 1985.

DATES: Written comments not received by 4:30 p.m. on August 13, 1985, will not necessarily by considered in the Director's decision on whether the proposed amendments satisfy the criteria for approval.

ADDRESSES: Written comments should be sent to Mr. Robert Hagen, Field Office Director, Office of Surface Mining Reclamation and Enforcement, Albuquerque Field Office, 219 Central Avenue, NW., Albuquerque, New Mexico 87102.

Copies of the Utah program, the proposed modifications to the program and all written comments received in response to this notice will be available for public review at the OSM Field Office above and the OSM Headquarters office and the office of the State regulatory authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays. Each requestor may receive, free of charge, one single copy of the amendments by contacting the OSM Albuquerque Field Office listed above.

Utah Division of Oil, Gas and Mining, Department of Natural Resources, 4241 State Office Building, Salt Lake City, Utah 84114

Office of Surface Mining, 1100 "L" Street, NW., Room 5124, Washington, D.C. 20240

FOR FURTHER INFORMATION CONTRACT: Mr. Arthur W. Abbs, Chief, Division of State Program Assistance, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue, NW., Washington, D.C. 20240; Telephone: (202) 343–5351.

SUPPLEMENTARY INFORMATION: On January 21, 1981, the Secretary of the Interior conditionally approved the Utah program under SMCRA for the regulation of the surface coal mining operations in the State (46 FR 5899–5915).

Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Utah program can be found in the January 21, 1981 **Federal Register** (46 FR 5899–5915).

On August 13, 1984, the Utah Division of Oil, Gas and Mining (DOGM) submitted proposed program amendments for OSM's approval (Administrative Record No. UT–336). The amendments include changes pertaining to the definition of "affected area", enforcement and penalty requirements, and bonding and insurance requirements.

On October 16, 1984, OSM sought public comment on whether the proposed modifications to the Utah permanent program listed above satisfy the criteria for approval of State program amendments set forth at 30 CFR 732.15 and 732.17 (49 FR 40421). In a letter to the State dated January 28, 1985, OSM informed the State of deficiencies identified in the proposed program amendments (Administrative Record No. UT–353). On March 6, 1985, Utah submitted additional material to respond to the concerns raised by OSM in its January 28, 1985 letter (Administrative Record No. UT–355).

On April 1, 1985 OSM reopened the comment period for 15 days on these revised provisions (50 FR 12834). Following the close of the comment period, OSM identified four additional concerns related to the proposed amendments and notified the State of these concerns in a letter dated May 6, 1985. On July 5, 1985 Utah submitted additional revised material to respond to the concerns raised by OSM.

Therefore, OSM is reopening the public comment period on the proposed amendments to provide the public an opportunity to review and comment on the material submitted by the State on July 5, 1985.

To approve the proposed provisions, OSM must find that the amendments are no less stringent than SMCRA and no less effective than the Federal regulations in meeting the purposes of SMCRA. With respect to Utah's penalty provisions OSM must find that the State program, as proposed to be amended, incorporates penalties no less stringent than those set forth under the Federal requirements and contains the same or similar procedural requirements. With respect to Utah's enforcement provisions, OSM must find that the State program, as proposed to be amended, incorporates sanctions no less stringent than those set forth in the Federal requirements and contains the same or similar procedural requirements. If the Director determines the proposed modifications meet the criteria, the amendments will be approved, and 30 CFR Part 944 modified accordingly. The Director's, approval of the amendments would be contingent on the State's adoption of the amendments in the identical form they were reviewed by OSM and the public.

30 CFR Part 948

Permanent State Regulatory Program of West Virginia

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing procedures for a public comment period on its proposal to extend the deadline for the State of West Virginia to submit a required amendment to its permanent regulatory program (hereinafter referred to as the West Virginia program), which the Secretary of the Interior conditionally approved under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

On April 23, 1985, OSM amended 30 CFR 948.16 to require that, no later than June 24, 1985, West Virginia amend its program to require that all persons responsible for the use of explosives be certifed (50 FR 15889–15891). By letter dated June 24, 1985, West Virginia notified OSM that, within 60 days, the State would begin formal rulemaking to provide that all surface blasting (including those operations using less than five pounds and those involving surface disturbance at underground mines) must be done in accordance with section 4C of the West Virginia surface mining regulations (Administrative Record No. WV 661). Therefore, OSM is proposing to extend the deadline for submission of the required amendment for 120 days.

This notice sets forth the times and locations that the West Virginia program and deadline extension request will be available for public inspection and establishes the comment period during which interested persons may submit written comments.

DATES: Written comments from the public not received by 4:00 p.m. on August 28, 1985 will not necessarily be considered in the decision process.

ADDRESSES: Written comments should be mailed or hand delivered to: Office of Surface Mining Reclamation and Enforcement, Charleston Field Office. Attn: West Virginia Administrative Record, 603 Morris Street, Charleston, West Virginia 25301.

Copies of the extension request, the West Virginia program and the administrative record on the West Virginia program are available for public review and copying at the OSM offices and the State regulatory authority office listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays.

Office of Surface Mining Reclamation and Enforcement, Charleston Field Office, 603 Morris Street, Charleston, West Virginia 25301. Telephone: (304) 347–7158

Office of Surface Mining Reclamation and Enforcement, 1100 "L" Street, NW., Room 5124, Washington, D.C. 20240. Telephone: (202) 343–4855

West Virginia Department of Energy, 1615 Washington Street, East Charleston, West Virginia 25305. Telephone: (304) 348–3267.

FOR FURTHER INFORMATION CONTACT: Mr. James C. Blankenship, Jr., Director, Charleston Field Office, Office of Surface Mining Reclamation and Enforcement, 630 Morris Street, Charleston, West Virginia 25301. Telephone: (304) 347–7158.

SUPPLEMENTARY INFORMATION: On March 3, 1980, West Virginia submitted its proposed permanent regulatory program to the Secretary of the Interior. On October 22, 1980, following a review of the proposed program in accordance with 30 CFR Part 732, the Secretary approved it in part and disapproved it in part (45 FR 69249–69271).

West Virginia resubmitted its proposed program on December 19, 1980, which the Secretary conditionally approved on January 21, 1981. Information concerning the general background of the permanent program submission, as well as the Secretary's findings, the disposition of comments and an explanation of the initial conditions of approval of the West Virginia program, can be found in the January 21, 1981 **Federal Register** (46 FR 5915–5956).

Since then the program has been amended several times, including a September 20, 1984 amendment containing West Virginia's blaster training, examination and certification program. The Director approved this amendment, but required correction of three minor deficiencies (49 FR 36837–36840). On November 20, 1984, West Virginia submitted proposed regulations and a policy statement to resolve these deficiencies. The Director approved this amendment on April 23, 1985, but required the State, no later than June 24, 1985, to submit an Attorney General's opinion that the policy statement could legally override a conflicting regulation (50 FR 15889–15891).

By letter dated June 24, 1985, West Virginia notified OSM that it had decided to resolve the conflict by formal rulemaking through the legislative process instead of seeking the Attorney General's opinion (Administrative Record No. WV 661). The letter committed the State to begin the rulemaking process within 60 days. To allow the State sufficient time to complete the initial Procedural stages of formal rulemaking, the Director is proposing to extend the deadline for amendment submission to November 26, 1985. He is now seeking comment on this proposed extension.

The issue involves section 4C.01 of the State's approved surface mining regulations which inappropriatedly relates blasting plan requirements to blasts using more than five pounds of explosives. Since section 3.01(A) of the State's blasting regulations requires certification only of blasting personnel who use explosives in accordance with the blasting plan, certain blasting operations would be exempt from the requirement of section 4C.01 that a certified blaster be responsible for all blasting operations. In addition, since section 4C.02 provides that only surface mining operations need to prepare blasting plans, surface blasting at underground mines would not be covered. Both of these provisions are less effective than the Federal regulations at 30 CFR 816.61(c) and 817.61(c) which require that all surface blasting operations be conducted under the direction of a certified blaster.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no enviromental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from sections 3, 4, 7 and 8 of Excutive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, for this action OSM is exempt from the requirement to prepare a Regulatory Impact Analysis and this action does not require regulatory review by OMB.

The Department of the Interior had determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. *Poperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

DEPARTMENT OF COMMERCE

Agency From Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Economic Development Administration (EDA)
Title: Quarterly Report on Guaranteed Loans
Form Number: Agency—ED–700; OMB—0610–0010
Type of Request: Revision of a currently approved collection
Burden: 90 respondents; 119 reporting hours
Needs and Uses: EDA uses the Quarterly Report on Guaranteed Loans to collect information from lenders that have made EDA-quaranteed loan in order to determine EDA's contingent liability for these loans
Affected Public: Businesses or other for-profit institutions
Frequency: Quarterly
Respondent's Obligation: Voluntary
OMB Desk Officer: Timothy Sprehe, 395–4814

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals (202) 377–4217, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW, Washington, D.C. 20230.

Written comments and recommendations for the proposed information collection should be sent to Timothy Sprehe, OMB Desk Officer, Room 3235, New Executive Office Buiding, Washington, D.C. 20503.

Agency From Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Bureau of Standards
Title: Survey of Electronic Measurement Needs
From Number: Agency—NBS–1215; OMB–N/A
Type of Request: New collection
Burden: 1,000 respondents; 500 reporting hours
Needs and uses: The information will be used for the planning and development of research and development programs, measurement methods, or calibration services to meet the measurement needs of NBS' clients in the electronics industry. The clients include manufacturers; government agencies, universities, national laboratories, standards laboratories, and related organizations
Affected public: State of local governments; businesses or other for profit institutions; federal institutions, and small businesses or organizations
Frequency: One-time only
Respondent's obligation: Voluntary
OMB Desk Officer: Sheri Fox, 395–3785

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals (202) 377–4217, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Written comments and recommendations for the proposed information collection should be sent to Sheri Fox, OMB Desk Officer, Room 3235, New Executive Office Building, Washington, D.C. 20503.

Date: July 19,1985.

Edward Michals,
Departmental Clearance Officer.

International Trade Administration

Petitions by Producing Firms for Determinations of Eligibility To Apply for Trade Adjustment Assistance; Merritt Estate Winery, Inc., et al.

Petitions have been accepted for filing on the dates indicated from the following firms: (1) Merritt Estate Winery, Inc., 2264 King Road, Forrestville, New York 14062, producer of grapes and wine (July 1, 1985); (2) Dentek, Inc., 155 Great Arrow, Buffalo, New York 14207, producer of dental equipment (July 1, 1985); (3) Fabrications, Inc., 529 Cooke Street, Honolulu, Hawaii 96813, producer of women's dresses, skirts, slacks and tops (July 1, 1985); (4) Metaltec Corporation, Aerosystems Industrial Park, Cork Hill Road, Franklin, New Jersey 07416, producer of metal tubes for writing instruments and cosmetics (July 2, 1985); (5) Tranoco, Inc., P.O. Box 267, Travelers Rest, South Carolina 29690, producer of wood golf club heads, textile machinery parts, logs and lumber (July 2, 1985); (6) Pratt-Read Corporation, Main Street, Invoryton, Connecticut 06442, producer of pianos, electronic keyboards and synthesizers, piano and organ components, turned and shaped wood products, timing devices, hand tools, metal pins and stampings, motors, coils and transformers (July 3, 1985); (7) Volpi & Son Machine Corporation, 2043 Wellwood Avenue, Farmingdale, New York 11735, producer of oriental noodle and fabric ribbon processing machinery (July 3, 1985); (8) Century Manufacturing Company, Inc., P.O. box C, Aurora, Nebraska 68818, producer of hospital and nursing home equipment (July 5, 1985); (9) Capitol Tackle, Inc., 4809 Fruit Valley Road, Vancouver, Washington 98660, producer of fishing tackle and automotive wheel weights (July 5, 1985); (10) Crockford Enterprises, 716 NW. 68th Street, Vancouver, Washington 98665, producer of fishing rods and components (July 5, 1985); (11) Wink Corporation, P.O. Box J, Lynnwood, Washington 98046, producer of automotive accessories (July 5, 1985); (12) Sand Manufacturing Corporation, 8775 Production Avenue, San Diego, California 92121, producer of caps and visors (July 8, 1985); (13) Relational Memory Systems, Inc., 1650-Building B, Berryessa Road, San Jose, California 95113, producer of computer hardware and software (July 8, 1985); (14) Lion Leather Products, Inc., 1831 Starr Street, Ridgewood, New York 11385 producer of briefcases and attache' cases (July 8, 1985); (15) Auburn Gear, Inc., Auburn Drive, Auburn, Indiana 46706, producer of automotive gears, shafts, and assemblies (July 10, 1985); (16) Louis Gordon Company, 129 Chestnut Street, Warwick, Rhode Island 02888, producer of jewelry (July 10, 1985); (17) Lucky Childrens Wear Manufacturing Company, Inc., 55 South 11th Street, Brooklyn, New York 11211, producer of men's and boy's jeans (July 10, 1985); (18) Ray Carr Tires, Inc., Box 48, Harrisonburg, Virginia 22081, producer of automotive tires (July 11, 1985); (19) Milton Shoe Manufacturing Company, Inc., 700 Hepburn Street, Milton, Pennsylvania 17847, producer of women's footwear (July 11, 1985); (20) Prestige Sportswear, Inc., 493 C Street, South Boston, Massachusetts 02210, producer of women's blazers, slacks, blouses, skirts, shorts and dresses (July 11, 1985); (21) Setlowear, Inc., Indian River Road, Orange, Connecticut 06477, producer of men and women's pants, jackets shirts, dresses and smocks (July 11, 1985); (22) Magic Sportswear, Inc., 1359 Broadway, New York, New York 10018, producer of women's skirts, blouses and pants (July 11, 1985); (23) Scott Foot Appliance Company, 2412 Saint Mary's Avenue, Omaha, Nebraska 68105, producer of foot care and shoe repair articles (July 11, 1985); (24) Hazlitt 1852 Vineyard, P.O. Box 53, Hector, New York 14841, producer of grapes and apples (July 15, 1985); (25) Don J. Wickham, Inc., Route 414, Hector, New York 14841, producer of grapes and wine (July 15, 1985); (26) Beckhorn Vineyards, 6110 Beckhorn Road, Valois, New York 14888, producer of grapes (July 15, 1985); (27) W.R.M.J. Johnson Fruit Farms, Inc., Route 414, Valois, New York 14888, producer of grapes, peaches, apples and cherries (July 15, 1985); (28) Beattie Hill Farm, Route 4145, Hector, New York 14841, producer of grapes, cattle and grain (July 15, 1985) and (29) Buttonwood Creek Vineyard Corporation, P.O. Box 87, Rock Stream, New York 14878, producer of grapes (July 15, 1985).

The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (Pub. L. 93–618). Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Director, Certification Division, Office of Trade Adjustment Assistance, Room 4015A, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

The Catalog of Federal Domestic Assistance official program number and title of the program under which these petitions are submitted is 11.309, Trade Adjustment Assistance. Inasfar as this notice involves petitions for the determination of eligibility under the Trade Act of 1974, the requirements of Office of Management and Budget Circular No. A–95 regarding review by clearinghouses do not apply.

Jack W. Osburn, Jr.,
Director, Certification Division, Office of Trade Adjustment Assistance.

DEPARTMENT OF DEFENSE

Department of the Army

Department of the Army Historical Advisory Committee; Meeting

1. In accordance with section 10(A)(2) of the Federal Advisory Committee Act (Pub. L. 92–463) announcement is made of the following committee meeting:

Name of Committee: Department of the Army Historical Advisory Committee.
Date: 20 September 1985.
Place: Conference Room, National Guard Association Building 1, Massachusetts Avenue, NW, Washington, D.C.
Time: 0845–1230, 1400–1630
Proposed Agenda:
0845–1230—Review of historical activities
1400–1630—Discussion of activities and executive session of the committee

Purpose of meeting: The committee will review the past year's historical activities based on reports and manuscripts received throughout the year and formulate recommendations through the Chief of Military History of the Chief of Staff, U.S. Army and the Secretary of the Army for advancing the purpose of the Army Historical Program.

2. Meetings of the Advisory Committee are open to the public. Due to space limitations, attendance may be limited to those persons who have notified the Advisory Committee Management Office in writing, at least five days prior to the meeting of their intention to attend the 20 September meeting.

3. Any members of the public may file a written statement with the Committee before, during or after the meeting. To the extent that time permits the Committee Chairman may allow public presentations of oral statements at the meeting.

4. All communications regarding this Advisory Committee should be addressed to LTC William G. McAninch, Executive Officer, U.S. Army Center of Military History, Washington, D.C. 20314–0200.

Dated July 12, 1985.
William G. McAninch
LTC, FA, Executive Officer.

UMI

SUMMARY: This notice sets forth the schedule and proposed agenda of and Executive Committee meeting of the National Advisory Council on Continuing Education. It also describes the functions of the Council. Notice of meetings is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES: August 1 and 2, 1985.

ADDRESS: The Sheraton Grand Hotel, 525 New Jersey Avenue NW., Washington, D.C. 2001–1527.

FOR FURTHER INFORMATION CONTACT: Dr. William G. Shannon, Executive Director, National Advisory Council on Continuing Education, 2000 L Street NW., Suite 500, Washington, D.C. 20036. Telephone: (202) 634–6077.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Continuing Education is established under section 117 of the Higher Education Act (20 U.S.C. 1109), as amended. The Council is established to advise the President, the Congress, and the Secretary of the Department of Education on the following subjects:

(a) An examination of all federally supported continuing education and training programs, and recommendations to eliminate duplication and encourage coordination among these programs;

(b) the preparation of general regulations and the development of policies and procedures related to the administration of Title I of the Higher Education Act; and

(c) activities that will lead to changes in the legislative provisions of this title and othe federal laws affecting federal continuing education and training programs.

The meetings of the Council are open to the public. However, because of limited space, those interested in attending are asked to call the Council's office beforehand.

The public is being given less than fifteen days notice of this meeting because of last minute negotiations with OECD with regard to conference.

The Executive Committee will meet from 9:00 a.m. to 4:30 p.m. on August 1 and from 8:30 a.m. to 1:00 p.m. on August 2.

The proposed agenda includes:

—OECD Conference Plans
—Annual Report
—Budget and other matters

Records are kept of all Council proceedings and are available for public inspection at the office of the National Advisory Council on Continuing Education, 2000 L Street NW., Suite 500, Washington, D.C.,

Signed at Washington, D.C. on July 24, 1985.

William G. Shannon,

Executive Director.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Intent To Issue a Program Solicitation; District Heating and Cooling Research and Development

The Department of Energy will soon be inviting firms, universities, organizations, and individuals to submit proposals for the performance of research aimed at reducing costs and improving the efficiency of district heating and cooling (DHC) systems. The Department is interested in research relating to DHC components and systems, and to the rehabilitation of older district heat systems.

The Program Solicitation will solicit research in any of the following phases of development: basic and applied research; exploratory development; technology development; or engineering development. Topical areas may include, for example: systems development (district cooling, low density DHC, simultaneous heating and cooling); component development (piping, metering, controls, building conversion equipment); local resources use (reject heat, water resources); and rehabilitation of steam district heat systems.

Multiple awards for research are expected to be made in 1986. Subject to the availability of funds, up to $800,000 has been programmed for these awards. Of this amount, $300,000 will be specifically earmarked for research relating to the rehabilitation of older district heat systems.

It is anticipated that a formal solicitation will be issued in the fall of 1985. Requests for copies of this solicitation may be addressed to: Ms. Wanda Simpson—Contracting Officer, MA–453.2, Reference: DE–PS01–86CE26534, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585.

Issued in Washington, DC on July 23, 1985.

David G. Newman,

Director, Office of Procurement Operations.

[FR Doc. 85–17862 Filed 7–26–85; 8:45 am]

BILLING CODE 6450–01–M

Cooling Water Systems for the C- and K-Reactors and the D-Area Power Plant at the Savannah River Plant, Aiken, SC; Intent To Prepare an Environmental Impact Statement

AGENCY: Department of Energy.

ACTION: Notice of intent to prepare an environmental impact statement (EIS) and conduct a public scoping meeting on cooling water systems for C- and K-Reactors and the D-Area coal-fired power plant at the Savannah River Plant (SRP) near Aiken, South Carolina.

SUMMARY: The Department of Energy (DOE) announces its intent to prepare an EIS to provide input into the selection of cooling water systems for thermal discharges from the C- and K-Reactors, and from a coal-fired power plant in the D-Area. The need to implement cooling water systems for these facilities is based on compliance with the Clean Water Act and a Consent Order, dated January 3, 1984, between DOE and the State of South Carolina's Department of Health and Environemntal Control (SCDHEC). This EIS will address the potential environmental consequences of constructing and operating alternative cooling water systems.

Scoping

DOE invites interested agencies, orgnizations, and the general public to submit comments or suggestions for consideration in the preparation of the EIS. Written comments or suggestions to assist DOE in identifying significant environmental issues and the appropriate scope of the EIS are requested by August 31, 1985. Written comments should be submitted to Mr. R. P. Whitfield at the address below. Written comments postmarked after August 31, 1985 will be considered to the degree practicable. The DOE will also hold a public scoping meeting at the location and times indicated below:

Aiken, South Carolina, on August 19, 1985 at 10:00 a.m. and at 6:00 p.m. at the Odell Weeks Activity Center, 1700 Whiskey Road, Aiken, South Carolina 29801.

Individuals desiring to make oral presentations at this meeting should notify Mr. Whitfield at the address listed below as soon as possible after the appearance of this notice in the **Federal Register** so that DOE may arrange a schedule for the presentations. Persons who have not submitted a request to speak in advance may register to speak at the meeting before the meeting commences. They will be called on to present their comments as time permits. In order to assure that everyone who wishes to present oral comments has the opportunty to do so, five minutes will be allotted to individuals, and ten minutes will be allotted to individuals representing groups. Comments received at this scoping meeting will be considered in the preparation of the draft EIS. Transcripts of the scoping meeting will be prepared by DOE and made available for review at the DOE Public Reading Room located at the University of South Carolina, Aiken Campus, University Library, 2nd Floor, University Parkway, Aiken, South Carolina, and the Freedom of Information Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, D.C.

Those interesed parties who do not wish to submit comments or suggestions at this time but would like to receive a copy of the draft EIS for review and comment should notify Mr. Whitfield at the address below.

ADDRESS: Written comments or suggestions on the scope of the EIS and requests to speak at the scoping meeting may be submitted to: Mr. R. P. Whitfield, Director, Environmental Division, U.S. Department of Energy, Savannah River Operations Office, P.O. Box A, Aiken, SC 29802, (803) 725–3957.

Envelopes should be marked "Scoping for SRP Cooling Water Systems EIS."

For general information on the DOE EIS process, please contact: Office of the Assistant Secretary for Environment, Safety, and Health, U.S. Department of Energy, Attn: Ms. Carol M. Borgstrom (EH–152), Room 3G–092 Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252–4600.

Background Information

The SRP is a controlled-access, major DOE installation established in the early 1950s for the protection of nuclear materials for national defense. Plant facilities, which may be characterized as heavy industry, consist of five production reactors (three operational, one being readied for restart, and one in standby status), electrical and steam generating plants, two chemical separations facilities, fuel and target fabrication facilities, waste management facilities, a heavy-water production facility (in standby status), research laboratories, repair shops, warehouses, and administrative facilities.

The major sources of thermal effluent discharges at the SRP consist of cooling water discharges from the production reactors and an onsite coal-fired power plant. Two of the currently operating production reactors, C- and K-Reactors, discharge their cooling water directly to Four Mile Creek and Pen Branch, respectively. The onsite coal-fired power plant in the D-Area normally discharges cooling water through a small mechanical cooling tower prior to discharge to Beaver Dam Creek.

The thermal effluent from the other currently operating reactor, P-Reactor, is cooled by an onsite 2500 acre cooling lake, Par Pond. Continued use of the recirculating cooling system for P-Reactor is anticipated based on section 316(a) and 316(b) studies, being conducted by DOE. These studies, to be submitted to SCDHEC, are expected to demonstrate the existence of a balanced indigenous biological community in Par Pond. L-Reactor, which is presently being readied for restart, will discharge cooling water to a cooling lake currently under construction. The restart of L-Reactor and the cooling lake are extensively discussed in the "Environmental Impact Statement, L-Reactor Operation, Savannah River Plant" (DOE/ EIS–0108).

On January 1, 1984, SCDHEC issued a National Pollutant Discharge Elimination System (NPDES) permit for the SRP. In this permit, the cooling water discharge limitation included an instream temperature limitation on thermal discharges rather than in the Savannah River. To achieve compliance with these limitations, DOE and SCDHE entered into a Consent Order on January 3, 1984, that temporarily superseded the temperature requirements in the NPDES permit and identified a process for attaining compliance. Major elements of this process included DOE agreement to complete a comprehensive study of the thermal effects of major SRP thermal discharges, the submittal of a thermal mitigation study, and the selection and implementation of cooling water system.

On October 3, 1984, DOE submitted a "Thermal Mitigation Study" to SCDHEC describing the cooling water systems that could be implemented for the C- and K-Reactors and the D-Area coal-fired power plant to achieve compliance with Federal and State water quality standards.

On March 4, 1985, SCDHEC informed DOE that it was in agreement with the preferred cooling water systems of once-through cooling towers for C- and K-Reactors and increased pumping to the raw water basin with basin water overflow discharge to a nearby outfall for the D-Area power plant. SCDHEC also stated that recriculating cooling towers for C- and K-Reactors would also be an adequate choice and that both once-through and recirculating cooling towers would satisfy State standards.

In compliance with the National Environmental Policy Act, DOE will evaluate the potential environmental consequences of constructing and operating cooling water systems for the C- and K-Reactors and the D-Area coal-fired power plant prior to a decision on implementation.

Alternatives

The "Thermal Mitigation Study" (DOE/SR–5003) submitted by DOE to the SCDHEC identified a total of 22 possible cooling water alternatives which would meet the Class B water quality standards of the State of South Carolina for C- and K-Reactors and four possible alternatives for the D-Area coal-fired power plant. Based on a structured evaluation process, five reasonable compliance alternatives were then identified for the C- and K-Reactors, and two reasonable compliance alternatives were identified for the D-area coal-fired power plant. For the C- and K-Reactors, the alternatives identified as reasonable compliance alternatives were a once-through cooling tower with a holding pond, a recirculating cooling tower with a holding pond, a once-through cooling lake, a once-through cooling tower followed by a cooling lake, and a cooling lake followed by a once-through cooling tower. For the D-Area coal-fired power plant, the alternatives identified as reasonable compliance alternatives were direct discharge to the Savannah River and increased pumping to the raw water basin with discharge of basin overflow to a nearby outfall.

Due to unfavorable topographic features in the area around C- and K-Reactors and the resulting high capital costs for construction of large cooling lakes in such area, DOE believes that these alternatives are unreasonable for purposes of this EIS despite their ability to meet State water quality standards. Accordingly, it is proposed that detailed evaluations will only be performed for the once-through and recirculating cooling towers with holding ponds. Further, because of its higher capital costs, the longer schedule for implementation, and the potential reduction in habitat for endangered and threatened species caused by the reduced flow to Beaver Dam Creek, the alternative for direct discharge to the Savannah River of D-Area coal-fired power plant cooling water may not be reasonable. Consequently, the DOE proposed not to perform a detailed evaluation of this alternative. The public is invited to comment on this preliminary determination of reasonable alternative during the scoping process.

The cooling water systems proposed to be considered in detail in this EIS

therefore, are once-through cooling towers with 100-acre offstream holding ponds and recirculating cooling towers with 100-acre offstream holding ponds for C- and K-Reactors, and increased pumping to the raw water basin with discharge of basin overflow to a nearby outfall for the D-Area coal-fired power plant. As required by the Council on Environmental Quality regulations for implementing the National Environmental Policy Act, the EIS will also consider "no action".

Identification of Environmental Issues

The following issues will be analyzed during preparation of the EIS. This list is not intended to be all inclusive, nor is it s predetermination of potential impacts. Additions or deletions may occur as the result of the scoping process.

1. *Socioeconomic:* Economic and community infrastructure effects as a result of the construction and operation of cooling water systems.

2. Wildlife and Endangered Species: Biological evaluations of the effects on endangered species and the status of any required consultation process in accordance with section 7 of the Endangered Species Act. The effects of cooling water systems (impacts during construction and benefits during operation) on other wildlife species and habitats.

3. *Fisheries:* Impingement and entrainment of fish, and fish eggs and larvae due to withdrawal of cooling water; and maintenance of a zone of passage for anadromous fish and other aquatic organisms.

4. *Wetlands:* Wetlands to be impacted by construction and operation of cooling water systems, and the recovery of wetlands due to reduced rates of cooling water discharge and downstream temperatures.

5. *Radiological effects:* Changes in dose commitments resulting from operation of cooling water systems.

6. *Radionuclide remobilization:* Changes in stream flow rates resulting in a remobilization of previously deposited radionuclides and effects on downstream drinking water.

7. *Water use and quality:* Discharge temperature and flow rate variations that would occur after cooling water systems are implemented, chemical characteristics of cooling water discharges, erosion and sedimentation resulting from construction and operation, and water use requirements.

8. *Atmospheric releases:* Cooling tower fogging, drift, and deposition.

9. *Cumulative thermal effects:* Cumulative effects of cooling water discharges to the Savannah River from C-, K-, and L-Reactors, the D-Area coal-fired power plant, the Vogtle Power Plant, and the Urquhart Steam Generating Plant.

10. *Cumulative radiological effects:* Changes in cumulative radiological dose commitments from radioactive releases from implementation of cooling water systems and existing and planned SRP and neighboring facilities.

References

Major documents related to the proposed EIS include the following:

- DOE/EIS–0108, "Final Environmental Impact Statement—L-Reactor Operation, Savannah River Plant, Aiken, South Carolina," May, 1984.
- DOE/SR–5003, "Thermal Mitigation Study," October, 1984.
- DP–1697 (draft), "Comprehensive Cooling Water Study, Annual Report."

Copies of these documents together with the January 1, 1984, NPDES permit as issued by SCDHEC and the January 3, 1984, Consent Order between DOE and SCDHEC have been placed for public review in the DOE Public Reading Room located at the University of South Carolina, Aiken Campus, University Library, 2nd Floor, University Parkway, Aiken, South Carolina, and the Freedom of Information Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, D.C.

Upon completion of the draft EIS, its availability will be announced in the **Federal Register** and local news media, and comments will be solicited. Comments on the draft EIS will be considered in preparing the final EIS.

Dated in Washington, D.C., this 22nd day of July, 1985, for the United States Department of Energy.

William A. Vaughan,

Assistant Secretary, Environment, Safety, and Health.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket No. TA85–13–20–000 & 001]

Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

July 23, 1985.

Take notice that Algonquin Gas Transmission Company ("Algonquin Gas") on July 18, 1985, tendered for filing Second Revised Sheet No. 204 to its FERC Gas Tariff, Second Revised Volume No. 1.

Algonquin Gas states that Second Revised Sheet No. 204 is being filed to reflect in Algonquin Gas' Rate Schedule F–3 revised rates in National Fuel Gas Supply Corporation's ("National Fuel") underlying Rate Schedule RQ.

Algonquin Gas requests that the Commission accept such tariff sheet, to be effective August 1, 1985, to coincide with the proposed effective date of National Fuel's rate change.

Algonquin Gas notes that a copy of this filing is being served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before July 30, 1985. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket Nos. ER85–629–000, et al.]

Idaho Power Co., et al.; Electric rate and corporate regulation filings

July 23, 1985.

Take notice that the following filings have been made with the Commission:

1. Idaho Power Company

[Docket No. ER85–629–000]

Take notice that on July 15, 1985, the Idaho Power Company tendered for filing in compliance with the Federal Energy Regulatory Commission's order or October 7, 1978, a summary of sales made under the Company's 1st Revised FERC Electric Tariff, Volume No. 1 (Supersedes Original Volume No. 1) during May 1985, along with cost justification for the rate charged. This filing includes the following supplements:

Utah Power & Light Company, Supplement 43
Sierra Pacific Power Company, Supplement 39
Montana Power Company, Supplement 35
Portland General Electric Company, Supplement 35
Southern California Edison Company, Supplement 29
San Diego Gas & Electric Company, Supplement 24
Pacific Power & Light Company, Supplement 15
Washington Water Power Company, Supplement 29
Los Angeles Water & Power Company, Supplement 26
Puget Sound Power & Light Company, Supplement 16
Pacific Gas & Light Electric Company, Supplement 10

Comment date: August 5, 1985, in accordance with Standard Paragraph E at the end of this notice.

2. New York State Electric & Gas Corporation

[Docket No. ER85–633–000]

Take notice that on July 15, 1985, New York State Electric and Gas Corporation (NYSEG) submitted for filing an original and a conformed copy of a Notice of Cancellation of its Rate Schedule FPC No. 23, made effective on August 16, 1964.

The change in the status of this Rate Schedule was discovered during an overall review of NYSEG's rate schedules which culminated in its filing with the Commission in Docket No. ER85–426–000. Further review of Rate Schedule FPC No. 23 revealed that it has been inoperative since January 30, 1985. NYSEG, therefore, requests waiver of the requirement of thirty days notice in accordance with § 35.15 of 18 CFR.

Comment date: August 5, 1985, in accordance with Standard Paragraph E at the end of this notice.

3. Public Service Company of Indiana, Inc.

[Docket No. ER85–630–000]

Take notice that Public Service Company of Indiana, Inc. on July 15, 1985 tendered for filing pursuant to the Interconnection Agreement between Public Service Company of Indiana, Inc. (Service Company) and Southern Indiana Gas and Electric Company (Southern Company), a Ninth Supplemental Agreement, to become effective September 10, 1985.

Said Supplemental Agreement provides for the following:

(1) Amends the existing Agreement to update those points of interconnection between Service Company and Southern Company.

(2) Amends Article 6, Billing and Payment, by deleting Article 6.01 and inserting a new Article 6.01.

(3) Inserts a new Service Schedule A—Emergency Service, Service Schedule C—Interchange Power, Service Schedule D—Short Term Power, Service Schedule E—Coordination of Scheduled Maintenance of Generating Facilities, and deletes those existing said service schedules, as amended.

Copies of the filing were served upon Southern Indiana Gas and Electric Company and the Public Service Commission of Indiana.

Comment date: August 5, 1985, in accordance with Standard Paragraph E at the end of this notice.

4. Public Service Company of New Mexico

[Docket No. ER85–631–000]

Take notice that on July 15, 1985, Public Service Company of New Mexico (PNM) tendered for filing Service Schedule E (Block Energy Sale) to the Interconnection Agreement (Rate Schedule FERC No. 37) between PNM and Nevada Power Company (NPC).

PNM states that the service to be provided to NPC under Service Schedule E is for sale of approximately 61,000 megawatt hours of block energy at a rate of delivery of 33 megawatts per hour. The proposed service commences on July 1, 1985, and terminates at midnight on September 15, 1985. The rates are specifically negotiated rates based upon on-peak and off-peak hour deliveries, and taking into consideration present competitive market factors.

PNM requests waiver of the Commission's notice requirements so that NPC may avoid generation of more expensive gas-and-oil fired energy and requests the application be accepted allowing commencement of service on July 1, 1985.

Comment date: August 5, 1985, in accordance with Standard Paragraph E at the end of this notice.

5. South Carolina Electric & Gas Company

[Docket No. ER85–627–000]

Take notice that South Carolina Electric & Gas Company on July 15, 1985 tendered for filing a proposed cancellation of F.P.C. schedule Nos. T1.S2 and T1.S2.1 dated August 27, 1973, agreement between South Carolina Electric & Gas Company and Broad River Electric Power Cooperative, Inc.

The cancellation is proposed to be effective 60 days after filing. South Carolina Electric & Gas Company has sent copies of the filing to Board River Electric Cooperative, Inc.

Comment date: August 5, 1985, in accordance with Standard Paragraph E at the end of this notice.

6. South Carolina Electric & Gas Company

[Docket No. ER85–628–000]

Take notice that South Carolina Electric & Gas Company on July 15, 1985 tendered for filing a proposed cancellation of F.P.C. schedule Nos. T1.S3 and T1.S3.1 dated June 26, 1973, agreement between South Carolina Electric & Gas Company and Central Electric Power Cooperative, Inc.

The cancellation is proposed to be effective 60 days after filing. South Carolina Electric & Gas Company has sent copies of the filing to Central Electric Power Cooperative, Inc.

Comment date: August 5, 1985, in accordance with Standard Paragraph E at the end of this notice.

7. The Washington Water Power Company

[Docket No. ER85–632–000]

Take notice that on July 15, 1985, The Washington Water Power Company (WWP) tendered for filing copies of a five-year Agreement dated March 8, 1985, with City of Seattle, Department of lighting (Seattle) for replacement energy for Seattle's Lake Union Steam Plant. Washington states that this Agreement is for February 1 through June 30 period for each of the 1985–86 through 1989–90 operating years and supersedes Washington's FERC Rate Schedule No. 143, a similar Agreement which ended June 30, 1985.

Washington requests that the requirements of prior notice be waived and the effective date be March 8, 1985.

Comment date: August 5, 1985, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

VOL 50 ISS 145 JL 29 1985 UMI

VOL 50 ISS 145 JL 29 1985 UMI

[Docket Nos. CP85-676-000, et al.]

Transcontinental Gas Pipe Line Co., et al.; Natural Gas Certificate Filings

July 22, 1985.

Take notice that the following filings have been made with the Commission:

1. Transcontinental Gas Pipe Line Company

[Docket No. CP85-676-000]

Take notice that on July 5, 1985, Transcontinental Gas Pipe Line Corporation (Transco), Post Office Box 1296, Houston, Texas 77251, filed in Docket No. CP85-676-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport end-user gas on behalf of Mannington, a Division of Mannington Mills, Inc. (Mannington), under the authorization issued in Docket No. CP82-426-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Transco proposes to transport on a peak day 2,000 Mcf; on an average day 1,200 Mcf; and on an annual basis 250,000 Mcf of gas for use at Mannington's Salem plant in New Jersey (Salem plant), for a term expiring October 31, 1985. It is stated that the natural gas to be transported would be purchased from GHR Energy Corporation (GHR), and would be used for process fuel and boiler fuel. It is stated that Transco would receive the gas at (1) the existing interconnection with GHR at Agua Dulce, Nueces County, Texas, (2) the existing interconnection with Valero Transmission Company in LaSalle County, Texas, (3) the existing interconnection with GHR at Miranda Prospect, Duval County, Texas and (4) the tailgate of the Katy Exxon gas plant in Waller County, Texas, and would redeliver on an interruptible basis, equivalent quantities of gas (less quantities retained for compressor fuel and line loss make-up) to existing points of delivery with South Jersey Gas Company (South Jersey). In turn, South Jersey would redeliver such gas to the Salem plant.

Transco states that it would charge Mannington the currently applicable transportation rate in accordance with its Rate Schedule T-II, FERC Gas Tariff, Second Revised Volume No. 1. In addition,Transco states that it would apply its current transportation policy to the subject transportation which, among other things, requires that Mannington periodically provide Transco with affidavits which state that the subject transportation is not displacing sales which Transco would otherwise make under any of its firm sales rate schedules.

Transco states that Mannington is considering alternatives in the sources of supply of natural gas for delivery to the Salem plant. Transco further states that such modifications may involve different suppliers and/or changes in receipt/delivery points, but would not involve any increase in peak day, average day or annual volumes to be transported by Transco. Transco also requests flexible authority to add or delete receipt/delivery points associated with sources of gas acquired by the end-user. The flexible authority requested applies only to points related to sources of gas supply, not to delivery points in the market area. Transco will file a report providing certain information with regard to the addition or deletion of sources of gas as further detailed in the application and any additional sources of gas would only be obtained to consititute the transportation quantities herein and not to increase those quantities.

Transco asserts that any changes made pursuant to such flexible authority would be on behalf of the same end user, Mannington, for use at the same end-use locations and would remain within daily and annual volume levels proposed herein.

Comment date: September 5, 1985, in accordance with Standard Paragraph G at the end of this notice.

2. Transcontinental Gas Pipe Line Corporation

[Docket No. CP85-678-000]

Take notice that on July 5, 1985, Transcontinental Gas Pipe Line Corporation (Transco), Post Office Box 1296, Houston, Texas 77251, filed in Docket No. CP85-678-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport end-user gas on behalf of Coastal Eagle Point Oil Company (Coastal) under the authorization issued in Docket No. CP82-426-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Transco proposes to transport on a peak day 28,000 Mcf; on an average day 10,000 Mcf; and on an annual basis 3,650,000 Mcf of gas for use at Coastal's Eagle Point refinery (Eagle Point refinery) in Gloucester County, New Jersey for a term expiring October 31, 1985. It is stated that the natural gas to be transported would be purchased from Coastal Oil and Gas Company from the Feffress Field, Hidalgo County, Texas, and would be used for boiler fuel in refining crude oil into products. It is stated that Transco would receive the gas at existing interconnections with Valero Transmission Company in LaSalle County, Texas, and would redeliver such gas, less quantities retained for compressor fuel and line loss make-up, to the existing point of interconnection with Coastal at the Eagle Point refinery.

Transco states that it would charge Coastal the currently applicable transportation rate in accordance with its Rate Schedule T-II, FERC Gas Tariff, Second Revised Volume No. 1. In addition, Transco states that it would apply its current transportation policy to the subject transportation which, among other things, requires that Coastal periodically provide Transco with affidavits which state that the subject transportation is not displacing sales which Transco would otherwise make under any of its firm sales rate schedules.

Transco states that Coastal is considering alternatives in the sources of supply of natural gas for delivery to the Eagle Point refinery. Transco further states that such modifications may involve different suppliers and/or changes in receipt/delivery points, but would not involve any increase in peak day, average day or annual volumes to be transported by Transco. Transco also requests flexible authority to add or delete receipt/delivery points associated with sources of gas acquired by the end-user. The flexible authority requested applies only to points related to sources of gas supply, not to delivery points in the market area. Transco will file a report providing certain information with regard to the addition or deletion of sources of gas as further detailed in the application and any additional sources of gas would only be obtained to constitute the transportation quantities herein and not to increase those quantities.

Transco asserts that any changes made pursuant to such flexible authority would be on behalf of the same end user, Coastal, for use at the same end-use locations and would remain within daily and annual volume levels proposed herein.

Comment date: September 5, 1985, in accordance with Standard Paragraph G at the end of this notice.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

[FR Doc. 85-17908 Filed 7-26-85; 8:45 am]

BILLING CODE 6717-01-M

Gulf States Utilities Co.; Order Accepting for Filing and Suspending Rates, Noting Interventions, Ordering Summary Disposition, Granting Waiver of Notice Requirements, Denying Expedited Hearing, and Establishing Hearing Procedures

[Docket No. ER85-538-000]

Issued July 23, 1985

Before Commissioners: Raymond J. O'Connor, Chairman; A.G. Sousa and Charles G. Stalon.

On May 24, 1985, Gulf States Utilities Company (GSU) tendered for filing a two-step increase in its rates for transmission service to eight wholesale customers.[1] The proposed "interim rates" would increase revenues by approximately $13.1 million (82.9%) over the twelve months ending December 31, 1985. The proposed "full rates" would increase revenues by an additional $3.3 million, or a total increase of approximately $16.4 million (103.7%) over the same period. Approximately $516,759 (3.2%) of the increase is supported by the inclusion of construction work in progress (CWIP) pursuant to § 35.26(c)(3) of the regulations. For all customers other than the Sam Rayburn Dam Electric Cooperative, Inc. (SRDEC), GSU requests an effective date of July 24, 1985, for both sets of rates. GSU further requests waiver of the notice requirements so that the proposed rates will not take effect as to SRDEC until June 1, 1986, in accordance with the terms of GCU's agreement with SRDEC.[2] If it is determined that the proposed full rates should be suspended for more than one day,GSU asks that the alternate interim rates be put into effect with no more than a one-day suspension. If, however, the proposed full rates and the interim rates would be suspended for the same period, GSU requests that the interim rates be deemed withdrawn.

Notice of the company's filing was published in the **Federal Register**[3] with comments due on or before June 26, 1985. Timely motions to intervene were filed by Stauffer Chemical Co. (Stauffer) and the Attorney General of Louisiana which raise no particular substantive issues. Additionally, timely motions to intervene were filed by the City of Lafayette, Louisiana (Lafayette); jointly by the Sam Rayburn Municipal Power Agency (SRMPA) and SRDEC: Sam Rayburn G&T, Inc. (SRGT); the Louisiana Energy and Power Authority (LEPA); and Cajun Electric Power Cooperative, Inc. (Cajun). The motions to intervene filed by SRMPA, SRDEC, SRGT, LEPA, & Cajun all raise a variety of cost of service and rate issues[4] and request a five-month suspension.

On July 8, 1985, GSU filed an answer to the interventions of Lafayette, SRMPA and SRDEC, SRGT, LEPA, and Cajun. While not opposing any of the motions to intervene, the company denies that either a five-month suspension or an expedited hearing is warranted. With repect to transmission costs, however, GSU states that it inadvertently included two facilities charges, totalling $4.4 million, which are not allocable to transmission service. GSU states that it does not object to summary disposition as to this $4.4 million amount.

Discussion

Under Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the timely motions to intervene serve to make the Attorney General of Louisiana, Stauffer, Lafayette, SRMPA, SRDEC, SRGT, LEPA and Cajun parties to this proceeding.

As GSU notes, the $4.4 million of the transmission facilities charges representing payments by GSU to SRMPA and SRGT in connection with the Nelson Unit 6 power plant are related more closely to production than to the transmission function. Accordingly, we shall order summary disposition with respect to this issue. Because the revenue impact of this decision is substantial, we shall require GSU to refile its "full" cost of service and rates to reflect the exclusion of the $4.4 million.

Our revieiw of the company's filing and the pleadings indicates that the rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the rates for filing and suspend them as ordered below.

In *West Texas Utilities Company*, Docket No. ER82-23-000, 18 FERC ¶61, 189 (1982), we explained that were our preliminary review indicates that proposed rates may be unjust and unreasonable and may yield substantially excessive revenues, as defined in *West Texas*, we will generally suspend the rates for a period of five months. Our preliminary review of the proposed full rates indicates that those rates as modified by summary disposition, above, may not produce substantially excessive revenues. Accordingly, we shall suspend the full rates for one day, to become effective, as modified, on July 25, 1985, subject to refund, for all customers other than SRDEC. Because of the terms in SRDEC's contract, these rates will not become effective until June 2, 1986, subject to refund. We shall deem the interim rates for all customers to have been withdrawn.

LEPA has alleged that GSU's practices in the offering of transmission services are unreasonably restrictive and discriminatory and has requested an expedited hearing on those issues. We are not persuaded that LEPA has presented an adequate basis for ordering a separate, formally expedited hearing on the questions of GSU's alleged practices in the offering of transmission services, and we shall deny their request at this time[5]

The Commission orders:

(A) Summary disposition is hereby ordered, as noted in the body of this order, with respect to GSU's transmission charges. Within thirty (30) days of the date of this order, GSU shall

[1] *See* Attachment for rate schedule designations and affected customers.

[2] GSU's present contract with SRDEC provides that the company may file a change in rate prior to June 1, 1986, but that such change may not become effective prior to June 1, 1986. This provision was part of the overall bargain under which the Sam Rayburn entities purchased an interest in GSU's Nelson 6 generating unit. According to GSU, the requested waiver will allow the moratorium agreement to to be carried out.

[3] 50 FR 25314 (1985).

[4] The issues raised include:
(1) The claimed rate of return on equity;
(2) The allowance for cash working capital included in rate base;
(3) The classification of primary distribution lines;
(4) The determination of billing demand units;
(5) The allocation of purchased power costs to transmission service customers.

[5] However, pursuant to Ordering paragraph (G) below, the presiding judge designated in this proceeding will have the discretion to establish any appropriate procedural dates.

VOL 50 ISS 145 JL 29 1985 UMI

refile its rates and supporting cost data to reflect this determination.

(B) GSU's request for waiver of the notice requirements is hereby granted for good cause shown.

(C) GSU's proposed and rates are hereby accepted for filing, as modified by summary disposition, and are suspended for one day, to become effective on July 25, 1985, subject to refund, for all customers except SRDEC; as to SRDEC, the proposed full rates are suspended for one day, to become effective on June 2, 1986, subject to refund, pursuant to the agreement between GSU and SRDEC. The interim rates for all customers are deemed to have been withdrawn.

(D) LEPA's request for an expedited hearing on certain issues is hereby denied.

(E) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR Chpater I), a public hearing shall be held concerning the justness and reasonableness of GSU's proposed rate schedule changes.

(F) Subdocket—000 in Docket No. ER85–538–000 is hereby terminated. The evidentiary proceeding ordered herein shall be assigned Docket No. ER85–538–001.

(G) The Commission staff shall serve top sheets in this proceeding within ten (10) days of the date of this order.

(H) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conferece in this proceeding, to be held within approximately fifteen (15) days after service of top sheets, a in hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure (18 CFR Part 385).

(I) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.
Kenneth F. Plumb,
Secretary.

BILLING CODE 6717–01–M

[Project No. 8957–000, et al.]

Hydroelectric Applications (City of Morro Bay, et al.,); Applications Filed With the Commission

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1 a. Type of Application: Preliminary Permit.
b. Project No.: 7856–000.
c. Date Filed: February 14, 1985.
d. Applicant: City of Morro Bay.
e. Name of Project: San Bernardo Creek Hydroelectric Project.
f. Location: On San Bernardo Creek, near City of Morro Bay, in San Luis Obispo County, California.
g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).
h. Contact Person: Mr. David A. Norton, Water Engineer, Department of Public Works, 695 Harbor Street, Morro Bay, CA 93442.
i. Comment Date: September 8, 1985.
j. Description of Project: The proposed project would consist of: (1) A 178-foot-high, 1,200-foot-long diversion dam at elevation 310 feet; (2) a 24-inch-diameter, 14,000-foot-long steel penstock; (3) a powerhouse with a total installed capacity of 865 kW operating under a head of 410 feet; and (4) a 1-mile-long, 12.5-kV transmission line from the powerhouse to an existing Pacific

Gas and Electric Company (PG&E) transmission line. The Applicant estimates the average annual energy generation at 1.5 million KWh to be sold to PG&E.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a 36-month preliminary permit to conduct technical, environmental and economic studies, and also prepare an FERC license application at an estimated cost of $135,000.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C & D2.

2 a. Type of Application: Preliminary Permit.
b. Project No.: 9097–000.
c. Date Filed: April 8, 1985.
d. Applicant: Mutual Energy Partnership.
e. Name of Project: Old Highway Hydroelectric.
f. Location: On Big Wood River near the town of Shoshone in Lincoln County, Idaho.
g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).
h. Contact Person: Mr. Bart M. O'Keeffe, Mutual Energy Partnership, 3451 Longview Drive, Suite 130, North Highlands, CA 95660.
i. Comment Date: September 16, 1985.
j. Description of Project: The proposed project would consist of: (1) A 12-foot-high, 50-foot-long diversion dam; (2) an intake structure; (3) a 1,000-foot-long, 18-foot-wide power canal; (4) a 10-foot-diameter, 500-foot-long penstock; (4) a powerhouse containing two generating units with a total combined capacity of 2,000 kW; (5) a tailrace; (6) a 600-foot-long transmission line; and (7) a 1,500-foot-long gravel service road. Applicant estimates the average annual energy production to be 12,260 MWh.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 24 months during which it would conduct engineering and environmental feasibility studies and prepare a license application at a cost of $125,000. No new roads would be constructed or drilling conducted during the feasibility study.

k. Purpose of Project: The proposed power generation is to be sold to a local privately owned utility.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

3 a. Type of Application: Preliminary Permit.
b. Project No.: 9213–000.
c. Date Filed: May 21, 1985.
d. Applicant: Aero Construction, Inc.
e. Name of Project: Canal Section Lock A Hydro Project.
f. Location: On the Tennessee-Tombigbee Waterway Canal Section near Monroe, Amory County, Mississippi.
g. Filed Pursuant to: Federal Power Act; 16 U.S.C. 791(a)–825(r).
h. Contact Person: Ralph L. Laukhuff, Forte and Tablada, Inc., P.O. Box 64844, Baton Rouge, LA 70896.
i. Comment Date: September 11, 1985
j. Description of Project: The proposed project would utilize the U.S. Army Corps of Engineers' Tennessee-Tombigbee Waterway Canal Section at Lock A; a 1100-foot-long and 20-foot-wide diversion channel; and would consist of: (1) A new powerhouse located on the west side of the lock in the diversion channel housing two 900–kW generators for a total installed capacity of 1,800 kW; (2) a proposed 12.47-kV transmission line approximately 200 feet long; and (3) appurtenant facilities. The Applicant estimates that the average annnal generation would be 12.6 GWh. All project energy would be sold to a local utility company.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

l. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 18 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $20,000.

4 a. Type of Application: Preliminary Permit.
b. Project No. 9228–000.
c. Date Filed: May 24, 1985.
d. Applicant: Rockingham Hydro Associates.
e. Name of Project: McGaheysville.
f. Location: South Fork of the Shenandoah River in Rockingham County, Virginia.
g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).
h. Contact Person: Mr. Thomas Forbes, P.O. Box 421, Mercer Island, WA 98040.
i. Comment Date: September 9, 1985.
j. Description of Project: The proposed project would consist of: (1) An existing concrete dam about 750 feet long and 15 feet high; (2) an existing reservoir with a storage capacity of about 103 acre-feet and normal maximum water surface elevation of 1,000 feet, m.s.l.; (3) an existing power channel, 100 feet long and 200 feet wide; (4) two existing penstocks, 10 feet in diameter and 15 feet long; (5) a proposed powerhouse, 100 feet by 50 feet, which will house two turbine/generator units, each rated at 750kW for a total installed capacity of 1.5MW, (6) an existing 50 feet wide by 10 feet long tailrace; (7) a proposed 0.25-mile-long transmission line at 14.4 kV; and (8) appurtenant facilities. Applicant estimates that the average annual energy generation would be 6.3 GWh. Owner of the dam is the City of Harrisonburg, Virginia

k. Purpose of Project: Applicant intends to sell the project energy to the Cities of McGaheysville, Elkton, and Harrisonburg, Virginia.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2

m. Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time it would perpare studies of the hydrualic, construction, economic, environmental, historic and recreational aspects of the project. Depending on the outcome of the studies, Applicant estimates the cost of the studies under the permit would be $125,000.

5 a. Type of Application: Preliminary Permit.
b. Project No. 9278–000.
c. Date Filed: June 7, 1985.
d. Applicant: Cedar Falls Development Ltd.
e. Name of Project: Cedar Falls Dam Project.
f. Location: On the Cedar River near Cedar Falls, Black Hawk County, Iowa.

l. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $50,000.

6 a. Type of Application: Preliminary Permit.

b. Project No. 9284–000.

c. Date Filed: June 10, 1985.

d. Applicant: Rainbow Water Company.

e. Name of Project: Rainbow Lake.

f. Location: On Cottonwood Creek and Hoover Tunnel, near Ono, in Shasta County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Jack Schreder, Rainbow Water Company, 1327 "O" Street, Suite 12, Sacramento, CA 95814, (916) 441–0986

Raymond, Vail and Associates, 1410 Ethan Way, Sacramento, CA 95825, (916) 929–3323.

i. Comment Date: September 9, 1985.

j. Description of Project: The proposed project would consist of: (1) Rainbow Water Company's existing Misselbeck Dam and Rainbow Lake; (2) a 36-inch-diameter, 4,000-footlong pipeline; (3) the existing 7,000-foot-long Hoover Tunnel; (4) a 32-inch-diameter, 1,050-foot-long penstock; (5) a powerhouse containing a single Pelton turbine-generator unit with a rated capacity of 930 kW and producing an estimated average annual generation of 3.27 GWh; (6) a tailrace discharging to Ducket Creek; and (7) a tap 12.5–kV transmission line interconnecting the project to an existing Pacific Gas and Electric Company (PG&E) line. Project power would be sold to PG&E.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks a 24-month permit to study the feasibility of constructing and operating the project and estimates the cost of the studies at $50,000.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

7 a. Type of Application: 5MW Exemption.

b. Project No. 7160–001.

c. Date Filed: March 1, 1985.

d. Applicant: Arkansas Department of Parks and Tourism, State Parks Division.

e. Name of Project: Mammoth Spring Hydroelectric Facility.

f. Location: On the Spring River in Fulton County, Arkansas.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980 (16 U.S.C. 2705 and 2708, *as amended*).

h. Contact Person: Mr. Richard Davies, Director, Arkansas State Parks, One Capitol Mall, Little Rock, AR 72201.

i. Comment Date: August 28, 1985.

j. Description of Project: The proposed project would consist of: (1) A proposed impoundment with a water surface area of 9.8 acres at normal maximum surface elevation of 503.8 feet, m.s.l.; (2) an existing dam about 110 feet long and presently 13.3 feet high. Repairs and reconstruction to the dam will involve the addition of a concrete cap 1.3 feet high on top of the dam, giving a proposed dam height of 14.6 feet high; (3) an existing intake structure; (4) an existing powerhouse 25 feet square, contiguous with the dam, which will house one renovated generating unit with an installed capacity of 550 kW; (5) an existing tailrace; (6) approximately 600 feet of new underground transmission line at 5kV; and appurtenant facilities. Applicant estimates that the average annual energy generation would be 1,700,000 kWh. The Applicant is the Permittee for Project No. 7160–000.

k. Purpose of Project: Project energy will be sold to the Arkansas Power and Light Company.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D3a

m. *Purpose of Exemption*—An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

8 a. Type of Application: Minor License.

b. Project No. 8422–001.

c. Date Filed: December 3, 1984.

j. Competing Application: Project No. 8686–000; Date Filed: October 24, 1984.

k. Description of Project: The proposed project would consists of: (1) An existing 17-foot-high, 80-foot-long stone masonry dam with; (2) 2.5-foot-high wood flashboards; (3) a reservoir with a surface area of 37 acres, a storage capacity of 240 acre-feet, and a normal water surface elevation of 151.1 feet msl; (4) a new intake structure; (5) a new concrete and wood powerhouse containing one generating unit with a capacity of 35 kW and one generating unit with a capacity of 170 kW for a total installed capacity of 205 kW; (6) a new 20-foot-wide, 6-foot-deep tailrace; (7) a new transmission line, 300 feet long; and (8) appurtenant facilities. The Applicant estimates the average annual generation would be 718,000 kWh. The existing dam is owned by Edward J. Socha, Manchester, New Hampshire.

l. Purpose of Project: All project energy produced would be sold to the Public Service Company of New Hampshire.

m. This notice also consists of the following standard paragraphs: A4, B, C, and D1.

9 a. Type of Application: Preliminary Permit.

b. Project No.: 8776–000.

c. Date Filed: December 5, 1984.

d. Applicant: Kittitas Reclamation District.

e. Name of Project: Cle Elum Dam.

f. Location: At the Bureau of Reclamation's Cle Elum Dam, on the Yakima River, in Kittitas Country, Washington.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Stan Powers, Kittitas Reclamation District, P.O. Box 276, Ellensburg, WA 98926.

i. Comment Date: August 28, 1985.

j. Description of Project: The proposed project would utilize the Bureau of Reclamation's Cle Elum Dam and Reservoir and would consist of: (1) A 3,000-foot-long, 14-foot-diameter concrete lined tunnel (2) a powerhouse containing two generating units with a total capacity of 10 MW and an average annual generation of 42,700 MWh; and (3) a 2 ¼-mile-long transmission line.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 36 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $70,000. No new roads would be constructed or drilling conducted during the feasibility study.

k. Purpose of Project: Project power would be sold to a utility company.

l. This notice also consists of the following standard paragraphs: A8, A9, B, C, and D2.

10 a. Type of Application: Preliminary Permit.

b. Project No.: 9191–000.

c. Date Filed: May 13, 1985.

d. Applicant: Streamline Hydro, Inc.

e. Name of Project: Hansen Canal.

f. Location: On Charles Hansen Canal, near Laporte, in Larimer County, Colorado.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Robert E. Stout, Streamline Hydro, Inc., 6565 South Dayton Street, Suite 1100, Englewood, CA 80111, (303) 792–2028.

i. Comment Date: August 28, 1985.

j. Description of Project: The proposed project would utilize an existing overflow drop chute located at elevation 5,246 feet msl on the U.S. Bureau of Reclamation's Charles Hansen Canal and would consist of: (1) A 48-inch-diameter, 50-foot-long penstock; (2) a powerhouse containing a single turbine-generator unit with an installed capacity of 300–kW and producing an estimated average annual generation of 1.3 MWh; (3) a 10-foot-long tailrace discharging water to the Poudre River; and (4) a 700-foot-long, 13.7–kV tap transmission line interconnecting the project to an existing Public Service Company of Colorado (PSCC) line. Applicant intends to sell the project power to PSCC).

A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 24 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under the permit would be $5,000.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

11 a. Type of Application: Transfer of License.

b. Project No.: 3671–004.

c. Date Filed: May 8, 1985.

d. Applicant: The Borough of Central City, Mitex, Inc., and Allegheny Hydro Partners.

e. Name of Project: Allegheny Lock and Dam No. 5.

f. Location: At the U.S. Army Corps of Engineers' Allegheny Lock and Dam No. 5 on the Allegheny River in Armstrong County, Pennsylvania.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Bruce J. Wrobel, 91 Newbury Street, Boston, Massachusetts 02116.

i. Comment Date: August 30, 1985.

j. Description of Proposed Transfer: On October 15, 1984, a major license was issued to the Borough of Central City and Mitex, Inc. to construct, operate, and maintain the Allegheny Lock and Dam No. 5 Project No. 3671. It is proposed to transfer the license to the Borough of Central City and Allegheny Hydro Partners, a Pennsylvania limited partnership of which Mitex, Inc. is the general partner. Applicants state that the transfer is necessary to facilitate the financing of the project.

k. This notice also consists of the following standard paragraphs: B and C.

12 a. Type of Application: Surrender of License.

b. Project No.: 5702–002.

c. Date Filed: April 24, 1985.

d. Applicant: Barnet Hydro Company.

e. Name of Project: Barnet.

f. Location: Stevens River in Barnet Village, Caledonia County, Vermont.

g. Filed pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. L. Macrae Rood, Box 142, Warren, Vermont 05674.

i. Comment Date: August 30, 1985.

j. Description of Proposed Surrender: The proposed project would have consisted of: (1) A new 1-to 5-foot-high, 60-foot-long concrete gravity spillway/diversion dam; (2) a pond with no storage capacity at elevation 537.0 feet m.s.l.; (3) a new forebay at the west dam abutment; (4) a 42-inch-diameter, 450-foot-long, buried steel penstock; (5) a new rated capacity of 530 kW; (6) a transmission line; and (7) appurtenant facilities. The proposed run-of-the-river project would have generated up to 2,342,000 kWh annually. Energy produced at the project would have been sold to the local utility.

The Licensee states that due to the current lack of economic viability of the project since the buy-back rate for electricity in Vermont was reduced, and its inability to comply with the timetable for construction, it wishes to surrender its license.

k. This notice also consists of the following standard paragraphs: B, C & D2.

13 a. Type of Application: Preliminary Permit.

b. Project No.: 8919–000.

c. Date Filed: February 1, 1985.

d. Applicant: St. Vrain & Left Hand Water Conservancy District (SVLHWCD).

e. Name of Project: Coffintop Reservoir Pumped Storage.

f. Location: On St. Vrain Creek, in Sections 23 through 27, T3N, R71W, of the 6th P.M., near Laporte, in Larimer County, Colorado.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Ms. Barb Poquette, Executive Director, SVLHWCD, 500 Coffman Street, Suite 106, Longmont, CO 80501.

i. Comment Date: September 20, 1985.

j. Description of Project: The proposed project would utilize the existing Price Reservoir (impounded by Button Rock Dam which is owned by City of Longmont, Colorado) as the forebay for a pumped storage hydroelectric project. The reservoir to be created by the proposed Coffintop Dam, would be utilized as the project's afterbay. Button Rock Dam, an earth and rockfill dam 925 feet long with a maximum height of 215 feet, impounds Price Reservoir with a surface area of 248 acres and a storage capacity of 16,000 acre-feet at maximum surface elevation 6,400 feet m.s.l. The proposed Coffintop Dam would be an earth and rockfill or a roller compacted concrete dam 2,350 feet long and 350 feet high (if concrete) or 385 feet high (if earthfill), impounding a reservoir with a surface area of 800 acres and storage capacity of 115,000 acre-feet at maximum surface elevation 5,740 feet m.s.l. Additional new project works would consist of: (1) A 15-foot-diameter concrete-lined tunnel/penstock 17,600 feet long; connecting to (2) a 15-foot-diameter steel-lined tunnel/penstock 2,350 feet long; leading to (3) a powerhouse with an installed capacity of 156 MW containing 3 pump-turbines rated at 52 MW each; (4) a surge chamber, 5,950 feet upstream of the powerhouse; (5) a 1,550-foot-long, 15-foot-diameter, concrete-lined tunnel loading from the powerhouse to (6) a tailrace; and (7) a 2.5-mile-long, 115-kV primary transmission line. Applicant estimates that the average annual energy production would be 573,955,000 kWh. Project energy would be sold to area utility systems including the Public Service Company of Colorado, Tri-State Generation and Transmission Association, and the Platte River Power Authority. The project would be partially located on U.S. Bureau of Reclamation lands.

A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the

outcome of the studies, the Applicant would decide whether to proceed with

kWh. Existing facilities are owned by Homestead Woolen Mills, Inc.

the cost of the studies under permit would be $125,000.

kW; (6) a proposed 100-foot-long tailrace; (7) a proposed 220-foot-long,

outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under the permit would be $50,000.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

14 a. Type of Application: Preliminary Permit.

b. Project No.: 9143–000.

c. Date Filed: May 1, 1985.

d. Applicant: Guthrie Associates.

e. Name of Project: Monroe Dam.

f. Location: On the Salt Creek in Monroe County, Indiana.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Thomas Forbes, Guthrie Associates, P.O. Box 421, Mercer Island, Washington 98040.

i. Comment Date: August 30, 1985.

j. Competing Application: Project No. 9076–000; Date Filed: April 1, 1985.

k. Description of Project: The Applicant would utilize an existing dam under the administration of the U.S. Army Corps of Engineers (Corps). The proposed project would consist of: (1) A proposed bifurcated penstock, which would be connected to the Corps' existing 12-foot-diameter outlet conduit; (2) a proposed powerhouse containing two generating units with a total installed capacity of 3,500 kW; (3) a proposed tailrace which would divert the outflow from the powerhouse to the existing outlet channel of the existing Corps flood control project; (4) a proposed transmission line; and (5) appurtenant facilities. The estimated average annual energy output for the proposed project is 9,100,000 kWh.

l. This notice also consists of the following standard paragraphs: A6, B, C & D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $125,000.

j. Description of Project: September 20, 1985. The proposed project would consist of the following 2 developments.

A. The Ashland Pond Dam Development consisting of: (1) The existing 450-foot-long, 25-foot-high, earth embankment dam with a masonry spillway; (2) a reservoir having a surface area of 83 acres, a storage capacity of 502 acre-feet, and a water surface elevation of 127 feet msl; (3) a proposed intake structure; (4) a proposed 120-foot-long, 5-foot-diameter steel penstock; (5) a proposed powerhouse containing one generating unit with an installed capacity of 185 kW; (6) a proposed 50-foot-long tailrace; (7) a proposed 200-foot-long, 4.16 kV transmission line; and (8) appurtenant facilities

B. The Slater Dam development consisting of the following two alternatives:

Alternative 1

(1) The existing 170-foot-long, 18-foot-high masonry Slater Dam; (2) a reservoir having a surface area of 3 acres, a storage capacity of 6 acres-feet, and a normal water surface elevation of 108 feet msl; (3) a proposed intake structure; (4) a proposed 180-long, 5-foot-diameter steel penstock; (5) a proposed powerhouse containing one generating unit having an installed capacity of 205 kW; (6) a proposed 80-foot-long tailrace; (7) a proposed 70-foot-long, 4.16-kV transmission line; and (8) appurtenant facilities.

Alternative 2

(1) The existing 170-foot-long, 18-foot-high masonry Slater Dam; (2) a reservoir having a surface area of 3 acres, a storage capacity of 6 acre-feet, and a normal water surface elevation of 108 feet msl; (3) a proposed intake structure; (4) a proposed 360-foot-long, 5-foot-diameter steel penstock; (5) a proposed powerhouse containing one generating unit having an installed capacity of 280 kW; (6) a proposed 100-foot-long tailrace; (7) a proposed 220-foot-long, 4.16-kV transmission line; and (8) appurtenant facilities.

The Applicant estimates the average generation would be 1,695,000 kWh for the Ashland Pond development and alternative 1 of the Slater Dam development, and 2,026,000 kWh for the Ashland Pond development and alternative 2 of the Slater Dam development. The Existing Ashland Pond Dam and Slater Dam are owned by the State of Connecticut.

l. Purpose of Project: All project energy generated would be utilized by the Applicant for distrubution to its customers.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, D2.

n. Proposed Scope and Cost of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time the Applicant would perform studies to determine the feasibility of the project. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates the cost of the studies under permit would be $40,000.

20 a. Type of Application: Preliminary Permit.

b. Project No.: 9234–000

c. Date Filed: May 28, 1985

d. Applicant: Adirondack Hydro

e. Name of Project: Wilmington project.

f. Location On the Ausable River on the Town of Wilmington, Essex County, New York.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: Christopher McGill, P.O. Box 145, Wilmington, New York 12997.

i. Comment Date: September 20, 1985.

j. Description of Project: The proposed project would consist of: (1) An existing 227-foot-long, 19-foot-high concrete gravity dam; (2) a reservoir having a surface area of 25 acres, with negligible storage and a normal water surface elevation of between 986 feet msl and 988 feet msl; (3) a proposed 15-foot-long, 7-foot-diameter steel penstock; (4) an existing powerhouse containing one new generating unit with an installed capacity of 250kW; (5) an existing 50-foot-long tailrace; (6) a proposed 275-foot-long, 13kV transmission line; and (7) appurtenant facilities. The Applicant estimates the average annual generation would be 1,500,000 kWh. The existing

dam and project facilities are owned by the Town of Wilmington and the New York State Electric and Gas

competing preliminary permit application no later than 30 days after

protests, or motions to intervene must be received on or before the specified

be sent to the Applicant's representatives.

Dated: July 24, 1985.

dam and project facilities are owned by the Town of Wilmington and the New York State Electric and Gas Corporation.

k. Purpose of Project: All project power generated would be sold to the New York State Electric and Gas Corporation.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope and Cost of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time the Applicant would perform studies to determine the feasibility of the project. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates the cost of the studies under permit would be $25,000.

Standard Paragraphs

A3. Development Application—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted in response to this notice.

A4. Development Application—Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, any competing development applications or notices of intent to file competing development applications, must be filed in response to and in compliance with the public notice of the initial development application. No competing applications or notices of intent may be filed in response to this notice.

A5. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36 (1985)). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application.

A competing preliminary permit application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application.

A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A8. Preliminary Permit—Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit and development applications or notices of intent. Any competing preliminary permit or development application, or notice of intent to file a competing preliminary permit or development application, must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent to file competing applications may be filed in response to this notice.

A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Mr. Fred E. Springer, Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203–RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D1. *Agency Comments*—Federal State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time sent for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be set to the Applicants representatives.

D2. *Agency Comments*—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in section 408 of the Energy Security Act of 1980, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilites. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 30 of the Federal Power Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: July 24, 1985.

Kenneth F. Plumb,

Secretary.

[FR Doc. 85–17911 Filed 7–26–85; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RE 81–56–000]

Oglethorpe Power Corp. et al.; Electric Rates: Purpa; Qualifying Facilities; Waiver; Interventions

Issued: July 23, 1985.

Oglethorpe Power Corporation; Altamaha EMC; Amicalola EMC; Canoochee EMC; Carroll EMC; Central Georgia EMC; Coastal EMC; Cobb EMC; Colquitt EMC; Coweta Fayette EMC; Douglas County EMC; Excelsior EMC; Flint EMC; Grady County EMC; Habersham EMC; Hart County EMC; Irwin County EMC; Jackson EMC; Jefferson EMC; Lamar EMC; Little Ocmulgee EMC; Middle Georgia EMC; Mitchell EMC; Ocmulgee EMC; Oconee EMC; Okefenoke Rural EMC; Patsula EMC; Planters EMC; Rayle EMC; Satilla Rural EMC; Sawnee EMC; Slash Pine EMC; Snapping Shoals EMC; Sumter EMC; Three Notch EMC; Tri-County EMC; Troup County EMC; Upson County EMC; Walton EMC; and Washington EMC; Docket No. RE81–56–000. Order granting and denying motions, granting in part and denying in part petition for waivers and terminating docket.

On January 22, 1981, as amended on March 23, 1984, Oglethorpe Power Corporation (Oglethorpe) and its 39 member retail distribution cooperatives (EMCs) (collectively, the petitioners) filed a petition for waiver of certain of the Commission's regulations implementing section 210 of the Public Utility Regulatory Policies Act of 1978 (PURPA) pursuant to § 292.403 of the Commission's regulations. Specifically, petitioners seek waiver of Oglethorpe's obligation under § 292.303(b) of the regulations to sell power to qualifying facilities (QFs) and of the EMCs' obligation under § 292.303(a) to purchase power directly from QFs.[1]

The petition was filed in connection with Oglethorpe's and the EMCs' joint program to implement the Commission's regulations promulgated pursuant to PURPA section 210, as required by § 292.401 of the regulations. Their implementation program consists of an "Interconnection Policy" which coordinates purchases from and sales to QFs. Under the Interconneciton Policy, Oglethorpe would make all purchases from QFs and the EMCs make all sales of power to QFs. The petition notes that under § 292.303 (a) and (b) of the regulations, the purchase and sale obligations apply to "each" electric utility. Thus, in order to secure approval of the Interconnection Policy, petitioners request the above mentioned waivers. In brief, petitioners contend that the requested waivers are appropriate because strict compliance with the regulations is not necessary to encourage cogeneration and small power production and compliance will be unduly burdensome and may cause substantial financial harm to Oglethorpe.

A timely intervention was filed by Mr. Gaynor L. Bracewell, the owner of a small hydroelectric facility. Mr. Bracewell did not object to the waiver, but criticized Oglethorpe's rates for purchases and sales. Petitioners answered in opposition.

On January 16, 1984, an untimely motion to intervene and protest was filed by Greensboro Lumber Company (Greensboro).[2] Greensboro contends the Commission lacks authority to grant the waiver, that requiring Oglethorpe to sell power to QFs is necessary to encourage cogeneration and small power productions; and that if the Commmission does have authority to grant the waiver, a hearing is necessary before it rules on the issue.

On March 23, 1984, petitioners filed the above-mentioned amendments to the petition, in which they provided supplementary arguments for the requested relief. Notice of the amendment was issued March 30, 1984. The comment date was extended to May 14, 1984.[3]

Mr. Bracewell filed a timely pleading in which he objected to the waiver.[4] Timely motions to intervene were also filed by Georgia Power Company (GPC), from which Oglethorpe purchases substantial amounts of power; Mr. Herschel L. Webster, the owner of a shall hydroelectric project from which Oglethorpe purchases power; and the National Rural Electric Cooperative Association (NRECA). GPC, Mr. Webster and NRECA all support the petition. In addition, Mr. Webster requests that a hearing be convened if the Commission does not grant the

[1] Oglethorpe is a generation and transmission cooperative owned by the 39 member EMCs. Oglethorpe acts as the generation and transmission agent for the EMCs, which purchase substantially all of their power and energy requirements from Oglethorpe. Oglethorpe has no service territory and no customers other than the EMCs.

[2] Greensboro owns a 7.5 MW qualifying small power production facility in Georgia. Greensboro has a contract with Oglethorpe and Rayle EMC executed pursuant to the Interconnection Policy, under which Greensboro sells energy and capacity to Oglethorpe and purchases power from Rayle.

[3] Notice issued April 27, 1984 in Docket No RE81–56–000.

[4] The Commission contrues this document as an amendment to Mr. Bracewell's intervention.

VOL 50 ISS 145 JL 29 1985 UMI

petition in the first instance. Greensboro filed timely comments in opposition to the petition as amended.[5]

In succeeding months, the parties exchanged numerous pleadings. These will be identified below, as necessary.

Discussion

Under Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214), their timely notices and motions to intervene serve to make Mr. Bracewell, Greensboro, Mr. Webster, GPC and NRECA parties to this proceeding.

(a) *Commission authority to waive the purchase and sale obligations.*

The threshold issue in this proceeding is whether the Commission has authority to grant waivers of the purchase and sale obligations and, if so, under what circumstances? The Commission concludes that it has authority to waive these obligations where a State commission, with respect to a particular utility or utilities, or a nonregulated utility, can demonstrate that strict compliance is not necessary to encourage cogeneration and small power production.

Section 210(a) makes no explicit provision for waiver of purchase or sale obligations. Rather, it requires the Commission to prescribe "such rules as it detemines necessary" to encourage cogeneration and small power production, which rules "shall require electric utilities to offer to" purchase from and sell power to qualifying facilities. The legislative history is also silent on the question of waiving these obligations. Petitioners, however, contend that the phrase "such rules as it determines necessary," indicates that Congress intended to permit the Commission to grant waivers. They also state that nothing in the legislative history indicates Congress intended that these obligations must apply to every utility vis-a-vis every QF. In support, they claim that the Commission has already construed section 210(a) to permit waivers, noting the exceptions to the purchase obligation during "light loading" periods [6] and to the purchase and sale obligations during system emergencies.[7] In addition, petitioners point to the "wheeling in lieu of purchase provision (§ 292.303(d)) and construe this as a waiver of the wheeling utility's obligation to purchase.[8] Moreover, they note that § 292.403(b) of the regulations contains a generally applicable provisions for waivers upon application.[9]

Finally, petitioners seek to distinguish a proceeding in which the Commission denied a petition by Colorado-Ute Electric Association for an amendment to § 292.303 to require QFs to by-pass local distribution utilities and sell power directly to those utilities's wholesale suppliers.[10] In that proceeding, the Commission terminated 15 rulemaking dockets, among them Colorado-Ute's petition. The Commission denied the petition, stating that "the obligation to purchase is a statutory requirement" and "[s]ince Colorado-Ute's petition does not indicate how the statute can be construed differently, the Commission is not convinced it should modify § 292.303." [11] Petitioners allege Colorado-Ute should not be read as holding that the purchase requirement cannot be waived because such a reading would contradict Order No. 69's provision for exceptions to the general rule and because Colorado-Ute did not show any specific hardships that local distribution utilities might suffer [12] or that the general obligation is not necessary to encourage cogeneration and small power production.[13]

Greensboro offers several arguments in rebuttal. First, it notes that one purpose of PURPA was to cure the problem of utility refusal to deal with congenerators and small power producers.[14] Thus, it argues, there is no waiver provision in section 210(a) because Congress intended to ensure that the Commission would not frustrate that intent. Greensboro also notes that PURPA gives the Commission explicit discretion in section 210(e)(1) to grant exemptions from certain Federal laws.[15] The absence of such a provision in section 210(a) must, therefore, indicate that no waivers from the general purchase and sale requirements were intended to be allowed. Greensboro next notes that § 292.403(b) permits waivers of the regulations only if compliance is not necessary to encourage cogeneration and small power production "and is not otherwise required under section 210 of PURPA." Greensboro alleges that this limitation is intended to apply to the purchase and sale requirements. Greensboro avers that the wheeling in lieu of purchase provisions is not a waiver because of QF must give its consent. Thus, that provision is designed to give the QF flexibility to go beyond the utility to which it is connected if there is a price advantage. Greensboro contends *Colorado-Ute* is indistinguishable because the fact that Colorado-Ute was seeking a broad exemption with no showing of special hardship was not a consideration in the Commission's decision, which rested solely on a finding that purchase obligation could not be waived.

Notwithstanding Greensboro's arguments, the Commission concludes that it does have implicit authority to waive the purchase and sale obligations under its regulations where strict compliance would not serve to advance the Congressional purpose of encouraging QFs. Greensboro interprets the Commission's order in *Colorado-Ute* too broadly. *Colorado-Ute* held, perhaps unclearly, that Colorado-Ute did not provide support for Commission authority to waive the purchase obligation for the entire class of local distribution utilities. The provisions for waiver in the regulations (§§ 292.305(b)(2) and 292.403(b)) permit waivers only with respect to individual utilities based on a showing by the applicant that designated standards have been met. Waivers en masse, without any showing that compliance is not necessary to encourage QFs, was clearly not contemplated by Congress.

Greensboro's other major contention is that where Congress intended to permit waivers of statutory requirements, it explicity so stated, in section 210(e)(1). However, we conclude that the Congressional directive to the Commission to prescribe "such rules as it determines necessary to encourage cogeneration and small power production" indicates sufficient flexibility was intended to accommodate a limited authority to waive the purchase and sale obligations where strict compliance would serve no purpose. In this connection, it is notable that section 210(e)(1) concerns exemptions from the provisions of statutes other than PURPA and refers specifically to exemptions for QFs, not utilities. Thus, that section is irrelevant to waivers of utility obligations under PURPA.

Further, the phrase "not otherwise required under section 210 of PURPA" does not, in our view, mean that § 292.403(b) can never be applied to the purchase and sale obligations. As noted above, we have concluded that section 210 does not require that each and every utility offer to both purchase and sell at all times and under all conditions. Rather, in the context of purchases and sales, this phrase refers to the requirement of section 210 that the Commission's regulations generally require utilities to purchase and sell and that no qualifying facility be deprived of an opportunity to deal with a utility.

Waiver of the purchase or sale obligations under these circumstances is not inconsistent with the Congressional intent to force utilities to deal with cogenerators and small power producers. Waiver would only be inconsistent with this intent if it frustrated the purpose of encouraging these entities. The Commission's waiver provisions are designed to ensure that this purpose is not frustrated. At a minimum, a State commission or nonregulated utility must demonstrate that compliance with the purchase obligation is not necessary to encourage cogeneration and small power production. Under the Commission's regulations, waivers of the sale obligation are subject to a higher standard, a showing that the affected utility's ability to serve its customers will be impaired or that it will otherwise suffer an undue burden if required to sell power to QFs.

Finally, Greensboro is correct that the wheeling in lieu of purchase provision is not a waiver of the purchase obligation. The QF has the discretion determine whether it will sell to the directly or indirectly connected utility. However, the fact that this provision is not a waiver provision is not dispositive of the issue of whether the Commission can grant waivers.

For these reasons, the Commission concludes that section 210 does not require the purchase and sale obligations to be applied inflexibly. So long as the provision waived is not, in the particular circumstances presented, necessary to encourage cogeneration and small power production, section 210 is satisfied. We turn now to the merits of the petition.

(b) *Whether to grant the requested waivers.*

(i) Waiver of the EMCs' purchase obligation

The Commission concludes that petitioners have shown that requiring the EMCs to purchase from QFs is not necessary to encourage qualifying facilities. Thus, this portion of the waiver petition will be granted.

Petitioners contend that waiver of the EMCs' purchase obligation is warranted because: (1) Central coordination of power purchases is essential to Oglethorpe's role as power supplier to the EMCs, (2) Oglethorpe has an administrative and engineering staff in place for purchasing power; the EMCs do not and it would be costly and inefficient for them to have to develop that capability, (3) Oglethorpe could make purchases via connection with the ITS in cases where the QF produces more power than the EMC can use or has physical capability to handle, and (4) purchases by the EMCs are not necessary to encourage QFs because the rates paid by Oglethorpe will always be as high or higher than those of an EMC. In the latter connection, petitioners' note that under the EMCs' contracts with Oglethorpe, any adverse cost impact on Oglethorpe resulting from an EMC purchase from a QF (*e.g.*, a reduction in Oglethorpe's purchases from GPC, resulting in unavoided demand charges) would be allocated to the EMC, which would have to recover that cost from the QF.[16] They also state that an EMC's purchase rate would be lower because the entire administrative cost of having a QF purchase program would be allocated only to the QFs in the EMC's service territory, rather than spread over all of Oglethorpe's customers. Finally, the EMCs state that under Oglethorpe's contracts with GPC, Oglethorpe receives a capacity credit for purchases from QFs, which may not be applicable if an EMC purchases instead.

Greensboro responds that (1) it is improper for Oglethorpe to allocate unavoided fixed costs to the EMC purchasing QF power, because Order No. 69 provides that such allocations to an EMC are only permissible in excess capacity situations, (2) Oglethorpe's avoided capacity cost of purchases from GPC may at times be less than an EMC's avoided cost of purchasing power from Oglethorpe; thus, the QF would rather sell to the EMC, (3) an EMC may choose not to calculate avoided cost the same way as Oglethorpe and thus provide a higher rate, (4) EMCs may be more friendly to the industrial operations that give rise to QF power and (presumably) provide a better rate than Oglethorpe, (5) other contractual terms, such as levelized payments, may be just as important as price, and (6) forcing QFs to deal with Oglethorpe is anti-competitive because it removes 39 potential purchasers from the market.

Greensboro's objections are not persuasive. As set forth in Order No. 69, which established the Commission's regulations implementing section 210, the Commission concluded that a utility's rates are sufficient to encourage QFs if they are based on the utility's full avoided cost. Oglethorpe contends that its rates are based on full avoided cost, a contention Greensboro has not disputed in this proceeding. Thus, the rates are, on their face, in compliance with the regulations thus are sufficient to encourage QFs.[17] Greensboro, however, contends that in order to show that EMC purchases are not necessary to encourage QFs, petitioners should be required to show that Oglethorpe's rates and terms and conditions of service will, in every possible circumstance, equal or exceed the EMCs'.[18] We believe that

---

[5] The Commission construes Greensboro's pleading as a timely filed intervention, in response to the notice of March 30, 1984. Thus, Greensboro's original untimeliness is cured.

[6] 18 CFR 292.304(f). "Light loading" refers to a situation where a utility would incur greater costs as a result of purchasing electricity from a QF than it would have had it not purchased the power; in short, it would have a negative avoided cost. This would have to be paid for by the QF if it continued to deliver power during these periods. See FERC Stats. and Reg., Regulations Preambles 1977–1981, ¶30,128 at 30,886 (Hereafter "FERC Preambles") (45 FR 12,214 at 12,227 (May 25, 1980)).

[7] 18 CFR 292.307(b)(1) (purchases) and 292.307(b)(2) (sales).

[8] Section 292.303(d) provides generally that if a QF agrees, "an electric utility which would otherwise be obligated to purchase energy or capacity from [a QF] may transmit the energy or capacity to any other electric utility." When this occurs, the utility to which the power is transmitted is required to purchase the QF's power as if it were directly connected to the QF.

[9] Section 292.305(b)(2) provides that a State regulatory Commission or this Commission (with respect to nonregulated utilities) may waive the obligation to provide any of the back-up power services upon a finding that compliance will:

(i) Impair the electric utility's ability to render adequate services to its customers; or

(ii) Place an undue burden on the electric utility.

[10] "Termination of Rulemaking Docket; Certification of Compliance With Coastal Zone Management Act, *et al.*," IV FERC Statutes and Regulations ¶ 32,344, 32,767–768, Docket No. RM82–7–000, Colorado-Ute Electric Association (Hereafter, *Colorado-Ute*).

[11] IV FERC Stats. and Regs. at 32,768.

[12] Petitioners argue that they will suffer specific hardship if they are not granted a waiver. These arguments will be considered below.

[13] NRECA also filed comments supporting the waiver in its motion to intervene and in its answer to Greensboro's Motion for Summary Disposition. NRECA's arguments are variations on those made by petitioners. Thus, both parties' arguments will be considered jointly.

[14] *See FERC v. Mississippi*, 456 U.S. 742, 750–51 (1982).

[15] Section 210(e) refers to the Federal Power Act, the Public Utility Holding Company Act and State laws and regulations regarding rates and financial regulations of electric utilities.

[16] Petitioners claim that allocation of any such costs to QFs is sanctioned in Order No. 69. *See* FERC Preambles at 30,870 (45 FR at 12,219).

[17] If Greensboro contends that Oglethorpe's avoided cost methodology is improper, that contention should, as the Commission has repeatedly stated, be pursued in a State forum of competent jurisdiction. *See* "Policy Statement Regard the Commission's Enforcement Role Under Section 210 of the Public Utility Regulatory Policies Act of 1978," 23 FERC ¶ 61,304 at 61,645 (1983); *Southern Company Services, Inc.*, 27 FERC ¶ 61,443, *reh. den.* 28 FERC ¶ 61,340 (1984); *Roche Products, Inc., et al.*, 29 FERC ¶ 61,098 (1984).

[18] In its petition to intervene, Greensboro acknowledges that Oglethorpe's rates will generally equal the EMCs', but states that waiver of the purchase obligation should be granted only if petitioners can "guarantee that in all possible cases QFs will come out in at least as good a position selling to [Oglethorpe] as to an EMC. . . ." Petition to Intervene, pp. 10–11.

section 210 requires no such result. The intent of Congress was to ensure that

power is the directly connected utility or, if that utility is willing to wheel

hardships is not well supported.[22] As to the first contention, Oglethorpe merely

not be regulated by the Georgia Commission in any event, it is unlikely

otherwise be required to purchase, and that no qualifying facility shall be

VOL 50 ISS 145 JL 29 1985 UMI

section 210 requires no such result. The intent of Congress was to ensure that QFs have a market for their power under reasonable terms, and it granted the Commission broad power to construct a regulatory framework to achieve that end. In this instance, where Oglethorpe is ready and willing to stand in the shoes of the EMCs, waiving the EMCs' purchase obligation will not frustrate Congress' intent, because no QF will be deprived of a market for its power and each will receive a rate established as sufficient to encourage QFs. Thus, assuming that Greensboro's contention that there may be periods during which an EMC's avoided cost would exceed Oglethorpe's is correct, we still conclude that requiring EMC purchases is not necessary to encourage QFs.

While it is not necessary to our decision in this case, we also think it worthwhile to point out that Greensboro's other arguments are flawed. One of Greensboro's primary contentions in support of the argument that the EMCs' avoided costs may exceed Oglethorpe's that it is improper for Oglethorpe to allocate to an EMC unavoided fixed costs that result from that EMC purchasing from a QF unless Oglethorpe is in an excess capacity situation. We disagree. The excess capacity situation discussed in Order No. 69 merely illustrates the principle that a purchasing utility should be in the same financial position it would have been had it not purchased from the QF.

Further, Greensboro's assertion that an EMC may choose not to calculate avoided cost on the same basis as Oglethorpe and provide a higher rate to QFs is entitled to little weight. It is not logical to suppose that an EMC would choose an avoided cost methodology that not only would result in it paying more for power than it has to, but which might also cause it to incur a penalty by way of compensation to Oglethorpe for any unavoided costs incurred by Oglethorpe as a result of the EMC's purchase. Such an occurrence is particularly unlikely given that the EMC's clearly prefer to have Oglethorpe power on their behalf. To offer a better rate than Oglethorpe would undercut that goal. For the same reason, it is highly unlikely that an EMC would offer better terms and conditions than Oglethorpe.

Finally, the allegation that requiring QFs to sell to Oglethorpe would remove 39 potential purchasers from the market for QF power reveals a misunderstanding of the nature of the purchase obligation. Under our regulations, the "market" for a QF's power is the directly connected utility or, if that utility is willing to wheel power to other utilities, indirectly connected utilities. 18 CFR § 292.303 (a) and (d). A QF in an EMC's service territory would be directly connected either to the local EMC or to Oglethorpe. Unless Oglethorpe voluntarily offered to wheel power to other EMCs, the indirectly connected EMCs would not be required to purchase the QF's power. It seems quite unlikely that Oglethorpe would willingly offer to wheel to another EMC for this purpose, because that would be inconsistent with Oglethorpe's preference that it make all purchases of QF power.[19]

While the Commission concludes that a waiver is appropriate in this instance, that waiver will be granted subject to certain conditions to ensure that QFs selling to Oglethorpe will receive the same encouragement as other qualifying facilities. First, we note that Greensboro is directly connected to Oglethorpe, not Rayle. Oglethorpe has, appropriately, imposed only one set of interconnection charges. Similiarly, if a QF was directly connected to an EMC, it could be required to pay only for interconnection costs related to the connection with the EMC. It could not be required to pay twice under the theory that it is selling power to an indirectly connected utility. Also, if a QF were directly connected to Oglethorpe, Oglethorpe would have to deliver back-up power from its facilities. The QF could not be forced to make a second interconnection with the local EMC to receive back-up power and to pay additional interconnection charges.

In addition, we note that under the existing agreements, Greensboro pays no wheeling charge in connection with Oglethorpe's purchase. This may be a coincidence related to the fact that Greensboro is directly connected to Oglethorpe. In any event, no wheeling charge would be permissible even if the affected QF were directly connected to an EMC. The theory underlying the waiver is that Oglethorpe acts as purchasing agent on behalf of all the EMCs. Therefore, once the power enters an EMC's system, it has been delivered to the purchaser.

(ii) Waiver of Oglethorpe's sale obligation.

Petitioners' argument for waiver of Oglethorpe's sale obligation rests on the assertions that sales to QFs by Oglethorpe are not necessary to encourage congeneration and small power production and that such sales would be unduly burdensome. The argument is as follows: (1) The back-up power needs of QFs can be met by other utilities, (2) Oglethorpe would be required to develop a retail rate division, which would result in financial and administrative burdens, on the off-chance that a QF might choose to purchase directly from it, (3) Oglethorpe "could well" become subject to regulation by the Georgia Public Service Commission, in particular, regulation of Oglethorpe's future financial dealings,[20] and, (4) becoming subject to State regulation could adversely affect tax benefits which are asserted to depend on Oglethorpe not being subject to Georgia Commission jurisdiction. The tax benefits relate to "safe harbor" leasing transactions and sale of tax benefits, accelerated depreciation and energy tax credits.[21]

The applicable section of the Commission's regulation's (§ 292.305(b)(2)) permits waivers upon a showing of impaired service to the utility's customers or undue burden to the utility. Petitioners' arguments do not go to the former basis. Thus, the question in whether Oglethorpe would be unduly burdened by compliance with the sale obligation. In the Commission's view, petitioners have not made such a showing.

First, even if the power needs of QFs could be met by other utilities, that has nothing to do with whether Oglethorpe would be burdened by such sales. Second, developing retail rates for QFs should not be burdensome for Oglethorpe. It now has a staff which develops rates for purchases from QFs and its wholesale rates to the EMCs. This staff should certainly have the expertise to develop retail rates. Moreover, Oglethorpe had only entered into contracts with only a few QFs since the Commission's regulations were promulgated in 1980. Petitioners' assertion that a whole new retail rate division is necessary to serve a handful of back-up power customers is not persuasive.

Petitioners' argument that Oglethorpe may be subject to State regulation if it makes any retail sales and that such regulations will cause financial

[19] Greensboro contends in *Greensboro Lumber Company v. Georgio Power Company, et al.*, (No. 84-2022A) (N.D. Ga., Atlanta Division, Filed February 26, 1985), that Oglethorpe refuses to wheel Greensboro's power to other utilities and that this is a violation of the antitrust laws. Our comments here refer only to Oglethorpe's obligations under our rules implementing section 210 of PURPA.

[20] But not its rates.

[21] The tax benefits rest on an Internal Revenue Service (IRS) ruling that Oglethorpe's property is not "public utility property" within the meaning of the Internal Revenue Code of 1954. 26 U.S.C. 1, *et seq.* (Tax Code).

hardships is not well supported.[22] As to the first contention, Oglethorpe merely states that such a sale "could well" bring Oglethorpe under State commission jurisdiction.[23] Petitioners cite section 46-3-2 of the Georgia Territorial Act in support of this supposition. However, that section simply states that EMCs and municipalities which furnish retail service are subject to Commission regulation except as to their rates (this includes review of financings: Section 46-2-28). "Electric Membership Corporation" is defined in section 46-2-171(3) of that Act as an EMC organized under Chapter 3, Article 4. Nowhere does Oglethorpe state that it is an EMC or that any sale of back-up power would make it a *de facto* EMC. Moreover, the Georgia Territorial Act may permit Oglethorpe to make retail sales in an EMC's service area if the EMC consents and the Georgia Commission approves section 46-3-8(c)(2)). The jurisdictional consequences of such a sale are not clear on the face of the Georgia Territorial Act.

Even if such sales did render Oglethorpe subject to the jurisdiction of the Georgia Commission, that Commission exercises no control over EMC rates (section 46-3-12). Oglethorpe, however, asserts that Georgia Commission authority to approve Oglethorpe's financings "would . . . hinder its ability to move quickly in volatile financial markets." This possibility does not appear to involve any undue hardship, as it would put Oglethorpe on the same footing as virtually every regulated utility and many nonregulated utilities, including the EMCs.

Finally, it is not at all clear that jurisdiction by the Georgia Commission over Oglethorpe's financings would void Oglethorpe's letter ruling from the IRS that its property is not "public utility property" within the meaning of the Tax Code. The Tax Code defines that term as property used in the business of selling electricity:

> If the rates for such furnishing or sale, as the case may be, have been established or approved by a State or political subdivision thereof, by an agency or instrumentality of the United States, or by a public service or public utility commission or other similar body of any State or political subdivision thereof.

26 U.S.C. 167(1)(3)(A). Because Oglethorpe's rates for retail sales would not be regulated by the Georgia Commission in any event, it is unlikely that Oglethorpe's ruling from the IRS would be voided by virtue of making sales to QFs.[24]

In any event, the Commission believes it should not grant waivers of the purchase or sale obligations based on speculation as to how the Georia Commission and the IRS might interpret the Georgia Territorial Act and the Tax Code, respectively, if Oglethorpe sold back-up power to a QF. Section 292.305(b)(2) requires a showing that compliance "will" be unduly burdensome. Moreover, there is no apparent reason why Oglethorpe could not seek definitive opinions from each to these agencies rather than ask this Commission to act on speculation or interpret laws concerning which it has no expertise. Finally, the Commission notes that several implementation plans have been filed by G&T Cooperatives and their members which specifically provide for the G&T cooperative to sell back-up power.[25] To the Commission's knowledge, none of these G&T cooperatives has lost tax benefits as a result. For all of the reasons stated above, the Commission finds that petitioners have not shown that Oglethorpe would be unduly burdened by making sales to QFs.

The Commission orders:

(A) All motions for extensions of time to respond to pleadings of other parties are hereby granted.

(B) All motions not specifically granted are hereby denied.

(C) Oglethorpe's and the EMC's petition for waiver of the EMCs' purchase obligation is hereby granted, subject to the conditions that Oglethorpe continue to be ready and willing to purchase power from qualifying facilities from which the EMCs would otherwise be required to purchase, and that no qualifying facility shall be subject to duplicate interconnection charges or charges for wheeling power to Oglethorpe across EMC transmission lines.

(D) Oglethorpe's and the EMCs' petition for waiver of Oglethorpe's sale obligation is hereby denied.

(E) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 85-17914 Filed 7-26-85; 8:45 am]

BILLING CODE 6717-01-M

[22] It is worth noting that Oglethorpe seeks a waiver even if it would not become subject to Georgia Commission jurisdiction as a result of sales to QFs. Petition, p. 6.

[23] *See* Amendment to Petition, p. 11.

[24] Petitioners have not explained how Oglethorpe obtained a ruling from the IRS that its facilities are not "public utility property" within the meaning of section 167(1)(3)(A) of the Tax Code. The Rural Electification Administration (REA) must approve the rates and rate structures of its borrowers (including Oglethorpe). Thus, Oglethorpe's facilities seem to fit squarely within the definition in section 167(1)(3)(A). However, Petitioners' "Motion to Strike Factual Misstatements" appears to indicate that the IRS regards as "public utility property" only property belonging to utilities whose rates are regulated on a rate of return basis. If that is the case, it is highly unlikely that the letter ruling would be voided by sales of back-up power, because Oglethorpe's rates are not regulated on a rate of return basis.

[25] Central Electric Power Cooperative, Northeast Missouri Electric Power Cooperative, Northwest Electric Power Cooperative, Lincoln County Power District No. 1, Basin Electric Power Cooperative, Minkota Power Cooperative, Kamro Electric Cooperative, Western Farmers Electric Cooperative, Missouri Basin Municipal Power Agency, Deseret Generation and Transmission Cooperative.

Office of Hearings and Appeals

Issuance of Decisions and Orders; Week of June 10 through June 14, 1985

During the week of June 14 through June 14, 1985, the decisions and orders summarized below were issued with respect to apeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeal

W.F. Lawless, 6/12/85, HFA-0287

W.F. Lawless filed an Appeal from the Savannah River Operations Office's partial denial of his Freedom of Information Act (FOIA) request. The OHA upheld Savannah River's determination that the documents which were not released could be withheld pursuant to Exemption 5 of the FOIA. The OHA found, however, that Savannah River's determination was incomplete since it did not make any decision regarding the release of three documents which originated in another government agency. Important issues that were considered were (i) whether drafts, comments to drafts, cover memos accompanying drafts, and documents containing their authors' personal opinions were properly withheld pursuant to Exemption 5; (ii) whether the agency's release of the documents to Congress waived its FOIA privilege to withhold the documents; and (iii) whether the FOIA required a publicly available non-government journal to be released.

Remedial Orders

Marathon Petroleum Company, Marathon Oil Company, 6/13/85, BRO-1295

Marathon Petroleum Company and Marathon Oil Company (Marathon) objected to a Proposed Remedial Order (PRO) which the Economic Regulatory Administration (ERA) issued to the firm on July 23, 1980. In the PRO, the ERA alleged that during the period August 1973 through October 1978,

Marathon overstated the increased costs of natural gas liquids and natural gas liquid

approved were incorrectly calculated. In this Decision the correct refund amounts were

accrued interest, which equals a share of the consent order fund allocated to Engelhard on

as stripper wells and the misclassification of oil produced from other properties as new

Implementation of Special Refund Procedures

Allied Materials Corporation and Excel

firm's allocable share was well below the presumption of injury level of $5,000.

VOL 50 ISS 145 JL 29 1985 UMI

Marathon overstated the increased costs of natural gas liquids and natural gas liquid products that it was permitted to include in its selling prices under applicable regulations. In considering the PRO, the DOE initially granted a motion by the ERA to withdraw those portions of the PRO concerning the period August 1973 through December 1974. Regarding the remaining period, the DOE found that Marathon had conceded many of the cost overstatements specified in the PRO, and determined that Marathon's challenges to the PRO should be rejected. The DOE therefore concluded that the PRO should be issued as a final Remedial Order. The Remedial Order requires Marathon to file with the ERA revised cost calculation reports and supporting data, as adjusted to reflect the adjudicated cost overstatements, covering the period January 1975 through October 1978. The important issues discussed in the Decision and Order include (i) whether a "sale" of residue gas is required in order to claim increased shrinkage costs, and (ii) whether cost "offsets" may properly form a defense to a PRO that alleges no actual overcharges but seeks only a refiling of cost statements.

Motion for Discovery

Tootle Petroleum Inc., 6/13/85, HRD–0241, *HRH–0241*

Tootle Petroleum, Inc. (Tootle) filed Motions for Discovery and for Evidentiary Hearing in connection with its Statement of Objections to a Proposed Remedial Order (PRO) that was issued to the firm and to Iron R. Tootle. In its motions, Tootle sought discovery of information pertaining to various rulemakings applicable to crude oil resellers and to the DOE's contemporaneous construction of portions of the crude oil reseller regulations. The DOE found that Tootle's Motion for Discovery should be denied since the firm had failed to show that the regulations were sufficiently ambiguous or that other specific circumstances existed which would warrant discovery.

The DOE also found that the Motion for Evidentiary Hearing should be denied since Tootle had failed to make the requisite showing that there were any material factual issues in dispute. However, the DOE granted Tootle a 20-day period of time in which to submit affidavits or other documentation in support of its positions in the underlying enforcement proceeding.

Implementation of Special Refund Procedures

Ayers Oil Company 6/11/85, HEF–0223

The Office of Hearings and Appeals issued a final Decision and Order setting forth procedures to be used in filing applications for refund from the settlement funds obtained under a consent order with Ayers Oil Company. The funds will be available to customers who purchased covered petroleum products from Ayers during the period August 1973 to January 1981.

Refund Applications

The Hertz Corps./TRW, Inc., RF76–157; Ford Motor Co., RF76–158; Chesebrough-Pond's Inc., RF76–159; General Electric Co., 6/13/85, RF76–160

DOE Decisions and Orders had been issued to four firms in which the refunds approved were incorrectly calculated. In this Decision the correct refund amounts were calculated and refunds approved from the Hertz Corporation consent order fund. TRW, Inc. and Ford Motor Company were granted supplemental refunds in addition to the refunds approved in the original Decisions. Chesebrough-Pond's, Inc. and General Electric Company were granted full refunds on the original volumes claimed in their applications. The refunds granted in this Decision and Order total $29,000.

Mapco, Inc./Delta Propone Co., Inc., 6/13/85, RF108–3

In this proceeding Delta Propane Co., Inc. sought a refund based on its purchase of 999,020 gallons of refined products from Mapco, Inc. during the period covered by the Mapco consent order. Delta's claims was for less than the $5,000 threshold level for small claimants. The DOE therefore granted Delta a refund of $1,798.24 plus accured interest, which equals a share of the consent order fund allocated to Delta on the basis of the volume of the products the firm purchased.

OKC Corp./McCall Sevice, Stations, Inc. et al., RF13–6, RF13–18, RF13–24, RF13–27

The DOE issued a Decision and Order concerning four Applications for refund filed by certain purchasers of refined petroleum products from OKC Corporation. The DOE denied one of the applications on the grounds that the applicant was a spot purchaser which failed to rebut the presumption that spot purchasers were not injured by OKC Corporation's pricing practices. *Office of Enforcment: In the Matter of OKC Corporation*, 9 DOE ¶ 82,551 (1982) (OKC). The DOE granted the other three applications under standards established in *OKC*. The refunds granted in this proceeding total $48,091.

OKC Corp./Rainey Oil Company, 6/13/85, *RF13–36*

The DOE issued a Decision and Order concerning an Application for Refund filed by Rainey Oil Company. Rainey sought a portion of the settlement fund obtained by the DOE through a consent order entered into with OKC Corporation. Rainey is an independent reseller of petroleum products which purchased motor gasoline and middle distillates from OKC during the period covered by the consent order. The DOE granted Rainey's refund application based upon standards established in *Office of Enforcement: In the Matter of OKC Corporation*, 9 DOE ¶ 82,551 (1982). The refund granted Rainey totaled $2,658.

Seminole Refining, Inc./Engelhard Corp., 6/13/85, *RF111–7*

This Decision and Order relates to a distribution of a escrow account fund remitted by Seminole Refining, Inc. pursuant to a consent order that Seminole entered into with the DOE. Engelhard Corporation sought a refund on the basis of its purchases of 13,686,759 gallons of refined products from Seminole during the consent order period. The DOE found that Engelhard consumed the products in a business which was not subject to DOE regulations, and therefore the firm made a satisfactory showing of injury and should receive a refund. The DOE therefore granted Engelhard a refund of $85,679.11 plus accrued interest, which equals a share of the consent order fund allocated to Engelhard on the basis of the volume of the products the firm purchased.

Dismissals

The following submissions were dismissed:

Nome and *Case No.*

Chillum Gulf, RF40–2333
Croasdaile Gulf, RF40–2889
Holly Corp., HRR–0102

Copies of the full text of these decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room 1E–234, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

Dated: July 16, 1985.

George B. Breznay,

Director, Office of Hearings and Appeals.

[FR Doc. 85–17941 Filed 7–26–85; 8:45 am]

BILLING CODE 6450–01–M

Issuance of Decisions and Orders; Week of June 17 Through June 21, 1985

During the week of June 17 through June 21, 1985, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeal

Donold Lee Espenshade, 6/18/85; *HFA–0289*

Donald Lee Espenshade filed an Appeal from a denial by the Manager of the Nevada Operations Office (NOO) of a Request for Information which he had submitted under the Freedom of Information Act. In considering the Appeal, the DOE found that the documents responsive to Mr. Espenshade's request did not exist in the NOO. In addition, the appellant had requested a "confidential" hearing, apparently to disclose material which he was unwilling to present in a public forum. The DOE stated, however, that it was not in a position to grant such a request. The Appeal was therefore denied.

Remedial Order

Otis Ainsworth, 6/17/85; *BRO–0552*

Otis Ainsworth (Ainsworth) objected to a Proposed Remedial Order (PRO) issued to him on November 15, 1979. In the PRO the Economic Regulatory Administration alleged crude oil overcharges stemming from improper classification of certain properties as stripper wells and the misclassification of oil produced from other properties as new crude oil. Ainsworth advanced various objections including: (1) The historical down time pattern was ignored in calculating average daily production; (2) production from separate reservoirs qualified the reservoirs as new properties; (3) ignorance of the regulatory requirements must be given equitable consideration; (4) the petitioner relied on a statement of a DOE official in the reworking of one of the wells. In considering the Ainsworth's objections, the DOE found that he had improperly classified crude oil produced from seven properties as stripper well crude oil and as a result sold the production at prices in excess of those allowed by 10 CFR 212.73. In addition, the DOE found that Ainsworth had not established that the lengthy and unexplained periods of non-production could be counted as historical down time with a reasonable assurance that the result would still be a fair estimate or average daily production of the properties in question. The DOE also rejected the remainder of Ainsworth's arguments. The DOE therefore concluded that the PRO as amended should be issued as a Final Remedial Order.

Request for Temporary Exception

Bock Water Heaters, Inc., 6/18/85; *HEL–0126*

Bock Water Heaters, Inc. filed an Application for Exception from the provisions of 10 CFR Part 430, Subpart B, Appendix E in which the firm sought temporary exception relief from the water heater energy efficiency test procedures. In considering the request, the DOE found that partial temporary exception relief was necessary to insure that the public had access to comparable energy efficiency data, and to prevent Bock from suffering an immediate serious hardship.

Interlocutory Order

Texaco Inc./Economic Regulatory Administration, 6/20/85; HRZ–0251

The Office of Hearings and Appeals issued an interlocutory order to Texaco Inc. and the Economic Regulatory Administration (ERA) concerning the Evidentiary Appendix filed by Texaco on July 14 and 15, 1981, in support of its Statement of Factual Objections to a Proposed Remedial Order issued to Texaco by ERA on May 1, 1979. The OHA accepted as part of the record in the enforcement proceedings against Texaco materials submitted by Texaco on January 8 and 18, February 11, and March 13, 1985, after a review of portions of the Evidentiary Appendix. The OHA denied Texaco's request for an expedited review of other portions of the Evidentiary Appendix.

Supplemental Order

Coline Gasoline Corp., 6/17/85; HEF–0122

The Department of Energy issued a Decision and Order revising the Appendix issued in *Coline Gasoline Corp.*, Case No. HQF–0504. The new Appendix set forth corrected amounts to be distributed to the States in connection with the second-stage disbursement of $167,804, a portion of the total available second-stage consent order funds.

Implementation of Special Refund Procedures

Allied Materials Corporation and Excel Corporation, 6/20/85; HEF–2000

The DOE issued a Decision and Order setting forth procedures to be used for distributing $848,232.46 plus accrued interest, received under a consent order with Allied Materials Corporation and Excel Corporation. The consent order settled all disputes regarding the firms' application of the DOE petroleum price and allocation regulations. The funds will be available to customers who purchased covered petroleum products from Allied or Excel during the period from September 1, 1973 through January 28, 1981, excluding certain ultimate consumers who have already received refunds pursuant to the consent order. The Decision outlines specific information to be included in refund applications.

The Boswell Oil Company, 6/17/85; HEF–0040

The DOE issued a Decision and Order establishing procedures for the distribution of $148,250 obtained as the result of a consent order which the DOE entered into with The Boswell Oil Company. The funds will be available to Boswell's customers who purchased motor gasoline, Nos. 2 and 6 fuel oils, and other refined petroleum products during the consent order period, November 1, 1973 through April 30, 1974. The Decision sets forth the specific information to be included in refund applications.

Eugene Endicott, HEF–0069, Field Oil Co., HEF–0071, F.O. Fletcher, Inc., HEF–0074, Glaser Gas Inc., HEF–0080, Ideal Gas, Inc., HEF–0093, Inland U.S.A., Inc., 6/17/85; HEF–0096

On June 17, 1985, the Office of Hearings and Appeals of the Department of Energy issued a Final Decision and Order establishing procedures for the disbursement of $765,207.76 (plus accrued Interest) obtained as a result of Consent Orders entered into by the DOE and the following parties: Eugene Endicott, Field Oil Company, F.O. FLetcher, Inc., Glaser Gas, Inc., Ideal Gas, Inc., and Inland U.S.A., Inc. The funds will be available to customers who purchased certain refined petroleum products from one of the consent order firms during the relevant consent order period. End-users and reseller applicants requesting refunds of $5,000 or less will not be required to provide any additional evidence of injury in order to receive a refund. Successful applicants will receive refunds proportionate to the amount they were allegedly overcharged by one of the consent order firms.

Refund Applications

Little Americo Refining Company/A.M. Marshall Company, 6/19/85; RF112–4

A.M. Marshall Company filed an Application for Refund in which the firm sought a portion of the fund obtained by the DOE through a consent order entered into by the agency and Little America Refining Company (Larco). In considering the request the DOE found that Marshall purchased a relatively small amount of Larco motor gasoline. Using the volumetric allocation methodology, the DOE determined that the firm's allocable share was well below the presumption of injury level of $5,000. Therefore, the DOE decided that Marshall would receive a refund equal to its allocable share of $367. In addition, the firm received accrued interest which brought the total refund amount to $491.

Mapco, Inc./Farmland Industries, Inc., 6/19/85; RF108–5

This Decision and Order relates to a distribution of an escrow account fund remitted by Mapco, Inc. pursuant to a consent order that Mapco entered into with the DOE. Farmland Industries, Inc. sought a refund on the basis of its purchases of 60,850,734 gallons of refined products from Mapco during the consent order period. The DOE granted Farmland and refund of $108,531.32 plus accrued interest, which equals a share of the consent order fund allocated to Farmland on the basis of the volume of the products the firm purchased. This refund was conditioned upon Farmland's distribution of the refund received to member cooperatives who purchased the products from Farmland and used them in their agricultural activities. The DOE stated in this Decision that a refund in this fashion to Farmland would achieve the same results as refunds to end-users.

Mapco, Inc./Small's LP Gas Co., 6/17/85; RF108–4

This Decision and Order relates to a distribution of an escrow account fund remitted by Mapco, Inc. Pursuant to a consent order that Mapco entered into with the DOE. Small's LP Gas Co. sought a refund on the basis of its purchases of 1,033,446 gallons of refined products from Mapco during the consent order period. Since Small's claim is less than the $5,000 threshold level, the DOE granted Small a refund of $1,860.20 plus accrued interest, which equals a share of the consent order fund allocated to Small on the basis of the volume of the products the firm purchased.

Mitchell Energy Corporation/Swanee Petroleum Company, 6/20/85; RF50–1

The DOE issued a Decision and Order concerning an Application for Refund filed by Swanee Petroleum Company, a reseller of Mitchell natural gas liquid products. Although the firm's purchases of Mitchell natural gas liquid products during the consent order period exceeded the threshold level established in *Texas Oil & Gas Corp.*, 12 DOE ¶85,089 (1984) (TOGCO), Swanee elected to file its refund application in accordance with the presumption of injury and procedures for filing small claims outlined in the *TOGCO* decision. After examining the evidence and supporting data sumbitted by the firm, the DOE concluded that Swanee should receive a refund of $6,807 based on its purchases of natural gas liquid products from Mitchell.

Stondord Oil Company (Indiana)/ Middlebrook Oil Company, 6/17/85; RF21–12398

The DOE issued a Decision and Order concerning duplicate refunds applied for and received by a wholesaler of Amoco motor gasoline in the Amoco special refund proceeding. Middlebrook Oil Company received two refund but was entitled only to

VOL 50 ISS 145 JL 29 1985 UMI

one. The DOE decided that the owner of Middlebrook must return the second refund amount in addition to accurued interest, and also must submit a written explanation of why he submitted duplicate application and did not inform the DOE of his receipt of duplicate refunds. The DOE stated that failure to provided this additional information would result in the total rescission of Middlebrook's refund.

Stinnes Interoil, Inc./Texaco Refining & Marketing, Inc., 6/21/85; RF125–3

Texaco Refining & Marketing, Inc. filed an Application for Refund in which the firm sought a portion of the fund obtained by the DOE through a consent order entered into by the agency and Stinnes Interoil, Inc. In considering the request the DOE found that Texaco purchased a relatively small amount of stinnes motor gasoline. Using the volumetric allocation methodology, the DOE detemined that the firm's allocable share was well below the presumption of injury level of $5,000. Rather than requiring the firm to make a showing if injury, therefore, the DOE decided that Texaco would receive a refund equal to its allocable share of $1,452. In addition, the firm received accured interest which brought the total refund amount to $2,031.

Tenneco Oil Co./H.V. Johnson & Son, Inc., 6/19/85; RF7–129

On May 23, 1985, the DOE approved a refund of $3,179 from the Tenneco consent order fund for H.V. Johnson & Son, Inc. *Tenneco Oil Co./H. V. Johnson & Son, Inc.*, 13 DOE ¶ , No. RF7–116 (May 23, 1985). Subsequent to the issuance of the May 23 Decision, it was discovered that, due to a clerical error, H.V. Johnson & Son, Inc. did not receive the full refund to which it was entitled. The DOE therefore issued a Supplemental Order approving an additional refund of $55 to the firm.

U.S. Oil Company/Gramco, Ltd., 6/21/85; RF110–1

Gramco, Ltd. filed an Application for Refund in which the firm sought a portion of the fund obtained by the DOE through a consent order entered into by the agency and U.S. Oil Company. In considering the request the DOE found that Gramco purchased a relatively small amount of U.S. Oil gasoline. Using the volumetric allocation methodology, the DOE determined that the firm's allocable share was well below the presumption of injury level of $5,000. Rather than requiring the firm to make a showing of injury, therefor, the DOE decided that Gramco would receive a refund equal to its allocable share of $143. In addition, the firm received accrued interest which brought the total refund amount to $211.

Witco Chemical Corporation/Fortmeyer's, Inc., 6/21/85; RF115–1

Fortmeyer's, Inc. filed an Application for Refund in which the firm sought a portion of the fund obtained by the DOE through a consent order entered into by the agency and Witco Chemical Corporation. In considering the request the DOE found that Fortmeyer's purchased a relatively small amount of Witco product. Using the volumetric allocation methodology, the DOE determined that the firm's allocable share was well below the presumption of injury level of $5,000. Rather than requiring the firm to make a showing of injury, therefore, the DOE decided that Fortmeyer's would receive a refund equal to its allocable share of $433. In addition, the firm received accrued interest which brought the total refund amount to $661.

Dismissals

The following submissions were dismissed:

Name and Case No.

Dick and Hoppy's Gulf; RF40–2273
Farmland Industries, Inc.; RF105–1
Union Oil Co. of Calif.; HRO–0256

Copies of the full text of these decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room 1E–234, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

Cases filed the Week of June 14 through June 21, 1985

During the Week of June 14 through June 21, 1985, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20585.

Date: July 16, 1985.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

(Week of June 14 through June 21, 1985)

Date	Name and Location of Applicant	Case No.	Type of Submission
June 17, 1985	Elk Trading Company, Inc. and Neal Davis, Washington, DC.	HRD-0281, HRH-0281	Motion for discovery and request for evidentiary hearing.If granted: Discovery would be granted and an evidentiary hearing would be convened in connection with the Statement of Objections submitted by Elk Trading Company & Neal Davis in response to the Proposed Remedial Order (Case No. HRO-0266).
June 18, 1985	Amoco/Mississippi, Jackson, MI	RM21-7	Request for modification/rescission. If granted: The June 26, 1984 Decision and Order (Case No. RQ21-84) issued to Mississippi would be modified regarding the state's restitutionary plan submitted in the Amoco second-stage refund proceeding.
Do	Economic Regulatory Administration, Washington, DC	HRZ-0256	Motion to strike. If granted: The Office of Hearings and Appeals would strike from the record in Texaco Inc. (Case No. DRO-0199) certain documents submitted by Texaco Inc.
Do	Texaco, Inc., Washington, DC	HRD-0282	Motion for discovery. If granted: Discovery would be granted to Texaco Inc. in connection with the Statement of Objections submitted in response to the May 1, 1979 Proposed Remedial Order (Case No. DRO-0199).
June 19, 1985	Gene Dannen, Corvallis, OR	HFA-0296	Appeal of a fee waiver denial. If granted: The June 12, 1985 Denial issued by the Albuquerque Operations Office would be rescinded and Gene Dannen would receive a waiver of fees for a document concerning radiological poisons.
Do	Lucky Stores, Inc., Tampa, FL	HEZ-0258	Request for issuance of subpoenas. If granted: The Office of Hearings and Appeals would issue subpoenas to certain designated witnesses to compel their attendance at an evidentiary hearing.
Do	Navajo Refining Company, Houston, TX	HED-0263	Motion for discovery. If granted: Discovery would be granted in connection with the Statement of Objections submitted by Navajo Refining Company in response to a Proposed Decison & Order (Case No. HEE-0083).

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS—Continued

[Week of June 14 through June 21, 1985]

Date	Name and Location of Applicant	Case No.	Type of Submission
Do	Oasis Petroleum Corporation, Los Angeles, CA	HER-0105	Request for modification/rescission. If granted: The April 18, 1985 Decision and Order issued to Oasis Petroleum Corporation, Research Fuels, Inc. & Lucky Stores, Inc. (Case Nos. HEX-0118, HER-0101 & HEZ-0234) would be modified insofar as it pertains to the bifurcated evidentiary hearing.
Do	do	HEX-0123	Supplemental order. If granted: The Office of Hearings and Appeals will evaluate the supplemental witness list submitted by Oasis Petroleum Corp. pursuant to a Decison and Order issued by Office of Hearings and Appeals on April 18, 1985, and designate those witnesses whose testimony will be presented at the evidentiary hearing.
Do	do	HEZ-0257	Request for issuance of subpoenas. If granted: The Office of Hearings and Appeals would issue subpoenas to certain designated witnesses to compel their attendance at an evidentiary hearing.
Do	Stnrey Oil Company, Inc., Grand Junction, CO	HRR-0103	Request for modification/rescission. If Granted: The May 17, 1985 Decision and Order (Case Nos. HRD-0215 & HRH-0215) issued to Stanley Oil Co., Inc. would be modified regarding Stanley Oil Company's request for evidentiary hearing.
Do	Oasis Petroleum Corporation, Los Angeles, CA	HER-0104	Request for modification/rescission. If granted: The February 12, 1985 Decision and Order issued to Oasis Petroleum/Research Fuels (Case No. HEX-0110) would be modified as to require Lucky Stores, Inc. to furnish the Office of Hearings and Appeals with a copy of the deposition of Richard Heinzelmann.
Do	Ted's Truck Center Quartsize, AZ	HEE-0156	Exception to the reporting requirements. If granted: Ted's Treck Center would not be required to filed Form EIA-782B, "Reseller/Retailers' Monthly Petroleum Products Sales Report."
June 20, 1985	Farmers Union Co-op Oil Association, Lincoln, NE	HEE-0157	Exception to the reporting requirements. If granted: Farmer's Union Co-op Oil Association would not be required to file Form EIA-782B "Reseller/Retailers' Monthly Petroleum Products Sales Report."

REFUND APPLICATIONS RECEIVED

[Week of June 14 To June 21, 1985]

Date received	Name of refund proceeding/name of refund applicant	Case number

BILLING CODE 6450–01–M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of Implementation of Special Refund Procedures and Solicitation of Comments.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding $9,719 in consent order funds to members of the public. This money is being held in escrow following the settlement of enforcement proceedings involving Blaylock Oil Company, Inc., a reseller-retailer of motor gasoline located in Homestead, Florida.

DATE AND ADDRESS: Comments must be filed within 30 days of publication of this notice in the **Federal Register** and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585. All comments should conspicuously display a reference to case number HEF–0037.

FOR FURTHER INFORMATION CONTACT: Richard W. Dugan, Associate Director, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–2860.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set forth below. The Proposed Decision relates to a consent order entered into by Blaylock Oil Company, Inc. (Blaylock), which settled alleged pricing violations in the firm's sales of motor gasoline to wholesale and retail customers during the October 1, 1979 through December 31, 1979 audit period.

The Proposed Decision sets forth the procedures and standards that the DOE has tentatively forumulated to distribute the contents of an escrow account funded by Blaylock pursuant to the consent order. The DOE has tentatively established procedures under which purchasers of Blaylock motor gasoline during the audit period may file claims for refunds from the consent order fund. Applications for Refund should not be filed at this time. Appropriate pubic notice will be given when the submission of claims is authorized.

Any member of the public may submit written comments regarding the proposed refund procedures. Comments submitted in response to the Proposed Decisions previously issued in this proceeding on Febuary 7, 1984 and July 12, 1984 need not be refiled.

Commenting parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice in the **Federal Register**, and should be sent to the address set forth at the beginning of this notice. All comments received in this proceeding will be available for public inspection between the hours of 1:00 and 5:00 p.m., Monday through Friday, except federal holidays, in the Public Docket Room of the Office of Hearings and Appeals, located in Room 1E–234, 1000 Independence Avenue, SW., Washington, D.C. 20585.

Dated: July 17, 1985.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order of the Department of Energy

Special Refund Procedures

July 17, 1985.

Name and Firm: Blaylock Oil Company, Inc.

Date of Filing: October 13, 1983.

Case Number: HEF–0037.

The procedural regulations of the Deparment of Energy (DOE) provide that the Economic Regulatory Administration (ERA) may request the Office of Hearings and Appeals (OHA) to

implement special refund procedures for the purpose of providing restitution to persons who were injured by alleged or

II. Proposed Refund Procedures

We have considered the ERA's

205.282(e) of those regulations states that:

be considerable expenses involved in gathering the types of data needed to

petroleum goods and services would be beyond the scope of a special refund

be distributed in accordance with the foregoing Decision.

VOL 50 ISS 145 JL 29 1985 UMI

implement special refund procedures for the purpose of providing restitution to persons who were injured by alleged or adjudicated violations of DOE regulations. *See* 10 CFR Part 205, Subpart V. The Subpart V process may be used in situations where the DOE is unable to identify readily those persons who were injured by such alleged or adjudicated violations or to ascertain readily the amounts of such persons' injuries. For a more detailed discussion of Subpart V and the authority of the OHA to fashion procedures to distribute refunds obtained as part of settlement agreements, see *Office of Enforcement*, 8 DOE ¶82,597 (1981) (*Vickers*).

I. Background

On October 13, 1983, the ERA filed a petition requesting that the OHA establish a refund proceeding in order to distribute funds received pursuant to a Consent Order entered into by the DOE and Blaylock Oil Company, Inc. (Blaylock). Blaylock is a "reseller-retailer" of refined petroleum products as that term was defined at 10 CFR 212.31, and is located in Homestead, Florida. The firm was subject to the Mandatory Petroleum Price Regulations set forth in 10 CFR Part 212, Supart F until January 28, 1981, when motor gasoline and other refined petroleum products were exempted from price and allocation controls. Exec. Order No. 12287, 46 FR 9909 (January 30, 1981). A DOE audit of Blaylock's records revealed possible regulatory violations with respect to the firm's pricing of motor gasoline during the period October 1, 1979 through December 31, 1979 (the audit period). In order to settle all claims and disputes between Blaylock and the DOE regarding the firm's sales of motor gasoline during that three month period, Blaylock and the DOE entered into a Consent Order on October 15, 1981, in which Blaylock agreed to remit to the DOE $9,719 to be deposited into an interest-bearing escrow account for ultimate distribution "in a just and equitable manner in accordance with applicable laws and regulations." Consent Order ¶ 5. By its terms, the Blaylock Consent Order does not constitute an admission by Blaylock or a finding by the DOE that Blaylock violated the price regulations during the audit period. This Proposed Decision concerns the distribution of the $9,719 consent order amount, which is currently held in a DOE escrow account, plus accrued interest.[1]

[1] On February 7, 1984, the OHA issued a Proposed Decision and Order (PDO) tentatively establishing procedures for the distribution of the escrowed Blaylock consent order funds. However, on June 5, 1984, a United States District Court granted in part an Application for Preliminary Injunction filed by Blaylock and directed the DOE not to proceed with this special refund proceeding until such time as the language in the PDO was modified in accordance with the court's decision. *Blaylock Oil Co. v. DOE*, Fed. Energy Guidelines, Court Decisions 1981–1984, ¶26,500 (N.D. GA. 1984). A second PDO was issued on July 12, 1984, but was rescinded on July 26, 1984. On April 30, 1985, Blaylock and the DOE entered into a settlement of the pending court case, resulting in its dismissal. Under the terms of that settlement, the DOE may proceed with the implementation of Subpart V procedures to distribute the Blaylock consent order funds.

II. Proposed Refund Procedures

We have considered the ERA's Petition for the Implementation of Special Refund Procedures and have determined that it is appropriate to establish such procedures with respect to the funds remitted by Blaylock. As we have stated in previous Decisions, refunding moneys obtained through DOE enforcement proceedings to parties who were injured by alleged or adjudicated violations is the focus of Subpart V proceedings. *See generally Vickers.*

Based upon our experience with Subpart V cases, we propose that the distribution of refunds in the present case should take place in two stages. In the first stage, we will attempt to refund moneys to customers who were injured by Blaylock's alleged overcharges during the consent order period. After meritorious claims are paid in the first stage, a second-stage refund procedure may become necessary.

Potential claimants in this proceeding will fall into the following categories: (i) Resellers (including retailers) of Blaylock motor gasoline, and (ii) firms, individuals, or organizations that were consumers of Blaylock motor gasoline. The motor gasoline will have been purchased either directly from Blaylock or in a chain of distribution leading back to Blaylock. As explained below, we propose that the consent order funds be distributed to eligible claimants who demonstrate that they have been injured by Blaylock's alleged overcharges.

As in many prior special refund cases, we will adopt certain presumptions in order that refunds may be distributed efficiently and equitably. First, we propose to adopt a presumption that the alleged overcharges were dispersed equally in all of Blaylock's sales during the consent order period. OHA has referred to this presumption in the past as a volumetric refund amount. Second, we intend to adopt a presumption of injury with respect to small claims.

Presumptions in refund cases as specifically authorized by applicable DOE procedural regulations. Section 205.282(e) of those regulations states that:

> In establishing standards and procedures for implementing refund distributions, the Office of Hearings and Appeals shall take into account the desirability of distributing the refunds in an efficient, effective and equitable manner and resolving to the maximum extent practicable all outstanding claims. In order to do so, the standards for evaluation of individual claims may be based upon appropriate presumptions.

10 CFR 205.282(e). The presumptions we are proposing to adopt in this case are used to permit claimants to participate in the Blaylock refund proceeding without incurring disproportionate expenses, and to enable the OHA to consider the refund applications in the most efficient way possible in view of the limited resources available.

The volumeteric refund presumption which we propose to establish in this proceeding assumes that alleged overcharges were spread equally over all gallons of motor gasoline sold by Blaylock during the consent order period. To determine the per gallon volumetric factor in the instant proceeding, the $9,719 consent order amount will be divided by the total volume of motor gasoline which Blaylock sold during the consent order period. Using the information available to us at the present time, the volumetric amount in this proceeding will be $0.00459 per gallon ($9,719 divided by 2,116,189 gallons of motor gasoline). Refunds will be calculated by multiplying the volumetric factor by the total amount of motor gasoline that an applicant purchased from Blaylock. The interest which has accrued on the money in the escrow account will be distributed to each successful claimant in proportion to its refund amount.

The second presumption we propose to establish involves small claims made by resellers. In general, resellers who file refund claims in Subpart V proceedings are required to establish that they absorbed the alleged overcharges. To make this showing, they must demonstrate that, at the time they purchased refined petroleum products from a consent order firm, market conditions would not permit them to increase their prices to pass through the additional costs associated with the alleged overcharges. However, in this case, as in prior special refund proceedings, we will adopt a presumption that reseller claimants for small refunds bore the injury associated with Blaylock's alleged overcharges. *See Midwest Industrial Fuels, Inc.*, 12 DOE ¶85,131 (1984). As we have stated in many prior refund Decisions, there may be considerable expenses involved in gathering the types of data needed to support a detailed claim of injury. In order to prove such a claim, an applicant must compile and submit detailed factual information regarding the impact of alleged overcharges. This procedure is generally time-consuming and expensive, and in the case of small claims, the cost to the firm of gathering this factual information and the cost to the OHA of analyzing it may be many times the expected refund amount. Failure to allow simplified application procedures for small claims could therefore operate to deprive injured parties of the opportunity to obtain refunds. The use of presumptions is also desirable from an administrative standpoint, because it allows the OHA to process a large number of routine refund claims quickly, and therefore to use its limited resources more efficiently.

Under the small claims presumption we are adopting, a reseller or retailer claimant will not be required to submit any additional evidence of injury beyond purchase volumes unless its volumetric refund exceeds $5,000.[2] *See Aztex Energy Co.*, 12 DOE ¶ 85, 116 (1984), and cases cited therein. In light of the fact that the escrow amount in this proceeding is relatively small, we find it extremely likely that all reseller claimants will fall under the threshold level.

In addition to the presumptions we intend to adopt in this proceeding, we are making a finding that end-users or ultimate consumers whose business is unrelated to the petroleum industry were injured by the alleged overcharges settled by the Blaylock Consent Order. Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the consent order period, and they were not required to keep records which justified selling price increases by reference to cost increases. For these reasons, an analysis of the impact of the increased cost of motor gasoline on the final prices of non-petroleum goods and services would be beyond the scope of a special refund proceeding. *See Office of Enforcement, Economic Regulatory Administration: In the Matter of PVM Oil Associates, Inc.*, 10 DOE ¶ 85,072 (1983); *See also Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 at 88,209 (1984), and cases cited therein. We have therefore concluded that end-users of motor gasoline covered by the Blaylock Consent Order need only document their purchase volumes from Blaylock in order to make a sufficient showing that they were injured by the alleged overcharges.

We further propose to establish a minimum amount of $75 for refund claims. We have found through our experience in prior refund cases that the cost of processing claims in which refunds are sought for amounts less than $15 outweighs the benefits of restitution in those cases. *See, e.g., Uban Oil Co.*, 9 DOE ¶ 82,541 at 85,225; *see also* 10 CFR 205.286(b).

Refund applications in this proceeding should not be filed until a final Decision and Order is issued.[3] Detailed procedures for filing applications will be provided in the final Decision and Order. Before disposing of any of the funds received, we intend to publicize the distribution process and to provide an opportunity for any affected party to file a claim. In addition to publishing copies of the proposed and final Decisions in the **Federal Register**, we will provide copies to potential claimants and to several petroleum marketing organizations.

In the event that money remains after all first-stage claims have been disposed of, those funds could be distributed in various ways. We will not be in a position to decide what should be done with any remaining funds until the first-stage refund procedure is completed.

It is therefore ordered that:

The refund amount remitted to the Department of Energy by Blaylock Oil Company, Inc. pursuant to the Consent Order executed on October 15, 1981 will be distributed in accordance with the foregoing Decision.

[2] Resellers that were spot purchasers from Blaylock will be ineligible to receive any refunds, even refunds below the threshold level, unless they make a showing that rebuts the presumption that they were not injured. As we have previously noted, spot purchasers would not have made spot market purchases of a firm's product at increased prices unless they were able to pass through to their customers the full amount of the firm's selling price. *See Vickers*, 8 DOE at 85,396–97. In order to overcome the rebuttable presumption that it was not injured, a spot purchaser must show that it absorbed the alleged overcharges and should submit additional evidence to establish that it would be inappropriate to presume that it had discretion as to where and when to make the purchase(s) upon which the refund claim is based.

[3] Comments submitted in response to either of the first two Proposed Decisions issued in this proceeding need not be resubmitted. We will consider the comments we have received when we formulate a final Decision and Order. The comments filed by Blaylock in response to the February 7, 1984 Proposed Decision primarily set forth Blaylock's opposition to our exercise of jurisdiction in this case. In the April 30, 1985 settlement with the DOE, Blaylock explicitly waived that opposition (*see* footnote 1). Moreover, in another proceeding, we have recently considered and rejected contentions similar to those advanced by Blaylock, and we see no benefit to restating that discussion in the final Decision and Order to be issued in this proceeding. *See E.M. Bailey Distribution Co., Inc.*, 13 DOE ¶ 85,049 (1985).

BILLING CODE 6450-01-M

Southeastern Power Administration

Power Marketing Policy; Kerr-Philpott System of Projects

AGENCY: Southeastern Power Administration (SEPA), DOE.

ACTION: Notice of issuance of Final Power Marketing Policy, Kerr-Philpott System of Projects.

SUMMARY: The Administrator has adopted the attached final power marketing policy for SEPA's Kerr-Philpott System of Projects. It will be effective upon publication in the Federal Register and will be applicable to the sale of system power in respective utility areas. The policy was developed in accordance with Procedure for Public Participation in the Formulation of Marketing Policy published in the Federal Register on July 6, 1978, 43 FR 29188.

Following a decision by the Administrator that a new written marketing policy for the Kerr-Philpott System of Projects was needed, a Notice of Intent to Formulate Power Marketing Policy was published in the Federal Register on October 31, 1979, 44 FR 62588. The notice, among other things, solicited proposals and recommendations for consideration by SEPA.

On July 3, 1980, a Proposed Power Marketing Policy for the Kerr-Philpott System of Projects was published in the Federal Register, 45 FR 45349, and the availability of a draft Environmental Assessment was announced and comments on both documents were solicited. Forty-nine (49) comments were received relative to the Notice of Intent and proposed policy, either during a public comment forum held in South Hill, Virginia, on November 18, 1980, in consultations with representatives of interested entities or groups of entities, or during the written comment period which ended December 19, 1980. No comments were received on the Environmental Assessment. Thereafter, the Administrator appointed a Staff Committee to prepare a Staff Evaluation of all oral and written comments and responses received by SEPA and to make appropriate recommendations.

The Committee determined that the proposed policy embodying the concept of sales of capacity without energy to new preference customers could not be

implemented and that other major problems existed regarding implementation, marketing area, and proposed allocations of power. The Committee recommended that a revised proposed policy seeking to address these problems be issued and further public comment be sought to assist in formulating a viable final policy. The Committee also recommended issuance and implementation of an interim policy pursuant to section 11 of SEPA's procedure for public participation (43 FR 29186, July 6, 1978) that would eliminate sales of capacity without energy to nonpreference customers and, to the extent feasible and practical, allocate to existing preference customers all capacity and energy pursuant to new contracts that would remain in effect only so long as needed to secure replacement contracts under a long-term policy. See 47 FR 27600, June 25, 1982. A public comment forum was held on November 18, 1982, regarding the revised proposed policy and the comment and consultation period extended through April 18, 1983. Six interested parties presented oral comments, 21 written comments were received, and a number of consultations were held during the comment period. SEPA, unfortunately, was unable to commit sufficient resources and time to the formulation of the long-term policy due to the issuance of its Final Cumberland Power Marketing Policy (48 FR 11148, March 16, 1983), and the need to implement, as soon as possible, the Cumberland Policy as a result of litigation brought by the Greenwood (Mississippi) Utility Commission. Implementation of the Final Cumberland Policy by the execution of new contracts was completed in June 1984. During this same period of time, SEPA had also instituted negotiations to implement its Final Georgia-Alabama Power Marketing Policy (Western portion) and was engaged in complex negotiations with the four operating companies of the Southern Company (Georgia, Alabama, Mississippi, and Gulf Power Companies) when suit was instituted in July 1984, in the Eastern District of North Carolina by various municipalities (*ElectriCities of North Carolina, Inc., et al. v. SEPA, et al.* Civil Action No. 84–625–CIV–5) seeking, among other things, an order requiring SEPA to issue within 30 days a final marketing policy for the Kerr-Philpott System. Negotiations and contracts for the Western portion were completed in January 1985, and shortly thereafter SEPA initiated preliminary discussions with Duke Power Company, South Carolina Electric & Gas Company, and South Carolina Public Service Authority to implement the Georgia-Alabama Final Marketing Policy in its Eastern portion and to insure that appropriate contractual arrangements were in place to transmit and dispose of new project power from the Richard B. Russell Project which was then anticipated to be on line during the early summer of 1985. On June 18, 1985, the district court ordered SEPA to issue its policy within 30 days and the final policy issued herein is in compliance with that order. The Staff Evaluation Committee, within the time allowed, reviewed and evaluated the written and oral comments, memoranda of consultations, and other pertinent data accumulated at each step of these proceedings as well as the revised proposed long-term policy and made its recommendations to the Administrator on July 15, 1985.

Following receipt of the Staff Evaluation, the Administrator decided to accept the staff recommendations with regard to the revised proposed long-term power marketing policy published in the **Federal Register** on June 25, 1982, and to adopt the recommended policy as the Final Power Marketing Policy for the Kerr-Philpott System of Projects.

SUPPLEMENTARY INFORMATION: The Final Marketing Policy constitutes the guidelines which SEPA will follow in the future disposition of power from the John H. Kerr and Philpott System of Projects. The policy establishes the marketing area for system power and deals with the utilization of area utility systems for essential purposes. The Policy also deals with wholesale rates, resale rates, and conservation measures.

Based on the Environmental Assessment of the proposed marketing policy, SEPA and DOE concluded that the revised proposed long-term policy would not have a significant effect upon the quality of the human environment. The final marketing policy is not modified sufficiently to alter this finding.

A recitation of the primary objections to the proposed marketing policy, brief explanations for rejecting those objections, and specific changes in the proposed marketing policy approved by the Administrator, precede the text of the final policy as adopted.

Issued at Elberton, Georgia, July 18, 1985.

Harry C. Geisinger,

Administrator.

Final Power Marketing Policy, Kerr-Philpott System of Projects

Introduction

The final marketing policy for SEPA's Kerr-Philpott System of Projects is the culmination of efforts which began on October 31, 1979. Twice SEPA has followed the step by step requirements of its Procedure for Public Participation in Formulation of Marketing Policy published in the Federal Register on July 6, 1978, 43 FR 29186, to seek the best advice and assistance available to fashion a viable policy for an energy limited system. Extensive public comment has twice been received and has been given appropriate consideration. This public input, offered in an orderly and timely fashion, has significantly contributed to the content of the final policy.

Purpose and Legal Authority

The purpose of the Policy is to establish with public input written guidlines which SEPA will follow in the future to reasonably and equitably carry out the statutory requirements contained in Section 5 of the Flood Control Act of 1944, 16 U.S.C. 825s. SEPA's authority to formulate the policy and perform these functions is derived from Section 5 of the Flood Control Act of 1944, Section 302(a) of the Department of Energy Organization Act, 42 U.S.C. 7152, and delegations pursuant thereto.

Reasons For Marketing Policy

Since its establishment in 1950, SEPA has utilized an ad hoc approach to power marketing. Resulting policy has been reflected in negotiated contractual documents. However, sometime before passage of the DOE Organization Act, SEPA recognized the need for a more formal power marketing policy. Factors contributing to this need were major changes within the electric power industry, the steep rise in energy prices, and the growing and increasing widespread interest in SEPA's limited resources. Additionally, contracts for portions of SEPA power were expiring and both existing and potential customers needed to know what SEPA planned to do with its power so that orderly power supply plans could be made. Furthermore, advice had been given that SEPA would reconsider certain entities' interests in SEPA power upon the expiration of existing contracts and the availability of additional sources of power.

Primary Objections and Responses.

A number of objections (or suggestions for change) wee made in response to the Notice of Intent to formulate a power marketing policy, the proposed power marketing policy and the revised long-term power marketing policy. SEPA responses to the objections or sugestions follow:

1. *Objection.* Rather than maintaining four separate systems, SEPA should integrate its projects into one system with a marketing area covering the 10-state area in which SEPA is authorized to market power. It is contended that: (1) Combining the systems would minimize inequities caused by the fact that the geographical distribution of preference customer loads differs from the geographical distribution of SEPA's generating capacity, (2) combining SEPA's four systems would increase opportunities for firming its hydro capacity be coordinating the operation of SEPA's hydro capacity with the thermal capability of preference customers, (3) combining the systems would enable each system to provide redundancy or reserves for the others, and (4) combining the systems would provide a mutual support or synergism with respect to adverse water periods and surplus water periods.

Response. This same concept was suggested in connection with both the Georgia-Alabama System and the Cumberland System and was dealt with in both the staff evaluation and Final Power Marketing Policy for each of these respective systems. Discussion on this idea or concept contained in the Final Power Marketing Policy for the Georgia-Alabama System of Projects and the Final Power Marketing Policy for the Cumberland System of Projects remains pertinent and is by reference incorporated herein and made a part hereof. SEPA is in the business of disposing of a relatively small amount of hydro power pursuant to the principles set forth in Section 5 of the Flood Control Act of 1944. SEPA has no transmission facilities, no control center, and a Congressionally authorized staff of 40 people. The task of hydraulically and electrically combining the widely separated systems in order to theoretically increase the dependable capacity, reduce the need for reserves, or the other "conceptual" benefits of such a synergism is still considered to be impractical and uneconomical as well as an unmanageable concept. The dependable capacity of the respective systems is already very substantially in excess of the nameplate rating of the machines and already very near the machine limits which the Corps of Engineers will allow for sustained generation. The critical year or adverse period utilized in establishing the marketabie dependable capacity and firm energy for the two major energy producing systems, the Georgia-Alabama System and the Cumberland System, is the same period for both systems. Thus, energy from one system would not be available to supplement the other system during the adverse period. The conceptual benefits through the integration of these two so called "energy-rich" systems would be negligible. SEPA believes the overall economic benefits to the preference customers, under a one-system concept, would be diminished by increased transmission costs in delivering power across multiple transmission systems. The varying marketing issues in the respective system areas negate a single operating system as well as a single marketing system. Furthermore, it is improbable that all of the area utilities in each of the respective systems would willingly cooperate in the accomplishment of such an integration, and SEPA is not certain that statutory or legal authority to compel such cooperation exists at this time. As stated in previous staff evaluations and final power marketing policies of SEPA with respect to the Georgia-Alabama System and the Cumberland System, SEPA has taken advantage of changes in the electric power industry through the years and its program has evolved and expanded; however, the one-system concept has been considered and remains beyond practicability.

2. *Objection.* SEPA should adopt a marketing policy that makes SEPA power available on a proportional basis to all preference entities in the SEPA area.

Response. Comments to this effect have been submitted previously on the Final Power Marketing Policy for the Georgia-Alabama System of Projects and basically reflect the consistent views of entities urging the elimination of the existing four-system arrangement from which SEPA presently operates and markets the available power. The further purpose of this comment is to have SEPA market power available from the proposed single system pro rata to preference entities located throughout the 10-state SEPA marketing area without regard to the past or present SEPA policies or any other considerations. This objection fails to recognize that SEPA's projects were planned, authorized, and constructed to serve the power requirements of specific power supply areas and that as a result of the construction of the SEPA projects, the necessity to construct other generating facilities to meet area power requirements were adjusted downward to reflect the SEPA projects. The value of SEPA power is only fully realized when it is incorporated into the planning for the power supply area. Discussion on this comment or idea contained in the Final Power Marketing Policy for the Georgia-Alabama System of Projects remains pertinent and is by reference incorporated herein and made a part hereof. In the Final Power Marketing Policy for the Kerr-Philpott System of Projects, SEPA has sought to include all eligible preference entities within the selected marketing area with an equitable allocation of capacity and energy to make the capacity viable. In SEPA's judgment, the final Policy deals equitably with existing and potential customers with respect to existing available power.

3. *Objection.* The proposed marketing area and allocation processes do not comply with the "widespread use" provision of the Flood Control Act of 1944.

Response. Several comments received contend the proposed policy is violative of the Act in not encouraging ". . . the most widespread use . . ." of the preference power SEPA proposes to market in the Kerr-Philpott System. But Congress has described the manner by which SEPA must transmit and dispose of this power as consisting of not one but several interrelated broad terms such as ". . . to encourage the most widespread use thereof at the lowest possible rates to consumers consistent with sound business principles . . .". Therefore, SEPA cannot address a single phrase to the exclusion of all others. Rather, the manner or method proposed should, if possible, consider and reconcile these several conflicting and competing terms. Since Congress did not delineate specific guidelines, it clearly intended to allow the Secretary, or the Power Marketing Administrator as his designated agent, wide discretion to resolve the general but conflicting terms of the Act. This discretion has been affirmed in a number of legal opinions. The comments presented with respect to the proposed Policy demonstrate such conflict when those who seek inclusion in SEPA's proposed marketing area or who advocate expansion of the area to include more of their constituents emphasize only "widespread use", while existing preference customers and their supporters contend further expansion violates the ". . . sound business principles . . ." and ". . . lowest possible rate(s) . . ." features of the statute. SEPA's goal is therefore to develop and implement a marketing policy for its limited resource that, to the degree possible, moderates, harmonizes, and reconciles these diverse terms. SEPA believes the Final Power Marketing Policy for the Kerr-Philpott System of Projects reasonably obtains that goal.

4. *Objection.* SEPA should abandon the radius limitations utilized to

Response. One comment stated that the preference customers who are

to all eligible customers and will withdraw only the amount of energy

proposed Policy issued June 25, 1982, set the goal of selling all available SEPA

depending upon the allocation of capacity and energy to the new

selected in the final Policy effectively accomplish this goal.

VOL 50 ISS 145 JL 29 1985 UMI

4. *Objection.* SEPA should abandon the radius limitations utilized to delineate the selected marketing area so that all preference entities within the Carolina Power & Light Company (CP&L) and Virginia Electric and Power Company (VEPCO) service areas will receive SEPA power.

Response. This comment is consistent with the position taken by certain potential preference entities who allege that the "most widespread use" language of Section 5 of the 1944 Flood Control Act requires that SEPA sell power to all interested preference entities or throughout an entire utility area. Again, this assertion has been made in comments with respect to the Final Power Marketing Policy for the Georgia-Alabama System of Projects and dealt with at length. Discussion on this idea or concept contained in the Final Power Marketing Policy for the Georgia-Alabama System of Projects remains pertinent and is by reference incorporated herein and made a part hereof. Congress did not choose to delineate geographical areas or utility service areas as the marketing area for the power from Federal projects. Rather, Congress chose to have a designated Power Marketing Administrator select the geographical marketing area in accordance with the language set forth in Section 5 of the Flood Control Act of 1944, including among other things the "most widespread use". Under this language some factors to be considered in the selection of an appropriate geographical marketing area include, but are not limited to, reasonable distance from projects; utility service areas; number, location, and demand of preference customers; type and amount of power available for marketing; and various other matters involved in scheduling, transmission, utilization, and disposition of the power. While these factors are considered important, there is also the matter of harmonizing the "most widespread use" language with other statutory language. Expansion of the area to include the entire VEPCO and CP&L areas would result in too great a dilution of SEPA's Kerr-Philpott resources. The selected marketing area appears, when all factors are considered, to be the most reasonable area within which to market the power available from the Kerr-Philpott System of Projects.

5. *Objection.* SEPA existing preference customers should be entitled to continue to receive only as much power as they have been receiving in the past until such time as new customers are on a par with the existing customers.

Response. One comment stated that the preference customers who are presently receiving benefits from Federal power should be held at the formerly existing level until the preference customers who have not received any power in the past have received an equal allocation according to the present loads. The comment developed a methodology which would allocate the capacity using load percentages after assuring that existing customers retain their existing contract allocations. In addition, if their load ratio share justified it, the existing customers would receive more power.

The only power that is available is the capacity formerly sold to VEPCO and CP&L. Because of the problems in finding a viable arrangement to allocate capacity without energy as discussed in the response to Objection 8, SEPA has proposed the withdrawal of a limited amount of energy from the presently served preference customers. This amount of energy provides a means whereby the capacity can be useable by the new preference customers. If more capacity is allocated to the new customers, then more energy would need to be withdrawn from the presently served preference customers. As discussed in the response to Objection 9, presently served preference customers feel very strongly that they should be allowed to retain their present capacity and energy and share in any additional capacity available.

In addition, SEPA has considered the philosophical issue as to whether the new preference customers should be in a higher priority position because they have not received Federal power in the past, or whether all preference customers (both existing and new) should be in an equal position for any new resources, or whether the existing customers should be in a higher priority position because of their long-term involvement in the Federal hydropower program. SEPA believes that good arguments can be made for all three positions. SEPA in the past has chosen to treat all eligible preference customers equally when allocating new resources. In light of the fact that existing customer's allocations constitute a decreasing percentage of their load due to the overall load growth, and the fact that they have relied on their SEPA allocations in their power planning, it is appropriate to permit them to share in the newly-available capacity, especially since some energy is being withdrawn from them. SEPA can see no reason to adopt the suggestion based on the present circumstances. Therefore, SEPA will allocate the available new capacity to all eligible customers and will withdraw only the amount of energy from existing customers necessary to make the capacity viable.

6. *Objection.* SEPA should not dilute the power by such widespread use as to be inconsistent with sound business principles. Some of the comments stated that the power should not be diluted to the point where the power is no longer a significant portion of the system's power supply.

Response. SEPA has considered whether the dilution being considered makes Kerr-Philpott power so insignificant in relation to the total power used by the customers that it no longer provides a meaningful contribution to the customers' systems. Unfortunately, because of a very limited and finite resource, SEPA is able to serve only a small portion of the capacity of the existing customers and an even smaller portion of the load of the new customers. These portions will almost certainly decrease as loads grow unless construction of more Federal hydro resources are initiated. SEPA feels that any additional increase beyond the proposed marketing area would dilute the available power to the point where the value of the power would approach insignificance.

7. *Objection.* SEPA should consider 20 years as an appropriate contract term in that the long lead time to plan new power plants and transmission capabilities would make a 20-year term more consistent with today's generation market.

Response. Although power supply arrangements are by nature long term, SEPA's experience has been that changing conditions dictate that all parties to the contract be given an opportunity to make necessary changes after a reasonable period of time. Contracts can always be extended if acceptable by the parties. For the Final Power Marketing Policy for the Kerr-Philpott System of Projects, SEPA considers the 10-year term to be appropriate.

8. *Objection.* SEPA should reconsider its determination not to market capacity without energy.

Response. In the past, for a number and variety of reasons, it was not possible to develop arrangements whereby preference customers could physically and economically utilize all of SEPA's peaking capacity, resulting in the sale of a portion of the capacity, essentially without energy, to some of the private utilities. Because of changed or changing circumstances in the power industry, SEPA's proposed Policy issued July 3, 1980, and SEPA's revised proposed Policy issued June 25, 1982, set the goal of selling all available SEPA power to preference entities. This goal was accomplished and is currently being carried out with the contracts implementing the interim policy. Under the proposed Policy issued July 3, 1980, only capacity without energy would have been available to new preference customers. Because of SEPA's concern that whatever Policy was to be the final Policy should be one that could be reasonably assure of being implemented through subsequent contractual arrangements, SEPA sought on several occasions to determine the implementation feasibility of this Policy. Based upon conferences with representatives of both VEPCO and CP&L, as well as information received from Appalachian Power Company (APCO), SEPA concluded that the capacity without energy concept could not be contractually implemented. Furthermore, the Final Policy is based upon the premise that the preference customers will receive credit for the power as generated at the projects to fit the peak load conditions of the preference customers systems. SEPA preference customers now will experience the variation in energy availability as dictated by water conditions. However, the dependable capacity of the system, less reserves and losses, will be credited to the preference customers each month regardless of the energy available. The concept of capacity without energy is not, in SEPA's opinion, a viable concept where only a peaking resource is involved and therefore is not included in the Final Power Marketing Policy for the Kerr-Philpott System of Projects.

9. *Objection.* Allocations of capacity and energy to existing preference customers should not be reduced, and existing preference customers should have an equitable share with new customers of the capacity previously sold to nonpreference customers.

Response. The existing preference customers in the Kerr-Philpott marketing area were the only preference entities who elected to purchase power from the Kerr-Philpott System of Projects at the time power first became available. These preference customers are understandably concerned about the proposed withdrawal of certain quantities of energy to be utilized in supporting capacity allocations to new preference customers in the new customers' share of the capacity previously sold to the companies. They contend that the proposed allocations will adversely impact them, both product and benefitwise, the extent depending upon the allocation of capacity and energy to the new preference customers. In the Final Power Marketing Policy for the Kerr-Philpott System of Projects, with respect to the capacity sold to the existing preference customers prior to contracts executed to implement the interim policy, each existing preference customer within the VEPCO service area will be allowed to retain its individual share of the 65 megawatts of delivered capacity, and each existing preference customer within the CP&L service area will be allowed to retain its individual share of the 30 megawatts of delivered capacity.

Both new and existing preference customers within the VEPCO and APCO service areas and those within the CP&L service area will be eligible to share equitably in the available capacity remaining after reductions for reserves, losses and capacity retained by the existing customers; provided that preference customers in the APCO area will be limited to the available capacity output of the Philpott Project, less reserves and losses. Allocations of capacity to a particular preference customer within a particular utility service area will be based on the relationship of such customer's maximum 1980 demand to the sum of the 1980 maximum demands of all preference customers in a given utility service area sharing such power.

Capacity allocated to serve new preference customers will be accompanied by energy equal to the firm energy available from the projects (approximately 650 kilowatt-hours per kilowatt per year). The remainder of the energy available from the projects shall be allocated to existing preference customers in the respective service areas based on their capacity allocations. The benefits from the new capacity allocation which the existing customers will receive under the Final Power Marketing Policy will to a degree offset the diminution of benefits related to the energy withdrawals.

Therefore, a carefully selected withdrawal of energy, offset by increased capacity allocations, is appropriate under the circumstances for the Final Power Marketing Policy. SEPA believes the inclusion of new preference customers in the marketing area furthers the "widespread use" provision to the degree that the limited resource allows within the intent of the Flood Control Act. A carefully balanced overall Policy carrying out in a responsible manner SEPA's marketing responsibilities is the goal being sought. The allocations selected in the final Policy effectively accomplish this goal.

10. *Objection.* Preference customers want to be assured that SEPA will establish procedures to enable full preference customer input in SEPA's negotiations with area generation and transmission systems.

Response. SEPA's proposed Policy provides for such input. The concern is that vital decisions by SEPA might be made before preference customers are actually involved, foreclosing proper consideration of preference customer positions. To make SEPA's intent clear that the timely, meaningful input of preference customers is desired, the Final Marketing Policy contains language to the effect that individual preferred entities directly affected by the negotiations shall stand in an advisory role to SEPA and shall be kept currently advised as to the status and progress and negotiations. The opportunity for the preference customers to consult and offer advice to SEPA throughout the negotiations is the intent of the Policy.

11. *Objection.* Virginia Polytechnic Institute (VPI) is an agency of the Commonwealth of Virginia and thus is a public body and a preference agency.

Response. In the written comments of January 17, 1983, on behalf of VPI and the APCO area municipalities it is stated: "VPI . . . is the only university in the United States that operates its own utility system and distributes power to retail customers, in this case the City of Blacksburg, Virginia, and various departments of the University pursuant to approved tariffs." SEPA has consistently denied an allocation of power to universities, municipalities, and state or Federal governmental agencies sought substantially for the purpose of consumptive use. Additionally, since VPI markets power in the City of Blacksburg pursuant to approved tariffs, it appears that VPI is a seller for profit of power in the City of Blacksburg with the profit being for the University rather than for the citizens of Blacksburg. Since VPI is primarily: (1) A consumer of electricity and (2) a seller for profit of electric power, SEPA, in view of its limited power resource, has determined that better utilization of the power could be made in the selected marketing area and has therefore omitted VPI as a potential recipient of power from the Kerr-Philpott System of Projects.

12. *Objection.* SEPA should reallocate existing preference customers existing capacity based upon load growth.

Response. One of the comments stated that the capacity and energy that

VOL 50 ISS 145 JL 29 1985 UMI

the existing customers have received should be reallocated according to current loads because some of the existing preference customers loads have grown and therefore more power is needed. As stated in response to Objection 5, there are good arguments for using many different allocation methods. If SEPA were to reallocate existing preference customers' capacity, it would be taking capacity from some existing preference customers and giving it to other existing preference customers. In like respect, potential new customers would and have presented the view that all capacity should be reallocated according to current load levels.

SEPA believes that the most equitable solution is to allow existing prference customers to retain their pre-1963 capacity allocations while providing a viable arrangement for both new and existing preference customers to share in any additonal capacity available for marketing. Therefore, SEPA will not reallocate capacity which was formerly sold to existing preference customers.

13. *Objection:* SEPA's proposed policy should remove the adverse competitive impact caused by uneven allocations of power to cooperative preference entities and municipal preference entities.

Response: This contention is, in itself, supportive of the proposition to reallocate all power available to SEPA proportionately among all preference entities within a given marketing area or the entire SEPA marketing area. SEPA is aware that because of circumstances influencing the evolution of its marketing programs, an uneven distribution of power among preference entities has resulted. With respect to the power from the Kerr-Philpott System of Projects, an uneven distribution of power to preference entities arises due to the fact that a number of municipalities in the APCO, CP&L, and VEPCO service areas elected not to purchase SEPA power previously offered to them. It goes without saying, however, that preference entity participation at any point in time was voluntary and beyond SEPA's control. Additionally, because geographical limits to marketing areas resulted from the decision process, preference entities immediately beyond the peripheries were affected.

Nevertheless, within selected marketing areas, evenhanded treatment has always been afforded partricipating preference entities as power became available. Toward that goal, the Final Power Marketing Policy for the Kerr-Philpott System of Projects states that preference entities not now served in the designated marketing area will be eligible to share equitably in the additional capacity available to preference entities accompanied by energy equal to the firm energy available from the projects.

SEPA's responsibility is to dispose of surplus hydropower from designated Corps of Engineers reservoir projects in accordance with statutory authority, and it has no utility responsibility respecting any customer within the 10-state area or other specified area in which it is authorized to market power. The impact of SEPA power is something of which SEPA is conscious, but the impacts are a natural consequence of its marketing program. The Congress has not required SEPA to specifically take this matter into consideration as it has required of certain other agencies of a regulatory nature. Furthermore, SEPA does not believe that the relatively small percentage of SEPA power which goes to its preference customers would constitute such an advantage as to be the determining factor in attracting customers to particular systems.

Changes or Revisions in the Revised Proposed Marketing Policy

The changes or revisions in the Revised Proposed Marketing Policy are very minor clarification changes resulting in no significant or substantive changes to the Final Power Marketing Policy for the Kerr-Philpott System of Projects.

Final Power Marketing Policy Kerr-Philpott System of Projects

General. The projects and power subject to this policy are:

Projects	Capacity (kw) (name-plate)	Energy (mwh) (average annual)
John H. Kerr	204,000	440,000
Philpott	14,000	25,000

The Final Marketing Policy for the Kerr-Philpott System of Projects will replace the interim policy and will be implemented as soon as contracts negotiated pursuant to the interim policy can be replaced.

The Final Marketing Policy will be implemented through negotiated contracts for terms not to exceed 10 years.

Transmission facilities owned by Virginia Electric and Power Company (VEPCO), Carolina Power & Light Company (CP&L) and Appalachian Power Company (APCO) will be used for all necessary purposes including transmitting power to load centers. Deliveries may be made at the projects, at utility interconnections or at customer substations, as determined by SEPA. The projects will be hydraulically, electrically and financially intergrated and will be operated to make maximum contribution to the respective utility areas. Preference in the sale of the power will be given to public bodies and cooperatives.

Marketing Area. The SEPA marketing are shall be a combination of the following areas: (1) That area within the VEPCO service area in both Virginia and North Carolina within a radius of 150 miles of the Kerr Project; (2) that area within the CP&L service area in North Carolina and South Carolina within a radius of 165 miles of a point on the Virginia-North Carolinia state line where CP&L's Kerr Dam-Henderson line interconnects with the VEPCO System; and (3) that area within the APCO service area within a radius of 100 miles of the Philpott Project. The combined SEPA marketing area of approximately 65,000 square miles contains 89 eligible public bodies and cooperatives, as listed on Appendix A attached hereto.

Allocations of Power. Approximately the output of the Philpott Project and approximately two-thirds of the output of the Kerr Project will be allocated on a long-term basis to customers located in the SEPA served portion (Virginia and North Carolina) of the VEPCO service area and to customers located in the SEPA served portion of the APCO service area and the remainder of the output of the Kerr Project will be allocated to customers located in the SEPA served portion of the CP&L area. Except where duplication of allocation would result, each public body and cooperative within the marketing area as shown on Appendix A will be eligible for an allocation of power as hereinafter provided.

It is SEPA's goal to allocate all available and usable system power (that power remaining after provision for reserves and losses) to preference customers including capacity which, prior to the interim policy, was sold to VEPCO and CP&L.

As to the capacity sold to the existing preference customers prior to contracts executed to implement the interim policy, each existing preference customer within the VEPCO service area will be allowed to retain its individual share of the 85 megawatts of delivered capacity, and each existing preference customer within the CP&L service area will be allowed to retain its individual share of the 30 megawatts of delivered capacity.

Both new and existing preference customers within the VEPCO and APCO service areas and those within the CP&L service area will be eligible to share equitably in the available capacity remaining after reductions for reserves, losses and capacity retained by the existing customers; provided that preference customers in the APCO area will be limited to the available capacity output of the Philpott Project, less reserves and losses. Allocations of capacity to a particular preference customer within a particular utility services area will be based on the relationship of such customer's maximum 1980 demand to the sum of the 1980 maximum demands of all preference customers in a given utility service are a sharing such power. SEPA recognizes that Washington and Greenville, North Carolina, which were previously served by the VEPCO system are now served by the CP&L system; however, for allocation purposes, they will be treated as if served through the VEPCO system.

Capacity allocated to serve new preference customers will be accompanied by energy equal to the firm energy available from the projects (approximately 650 kilowatt-hours per kilowatt per year). The remainder of the energy available from the projects shall be allocated to existing preference customers in the respective service areas based on their capacity allocations.

Utilization of Utility Systems. In the absence of transmission facilities of its own, SEPA will use area generation and transmission systems to integrate the Government's projects, provide firming, wheeling, exchange and backup service and such other functions as may be necessary to dispose of system power under reasonable and acceptable marketing arrangements. Utility systems providing such services shall be entitled to adequate compensation. Specific terms and conditions of such arrangements shall be the subject of negotiations between SEPA and the generation and transmission utilities providing the services. Individual preference agencies directly affected by the negotiations shall stand in an advisory role to SEPA and shall be kept currently advised as to the status and progress of negotiations.

Wholesale Rates. Rate schedules shall be drawn so as to recover all costs associated with producing and transmitting the power in accordance with then current repayment criteria. Production costs will be determined on a system basis and rate schedules will be related to the integrated output of the projects. Rates schedules may be revised periodically.

Resale Rates. Resale rate provisions requiring the benefits of SEPA power to be passed on to the ultimate consumer will be included in each SEPA customer contract which provides for SEPA to supply more than 25 percent of the customers' total power requirements during the term of the contract.

Conservation Measures. Each customer purchasing SEPA power shall agree to take reasonable measures to encourage the conservation of energy by ultimate consumers.

Appendix A—Preference Agencies in the Kerr-Philpott System Area

Preference agencies served by CP&L:

North Carolina

Brunswick EMC*	Pee Dee EMC*
Carteret-Craven EMC*	Piedmont EMC*
Central EMC*	Pitt & Greene EMC*
Four County EMC*	Randolph EMC*
Halifax EMC*	South River EMC*
Harker's Island EMC	Tideland EMC*
Jones-Onslow EMC*	Tri-County EMC*
Lumbee River EMC*	Wake EMC*
Apex	Louisburg*
Ayden	Lumberton
Benson	New Bern
Clayton	Pikeville
Farmville	Red Springs
Fayetteville	Rocky Mount
Fremont	Selma
Hookerton	Smithfield
Kinston	Wake Forest
LaGrange	Wilson
Laurinburg	

South Carolina

Bennettsville

Preference agencies served by VEPCO:

North Carolina

Albemarle EMC*	Halifax EMC*
Edgecombe-Martin County EMC*	Roanoke EMC*
	Tideland EMC*
Belhaven	Hobgood
Edenton	Robersonville
Elizabeth City	Scotland Neck
Enfield	Tarboro
Greenville	Washington
Hamilton	Windsor
Hertford	

Virginia

B-A-R-C EC*	Prince George EC*
Central Virginia EC*	Prince William EC*
Community EC*	Rappahannock EC*
Craig-Botetourt EC*	Shenandoah Valley EC*
Mecklenburg EC*	Southside EC*
Northern Neck EC*	
Blackstone	Harrisonburg
Culpeper	Iron Gate
Elkton	Wakefield
Franklin	

Preference agencies served by utilities other than CP&L or VEPCO:

City	*Served by*
Black Creek	Wilson
Fountain	Wilson
Lucama	Wilson
Macclesfield	Wilson
Oak City	Edgecombe-Martin County EMC
Pinetops	Wilson

*Existing Customers

Princeville	Tarboro
Sharpsburg	Rocky Mt.
Stantonsburg	Wilson
Walstonburg	Wilson
Winterville	Greenville

ENVIRONMENTAL PROTECTION AGENCY

[FRL-2869-6]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the Federal Register a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicitation and the expected impact, and where appropriate includes the actual data collection instrument. The following ICRs are available for review and comment.

FOR FURTHER INFORMATION CONTACT: Nanette Liepman, 202-382-2741 or FTS 382-2742.

SUPPLEMENTARY INFORMATION:

Office of Research and Development

• Title: Milk Cow and Population Survey (EPA #1221). (This is an extension of an existing collection.)

Abstract: The information collected provides a directory of the location of farms and ranches around the Nevada Test Site where milk is produced for local use or commercial distribution. The directory is used to identify sources of samples to assess radiological contamination from the Nevada Test Site. Information is updated alternate summers.

Respondents: Owners of milk cows and/or goats in eastern California, all of Nevada, southern Idaho, and western Utah.

Office of Air and Radiation

• Title: Compliance Demonstation by Importers of Non-Complying Motor Vehicles and Engines (EPA #0010). (This is an extension of an existing collection.)

Abstract: Commercial importers and individuals who import vehicles must comply with the emissions requirements of the Clean Air Act. Documents showing either that the vehicle has passed a laboratory emissions test or that the vehicle has been modified according to manufacturer's instructions are submitted for EPA approval.

Respondents: Commercial importers and individuals who import vehicles.

Agency PRA Clearance Request Completed by OMB

EPA #1119, Administrative Controls for Blending and Burning of Hazardous Waste and Used Oil Fuels, was approved 7/3/85 (OMB #2050-0047: expires 7/13/88).

Comments on all parts of this notice may be sent to:

Nanette Liepman (PM-23), Office of Standards and Regulations, Regulation and Information Management Division, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D C 20460

and

Rick Otis (ICR #1221) or Wayne Leiss (ICR #0010), Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office, Building (Room 3228), 726 Jackson Place NW., Washington, D.C. 20503

Dated: July 22, 1985.

Daniel J. Fiorino,

Acting Director, Regulation and Information Management Division.

Privacy Act of 1974, Notification of Deletion of System of Records

SUMMARY: The Environmental Protection Agency is deleting a system of records, Statements of Known Financial Interests (EPA-12), that is no longer in use.

DATE: Effective July 29, 1985.

FOR FURTHER INFORMATION CONTACT: Mr. Donnell Nantkes, Grants, Contracts, and General Law Division, Office of General Counsel (LE-132G), Washington, D.C. 20460, telephone (202) 382-4550.

SUPPLEMENTARY INFORMATION: On September 8, 1978, and pursuant to the provisions of the Privacy Act of 1974, there was published in the **Federal Register** (43 FR 40057) a notice of the system of records, Statements of Known Financial Interests (EPA-12). Section 207(c) of the Ethics in Government Act (Pub. L. 95-521) superseded the requirement for this report. Accordingly, this notice formally deletes this system of records.

Dated: July 22, 1985.

Seymour D. Greenstone,

Acting Assistant Administrator for Administration and Resources Management.

Transfer of Data To Contractor

AGENCY: Environmental Protection Agency.

ACTION: Notice of transfer of data and request for comments.

SUMMARY: The Environmental Protection Agency (EPA) will transfer to its contractor, Development Planning & Research Association (DPRA) of Manhattan, KS, information which has been, or will be, submitted to EPA under section 3007 of the Resource Conservation and Recovery Act (RCRA). Some of the information may have a claim of business confidentiality. This firm is conducting economic analyses associated with the promulgation of hazardous waste listings for the petroleum refining, inorganic chemicals, coke by-products, wood preserving, pesticides, and plastics manufacturing industries, and will need access to this information.

DATE: The transfer of the confidential data submitted to EPA will occur no sooner than August 5, 1985.

ADDRESSES: Comments should be sent to the Document Control Officer, Office of Solid Waste, Characterization and Assessment Division (WH-562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. Comments should be identified as "Transfer of Confidential Data."

FOR FURTHER INFORMATION CONTACT: Dina Villari, Document Control Officer, Characterization and Assessment Division (WH-562B), Office of Solid Waste, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, (202) 475-8551. For technical information contact Mr. Robert Scarberry, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, (202) 382-4761.

SUPPLEMENTARY INFORMATION:

I. Transfer of Data

The U.S. Environmental Protection Agency is conducting a program to characterize waste and assess waste management practices within the petroleum refining, inorganic chemicals, coke by-products, wood preserving, pesticides, and plastics manufacturing industries. The Agency will use the results to identify and list hazardous waste under authority of section 3001 of the Resource Conservation and Recovery Act (RCRA), and to develop appropriate waste management standards under section 3004.

Under EPA Contract No. 68-01-3565, DPRA, of Manhattan, KS, will assist the Waste Identification Branch of the Office of Solid Waste in conducting economic analyses associated with the petroleum refining, inorganic chemicals, coke by-products, wood preserving, pesticides, and plastics manufacturing industries.

The information being transferred to DPRA was previously, or is currently being, collected by other agency contractors, who conducted, or are currently conducting, waste characterization studies within these industries. Some of the information may have a claim of business confidentiality.

In accordance with 40 CFR 2.305(h), EPA has determined that DPRA employees may require access to confidential business information (CBI) submitted to EPA under section 3007 of RCRA to perform work satisfactorily under the above-noted contract. EPA is issuing this notice to inform all submitters of information under section 3007 of RCRA that EPA may transfer to this firm, on a need-to-know basis, confidential business information specific to the petroleum refining, inorganic chemicals, coke by-products, wood preserving, pesticides, and plastics manufacturing industries. Upon completing their review of materials submitted for these industries, DPRA will return all such materials to EPA "Contractors Requirements for the Control and Security of RCRA

DPRA has been authorized to have access to RCRA CBI under the EPA "Confidential Business Information" security manual. EPA has approved the security plan of its contractors and will inspect the facility and approve it prior to RCRA CBI being transmitted to the contractors. Personnel from this firm will be required to sign a non-disclosure agreement and be briefed on appropriate security procedures before they are permitted access to confidential information, in accordance with the "RCRA Confidential business Information Security Manual" and the Contract Requirements Manual.

II. List of Subjects in 40 CFR Part 2

Administrative practice and procedure, Freedom of information, Confidential Business information.

Dated: July 16, 1985.

Jack W. McGraw,

Acting Assistant Administrator.

EQUAL EMPLOYMENT OPPORTUNTIY COMMISSION

Agency Report Forms Under OMB Review

AGENCY: Equal Employment Opportunity Commission.

ACTION: Request for comments.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed information collection requests to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made such a submission. The proposed report form under review is listed below.

DATE: Comments must be received on or before September 12, 1985. If you anticipate commenting on a report form, but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB Reviewer and the Agency Liaison Officer of your intent as early as possible.

ADDRESS: Copies of the proposed report form, the request for clearance, (S.F. 83), supporting statement, and other documents submitted to OMB for review may be obtained from the Agency Liaison Officer and the OMB Reviewer.

FOR FURTHER INFORMATION CONTACT: EEOC Agency Liaison Officer: Margaret P. Ulmer, Financial and Resource Management Services, Room 386, 2401 E. Street, NW, Washington, DC, 20507; Telephone (202) 634-1932.

OMB Reviewer: James Mason, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC, 20503; Telephone (202) 395-6880.

Type of Request: Extension (No change)
Title: Employer Information Report EEO-1
Form Number: Standard Form 100
Frequency of Report: Annually
Type of Respondent: Private employers with 100 or more employees and certain Federal government contractors with 50 or more employees
Standard Industrial Classification (SIC) Code: Multiple
Description of Affected Public: IND/HHID and Farms adn Business/INST
Responses: 126,700
Reporting Hours: 633,500
Federal Cost: $476,000
Applicable under Section 3504(h) of Public Law 96-511: Not applicable
Number of Forms: 1

Abstract-Needs/Users: EEO-1 data are used by EEOC to investigate charges of discrimination against employers in private industry. Data are shared with several Federal government agencies, particularly the Office of Federal Contact Compliance Programs (OFCCP), U.S. Department of Labor. Under section 709(d) of Title VII of the Civil Rights Act of 1964, as amended, EEO-1 data are also shared with approximately 127 State and local FEPC agencies.

Dated: July 19, 1985.

For the Commission.

John Seal,

Management Director, Equal Employment Opportunity Commission.

FEDERAL RESERVE SYSTEM

Bank of Montreal, et al.; Application To Engage de Novo in Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any request for a hearing on this question must be acompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than August 22, 1985.

A. Board of Governors of the Federal Reserve System (William W. Wiles, Secretary) Washington, D.C. 20551:

1. *Bank of Montreal*, Montreal, Canada, and *Harris Bankcorp*, Chicago, Illinois: to engage through their wholly owned subsidiary, Harris Futures Corporation, Chicago, Illinois, in the execution and clearance on futures contracts of stock index futures and municipal bond index products. This application may be inspected at the Federal Reserve Bank of Chicago. These activities have been approved by Board Order as permissible for bank holding companies. *J.P. Morgan & Company, Inc.*, 68 Federal Reserve Bulletin 514 (1982); *Bankers Trust New York Corporation*, 68 Federal Reserve Bulletin 651 (1982).

F&M National Corp.; Formation of; Acquisition by; or Merger of Bank Holding Companies

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and §225.14 of the Board's Regulation Y (12 CFR 225.24) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than August 19, 1985.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules; Collins Foods International, Inc., et al.

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the Federal Register.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

Transaction	Waiting period terminated effective
(1) 85–0717—Collins Foods International, Inc.'s proposed acquisition of voting securities of Tenly Enterprises, Inc.	July 2, 1985.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Request for Nominations of Candidates To Serve on the Mine Health Research Advisory Committee

The National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control (CDC), is soliciting nominations for membership on the Mine Health Research Advisory Committee (MHRAC). On December 24, 1985, three vacancies will occur. The MHRAC, which is authorized by the Federal Mine Safety and Health Act of 1977, advises the Department of Health and Human Services on matters related to intramural and extramural health research for the nation's miners. The direction, scope, and scientific quality of the NIOSH mine health research program are considered by the Committee.

A range of disciplines is represented on the Committee, including occupational medicine, industrial hygiene, pulmonary medicine, radiology, pathology, epidemiology, biostatistics, and public health. Mining experience is desirable, but it is not necessary for every position on the Committee. Emphasis is placed on scientific credentials.

The following information is requested: name, affiliation, address, telephone number, and a recent curriculum vital. Nominations should be sent by August 16, 1985, to: Mr. Robert E. Glenn, Executive Secretary, MHRAC, NIOSH, CDC, 944 Chestnut Ridge Road, Morgantown, West Virginia 26505-2888, Telephones: FTS: 923-4474, Commercial: 304/291-4474.

Dated: July 22, 1985.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160-19-M

Food and Drug Administration

Consumer Participation; Open Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the following consumer exchange meeting:

Minneapolis District Office, chaired by John Feldman, District Director. The topics to be discussed are Color Additives in Foods, Health Claims for Food, and Nonnutritive Sweeteners.

DATE: Tuesday, August 6, 1985, 1:30 p.m. to 3:30 p.m.

ADDRESS: United Way of Dane County, 2059 Atwood Ave., Madison, WI.

FOR FURTHER INFORMATION CONTACT: Donald W. Aird, Jr., Public Affairs Officer, Food and Drug Administration, 240 Hennepin Ave., Minneapolis, MN 55401, 612-349-3906.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to encourage dialogue between consumers and FDA officials, to identify and set priorities for current and future health concerns, to enhance relationships between local consumers and FDA's District Offices, and to contribute to the agency's policymaking decisions on vital issues.

Dated: July 23, 1985.

Mervin H. Shumate,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

National Institutes of Health

National Cancer Institute; Board of Scientific Counselors, Division of Cancer Etiology; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, Division of Cancer Etiology on October 17-18, 1985, Building 31, C Wing, Conference Room 6, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20205. The meeting will be open to the public from 1:00 p.m. to recess on October 17, and from 9:00 a.m. to adjournment on October 18, for discussion and review of the Division budget and review of concepts for grants and contracts. Attendance by the public will be limited to space available.

The Board of Scientific Counselors meeting will be closed to the public from 9:00 a.m. to approximately 1:00 p.m. on October 17, 1985, in accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, for the review, discussion and evaluation of individual programs and projects conducted by the Division of Cancer Etiology. These programs, projects, and discussions could reveal personal information concerning individuals associated with the programs and projects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20205 (301/496-5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. David McB. Howell, Executive Secretary of the Board of Scientific Counselors, Division of Cancer Etiology, National Cancer Institute, Building 31, Room 11A06, National Institutes of Health, Bethesda Maryland 20205 (301/496-6927) will furnish substantive program information.

Dated: July 18, 1985.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140-01-M

National Cancer Institute; Cancer Center Support Review Committee; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Cancer Support Review Committee, National Cancer Institute, National Institutes of Health, August 1-2, 1985, Holiday Inn Crown Plaza, 1750 Rockville Pike, Rockville, Maryland 20852. This meeting will be open to the public on August 1, from 8:30 a.m. to 9:30 a.m. to review administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in section 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on August 1 from approximately 9:30 a.m. to recess; and on August 2 from 8:30 a.m. to adjournment, for the review, discussion and evaluation of individual grant applications. These applications and the discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20205 (301/496-5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. John Abrell, Executive Secretary, Cancer Center Support Review Committee, National Cancer Institute, Westwood Building, Room 826, National Institutes of Health, Bethesda, Maryland 20205 (301/496-9767) will furnish substantive program information.

This notice is being published less than 15 days prior to the meeting because of the difficulty of coordinating the attendance of the members due to their conflicting commitments.

Dated: July 17, 1985.

Recombinant DNA Advisory Committee Working Group on Toxins; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of a meeting of the Recombinant DNA Advisory Committee Working Group on Toxins at the National Institutes of Health, Building 31A, Conference Room 4, 9000 Rockville Pike, Bethesda, Maryland 20205, on August 16, 1985, from approximately 9:00 a.m. to adjournment at approximately 5:00 p.m. to discuss serveral proposals involving the cloning of genes coding for toxins. This meeting will be open to the public. Attendance by the public will be limited to space available.

Further information may be obtained from Dr. Elizabeth Milewski, Executive Secretary, Recombinant DNA Advisory Committee Working Group on Toxins, National Institutes of Health, Building 31, Room 3B10, Bethesda, Maryland, telephone (301) 496–6051.

OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements" (45 FR 39592) requires a statement concerning the official government programs contained in the *Catalog of Federal Domestic Assistance*. Normally NIH lists in its announcements the number and title of affected individual programs for the guidance of the public. Because the guidance in this notice covers not only virtually every NIH program but also essentially every federal research program in which DNA recombinant molecule techniques could be used, it has been determined to be not cost effective or in the public interest to attempt to list these programs. Such a list would likely require sereral additional pages. In addtion, NIH could not be certain that every federal program would be included as many federal agencies, as well as private organizations, both national and international, have elected to follow the NIH Guildelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above whether individual programs listed in the *Catalog of Federal Domestic Assistance* are affected.

Dated: July 22, 1985.

Betty J. Beveridge,

Committee Mangement Officer, NIH.

BILLING CODE 4140–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Plan for the Use and Distribution of the Shoshone-Bannock Tribes of Fort Hall Reservation Indians Judgment Funds in Docket 326–C–2 Before the United States Claims Court

July 16, 1985.

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary for Indian Affairs by 209 DM 8.

The Act of October 19, 1973 (Pub. L. 93–134, 87 Stat. 466), as amended, requires that a plan be prepared and submitted to Congress for the use or distribution of funds appropriated to pay a judgment of the Indian Claims Commission or Court of Claims to any Indian Tribe. Funds were appropriated on July 19, 1984, in satisfaction of the award granted to the Shoshone-Bannock Tribes of Fort Hall Reservation before the United States Claims Court in Docket 326–C–2. The plan for the use and distribution of the funds was submitted to the Congress with a letter dated February 15, 1985 and was received (as recorded in the *Congressional Record*) by the Senate on February 27, 1985, and by the House of Representatives on February 26, 1985. The plan became effective on May 19, 1985 as provided by the 1973 Act, as amended by Pub. L. 97–458 since a joint resolution disapproving it was not enacted. The plan reads as follows:

Plan

For the Use and Distribution of Funds Awarded to the Shoshone-Bannock Tribes of Fort Hall Reservation in Docket 326–C–2 Before the United States Claims Court

The funds appropriated July 19, 1984, in satisfaction of the judgment granted in Docket 326–C–2 to the Shoshone-Bannock Tribes before the United States Claims Court, less attorney fees and litigation expenses, and including all interest and investment income accrued, shall be used and distributed as provided herein.

Per Capita Aspect

Eighty (80) percent of the funds shall be distributed in the form of per capita payments, in sums as equal as possible, to all tribal members born on or prior to and living on the effective date of this plan.

Programing Aspect

Twenty (20) percent of the funds, and any amounts remaining from the per capita payment provided above, shall be invested by the Secretary of the Interior, and the principal and interest and investment income accrued shall be utilized by the tribal governing body on a budgetary basis, subject to the approval of the Secretary, for a tribal land acquisition program and water rights litigation.

General Provisions

The per capita shares of living, competent adults shall be paid directly to them by the Shoshone-Bannock Tribes in accordance with the Act of August 2, 1983, 97 Stat. 365.

The per capita shares of deceased individual beneficiaries shall be determined and distributed in accordance with 43 CFR Part 4, Subpart D. Per capita shares of legal incompetents and minors shall be handled as provided in the Act of October 19, 1973, 87 Stat. 466, as amended January 12, 1983, 96 Stat. 2512.

None of the funds distributed per capita or made available under this plan for programing shall be subject to Federal or State income taxes, nor shall such funds nor their availability be considered as income or resources nor otherwise utilized as the basis for denying or reducing the financial assistance or other benefits to which such household or member would otherwise be entitled under the Social Security Act or, except for per capita shares in excess of $2,000, any Federal or federally assisted programs.

John W. Fritz,

Deputy Assistant Secretary, Indian Affairs.

TXP Operating Company; 3.92 miles of 20-inch pipeline; SEA No. P–7588	West Cameron Area, South Addition Block 556 and East Cameron Area, South Addition, Blocks 298 and 281; Offshore Louisiana.	July 10, 1985.
Chandeleur Pipe Line Company, 11.32 miles of 12-inch pipeline; SEA No. P–7586	Mobile Block 961 to Mobile Block 902; Offshore Mississippi	June 14, 1985.
TXP Operating Company, 8.1 miles of 30-inch pipeline; SEA No. P–7589	West Cameron Area, South Addition Blocks 556, 533, 534, 531, and 510; Offshore Louisiana.	July 9, 1985.
Chevron U.S.A. Inc., 2.55 miles of 6-inch pipeline; SEA No. P–7592	Grand Isle Block 86 to South Timbalier Block 130; Offshore Louisiana	June 21, 1985
Chevron U.S.A. Inc., 2.55 miles of 4-inch pipeline; SEA No. P–7593	Grand Isle Block 86 to South Timbalier Block 130; Offshore Louisiana	June 25, 1985.
Trunkline Gas Company, 1.72 miles of 4-inch pipeline; SEA No. P–8039	Ship Shoal Blocks 165 to 162; Offshore Louisiana	July 12, 1985.
Marathon Oil Company, Geophysical Exploration for Mineral Resources; SEA No. L85–95.	South Pass Blocks 88 and 89; 14 miles southeast of Plaquemine Parish, Louisiana	May 30, 1985.
Mobil Oil Exploration & Producing Southeast Inc., 2.20 miles of 4-inch pipeline; SEA No. P–7591.	Grand Isle Block 20 Field, Blocks 20, 19, and 18; Offshore Louisiana	June 17, 1985.
Mobil Oil Exploration & Producing Southeast Inc., 4.34 miles of 4-inch pipeline; SEA No. P–7590.	Grand Isle Block 20 Field, Blocks 20, 21, 18 and 17; Offshore Louisiana;	June 14, 1985.
Transcontinental Pipe Line Corporation, 6.47 miles of 24-inch pipeline; SEA No. P–8040.	Ship Shoal Area, South Addition, Block 332 to South Timbalier Area, South Addition, Blocks 315 and 300..	July 10, 1985.
Tennessee Gas Pipeline, 1.29 miles of 16-inch pipeline; SEA No. P–8047	East Cameron Block 33; Offshore Louisiana	Do.
CNG Producing Company, 2.03 miles of 6-inch pipeline; SEA No. P–7594	Eugene Island Area, South Addition, Block 314; Offshore Louisiana	July 9, 1985.
Trunkline Gas Company, 1.33 miles of 6-inch pipeline; SEA No. P–8041	South Timbalier Area, Blocks 100 and 111; Offshore Louisiana	July 12, 1985.

Persons interested in reviewing environmental documents for the proposals listed above or obtaining information about EAs and FONSIs prepared for activities on the Gulf of Mexico OCS are encouraged to contact the MMS office in the Gulf of Mexico OCS Region.

FOR FURTHER INFORMATION CONTACT: Regional Supervisor, Leasing and Environment (LE), Gulf of Mexico OCS Region, Minerals Management Service, Post Office Box 7944, Metairie, Louisiana 70010, Telephone (504) 838–0755.

SUPPLEMENTARY INFORMATION: The MMS prepares EAs and FONSIs for proposals which relates to exploration for and the development/production of oil and gas resources on the Gulf of Mexico OCS. The EAs examine the potential environmental effects of activities described in the proposals and present MMS conclusions regarding the significance of those effects. Environmental Assessments are used as a basis for determining whether or not approval of the proposals constitutes major Federal actions that significantly affect the quality of the human environment in the sense of NEPA 102(2)(C). A FONSI is prepared in those instances where the MMS finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis for that finding and includes a summary or copy of the EA.

This notice constitutes the public notice of availability of environmental documents required under the NEPA Regulations.

Dated: July 19, 1985.

John L. Rankin,

Regional Director, Gulf of Mexico OCS Region.

U.S DEPARTMENT OF THE INTERIOR

National Park Service

Delta Region Preservation Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Delta Region Preservation Commission will be held at 7:30 p.m., CST, on September 12, 1985, at the Jefferson Parish East Bank Council Chamber, 3330 North Causeway Boulevard, Metairie, Louisiana.

The Delta Region Preservation Commission was established pursuant to Pub. L. 95–265, section 907(a) to advise the Secretary of the Interior in the selection of sites for inclusion in Jean Lafitte National Historical Park, and in the development and implementation of a general plan and of a comprehensive interpretive program of the natural, historic, and cultural resources of the Region.

The matters to be discussed at this meeting include:

—Big Oak Island Cooperative Agreement
—Acadian Culture Center
—Surface Water Management
—Barataria Unit
—Status of Development
—Status of Planning

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited, and persons will be accommodated on a first-come, first-serve basis. Any member of the public may file a written statement concerning the matters to be discussed with the Superintendent, Jean Lafitte National Historical Park.

Persons wishing further information concerning this meeting, or who wish to submit written statements may contact James Isenogle, Superintendent, Jean Lafitte National Historical Park, U.S. Customs House, 423 Canal Street, Room 206, New Orleans, Louisiana 70130, telephone 504/589–3882. Minutes of the meeting will be available for public inspection four weeks after the meeting at the office of Jean Lafitte National Historical Park.

Dated: July 16, 1985.

Robert I. Kerr,

Regional Director, Southwest Region.

INTERSTATE COMMERCE COMMISSION

Release of Waybill Data for Use by IIT Research Institute

The Commission has received a request from IIT Research Institute (IITRI) on behalf of its client, Commonwealth Edison, for permission to use the 1974 to 1984 Carload Waybill Sample to update its prior study on the probability of a munition's train exploding near the Braidwood Nuclear Power Plant located south of Joliet, Illinois. Commonwealth Edison, which is now applying to the Nuclear Regulatory Commission for an operating license, has requested that IITRI update the 1974 probability study to reflect current traffic conditions.

Specifically, IITRI seeks waybill data which will enable them to estimate the number of trains carrying explosives, the type of explosives (e.g., bulk or finished product), the train-miles of explosives shipped, and any other waybill information which would be helpful in determining the probability of an accident occurring.

The Commission requires rail carriers to file waybill sample information if in any of the past three years, they terminated on their lines at least: (1) 4,500 revenue carloads or (2) 5 percent of revenue carloads in any one State (49 CFR Part 1244). From this waybill information, the Commission has developed a Public Use Waybill File that has satisfied the majority of all our waybill data requests while protecting the confidentiality of properietary data submitted by the railroads. However, if confidential waybill data are requested, as in this case, we will consider releasing the data only after certain protective conditions are met and public notice is given. More specifially, under the Commission's current policy for handling waybill requests, we will not release any confidential waybill data until after: (1) Certain requirements designed to protect the data's confidentiality are agreed to by the requesting party and (2) public notice is provided so affected parties have an opportunity to object. (48 FR 40328, September 6, 1983).

Accordingly, if any parties object to this request, they should file their objections (an original and 2 copies) within 14 calendar days of the date of this notice. They should also include all grounds for objection to the full or partial disclosure of the requested data. The Commission's Director of the Office of Transportation Analysis will consider these ogjections in determining whether to release the requested waybill data. Any parties who filed objections will be timely notified of the Director's decision.

Contact: Elaine K. Kaiser, (202) 275–0907.

James H. Bayne,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

Lodging of Proposed Consent Decree Pursuant to the Clean Air Act; Hygrade Food Products Corp.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on June 21, 1985, a proposed consent decree in *United States* v. *Hygrade Food Products Corporation*, Civil Action C85–551T, was lodged with the United States District Court for the Western District of Washington.

The complaint filed by the United States alleged violations of the Clean Air Act by Hygrade Food Products Corporation at its Tacoma, Washington prepared meats plant. The complaint sought injunctive relief requiring defendant to comply with the Clean Air Act and civil penalties for past violations. The proposed consent decree requires defendant to pay a $5,300 civil penalty for past violations and to make certain process modifications, according to a schedule specified in the decree, designed to eliminate the possibility of future violations. Pursuant to the decree, the process modifications are to have been completed by June 22, 1985.

The Department of Justice will receive for a period of thirty (30) days following the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Hygrade Food Products Corporation*, DJ Ref. 90–5–2–1–796.

The proposed consent decree may be examined at the Office of the United States Attorney, 3600 Sea-First 5th Avenue Plaza, 800 5th Avenue, Seattle, Washington 98104; and at the Environmental Enforcement Section, land and Natural Resources Division of the Department of Justice, Room 1515, 9th Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please refer to the case and decree and enclose a check for the amount of $2.40 (10 per page reproduction costs) payable to the Treasurer of the United Staates.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410–01–M

Lodging of Partial Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act; Carolawn Co.

In accordance with Departmental policy, 28 CFR 50.7, notice is bereby given that on July 1, 1985, a proposed Partial Consent Decree in *United States v. Carolawn Co., Inc., et al.*, Civil Action No. 83–2162–0, was lodged with the United States District Court for the District of South Carolina. The amended complaint file conetmporaneously by the United States alleges that the defendants are liable under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 ("CERCLA"), 42 U.S.C. 9601 *et seq.* The amended complaint named owners and operators of a hazardous waste site located near Fort Lawn, South Carolina, as well as generators of hazardous substances shipped to that site. The government sought to recover money expended by the federal government to clean up the site as well as implementation of groundwater studies and other appropriate remedial action. The Partial Consent Decree provides that certain of the defendants will fund and perform a Remedial Investigation Feasibility Study ("FI/FS") at the Fort Lawn site to determine the nature and extent of groundwater contamination, if any.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United Stotes v. Carolawn Co.*, D.J. Ref. 90–11–3–5.

The proposed Partial Consent Decree may be examined at the Office of the United States Attorney, 1100 Laurel Street, Columbia, S.C. 29202 and at the Regional IV Office of the Environmental Protection Agency, 345 Courtland Street, NE., Atlanta, Georgia 30365. Copies of the Patial Consent Decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of

Justice, Room 1517, Ninth Street and Pennsylvania Avenue, NW.,

Manufacturer of Controlled Substances; Western Fher Laboratories, Inc., Application

Pursuant to § 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on April 12, 1985, Western Fher Laboratories, Inc., Carretera 132, KM. 25.3, P.O. Box 7468, Ponce, Puerto Rico 00732, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the Schedule II controlled substance Phenmetrazine (1631).

Any other such applicant and any person who is presently registered with DEA to manufacture such substance may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, NW., Washington, D.C. 20537, Attention: DEA Federal Register Representative (Room 1112), and must be filed no later than August 28, 1985.

Dated: July 17, 1985.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

BILLING CODE 4410-09-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Institute of Museum Services; General Operating Support Program

AGENCY: Institute of Museum Services, NFAH.

ACTION: Grant Application Notice for Fiscal Year 1986.

This grant application announcement applies only to the General Operating Support Program (GOS).

Applications are invited by the Institute of Museum Services (IMS) for General Operating Support (GOS) awards under 45 CFR Part 1180 for Fiscal Year 1986.

Nature of Program

IMS makes awards under the GOS Program to museums to maintain, increase, or improve museum services. The purpose of these awards is to ease the financial burden bone by museums as a result of their increased use by the public and to help them carry out their educational role, as well as other functions. Section 206 of the Museum Services Act, Title II of Pub. L. 94-462, as amended, contains authority for this program. (20 U.S.C. 965)

Deadline Date for Transmittal of Applications

An application for a new grant must be mailed or hand-delivered by November 15, 1985.

Applications Delivered by Mail

An application sent by mail must be addressed to the Institute of Museum Services, 1100 Pennsylvania Avenue, NW., Room 609, Washington, D.C. 20506.

An applicant must be prepared to show one of the following as proof of timely mailing:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other dated proof of mailing acceptable to the Director of IMS.

If any application is mailed thorugh the U.S. Postal Service, the Director does not accept either of the following as proof of mailing: (1) A private metered postmark; or (2) a mail receipt that is not date-canceled by the U.S. Postal Service.

Application Delivered by Hand

An application that is hand-delivered must be taken to the Institute of Museum Services, Old Post Office Building, 1100 Pennsylvania Avenue, NW., Room 609, Washington, D.C. 20506.

IMS will accept a hand-delivered application between 9:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand-delivered will not be accepted after 4:30 p.m. on the deadline date.

Program Information

Program information is contained in the following: final regulations published on June 17, 1983 in Federal Register Vol. 48, No. 118, pages 27727-27734; amendments published on April 10, 1984 Federal Register Vol. 49, No. 70, pages 14108-14111; on June 15, 1984 Federal Register Vol. 49, No. 117, pages 24731-24733; and on July 5, 1985 Federal Register Vol. 50, No. 129, pages 27586-27589; and in the application forms and accompanying instructions in the Application Package. See paragraph on *Application Form.*

Available Funds

It is anticipated that no museum will receive more than $75,000 under the Act for Fiscal Year 1986 and that most museums which are funded will receive a smaller amount (45 CFR 1180.9). In addition, IMS normally does not make grants for more than 10 percent of a museum's most recently completed fiscal year's actual non-federal operating income.

(see 45 CFR 1180.16(b))

This program is subject to the availability of appropriations.

Application Forms

IMS is mailing application forms and program information in an Application Packet to museums that have previously applied to IMS and other institutions on its mailing list. Applicants may obtain Application Packets by writing to the Institute of Museum Services, 1100 Pennsylvania Avenue, NW., Room 609, Washington, D.C. 20506.

Applicable Regulations

Final regulations for the General Operating Support grant program were published in the Federal Register on June 17, 1983 FR Vol. 48, No. 118, pages 27727-27734. Amendments to these regulations were published in the Federal Register on April 10, 1984 FR Vol. 49, No. 70, pages 14108-14111; on June 15, 1984 FR Vol. 49, No. 117 pages 24731-24733; and on July 5, 1985 FR Vol. 50, No. 129 pages 27586-27589.

The regulations as amended implement the Museum Services Act. The amendments make technical and other changes in the eligibility conditions and other terms for the administration of the General Operating Support and Museum Assessment programs for museums and remove unneeded provisions. As revised, the regulations published on June 17, 1983 will apply to the award of grants for Fiscal Year 1986.

Further Information

For further information contact Kristine K. Ramaekers, Museum Program Officer, Institute of Museum Services, 1100 Pennsylvania Avenue, NW., Room 609, Washington, D.C. 20506. Telephone: (202) 786-0539.

NATIONAL SCIENCE FOUNDATION

Joint Meeting of the Advisory Committees for Civil and Environmental Engineering and Earthquake Hazard Mitigation; Open Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Committees for Civil and Environmental Engineering and Earthquake Hazard Mitigation.

Place: Rooms 540, 1242-A, 1242-B, National Science Foundation, 1800 G Street, NW., Washington, D.C. 20550.

Date: August 13, 1985—8:00 a.m. to 5:00 p.m.; August 14, 1985—9:00 a.m. to 12:00 Noon.

Type of Meeting: Open.

Contact Person: Dr. Arthur A. Ezra, Director, Division of Fundamental Research for Emerging and Critical Engineering Systems, The National Science Foundation, Room 1132, 1800 G Street, NW., Washington, D.C. 20550. Telephone: 202/357-9545.

Purpose of Meeting: To provide advice and recommendations concerning fundamental research in emerging and critical engineering systems.

Summary Minutes: May be obtained from the contact person at the above stated address.

Agenda

Tuesday, August 13, Room 540

9:00 a.m.—Welcome and Introduction, Nam P. Suh
9:15 a.m.—Overview, Arthur A. Ezra
9:30 a.m.—Earthquake Engineering, Michael P. Gaus
10:15 a.m.—Coffee Break
10:45 a.m.—Biotechnology, Jerome S. Schultz
11:30 a.m.—Environmental Engineering, Edward H. Bryan
12:15 p.m.—Lunch
1:30 p.m.—Lightwave Technology, T.K. Gustafon
2:15 p.m.—Bioengineering and research to aid the Handicapped, William Freedman
3:00 p.m. Coffee Break
3:30 p.m.—Systems Engineering for Large Structures, John B. Scalzi
4:15 p.m.—Natural and Man-Made Hazard Mitigation, Michael P. Gaus
5:00 p.m.—Adjourn

Wednesday, August 14, Rooms 1242-A and 1242-B

9:00 a.m.-12 Noon—Emerging Engineering Systems Committee Room 1242-A
9:00 a.m.-12 Noon—Critical Engineering Systems Committee, Room 1241-B
12 Noon—Lunch
1:30 p.m.—Continuation of Morning Discussions
5:00 p.m.—Adjourn

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Meeting Agenda

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on August 8-10, 1985, in Room 1046, 1717 H Street, NW., Washington, DC. Notice of this meeting was published in the Federal Register on July 23, 1985.

The agenda for the subject meeting will be as follows:

Thursday, August 8, 1985

8:30 A.M.—8:45 A.M.: Report of ACRS Chairman (Open)—The ACRS Chairman will report briefly regarding items of current interest to the Committee.

8:45 A.M.—12:00 Noon: General Electric Standard Safety Analysis Report (GESSAR II) (Open/Closed)—Members of the Committee will hear and discuss the report of the cognizant ACRS Subcommittee regarding the review of this project for a FDA. Members of the NRC Staff and representatives of the applicant will make presentations and participate in the discussion.

Portions of this session will be closed as necessary to discuss Proprietary Information applicable to this project and detailed information regarding security provisions for this type of nuclear steam supply system.

1:00 P.M.—2:00 P.M.: NRC Long Range Plan (Open)—The Committee will hear the report of its subcommittee on proposed ACRS comments regarding a long range plan for NRC regulatory activities. Members of the NRC Staff and invited experts will participate as appropriate.

2:00 P.M.—5:00 P.M.: Seismic Qualification of Equipment in Operating Nuclear Power Plants (Open)—The Committee members will hear and discuss the report of its subcommittee regarding proposed methodology for seismic qualification of equipment in nuclear power plants. Representatives of the NRC Staff and the nuclear industry will participate as appropriate.

5:00 P.M.—6:00 P.M.: NRC Maintenance and Surveillance Program Plan (Open)—The members will hear the report of its subcommittee regarding the proposed NRC program plan for maintenance and surveillance of nuclear power plants. Members of the NRC Staff will participate as appropriate.

6:00 P.M.—6:30 P.M.: Future ACRS Activities (Open)—The members of the Committee will discuss anticipated ACRS Subcommittee activity and items proposed for consideration by the full Committee.

Friday, August 9, 1985

8:30 A.M.—11:30 A.M.: San Onofre Nuclear Plant Unit 1 (Open)—The members will hear and discuss the report of its subcommittee on the SEP review of this nuclear plant. Representatives of the NRC Staff and the licensee will make presentations and participate in the discussion.

11:30 A.M.—12:30 P.M.: Indian Point Nuclear Power Station (Open)—The members of the Committee will discuss proposed ACRS comments regarding implementation of the results of the PRA of the Indian Point Nuclear Station.

1:30 P.M.—2:30 P.M.: Management and Disposal of Radioactive Wastes (Open)—The members of the Committee will hear the report of its subcommittee regarding proposed ACRS activities in support of the NRC regulatory program for handling and disposal of radioactive wastes. Representatives of the NRC Staff and the Department of Energy will participate as appropriate.

2:30 P.M.—6:30 P.M.: Alvin W. Vogtle Nuclear Plant, Units 1 and 2 (Open/Closed)—The members will hear and discuss the report of its subcommittee regarding the request for an operating license for this nuclear plant. Members of the NRC Staff and representatives of the applicant will make presentations and participate in the discussion as appropriate.

VOL 50 ISS 145 JL 29 1985 UMI

Portions of this session will be closed as necessary to discuss Proprietary Information and detailed security arrangements for this plant.

Saturday, August 10, 1985

8:30 A.M.—12:00 Noon: ACRS Reports to NRC (Open/Closed)—This portion of the meeting will be to discuss proposed ACRS reports to the NRC regarding items considered during this meeting.

Portions of this session will be closed to discuss Proprietary Information applicable to the matters being considered and detailed security arrangements for the projects being reviewed.

1:00 P.M.—3:00 P.M.: ACRS Subcommittee Activities (Open)—The members will hear and discuss the reports of designated subcommittees regarding ongoing activities including ECC systems evaluation, ACRS procedures and practices, scram system reliability, the radiation protection program of INPO, and the source term used in accident evaluation.

3:00 P.M.—3:30 P.M.: Activities of ACRS Members (Open/Closed)—The Committee will discuss proposed activities of individual ACRS members as nongovernment employees.

Portions of this session will be closed as necessary to discuss information the release of which would represent an unwarranted invasion of personal privacy.

Procedures for the conduct of a participation in ACRS meetings were published in the **Federal Register** on October 3, 1984 (49 FR 193). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director, R.F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with subsection 10(d) Pub. L. 92–463 that it is necessary to close portions of this meeting as noted above to discuss Proprietary Information [5 U.S.C. 552b(c)(4)], detailed security information [5 U.S.C. 552b(c)(3)], to discuss information that will be involved in an adjudicatory proceeding [5 U.S.C. 552b(c)(10)], and to discuss information the release of which would represent an unwarranted invasion of personal privacy [5 U.S.C. 552b(c)(6)]

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202/634–3265), between 8:15 A.M. and 5:00 P.M. EDT.

Dated July 24, 1985.

Samuel J. Chilk,

Acting Advisory Committee Management Officer.

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards; Subcommittees on Waste Management and Procedures and Administration; Revised Agenda

The **Federal Register** published on Monday, July 22, 1985 (50 FR 29775) contained notice of a joint meeting of the ARCS Subcommittees on Waste Management, and Procedures and Administration to be held on Tuesday, July 30, 1985, 8:30 a.m., Room 1046, 1717 H Street, NW., Washington, DC. In addition to the ACRS Role in the Civilain High-Level Radioactive Waste Management Program, the following items have been added to the agenda:

(1) ACRS Annual Report to Congress on the NRC Safety Research Program and Budget—discuss scope and detail of this report.

(2) Appointment of ACRS Subcommittee to consider risk perspective in regulatory requirements.

(3) ACRS consideration of proposed changes in NRC Standard Review Plan—discuss applicable procedures.

(4) Testing of NRC Operator Candidates—procedures for ACRS consideration of natural ability testing.

(5) ACRS activities—discuss ACRS action regarding items carried over from earlier ACRS assignments.

The meeting will, for the most part, be open to public attendance. However, portions of the meeting may be closed for the discussion of individuals as potential consultants to the Waste Management Subcommittee. All other items remain the same as previously announced.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Owen S. Merrill (telephone 202/634–1414) or Mr. R.F. Fraley (202/634–3265) between 8:15 a.m. and 5:00 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated July 23, 1985.

John C. McKinley,

Chief, Project Review Branch No. 1.

[FR Doc. 85–17922 Filed 7–26–85; 8:45 am]

BILLING CODE 7590–01–M

Kerr-McGee Chemical Corp; Hearing

July 23, 1985.

Before Administrative Judges: John H Frye, III, Chairman, Dr. James H. Carpenter, Dr. Peter A. Morris.

In the Matter of Kerr-McGee Chemical Corporation (West Chicago Rare Earths Facility) Docket No. 40–2061–ML, ASLBP No. 83–495–01–ML; and Kerr-McGee Chemical Corporation (Kress Creek Decontamination) Docket No. 40–2061–SC, ASLBP No. 84–502–01–SC.

Please take notice that prehearing conferences in these proceedings will be held on September 11 and 12, 1985, at the NRC hearing room, fifth floor, 4350 East-West Highway, Bethesda, Maryland. The conference in the West Chicago proceeding will begin at 9:30 A.M. on September 11 and will be followed by the conference in the Kress Creek proceeding.

The purpose of the conferences is to hear argument of the parties regarding discovery disputes.

John H Frye III,

Chairman, Administrative Judge.

July 23, 1985.

[FR Doc. 85–17921 Filed 7–26–85; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–302]

Florida Power Corp., et al. (Crystal River Unit No. 3 Nuclear Generating Plant); Exemption

I

The Florida Power Corporation (the licensee) and eleven other co-owners are the holders of Facility Operating License No. DPR–72 which authorizes operation of Crystal River Unit No. 3 Nuclear Generating Plant (the facility) at steady state reactor power levels not in excess of 2544 megawatts thermal. The facility comprises one pressurized water reactor at the licensee's site located in Citrus County, Florida. The license provides, among other things, that it is subject to all rules, regulations and Orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

II

On November 19, 1980, the Commission published a revised Section 10 CFR 50.48 and a new Appendix R to 10 CFR Part 50 regarding fire protection features of nuclear power plants (45 FR 76602). The revised Section 50.48 and Appendix R became effective on February 17, 1981. Section III. of Appendix R contains fifteen subsections, lettered A through O, each of which specifies requirements for a particular aspect of the fire protection features at a nuclear power plant. One of these fifteen subsections, III. G., which requires that one train of cables and equipment necessary to achieve and maintain safe shutdown be maintained free of fire damage, is the subject of this exemption.

The specific areas in which exemptions from the requirements of Section III.G. have been requested are as follows.

Fire exemption requests concern separation of redundant equipment within a fire area:

1. Intermediate Building Redundant Emergency Feedwater System Pumps and Valves (Fire Area IB–95–200);

2. Auxiliary Building Seawater Pump Room (Fire Area AB–95–3);

3. Auxiliary Building Redundant Makeup Pumps (Fire Area AB–95–3);

4. Auxiliary Building Redundant Makeup System Valves (Fire Area AB–95–3);

5. Reactor Building Penetration Assemblies (Fire Area IB–119–201).

One exemption request concerns the fixed suppression system for a fire area:

1. Control Complex HVAC Equipment Room (Fire Area CC–164–121)

Six additional exemption requests concern fire area boundaries, the acceptance criteria for which are called out in Appendix A to Branch Technical Position (BTP) APCSB 9.5–1. Deviations from these fire area boundary guidelines do not require exemption and are accordingly not addressed herein.

III

By letters dated September 24, 1984 and October 5, 1984, and superseded by letter dated December 11, 1984, the licensee requested an exemption from requirements specified in Section III.G of Appendix R of 10 CFR Part 50. The specific requests and the acceptability of the exemption are addressed below.

(A) Exemptions From Section III.G.2

Subsection III.G.2 of Appendix R requires that one train of cables and equipment necessary to achieve and maintain safe shutdown be maintained free of fire damage by one of the following means:

a. Separation of cables and equipment and associated non-safety circuits of redundant trains by a fire barrier having a 3-hour rating. Structural steel forming a part of or supporting such fire barriers shall be protected to provide fire resistence equivalent to that required of the barrier;

b. Separation of cables and equipment and associated non-safety circuits or redundant trains by a horizontal distance of more than 20 feet with no intervening combustibles or fire hazards. In addition, fire detectors and an automatic fire suppression system shall be installed in the fire area; or

c. Enclosure of cables and equipment and associated non-safety circuits of one redundant train in a fire barrier having a 1-hour rating. In addition, fire detectors and an automatic fire suppression system shall be installed in the fire area.

The licensee requests exemption from Section III.G.2 of Appendix R to the extent that it requires separation of redundant safe shutdown components by 3-hour fire rated barriers for fire areas as follows:

(1) Redundant Emergency Feedwater System Pumps and Volves (Fire Area IB–95–200)

This fire area is located on the 95 foot elevation of the Intermediate Building. It is bounded by 3-hour fire rated walls on all sides. The ceiling and floor are reinforced concrete.

This area contains the A-train motor driven and the B-train turbine driven emergency feedwater system pumps. One of the pumps is required for safe shutdown.

The pumps are separated by a partial height concrete wall. Pipes and conduits traverse the open areas above and beyond the end of the wall and an open trench passes under the wall.

Two A-train valves and cables for an A-train valve located in another fire area are exposed by the B-train pump. One of the exposed valves has a redundant valve located in another fire area.

The fuel load of oil, grease, and cable insulation corresponds to an equivalent fire severity of approximately 25 minutes.

Existing fire protection includes an area-wide ionization detection system, portable extinguishers, and one hose station.

The licensee proposes: (1) To rotate the exposed A-train valve so that its motor operator will be located behind the partial height wall with respect to the turbine driven pump; (2) to enclose the valve within a 1-hour fire rated enclosure; (3) to install automatic sprinklers throughout the fire area, except in the tendon access gallery; (3) to protect one train of redundant cables with 1-hour fire rated barriers; (4) to modify all cables traversing the space between the pumps to eliminate them as intervening combustibles; and (5) to install a steel plate across the drain trench to prevent flame propagation through the trench.

The technical requirements of Section III.G.2 are not met because redundant shutdown components are not separated by 3-hour fire rated barriers.

The concern was that a fire would damage both emergency feedwater systems. However, the area-wide detection system provides reasonable assurance that a fire anywhere in the fire area would be detected in its early stages and extinguished by the plant fire brigade before damage to redundant safe shutdown equipment occurs.

If rapid fire growth occurs prior to brigade arrival, the automatic sprinklers would operate and control or extinguish the fire.

The partial height wall separating the pumps, the valve enclosure, and the cable protection would provide passive protection and would prevent damage to these systems by flame impingement and radiant heat energy until the fire brigade arrives or the sprinkler system operates. Therefore, we have reasonable assurance that one emergency feedwater system train will be available for safe shutdown after a fire in this area.

The tendon access gallery contains negligible combustibles. Therefore, sprinkler protection is not required in

rated cable protection will provide passive protection and provide

However, because the fuel load is low, we do not expect a fire of significant

low, we do not expect a fire of significant magnitude or duration to

before significant flame propagation or temperature rise occurs, and the 1-hour

water spray systems for the charcoal filter banks.

The tendon access gallery contains negligible combustibles. Therefore, sprinkler protection is not required in this area.

Based on our evaluation, we conclude that the existing fire protection with the proposed modifications provides reasonable assurance that one train of the emergency feedwater system will be available for safe shutdown after a fire. Therefore, the exemption in Fire Area IB–95–200 is granted.

(2) Auxiliary Building Seawater Pump Room (Fire Area AB–95–3)

This fire area is located on the 95 foot elevation of the Auxiliary Building. The Seawater Pump Room is located within this fire area. The room is bounded by reinforced concrete walls, floor, and ceiling. The room has open doorways to the reactor coolant pump seal injection filter room and the nuclear service booster pump room.

Redundant shutdown equipment in the room includes the emergency nuclear services and decay heat closed cycle cooling water system pumps, the emergency nuclear services and decay heat service seawater pumps, and their associated circuits. The minimum separation distance between redundant pumps is approximately 10 feet.

Combustible materials consists of oil, grease, cable insulation, and a negligible amount of ordinary combustibles. The estimated fire severity is less than 12 minutes.

Existing fire protection consists of an ionization detection system, portable extinguishers, and one hose station.

The licensee proposes to install sprinkler protection throughout the room, except in the heat exchanger area, and to enclose one train of redundant cables in 1-hour fire rated barriers.

The technical requirements of Section III.G.2 are not met because redundant safe shutdown equipment is not separated by 3-hour fire rated barriers.

The concern was that a fire would damage redundant safe shutdown components resulting in loss of safe shutdown capability.

The detection system provides reasonable assurance that a fire in the fire area would be detected before significant flame propagation or temperature rise occurs. The fire brigade would then extinguish the fire using available equipment before redundant equipment in the Seawater Pump Room is damaged.

If fire brigade response is delayed or rapid fire growth occurs, the automatic sprinkler system would operate, resulting in fire control, reduced room temperatures, and protection of redundant equipment. The 1-hour fire rated cable protection will provide passive protection and provide reasonable assurance that one train of redundant ciruits will be maintained free of damage until the fire is extinguished.

The combustible loading in the heat exchanger area is negligible. Therefore, the absence of automatic sprinklers in this area is acceptable.

Based on our evaluation, we conclude that the existing fire protection with the proposed modifications provides reasonable assurance that one train of safe shutdown components located in the Seawater Pump Room will be available following a fire. Therefore, the licensee's request for exemption in the Seawater Pump Room is granted.

(3) Auxiliary Building Redundant Makeup Pumps (Fire Area AB–95–3)

This fire area is located on the 95 foot elevation of the Auxiliary Building. The makeup pump area is located in this area and is enclosed by reinforced concrete walls with offset open doorways at the northeast to southeast corners. The pump area is divided into three cubicles by two reinforced concete walls. The cubicles are connected by an open 3-foot wide corridor. There are ventilation exhaust ducts in the dividing walls. One cable tray traverses all three cubicles.

The ceiling in each end cubicle is 3-hour fire rated. The ceiling in the center cubicle is reinforced concrete with penetrations to the floor above.

Each cubicle contains one makeup pump and its supporting lube oil and gear oil pumps. One end pump is powered and controlled by A-train circuits, the other end pump by B-train circuits and the center pump by either A-or B-train circuits.

The equivalent fire severity per cubicle is approximately 5 minutes.

Existing fire protection consists of hose stations and portable extinguishers located adjacent to the cubicles.

The licensee propose: (1) To install ionization detectors in the makeup pump area; (2) to install automatic sprinklers in the corridor that connects the pump cubicles; (3) to seal all ceiling penetrations; (4) to install 3-hour fire rated dampers in the exhaust ducts in the dividing walls; and (5) to seal the cable tray penetrations in the dividing walls.

The technical reqirements of Section III.G.2 are not met because redundant safe shutdown components are not separated by 3-hour fire rated barriers.

We were concerned that a fire originating either outside of or within the makeup pump area would result in loss of safe shutdown capability. However, because the fuel load is low, we do not expect a fire of significant magnitude or duration to occur in the makeup area. If a fire occurs anywhere in the fire area, it would be detected by the ionization detectors and extinguished by the plant fire brigade before spreading into the makeup pump area or from the cubicle of origin.

If rapid fire growth occurs in the fire area, the cubicle walls, penetration seals, duct dampers, and corridor sprinklers provide reasonable assurance that fire damage would be limited to no more than one cubicle.

In our opinion, under these conditions, any fire would, at most, cause damage to one shutdown system, but would not propagate horizontally and damage either of the two adjacent pumps before self-extinguishing or being extinguished by the plant fire brigade.

Based on our evaluation, we conclude that the existing fire protection with the proposed modifications provides an equivalent level of safety to that achieved by compliance with Section III.G. Therefore, the licensee's request for exemption in the makeup pump cubicles is granted.

(4) Auxiliary Building Redundant Makeup System Valves (Fire Area AB–95–3)

This fire area is located on the 95 foot evaluation of the Auxiliary Building. Three redundant makeup system block valves are located in a hallway in this area. The hallway is bounded on the west by the Reactor Building and on the east by a reinforced concrete wall. There are open doorways to the north, northeast, and south. The floor and ceiling are reinforced concrete. Two small penetrations to the 119 foot elevation will be sealed.

One A-train makeup system block valve is located between and within 20 feet of two B-train valves. The fuel load in the hallway corresponds to an eqivalent fire severity of less than 2 minutes.

Existing fire protection consists of one hose station adjacent to the hallway and two portable extinguishers in the hallway.

The licensee proposes to install ionization detectors and automatic sprinklers in the hallway and to protect the A-train valve cables with 1-hour fire rated barriers.

The technical reqirements of Section III.G.2. are not met because redundant shutdown equipment is not separated by 3-hour fire rated barriers.

Our concern was that a fire would damage the redundant makeup system block valves. Because the fuel load is low, we do not expect a fire of significant magnitude or duration to occur. If a fire does occur, it would be detected by the ionization detectors and extinguished by the plant fire brigade before damaging the redundant valves. If rapid fire growth occurs, the sprinkler system will operate and control or extinguish the fire. Moreover, the 1-hour fire rated cable protection will protect the A-train valve cables until the fire brigade arrived or the sprinkler system operates. Therefore, we have reasonable assurance that loss of shutdown capability would not occur.

Based on our evaluation, we conclude that the existing fire protection with the proposed modifications provides a level of protection equivalent to the requirements of Section III.G. Therefore, the exemption for the hallway containing the makeup system valves is granted.

(5) Reactor Building Penetration Assemblies (Quadrants I and IV) (Fire Area IB–119–201)

This fire area is the 119 foot elevation of the Intermediate Building. It is bounded on all sides by 3-hour fire rated walls. The ceiling is formed by the building roof and has open vents to the outside. The floor is partially basemat and is partially over Fire Area IB–95–200.

The fire area contains Reactor Building penetration assemblies in Quadrant I that are redundant to penetration assemblies in Quadrant IV. The penetration assemblies are separated by less than 20 feet with intervening combustible cable insulation between them.

The fuel load consists of approximately 70,000 pounds of cable insulation, 3,000 pounds of Class A combustibles, and 600 pounds of plastic. This corresponds to an equivalent fire severity of approximately 60 minutes.

Existing fire protection includes area-wide ionization detectors, two hose stations, and portable extinguishers.

The licensee proposes: (1) To install automatic sprinklers throughout the fire area; (2) to enclose one train of redundant cables in the fire area in 1-hour fire rated barriers where redundant assemblies exist within the same quadrant.

The technical requirements of Section III.G.2 are not met because redundant safe shutdown equipment is not separated by 3-hour fire rated barriers.

We were concerned that an undetected, unsuppressed fire in this fire area would result in damage to redundant safe shutdown components. However, we expect he ionization detectors to detect any potential fire before significant flame propagation or temperature rise occurs, and the 1-hour fire rated barriers to provide passive protection until the fire brigade extinguishes the fire.

If rapid fire growth occurs prior to fire brigade arrival, we expect the automatic sprinklers to operate, control fire spread, and prevent damage to redundant systems.

We also expect smoke and hot gases to vent through the large open roof vents, further reducing the potential for damage to more than one shutdown division.

Based on our evaluation, we conclude that the existing fire protection with the proposed modifications provides reasonable assurance that loss of shutdown capability will not occur. Therefore, the licensee's request for exemption for the Reactor Building Penetration Assemblies, Quadrants I and IV is granted.

(B) Exemptions from Section III.G.3

If the requirements of Section III.G.2 are not met, Section III.G.3 requires that there be an alternative shutdown capability independent of the fire area of concern. It also requires that a fixed suppression system be installed in the fire area of concern if it contains a large concentration of cables or other combustibles.

(1) The Licensee Requests Exemption From Section III.G.3 of Appendix R to the Extent That it Requires the Installation of a Fixed Fire Suppression System in the Control Complex HVAC Equipment Room (Fire Area CC–164–121)

This fire area is located in the 164 foot (upper) elevation of the Control Complex. The HVAC Equipment Room is located in this fire area and is bounded by 3-hour fire rated or exterior walls. The floor is 3-hour fire rated. There is no safe shutdown equipment on the roof.

The fire area contains the HVAC equipment required to maintain the air temperature in the control room, cable spreading room, essential switchgear rooms, battery rooms, and inverter rooms within acceptable limits for safe plant shutdown.

Cumbustible materials consist primarily of charcoal in the charcoal filters. There are minor quantities of cable insulation, oil, and miscellaneous combustibles. The total fuel load of approximately 80,000 BTU/ft^2 yields an equivalent fire severity of 1 hour.

Existing fire protection includes an area-wide ionization detection system, portable extinguishers, and automatic water spray systems for the charcoal filter banks.

To ensure that the areas within the Control Complex containing safe shutdown equipment will be cooled adequately if this existing HVAC system is disabled by fire, a separate dedicated system is being provided. This system will be located in another fire area.

The technical requirements of Section III.G.3 are not met in this fire area because of the lack of a complete fixed fire suppression system.

We were concerned that a fire would disable the HVAC system, resulting in loss of cooling to safe shutdown equipment in the Control Complex such that safe shutdown could not be achieved and maintained.

The principal fire hazards are the charcoal filters. Each filter bank is protected by an automatic water spray system consistent with the requirements of Regulatory Guide 1.52. Therefore, we expect any fire in the filters to be controlled by these systems. The water flow alarm will initiate fire brigade response resulting in extinguishment before the fire spreads from the filter involved.

We also expect any fire originating outside of the filters to be detected during its early stages by the area-wide detection system and extinguished by the fire brigade before damage to redundant equipment occurs.

If any fire disables the Control Complex HVAC system, the alternate ventilation cooling system will be used to cool the safe shutdown equipment located in the Control Complex that is required to achieve and maintain safe shutdown.

Based on our evaluation, we conclude that the existing fire protection with the proposed modifications provides an equivalent level of safety to that achieved by compliance with Section III.G. Therefore, the licensee's request for exemption in the Control Complex HVAC Room is granted.

IV

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, an exemption is authorized by law and will not endanger life or property or common defense and security and is otherwise in the public interest and hereby grants an exemption from the requirements of Sections III.G.2 and III.G.3 of Appendix R to 10 CFR Part 50 to the extent discussed in Section III above.

Pursuant to 10 CFR 51.32, the Commission has determined that the issuance of the exemption will have no

significant impact on the environment (50 FR 29005).

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[File No. 22-13458]

Application and Opportunity for Hearing; ITT Financial Corp.

July 23, 1985

Notice is Hereby Given that ITT Financial Corporation (the "Company") has filed an application pursuant to clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding by the Commission that the trusteeship of BankAmerican Trust Company of New York under an Indenture of the Company dated as of July 1, 1983, which was heretofore qualified under the Act, relating to debt securities to be issued thereunder by the Company from time to time, and a supplement thereto dated November 15, 1984 (as supplemented, the "Shelf Indenture"), under which the Company issued its 11-⅜% Senior Notes due November 15, 1987 (the "Notes"), and Indenture dated as of June 15, 1976 between the Company and Manufacturers Hanover Trust Company ("MHT"), which was heretofore qualified under the Act, relating to the Company's 9-⅝% Senior Debentures Due June 15, 1996 (the "Debentures") for which BATNY accepted the successor trusteeship from MHT on December 28, 1983 ("1976 Indenture"), is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify BATNY from acting as Trustee under the Shelf Indenture and the 1976 Indenture (collectively, the "Indentures").

Section 310(b) of the Act, the provisions of which are among the provisions of the Indentures, provides in part if a trustee under an indenture qualified under the Act has or shall acquire any conflicing interest (as defined in such section), it shall, within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of this section provides, with certain exceptions stated therein, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is a trustee under another indenture under which any other securities, or certificates of interest, or participation in any other securities of the same issuer are outstanding. However, pursuant to clause (ii) of subsection (1), there may be excluded from the operation of this provision another indenture or other indentures under which other securities of such obligor are outstanding if the issuer shall have sustained the burden of proving, on application to the Commission, and after opportunity for hearing thereon, that trusteeship under the qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under any such indentures.

The effect of the proviso contained in clause (ii) of section 310(b)(1) of the Act on the matter of the present application is such that the Shelf Indenture may be excluded from the operation of Section 310(b)(1) of the Act with respect to the 1976 Indenture if the Company shall have sustained the burden of proving by application of the Commission and after opportunity for hearing thereon, that the trusteeship of BATNY under the Shelf Indenture and under the 1976 indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest of for the protection of investors to disqualify BATNY from acting as trustee thereunder.

The Company alleges that:

(1) As of October 31, 1984, the Company had outstanding $43,719,000 aggregate principal amount of Debentures. The Debentures were registered under the Securities Act of 1933 (Registration No. 2-56275) and the indenture was qualified under the Trust Indenture Act of 1939 with MHT as trustee.

(2) Effective December 28, 1983, MHT resigned as trustee under the 1976 Indenture and BATNY became trustee;

(3) To date, no debt securities other than the Notes have been issued under the Shelf Indenture;

(4) The Notes and other debt securities issued or to be issued from time to time under the Shelf Indenture were registered under the Securities Act of 1933 (Registration No. 2-85022) and the Shelf Indenture was qualified under the Trust Indenture Act of 1939;

(5) The Shelf Indenture and the 1976 Indenture are wholly unsecured, and rank *pari passu inter se*;

(6) The Company's obligation to make payments on the Notes and other debt securities issued or issuable under the Shelf Indenture is not or will not be superior or inferior in right of payment to the Company's obligation to make payments on the Debentures;

(7) The Company is not in default under the Shelf Indenture or the Notes;

(8) The Company is not indefault under 1976 Indenture or the Debentures; and;

(9) Such differences as exist between the Shelf Indenture and the 1976 Indenture are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify BATNY from acting as trustee thereunder.

The Company waives notice of hearing and waives hearing and waives any and all rights to specify procedures under the Rules of Practice of the Securities and Exchange Commission in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application, File No. 22-13458, which is on file in the offices of the Commission's Public Reference Section, 450 5th Street NW., Washington, DC 20549.

Notice is further given that any interested person may, not later than August 19, 1985, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of law or fact raised by the application which he desires to controvert or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: John Wheeler, Secretary, Securities and Exchange Commission, Washington, DC 20549. At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest, or in the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Midwest Stock Exchange, Inc.

July 23, 1985.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Monarch Capital Corporation
Common Stock, $1.00 Par Value (File No. 7-8517)
Intelogic Trace, Inc.
Common Stock, No Par Value (File No. 7-8518)
Castle Industries, Inc.
Common Stock, $0.10 Par Value (File No. 7-8519)
Direct Action Marketing
Common Stock, $0.01 Par Value (File No. 7-8520)
Superior Surgical Manufacturing Company
Common Stock $1.00 Par Value (File No. 7-8521)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before August 14, 1985, written data, views and agruments concerning the above-referenced applications. Persons desiring to make written comments should file three copies therefor with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretory.

[FR Doc. 85-17927 Filed 7-26-85; 8:45 am]

BILLING CODE 8010-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Notice of Section 22 Tobacco Investigation Decision

On February 15, 1985, the International Trade Commission (USITC) submitted a report to the President on its investigation of certain tobacco under section 22 of the Agricultural Adjustment Act of 1933, as amended. The USITC found that tobacco imports did not materially interfere with the price support and production adjustment assistance programs of the U.S. Department of Agriculture (USDA). Therefore, the USITC report does not provide a basis for finding that import restrictions should be imposed under section 22 of the Agricultural Adjustment Act.

The USITC tobacco investigation was instituted on September 10, 1984, to determine whether flue-, fire-, and dark air-cured tobacco, in unmanufactured form, provided for in items 170.20, 170.25, 170.32, 170.35, 170.40, 170.45, 170.50, 170.60, and 170.80 of the Tariff Schedules of the United States, are practically certain to be imported under such conditions and in such quantities as to materially interfere with the tobacco price support and production adjustment programs administered by the USDA.

In view of the investigation and report by USITC, the Administration will take no further action regarding the Section 22 investigation of tobacco imports.

C. Michael Hathaway,

Deputy General Counsel.

[CM-8-870]

Shipping Coordinating Committee; Committee on Ocean Dumping; Meeting

The Committee on Ocean Dumping, a subcommittee of the Shipping Coordinating Committee, will hold an open meeting at 9:30 a.m. on Tuesday, August 13, 1985, in room 2409 (Mall) Waterside Mall, Environmental Protection Agency, 401 M Street SW., Washington, D.C.

The purpose of the meeting is to review and discuss the agenda and related U.S. positions for the Ninth Consultative Meeting of Contracting Parties to the Convention on the Prevention of Marine Pollution by Dumping of Waste and Other Matter (London Dumping Convention), to be held in London on September 23-27, 1985.

For further information contact Ms. Norma Hughes, Executive Secretary, Committee on Ocean Dumping (WH-556M), Environmental Protection Agency, Washington, D.C. 20460. Telephone: (202) 755-2927.

The Chairman will entertain comments from the public as time permits.

Samuel V. Smith,

Executive Secretary Shipping Coordinating Committee.

July 25, 1985.

Federal Aviation Administration

Radio Technical Commission for Aeronautics (RTCA); Special Committee 157—User-Selectable Navigational Data Base; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of RTCA Special Committee 157 on User-Selectable Navigational Data Base to be held On August 14-16, 1985 in the RTCA Conference Room, One McPherson Square, 1425, K Street, NW., Suite 500, Washington, D.C. commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks: (2) Approval of Minutes of Meeting Held on March 19-21, 1985; (3) Review Draft Report of Working Group on Processing and Documentation; (4) Review Draft Report of Working Group on Source Enhancements: (5) Other Business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, D.C. 20005; (202) 682-0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, D.C. on July 17, 1985.

Karl F. Bierach,
Designated Officer.

[Summary Notice No. PE-85-19]

Petition for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before: August 19, 1985.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Petition Docket No. ——, 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-204), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 426-3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C., on July 22, 1985.

John H. Cassady,
Assistant Chief Counsel, Regulations and Enforcement Division.

PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought
24644	Federal Express Corporation	14 CFR 121.523 and 121.643	To allow petitioner to operate under domestic air carrier rules regarding alternate airport requirements and fuel reserves.
24658	Midstate Airlines	14 CFR 135.293 and 135.297	To allow petitioner to use an approved Line Oriented Flight Training Program, instead of the specified Part 135 requirements.
21397	Flight Safety International	14 CFR 135.303 and 135.337(a)(3)	To allow petitioner to use approved petitioner's motion base visual simulators instead of aircraft to evaluate the check pilot status described.
24662	Albuquerque International Balloon Fiesta, Inc.	14 CFR 61.3 and 91.27	To allow certain pilots and foreign balloons to participate in the 14th Annual Albuquerque International Balloon Fiesta during the period of October 5-13, 1985, without complying with the pilot certification and airworthiness requirement of these sections.
12638	Air Transport Association of America	14 CFR 121.99 and 121.351(a)	Renewal of exemption to allow petitioner, Eastern Airlines and Pan American World Airways to dispatch, with single HF, on certain oceanic routes between the northeastern United States and the San Juan, P.R., ARTCC.
24708	Avco Lycoming, Williamsport Division	14 CFR 21.181	To allow petitioner to operate certain aircraft utilizing the provisions of a minimum equipment list.
24691	Hilton Hotels Corp.	14 CFR 21.181	To allow petitioner to operate certain aircraft utilizing the provisions of a minimum equipment list.
24698	Warner-Lambert Co.	14 CFR 21.181	To allow petitioner to operate certain aircraft utilizing the provisions of a minimum equipment list.

PETITIONS FOR EXEMPTION—Continued

Docket No.	Petitioner	Regulations affected	Description of relief sought
23644	Dow Chemical U.S.A.	14 CFR 21.181	To allow petitioner to operate certain aircraft utilizing the provisions of a minimum equipment list.
24682	Consolidated Gas Transmission Corp.	14 CFR 21.181	To allow petitioner to operate certain aircraft utilizing the provisions of a minimum equipment list.
24649	Interstate Airlines	14 CFR 121.407(c)(1)	To allow petitioner to use a Simulator Training, Inc. Lockheed Electra (L-188) training device for certain training and checking maneuvers and procedures allowed under the Non-Visual Simulator Classification of Appendices "E" and "F".
24647	Basler Flight Service, Inc.	14 CFR 121.9	To allow petitioner to operate under, SFAR 38-2 and Part 121 of the FAR, certain DC-3 non-transport category airplanes having a maximum payload capacity of 7,500 pounds or less.
22416	Empire Airlines, Inc.	14 CFR 121.371(a) and 121.378	Renewal of exemption to allow Braathens S.A.F.E. to perform maintenance and alterations outside of the U.S. on petitioner's aircraft.

DISPOSITIONS OF PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought disposition
24145-1	Dominicana de Aviaction C. POR A.	14 CFR 91.303	To allow petitioner to operate one Stage 1 Boeing 707-300 aircraft until hush kits are installed. *Granted 7/3/85.*
24579	Dallah AVCO Trans Arabia	14 CFR 91.303	To allow petitioner to operate a Stage 1 Boeing 707-123B aircraft for a brief time of no more than four weeks duration sometime during the period June through September 1985. *Denied 7/1/85.*
24333-1	ZAS Airline of Egypt	14 CFR 91.303	To allow petitioner to operate one Stage one Boeing 707-300 aircraft at U.S. airports. *Denied 7/1/85.*
24580	Balair AG	14 CFR 91.303	To allow petitioner to operate a Stage 1 DC-8-63 aircraft at Stewart International Airport for a flight on or about November 1, 1985, and December 6, 1985. *Denied 7/1/85.*
24248-1	Transbrasil S.A. Linhas Aereas	14 CFR 91.303	To exempt petitioner from the January 1, 1985, noise level compliance date. *denied 7/1/85.*
23883	Florida Express, Inc.	14 CFR 91.307	To amend Exemption No. 3116b to add 1 aircraft. The present exemption allows operation in the United States, under a service to small communities exemption, of specified two-engine airplanes, identified by registration and serial number, that have not been shown to comply with the applicable operating noise limits as follows: Until not later than January 1, 1988 BAC 1-11: N1543, N1544, N1545, N1549, N1548, N1135J, N1136J. *Granted 6/21/85.*
24326-1	Hawaiian Airlines	14 CFR 91.303	To exempt petitioner from the January 1, 1985, noise level compliance date. *Partial Grant 6/28/85.*
23996-1	Zantop	14 CFR 91.303	To exempt petitioner from the January 1, 1985, noise level compliance date. *Granted 7/8/85.*
24421-1	Samoa Airlines	14 CFR 91.303	To exempt petitioner from the January 1, 1985, noise compliance date. *Denied 7/11/85.*
24372-1	Lan-Chile	14 CFR 91.303	To exempt petitioner from the January 1, 1985, noise level compliance date. *Denied 7/19/85.*

BILLING CODE 4910-13-M

Updated Report of the Fleet Status and Compliance Plans of U.S. Domestic Aircraft Operators

AGENCY: Federal Aviation Administration (FAA), DOT.

SUMMARY: The table below summarizes the U.S. fleet noise compliance status as of January 1, 1977 approximately the date the noise compliance regulation was issued), the status as of April 1, 1980, January 1, 1981, January 1, 1982, January 1, 1983 and July 1, 1985. When the regulation was issued, slightly over 20 percent of the U.S. fleet met the FAA noise standards. As of July 1, 1985, 88.7 percent of the fleet complies.

Discussion: In December 1976, the FAA issued Subpart E of Part 91 of the Federal Aviation Regulations (14 CFR Part 91) which prescribes noise limits for U.S. registered, civil subsonic turbojet airplanes with maximum weights over 75,000 pounds and having standard airworthiness certificates. These requirements prohibit domestic operation in the United States of affected airplanes after specified dates, with full compliance required by January 1, 1985.

In November 1980, the FAA issued a final rule (adopting Title III of the Aviation Safety and Noise Abatement Act of 1979) to extend these same noise compliance requirements to all operators of affected aircraft in the United States, whether U.S. or foreign registered. This rule also provided for exemptions to extend the compliance deadline for two-engine airplanes (DC-9, Boeing 737, BAC 1-11 and SE-210) to January 1, 1985 (for over 100 seats) or to January 1, 1988 (for 100 or fewer seats) as protection for small community service.

To ensure that all domestic operators took appropriate steps to meet the noise compliance requirements, the FAA amended 14 CFR Part 91 in December 1979 to require the operators of affected turbojet airplanes to provide the current status of their fleets and their plans for achieving timely and continuing compliance. The first summary report on Fleet Noise Compliance was published on July 17, 1980 (45 FR 48011), the second on August 8, 1981 (46 FR 40126), the third on July 8, 1982 (47 FR 29754), and the fourth on May 12, 1983 (48 FR 21408). This report is an update to that publication.

Since January 1, 1985, non-noise compliant airplanes in the U.S. are operating under one of the following exemptions. As of July 1, 1985, small community service exemptions for 278 U.S. registered two-engine airplanes are in effect. The small communities exemptions for two-engine airplanes extend the compliance date to January 1, 1988. Under the Aviation Safety and Noise Abatement Act of 1979, general exemptions have been issued to operators, both foreign and U.S., that meet certain criteria. Also, section 124 of Pub. L. 96-473 exempts certain operators to operate on international flights out of Miami International and Bangor International Airports. Both of these types of exemptions are also time limited and have certain other restrictions placed on them, such as

number of aircraft and number of operations. The exempted aircraft are specified by registration and serial number and their exemptions expire on the scheduled date of "hush kit" installation.

FOR FURTHER INFORMATION CONTACT: Mr. Richard N. Tedrick, Manager, Noise Policy and Regulatory Branch, AEE-110, Noise Abatement Division, Office of Environment and Energy, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, Telephone: (202) 755-9027.

Issued in Washington, D.C., on July 22, 1985.

John E. Wesler,

Director of Environment and Energy.

BILLING CODE 4910-13-M

National Highway Traffic Safety Administration

[Docket No. IP85-12; Notice 1]

Sumitomo Rubber Industries, Ltd.; Receipt of Petition for Determination of Inconsequential Noncompliance

Sumitomo Rubber Industries, Ltd., of Kobe, Japan, has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) for a noncompliance with 49 CFR 571.109, Motor Vehicle Safety Standard No. 109, "New Pneumatic Tires—Passenger Cars." The basis of the petition is that the noncompliance is inconsequential as it relates to motor vehicle safety.

This notice of receipt of a petition for a determination of inconsequentiality is published in accordance with section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417), and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Paragraph § 4.3(e) of Standard No. 109 requires that the sidewall of each tire be labeled with the actual number of plies in the sidewall and the actual number of plies in the tread area, if different. Sumitomo produced 6,821 SC675 White Slim Line passenger car tires, size designation P215/75R14, where the actual number of plies in the tread area was mistakenly labeled as "4" plies instead of "6" plies. The incorrect labeling indicates "TREAD 4 PLIES 2 POLYESTER +2 STEEL +2 NYLON" whereas the correct labeling should indicate "TREAD 6 PLIES 2 POLYESTER +2 STEEL +2 NYLON". The tires were manufactured during the period from October 16, 1983 through June 9, 1985.

Sumitomo has impounded 509 of the tires in its possession and all recovered tires were rebranded with the correct information of "6 PLIES". Of the remaining tires, 5,860 were shipped to the United States, 216 to Puerto Rico, and 236 to Canada. Therefore, this petition affects 6,076 passenger car tires shipped to jurisdictions covered by the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*).

Sumitomo argues that the noncompliance is inconsequential because the failure to label properly has no impact on motor vehicle safety and the tires otherwise comply with Standard No. 109.

Interested persons are invited to submit written data, views and arguments on the petition of Sumitomo Rubber Industries, Ltd., described above. Comments should refer to the docket number and be submitted to Docket Section, Room 5109, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice will be published in the **Federal Register** pursuant to the authority indicated below.

The engineer and attorney primarily responsible for this notice are Art Casanova and Taylor Vinson, respectively.

Comment closing date: August 28, 1985.

(Section 102, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on July 24, 1985.

Barry Felrice,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

VETERANS ADMINISTRATION

Agency Form Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

The Veterans Administration has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Ch. 35). This document contains a revision and lists the following information: (1) The department or staff office issuing the form, (2) the title of the form, (3) the agency form number, if applicable, (4) how often the form must be filled out, (5) who will be required or asked to report, (6) an estimate of the number of responses, (7) an estimate of the total number of hours needed to fill out the form, and (8) an indication of whether section 3504(h) of Pub. L. 96-511 applies.

ADDRESSES: Copies of the form and supporting documents may be obtained from Patricia Viers, Agency Clearance Officer (732), Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 389-2146. Comments and questions about the items on the list should be directed to the VA's OMB Desk Officer, Dick Eisinger, Office of Management and Budget, 726 Jackson Place, NW, Washington, DC 20503, (202) 395-7316.

DATES: Comments on the information collection should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: July 17, 1985.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

BILLING CODE 8320-01-M

Privacy Act of 1974; Report of New Matching Program

AGENCY: Veterans Administration.

ACTION: Notice of Matching Program—Veterans Administration Records of Physicians and Dentists/Federal, State, Local and Private Income and Payment Records.

SUMMARY: The Veterans Administration (VA) is providing notice that the Office of Inspector General (OIG) will conduct a series of computer matches of VA records of physicians and dentists with Federal, State, local and private income and payment records.

The goal of these matches is to identify full-time physicians and dentists who may have engaged in unauthorized outside professional activities, or received unreported remuneration for their outside professional activities.

DATES: It is anticipated the matches will commence in July 1985.

ADDRESS: Interested individuals may comment on the proposed matches by writing to the Assistant Inspector General for Policy, Planning and Resources (53) Veterans Administration, 810 Vermont Avenue NW, Washington, DC 20420.

FOR FURTHER INFORMATION CONTACT: Mr. Jack H. Kroll, Assistant Inspector General for Policy, Planning and Resources (53), Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 389-5297.

SUPPLEMENTARY INFORMATION: Further information regarding the matching program is provided below. This information is required by paragraph 5.f.(1) of the Revised Supplemental Guidance for Conducting Matching Programs, issued by the Office of Management and Budget (47 FR 21656, May 19, 1982). A copy of this notice has been provided to both Houses of Congress and the Office of Management and Budget.

Approved: July 19, 1985.

By Direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

Report of Matching Program

Veterans Administration Records of Physicians and Dentists/Federal, State, Local and Private Income and Payment Records.

a. Authority

The Inspector General Act of 1978, Public Law 95-452.

b. Program Description

(1) *Purpose:* Title 38, United States Code, section 4108, restricts the outside professional activities of physicians and dentists employed full-time by the Veterans Administration (VA). These employees are required to obtain VA approval before assuming responsibility for the care of non-VA patients, teaching or providing consultative or professional service to communities. It is VA policy that remuneration for permitted outside professional activities must be reported annually. (Department of Medicine and Surgery Supplement to VA Manual MP-5, Part II, Chapter 13.)

(2) *Procedures:* The VA Office of Inspector General (OIG) plans to match the social security number of physicians and dentists who are employed full-time by the VA, with the records of the following:

(i) Payment records of the Office of Civilian Health and Medical Programs of the Unified Services (CHAMPUS), Department of Defense.

(ii) State and local employment security, wage or tax records.

(iii) Payment records of independent insurance carriers (private, commercial organizations processing medical claims).

It is planned that the OIG will initially match VA records with the employment security (unemployment compensation), wage or tax records of the States of Pennsylvania and Maryland. Subsequent matches with other States or local agencies will be conducted as resources and approval by the agencies concerned permit. For the purpose of this matching program, the term "State" also includes the District of Columbia and the Commonwealth of Puerto Rico.

If the match with CHAMPUS records demonstrates the effectiveness of matching VA records with other Federal programs to detect unauthorized activities, the Inspector General may direct that additional matches with other Federal agencies be conducted under this program.

These matches will be performed by the VA OIG and may be cyclical or may be repeated periodically. In certain instances when the laws of a particular jurisdiction preclude an organization from providing automated records to the OIG for matching purposes, the OIG will provide a copy of VA records containing only social security numbers to the organization concerned to conduct the match.

In the event of a "hit", i.e., the determination through a computer match that an organization may have information that indicates a full-time VA physician or dentist has engaged in outside professional activities or has received remuneration for outside professional activities, the identity of the individual will be confirmed and the OIG may request further information. When necessary for this purpose, the OIG may release additional identifying data from VA records to the organization holding the matching records. This additional identifying data may consist of name, date of birth, place of birth, sex, etc. The OIG will confirm the identity of individuals whom the matches indicate have engaged in unauthorized outside professional activities or have accepted

remuneration which has not been reported. Information from the matches

d. Period of Match

files previously agreed to; that it will not

Sunshine Act Meetings

VOL 50 ISS 145 JL 29 1985 UMI

remuneration which has not been reported. Information from the matches which has been verified will be reported to the Chief Medical Director of the VA for consideration of follow-up action. Where there are reasonable grounds to believe there has been a violation of criminal law, the matter will be investigated and referred for prosecutive consideration.

c. Records to be Matched

Lists extracted from the following system of records will be matched with Federal, State, local and private income and payment records:

Personnel and Accounting Pay System—VA (27VA047) (Private Act Issuances, 1982/83 Comp., Vol. V, pp. 1150–1160).

The disclosure of information from this system of records for the purpose of computer matching programs is permitted by a published routine use.

d. Period of Match

Intermittently from approximately July 1985.

e. Safeguards

Records used in the matches and data generated as a result, will be safeguarded from unauthorized disclosure. Access will be limited to those persons who have a need for the information in order to conduct the matches or follow-up actions. All of the material will be stored in locked containers when not in use. Prior to releasing any information from the VA system of records to a State or local agency or to an independent insurance carrier, the OIG will obtain a written agreement from the matching organization specifying that the matching file will remain the property of the VA and will be returned to the OIG or destroyed upon completion of the match, as appropriate; that it will be used and accessed only to match the files previously agreed to; that it will not be used to extract information concerning "non-hit" individuals for any purpose; and that it will not be duplicated or disseminated within or outside the matching organization unless authorized by the VA OIG.

f. Retention and Disposition

Records not resulting in "hits" will be destroyed by burning, shredding or electronic erasing within 6 months of the completion of the individual match. Records resulting in "hits" will be retained by either the OIG or the Department of Medicine and Surgery until the completion of any necessary administrative or legal action and will then be disposed of in accordance with approved records control schedules and/or approved disposition authority from the Archivist of the United States.

Sunshine Act Meetings

Federal Register
Vol. 50, No. 145
Monday, July 29, 1985

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONTENTS

	Item
Consumer Product Safety Commission	1
Federal Deposit Insurance Corporation	2
Federal Home Loan Bank Board	3
Synthetic Fuels Corporation	4
Interstate Commerce Commission	5

1

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: 9:30 a.m., Wednesday, July 31, 1985.

LOCATION: Third Floor Hearing Room, 1111–18th Street, NW., Washington, D.C.

STATUS:

MATTERS TO BE CONSIDERED:

Open to the Public

1. Fire Toxicity: Status

The staff will brief the Commission on the status of the priority project on Fire Combustion Toxicity.

Closed to the Public

2. Enforcement Matter OS# 4665

The Commission and staff will discuss Enforcement Matter OS# 4665.

FOR A RECORDED MESSAGE CONTAINING THE LATEST AGENDA INFORMATION, CALL: (301) 492–5709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Ave., Bethesda, Md. 20207, (301) 492–6800.

Sheldon D. Butts,
Deputy Secretary.
July 25, 1985.

2

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given at 7:00 p.m. on Tuesday, July 23, 1985, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to:

(A)(1) receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in the First National Bank of Onaga, Onaga, Kansas, which was closed by the Acting Comptroller of the Currency on Tuesday, July 23, 1985; (2) accept the bid for the transaction submitted by First National Bank of Onaga, Onaga, Kansas, a *de nova* bank; and (3) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction; and

(B)(1) receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in First National Bank of Glenrock, Glenrock, Wyoming, which was closed by the Acting Comptroller of the Currency on Tuesday, July 23, 1985; (2) accept the bid for the transaction submitted by National Bank of Glenrock, Glenrock, Wyoming, a *de nova* bank; (3) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction.

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director H. Joe Selby (Acting Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: July 24, 1985.
Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

SYNTHETIC FUELS CORPORATION

Board of Directors

SUMMARY: Interested members of the public are advised that a meeting of the Board of Directors of the United States Synthetic Fuels Corporation will be held at the time, date and place specified below. This public announcement is made pursuant to the open meeting requirements of section 116(f)(1) of the Energy Security Act (94 Stat. 611, 637; 42 U.S.C. 8701, 8712(f)(1)) and Section 4 of the Corporation's Statement of Policy on Public Access to Board meetings.

MATTERS TO BE CONSIDERED:

Open Session

I. Call to Order
II. Board Minutes
III. Consideration of Award of Financial Assistance to the Great Plains Project

TIME AND DATE: 3:15 p.m., July 30, 1985.

PLACE: 2121 K Street, NW. Room 503 Washington, D.C. 20586.

PERSON TO CONTACT FOR MORE INFORMATION: If you have any questions regarding this meeting, please contact Ms. Karen Hutchison, Director-Media Relations, at (202) 822–6455.

United States Synthetic Fuels Corporation.
March Coleman,
Assistant General Counsel Corporate & Litigation.
July 25, 1985.

Part II

Environmental Protection Agency

Water Quality Criteria; Availability of Documents; Notice

VOL 50 ISS 145 JL 29 1985 UMI

ENVIRONMENTAL PROTECTION AGENCY

[OW-FRL-2871-6]

Water Quality Criteria; Availability of Documents

AGENCY: Environmental Protection Agency.

ACTION: Notice of final ambient water quality criteria documents.

SUMMARY: EPA announces the availability and provides summaries of nine ambient water quality criteria documents and national guidelines for criteria development. These criteria are published pursuant to section 304(a)(1) of the Clean Water Act. These water quality criteria may form the basis for enforceable standards.

Availability of documents: This notice contains: (1) Summaries of nine documents containing final ambient water quality criteria for the protection of aquatic organisms and their uses, (2) a summary of changes in the document entitled "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" (which is an updated and revised version of the Guidelines previously published at 45 FR 79341; November 28, 1980), and (3) responses to public comments on the Guidelines. Copies of the complete criteria documents and the revised Guidelines may be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161 (phone number [(703) 487-4650). A list of the NTIS publication order numbers for all 10 documents is published below. These documents are also available for public inspection and copying during normal business hours at: Public Information Reference Unit, U.S. Environmental Protection Agency, Room 2404 (rear), 401 M Street SW., Washington, D.C. 20460. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services. Copies of these documents are also available for review in the EPA Regional Office libraries. Copies of the documents are *not* available from the EPA office listed below. Requests sent to that office will be forwarded to NTIS or returned to the sender.

1. Ambient Water Quality Criteria for Ammonia—EPA 440/5-84-001; NTIS Number PB85-227114
2. Ambient Water Quality Criteria for Arsenic—EPA 440/5-84-033; NTIS Number PB85-227445
3. Ambient Water Quality Criteria for Cadmium—EPA 440/5-84-032; NTIS Number PB85-227031
4. Ambient Water Quality Criteria for Chlorine—EPA 440/5-84-030; NTIS Number PB85-227429
5. Ambient Water Quality Criteria for Chromium—EPA 440/5-84-029; NTIS Number PB85-227478
6. Ambient Water Quality Criteria for Copper—EPA 440/5-84-031; NTIS Number PB85-227023
7. Ambient Water Quality Criteria for Cyanide—EPA 440/5-84-028; NTIS Number PB85-227460
8. Ambient Water Quality Criteria for Lead—EPA 440/5-84-027; NTIS Number PB85-227437
9. Ambient Water Quality Criteria for Mercury—EPA 440/5-84-026; NTIS Number PB85-227452
10. Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses. NTIS Number PB85-227049.

FOR FURTHER INFORMATION CONTACT: Dr. Frank Gostomski, Criteria and Standards Division (WH-585), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202) 245-3030.

SUPPLEMENTARY INFORMATION:

Background

Section 304(a)(1) of the Clean Water Act (33 U.S.C. 1314(a)(1)) requires EPA to publish and periodically update ambient water quality criteria. These criteria are to reflect the latest scientific knowledge on the identifiable effects of pollutants on public health and welfare, aquatic life, and recreation.

EPA has periodically issued ambient water quality criteria, beginning in 1973 with publication of the "Blue Book" (Water Quality Criteria 1972). In 1976, the "Red Book" (Quality Criteria for Water) was published. On November 28, 1980 (45 FR 79318) and February 15, 1984 (49 FR 5831), EPA announced the publication of 65 individual ambient water quality criteria documents for pollutants listed as toxic under section 307(a)(1) of the Clean Water Act.

Today EPA is announcing the availability of nine individual water quality criteria documents which update and revise certain criteria previously published in the "Red Book" and in the 1980 ambient water quality criteria documents. The criteria documents for ammonia and chlorine replace criteria previously published in the 1976 "Red Book." The criteria documents for arsenic, cadmium, chromium, copper, cyanide, lead, and mercury replace the aquatic life criteria previously published in the 1980 ambient water quality criteria documents. Draft criteria documents were made available for public comment on February 7, 1984 (49 FR 4551). These final criteria have been derived after consideration of all comments received.

Dated: July 19, 1985.

Edwin C. Johnson,

Acting Assistant Administrator for Water.

Appendix A—Summary of Water Quality Criteria

1. Ammonia

Freshwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of ammonia does not exceed the recommended criterion more than once every three years on the average and if the one-hour average concentration does not exceed the recommended criterion more than once every three years on the average.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to ammonia exceeds the criterion. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

To protect freshwater aquatic life, the criteria for ammonia (in mg/liter un-ionized NH_3) are based upon ambient water temperature and pH with one-hour and four-day average concentrations provided. Criterion concentratons for the pH range 6.5 to 9.0 and the temperature range 0 °C to 30 °C are provided in the following tables. Total ammonia concentrations equivalent to each un-ionized ammonia concentration are also provided in these tables. There is limited data on the effect of temperature on chronic toxicity. EPA will be conducting additional research on the effects of temperature on ammonia toxicity in order to fill perceived data gaps. Because of this uncertainty, additional site-specific information should be developed before these criteria are used in wasteload allocation modelling. For example, the chronic criteria tabulated for non-salmonids at temperatures much below 20 °C are less certain than those tabulated at temperatures near 20 °C. Where the treatment levels needed to meet these criteria below 20 °C may be substantial, use of site-specific criteria is strongly suggested. Development of such criteria should be based upon site-specific toxicity tests.

*To convert these values to mg/liter N, multiply by 0.822.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the critierion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. The Agency acknowledges that the CCC stream flow averaging period used for steady-state wasteload allocation modelling may be as long a 30 days in situations involving POTWs designed to remove ammonia where limited variability of effluent pollutant concentration and resultant concentrations in receiving waters can be demonstrated.

In cases where low variability can be demonstrated, longer averaging periods for the ammonia CCC (e.g., 30-day averaging periods) would be acceptable because the magnitude and duration of exceedences above the CCC would be sufficiently limited. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

[1] To convert these values to mg/liter N, multiply by 0.822.
[2] Site-specific criteria development is strongly suggested at temperatures above 20°C because of the limited data available to generate the criteria recommendation, and at temperatures below 20°C because of the limited data and because small changes in the criteria may have significant impact on the level of treatment required in meeting the recommended criteria.

Saltwater Aquatic Life

Data available for saltwater species are insufficient to derive a criterion for saltwater.

2. Arsenic

Freshwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of arsenic(III) does not exceed 190 $\mu g/1$ more than once every three years on the average and if the one-hour average concentration does not exceed 360 $\mu g/1$ more than once every three years on the average.

EPA believes that a measurement such as "acid-soluble" would provide a more scientifically correct basis upon which to establish criteria for metals. The criteria were developed on this basis. However, at this time, no EPA approved methods for such a measurement are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a measurement such as "acid-soluble". Until available, however, EPA recommends applying the criteria using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be analyzed directly because the total recoverable method does not distinguish between individual oxidation states, and (2) these criteria may be overly protective when based on the total recoverable method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to arsenic(III) exceeds the criterion. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

Not enough data are available to allow derivation of numerical national water quality criteria for freshwater aquatic life for inorganic arsenic(V) or any organic arsenic compound. Inorganic arsenic(V) is acutely toxic to freshwater aquatic animals at concentrations as low as 850 $\mu g/1$, and an acute-chronic ratio of 28 was obtained with the fathead minnow. Arsenic(V) affected freshwater aquatic plants at concentrations as low as 48 $\mu g/1$. Monosodium methanearsenate (MSMA) is acutely toxic to aquatic animals at concentrations as low as 1,900 $\mu g/1$ but no data are available concerning chronic toxicity to animals or toxicity to plants.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 ro 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

Saltwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, saltwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of arsenic(III) does not exceed 36 $\mu g/1$ more than once every three years on the average and if the one-hour average concentration does not exceed 69 $\mu g/1$ more than once every three years on the average.

EPA believes that a measurement such as "acid-soluble" would provide a more scientifically correct basis upon which to establish criteria for metals. The criteria were developed on this basis. However, at this time, no EPA approved methods for such a measurement are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a measurement such as "acid-soluble". Until available, however, EPA recommends applying the criteria using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be analyzed directly because the total recoverable method does not distinguish between individual oxidation states, and (2) these criteria may be overly protective when based on the total recoverable method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to arsenic(III) exceeds the criterion. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

Very few data are available concerning the toxicity of any form of arsenic other than inorganic arsenic(III) to saltwater aquatic life. The available data do show that inorganic arsenic(V) is acutely toxic to saltwater animals at concentrations as low as 2,319 $\mu g/1$ and affected some saltwater plants at 13 to 56 $\mu g/1$. No data are available concerning the chronic toxicity of any form of arsenic other than inorganic arsenic(III) to saltwater aquatic life.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steadystate models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

3. Cadmium

Freshwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration (in $\mu g/l$) of cadmium does not exceed the numerical value given by $e^{(0.7852[\ln(\text{hardness})]-2.490)}$ more than once every three years on the average and if the one-hour average concentration in ($\mu g/l$) does not exceed the numerical value given by $e^{(1.128[\ln(\text{hardness})]-3.828)}$ more than once every three years on the average. For example, at hardnesses of 50, 100 and 200 mg/l as $CaCo_3$ the four-day average concentrations of cadmium are 0.66, 1.1 and 2.0 $\mu g/l$, respectively, and the one-hour average concentrations are 1.8, 3.9 and 8.6 $\mu g/l$. If brook trout, brown trout, and striped bass are as sensitive as some of the data indicate they might not be protected by this criterion.

EPA believes that a measurement such as "acid-soluble" would provide a more scientifically correct basis upon which to establish criteria for metals. The criteria were developed on this basis. However, at this time, no EPA approved methods for such a measurement are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a measurement such as "acid-soluble". Until available, however, EPA recommends applying the criteria using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be analyzed directly because the total recoverable method does not distinguish between individual oxidation states, and (2) these criteria may be overly protective when based on the total recoverable method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to cadmium exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Based Toxics Control (U.S. EPA, 1985).

Saltwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, saltwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of cadmium does not exceed 9.3 $\mu g/L$ more than once every three years on the average and if the one-hour average concentration does not exceed 43 $\mu g/L$ more than once every three years on the average. The little information that is available concerning the sensitivity of the American lobster to cadmium indicates that this important species might not be protected by this criterion.

EPA believes that a measurement such as "acid-soluble" would provide a more scientifically correct basis upon which to establish criteria for metals. The criteria were developed on this basis. However, at this time, no EPA approved methods for such a measurement are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a

VOL 50 ISS 145 JL 29 1985 UMI

measurement such as "acid-soluble". Until available, however, EPA recommends applying the criteria using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be analyzed directly because the total recoverable method does not distinguish between individual oxidation states, and (2) these criteria may be overly protective when based on the total recoverable method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to cadmium exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxic Control (U.S. EPA, 1985).

4. Chlorine

Freshwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of total residual chlorine does not exceed 11 μg/1 more than once every three years on the average and if the one-hour average concentration does not exceed 19 μg/1 more than once every three years on the average.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to chlorine exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

Saltwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that saltwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of chlorine-produced oxidants does not exceed 7.5 μg/1 more than once every three years on the average and if the one-hour average concentration does not exceed 13 μg/1 more than once every three years on the average.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to chlorine exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

5. Chromium

Freshwater Aquatic Life

Chromium (III). The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly when a locally important species is very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration (in μg/l) of chromium (III) does not exceed the numerical value given by $e^{(0.8190\ [\ln(\text{hardness})]+1.561)}$ more than once every three years on the average and if the one-hour average concentration (in μg/l) does not exceed the numerical value given by $e^{(0.8190\ [\ln(\text{hardness})]+3.688)}$ more than once every three years on the average. For example, at hardnesses of 50, 100, and 200 mg/1 as $CaCo_3$ the four-day average concentrations of chromium(III) are 120, 210, and 370 μg/l and the one-hour average concentrations are 980, 1,700, and 3,100 μg/l.

Chromium(VI). The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species in very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of chromium(VI) does not exceed 11 μg/l more than once every three years on the average and if the one-hour average concentration does not exceed 16 μg/l more than once every three years on the average.

EPA believes that the measurement such as "acid-soluble" would provide a more scientifically correct basis upon which to establish criteria for metals. The criteria were developed on this basis. However, at this time, no EPA approved methods for such a measurement are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a measurement such as "acid-soluble". Until available, however, EPA recommends applying the criteria using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be analyzed directly because the total recoverable method does not distinguish between individual oxidation states, and (2) these criteria may be overly protective when based on the total recoverable method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to chromium exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

Saltwater Aquatic Life

Chromium(III). No saltwater criterion can be derived for chromium(III), but 10,300 μg/l is the EC50 for eastern oyster embryos, whereas 50,400 μg/l did not affect a polychaete worm in a life-cycle test.

Chromium(VI). The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, saltwater aquatic organisms should not be affected unacceptably if the four-day average concentration of chromium(VI) does not exceed 50 μg/L more than once every three years on the average, and if the one-hour average concentration does not exceed 1,100 μg/L more than once every three years on the average. Data suggest that the acute toxicity of chromium[VI] is salinity dependent; therefore, the one-hour average concentration may be underprotective at low salinities.

EPA believes that a measurement such as "acid-soluble" would provide a more scientifically correct basis upon which to establish criteria for metals. The criteria were developed on this basis. However, at this time, no EPA approved methods for such a measurement are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a measurement such as "acid-soluble". Until available, however, EPA recommends applying the criteria using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be analyzed directly because the total recoverable method does not distinguish between individual oxidation states, and (2) these criteria may be overly protective when based on the total recoverable method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to chromium exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

6. Copper

Freshwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possible where a locally important species in very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration (in μg/l) of copper does not exceed the numerical value given by $e^{(0.8545[\ln(\text{hardness})]-1.465)}$ more than once every three years on the average and if the one-hour average concentration (in μg/l) does not exceed the numerical value given by $e^{(0.8422[\ln(\text{hardness})]-1.464)}$ than once every three years on the average. For example, at hardness of 50, 100, and 200 mg/l as $CaCO_3$ the four-day average concentrations of copper are 6.5, 12, and 21 μg/l respectively, and the one-hour average concentrations are 9.2, 18 and 34 μg/L.

EPA believes that a measurement such as "acid-soluble" would provide a more scientifically correct basis upon which to establish criteria for metals. The criteria were developed on this basis. However, at this time, no EPA approved methods for such a measurement are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a measurement such as "acid-soluble". Until available, however, EPA recommends applying the criteria using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be analyzed directly because the total recoverable method does not distinguish between individual oxidation states, and (2) these criteria may be overly protective when based on the total recoverable method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to copper exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload

allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

Saltwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where locally important species is very sensitive, saltwater aquatic organisms and their uses should not be affected unacceptably if the one-hour average concentration of copper does not exceed 2.9 μg/l more than once every three years on the average.

EPA believes that a measurement such as "acid-soluble" would provide a more scientifically correct basis upon which to establish criteria for metals. The criteria were developed on this basis. However, at this time, no EPA approved methods for such a measurement are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a measurement such as "acid-soluble". Until available, however, EPA recommends applying the criteria using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be analyzed directly because the total recoverable method does not distinguish between individual oxidation states, and (2) these criteria may be overly protective when based on the total recoverable method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to copper exceeds the criterion. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

7. Cyanide

Freshwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of cyanide does not exceed 5.2 μg/l more than once every three years on the average and if the one-hour average concentration does not exceed 22 μg/l more than once every three years on the average.

EPA believes that a measure such a free cyanide would provide a more scientifically correct basis upon which to establish criteria for cyanide. The criteria were developed on this basis. However, at this time, no EPA approved methods for free cyanide are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for free cyanide. Until available, however, EPA recommends applying the criteria using the total cyanide method. These criteria may be overly protective when based on the total cyanide method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which cyanide exceeds the criterion. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

Saltwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, saltwater aquatic organisms and their uses should not be affected unacceptably if the one-hour average concentration of cyanide does not exceed 1.0 μg/L more than once three years on the average.

EPA believes that a measurement such as free cyanide would provide a more scientifically correct basis upon which to establish criteria for cyanide. The criteria were developed on this basis. However, at this time, no EPA approved methods for such a method are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a measurement such as free cyanide. Until available, however, EPA recommends applying the criteria using the total cyanide method. These criteria may be overly protective when based on the total cyanide method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to cyanide exceeds the criterion. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

8. Lead

Freshwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration (in μg/l) of lead does not exceed the numerical value given by $e^{(1.26[\ln(\text{hardness})]-4.661)}$ more than once every three years on the average and if the one-hour average concentration (in μg/l) does not exceed the numerical value given by $e^{(1.26[\ln(\text{hardness})]-1.41)}$ more than once every three years on the average. For example, at hardnesses of 50, 100, and 200 mg/l as $CaCO_3$ the 4-day average concentrations of lead are 1.3, 3.2, and 7.7 μg/l, respectively, and the one-hour average concentrations are 34, 83, and 200 μg/l.

EPA believes that a measurement such as "acid-soluble" would provide a more scientifically correct basis upon which to establish criteria for metals. The criteria were developed on this basis. However, at this time, no EPA approved methods for such a measurement are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a measurement such as acid-soluble. Until available, however, EPA recommends applying the criteria using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be analyzed directly because the total recoverable method cannot distinguish between individual oxidation states, and (2) these criteria may be overly protective when based on the total recoverable method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to lead exceeds the criterion. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

Saltwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, saltwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of lead does not exceed 5.6 μg/l more than once every three years on the average and if the one-hour average concentration does not exceed 140 μg/l more than once every three years on the average.

EPA believes that a measurement such as "acid-soluble" would provide a more scientifically correct basis upon which to establish criteria for metals. The criteria were developed on this basis. However, at this time, no EPA approved methods for such a measurement are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a measurement such as acid-soluble. Until available, however, EPA recommends applying the criteria using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be analyzed directly because the total recoverable method does not distinguish between individual oxidation states, and (2) these criteria may be overly protective when based on the total recoverable method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to lead exceeds the criterion. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

9. Mercury

Freshwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of mercury does not exceed 0.012 μg/l more than once every three years on the average and if the one-year average concentration does not exceed 2.4 μg/l more than once every three years on the average. If the four-day average concentration exceeds 0.012 μg/l more than once in a three year period, the edible portion of consumed species should be analyzed to determine whether the concentration of

methylmercury exceeds the FDA action level.

fifth percentile or 50 percent of a

toxicological data concerning the

toxicity based (whole effluent) approach

methylmercury exceeds the FDA action level.

EPA believes that a measurement such as "acid-soluble" would provide a more scientifically correct basis upon which to establish criteria for metals. The criteria were developed on this basis. However, at this time, no EPA approved methods for such a measurement are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a measurement such as "acid-soluble". Until available, however, EPA recommends applying the criteria using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be analyzed directly because the total recoverable method does not distinguish between individual oxidation states, and (2) these criteria may be overly protective when based on the total recoverable method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to mercury exceeds the criterion. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

Saltwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, saltwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of mercury does not exceed 0.025 µg/l more than once every three years on the average and if the one-hour average concentration does not exceed 2.1 µg/l more than once every three years on the average. If the four-day average concentration exceeds 0.025 µg/l more than once in a three-year period, the edible portion of consumed species should be analyzed to determine whether the concentration of methylmercury exceeds the FDA action level.

EPA believes that a measurement such as "acid-soluble" would provide a more scientifically correct basis upon which to establish criteria for metals. The criteria were developed on this basis. However, at this time, no EPA approved methods for such a measurement are available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a measurement such as "acid-soluble". Until available, however, EPA recommends applying the criteria using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be analyzed directly because the total recoverable method does not distinguish between individual oxidation states, and (2) these criteria may be overly protective when based on the total recoverable method.

The recommended exceedence frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed system to recover from a pollution event in which exposure to mercury exceeds the criterion. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

The use of criteria in designing waste treatment facilities requires the selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other factors may make their use impractical, in which case one should rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for criterion maximum concentration (CMC) design flow and 7Q5 or 7Q10 for the criterion continuous concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality Based Toxics Control (U.S. EPA, 1985).

10. Summary of Revisions to "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses"

This revised version of the National Guidelines provides clarifications, additional details, technical and editorial changes from the guidelines published at 45 FR 79341–79347, November 28, 1980. These modifications are the result of comments received on the previous Guidelines and also reflect advances in aquatic toxicology and related fields. The major technical changes are:

1. The acute data required for freshwater animals has been changed to include more tests with invertebrate species.

2. The Final Acute Value is now defined in terms of Genus Mean Acute Values rather than Species Mean Acute Values previously defined. A Genus Mean Acute Value is the geometric mean of all the Species Mean Acute Values available for species in the genus. On the average, species within a genus are toxicologically much more similar than species in different genera, and so the use of Genus Mean Acute Values will prevent data sets from being biased by an overabundance of species in one or a few genera.

3. The Final Acute Value is now calculated using a method that is not subject to the bias encountered with the previous method.

4. The criterion now consists of two numbers—The criterion continuous concentration (CCC) and the criterion maximum concentration (CMC).

a. The criterion continuous concentration is now used as a four-day average, rather than as a 24-hour average.

b. The criterion maximum concentration is now used as a one hour average, rather than a "not-to-be-exceeded" value.

c. Neither of these values should be exceeded more than once every three years on the average.

d. Instead of being equal to the Final Acute Value, the criterion maximum concentration is now obtained by dividing the Final Acute Value by 2. The Final Acute Value is intended to protect 95 percent of a group of diverse species, unless an important species is more sensitive. However, a concentration that would severely harm 50 percent of the fifth percentile or 50 percent of a sensitive important species cannot be considered to be protective of that percentile or that species. Dividing the Final Acute Value by 2 is intended to result in a concentration that will not severely adversely affect too many of the organisms.

5. When available, 96-hour EC50, based on the percentage of organisms immobilized plus the percentage of organisms killed are used instead of 96-hour LC50, for fish; comparable EC50 values are used instead of LC50, for other species.

6. The requirements for using the results of tests with aquatic plants have been made more stringent.

Two appendices (Appendix 1 and 2) were added as part of the guidance. Appendix 1 was added to aid in determining whether a species should be considered resident in North America and its taxonomic classification. Appendix 2 provides guidance for calculating a Final Acute Value.

Appendix B—Response to Comments on "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses"

Introduction—Most "Comments" Listed Below Are Summaries of Individual Comments Which Expressed Similar Points of View

1. Comment—Criteria should only apply outside the mixing zone, not at the end of the pipe or within the mixing zone.

Response—EPA is issuing guidance on mixing zones in the Technical Support Document for Water Quality-based Toxics Control (Office of Water, 1985), hereafter referred to as the TSD. Because one of the two concentrations in each criterion is based on acute toxicity, it might be appropriate to use this concentration from a national or a site-specific criterion when establishing mixing zone standards.

2. Comment—Derivation of water quality criteria for the protection of aquatic organisms and their uses should adequately take into account such things as the precision and accuracy of available methods for measuring concentrations of pollutants, economic and social considerations, etc.

Response—These criteria are intended to be the best scientific judgment of exposures that can be tolerated by aquatic organisms and their uses. Other considerations can be used in the establishment of standards, permits, etc., where permitted by law. The criteria themselves must be based solely on biological, ecological, and toxicological data concerning the sensitivities of the organisms and their uses. Technological and economic feasibility are not considered in derivation of water quality criteria.

3. Comment—Laboratory data cannot replace experience in the real world.

Response—EPA certainly agrees. Unfortunately few field data are good enough to be useful in deriving national water quality criteria. It is more likely that field data can be used on a site-specific basis to demonstrate whether a criterion, standard, or permit is underprotective. However, in order for field data to be useful, the studies must be designed and executed appropriately. Too many field studies have limited utility because one or more important aspects were not dealt with in a manner that was appropriate to the specific situation of concern.

4. Comment—These Guidelines are incomplete because they do not include protection of human health.

Response—Water quality criteria can be derived to protect a variety of uses and subuses. These Guidelines are only intended to deal with protection of aquatic organisms and their uses. The Guidelines are intended to ensure that the use of aquatic organisms is not subject to restrictions because of exceedence of FDA action levels. Protection of human health is the subject of "Guidelines and Methodology Used in the Preparation of Health Effect Assessment Chapters of the Consent Decree Water Criteria Documents" (U.S. EPA, FR 45: 79347–79357, November 28, 1980).

5. Comment—EPA should provide implementation guidance concerning such things as mixing zones, wasteload allocation, and compliance monitoring.

Response—EPA is providing such guidance in the TSD.

6. Comment—The criteria do not adequately deal with fluctuating concentrations.

Response—EPA has examined the question of fluctuating concentrations and has revised the expression of the criteria to take into account the data that are available concerning relative effects caused by constant and fluctuating concentrations.

7. Comment—The Guidelines do not deal with simultaneous exposure to more than one pollutant.

Response—This is true and is because (a) few useful data are available, (b) the data that are available do not allow the development of useful principles, and (c) there are so many possible combinations of two or more pollutants and each can be present at a variety of concentrations. To deal with such situations, EPA has developed the toxicity based (whole effluent) approach described in the TSD.

8. Comment—EPA should develop warmwater and coldwater criteria, regional criteria, etc.

Response—EPA knows of no way to geographically subdivide aquatic species so that derivation of criteria for special circumstances would be worth the effort. Community composition changes gradually from area to area. Also, the distinction between warmwater and coldwater species is only reasonably useful because of all the coolwater species. Even the distinction between fresh water and salt water is vague because the waters and their respective fauna mix in upper estuaries. EPA does allow the derivation of site-specific criteria so that pertinent differences between waters, ecosystems, etc., can be appropriately taken into account.

9. Comment—All criteria issued in 1980 should be revised using the new Guidelines.

Response—EPA is selecting pollutants for which criteria should be derived using the new Guidelines. All the pollutants included in the Red Book and in the 1980 criteria documents, as well as other pollutants, are being considered. How many new or revised criteria are derived will depend on the availability of data and resources.

10. Comment—The criteria do not deal with the effects of pH, dissolved oxygen, dissolved solids, temperature, etc., on toxicity and bioaccumulation.

Response—If data are available to demonstrate that a criterion can be quantitatively related to such a factor, then the criterion should be related to that factor. Thus criteria for some metals are hardness-dependent and the criterion for ammonia is both pH and temperature-dependent. All criteria are subject to site-specific modification so that as many factors as desired can be appropriately taken into account.

11. Comment—Criteria do not deal with uptake from food.

Response—This is a potential weakness for all pollutants, but it is particularly of concern for those that are or could be limited by FDA action levels or effects on wildlife predators. When this is a potential problem for an existing discharge, the most pertinent information can be obtained by analyzing edible tissue of appropriate exposed species for the pollutant of concern.

12. Comment—EPA should make available its rationale for selecting pollutants for which criteria are to be derived.

Response—EPA is developing a

the effect was not considered to be a

for a new species will lower, rather than

particular distribution and allow the

33. Comment—Explain "socially

periods. Because of the way permit

VOL 50 ISS 145 JL 29 1985 UMI

Response—EPA is developing a process that appropriately takes into account factors relating to both exposure and effects in the selection of chemicals.

13. Comment—The available data are biased to a few families and toward northern and eastern species.

Response—Although EPA desires more data from tests with southern and western species, EPA knows of no reason to believe that such species would be more or less sensitive to specific pollutants or to pollutants in general. Some of the species for which data are available are widely distributed. The requirement that acute values be available for aquatic animals in at least eight different families ensures that there is a reasonable amount of diversity in the data set.

14. Comment—Use of Family Mean Acute Values will lower criteria.

Response—When EPA calculated the Final Acute Value (FAV) from Species Mean Acute Values, some commentors felt that EPA was allowing the criteria to be unfairly influenced because data were available for numerous species in some sensitive families. When EPA proposed to use Family Mean Acute Values, some commentors felt that EPA was inappropriately causing the criteria to be higher by reducing the number of MAVs available. EPA has decided to calculate the FAV from Genus Mean Acute Values because species within a genus appear to be toxicologically indistinguishable. This decision also reduces the impact of having data available for numerous species in the same family, but does not reduce the number of MAVs as much as would the use of Famly Mean Acute Values.

15. Comment—Alternative methods of calculating the FAV should be examined.

Response—EPA did consider all the potentially useful methods, and then studied in detail the methods that appeared promising. The method selected has several desirable properties, such as (1) the FAV generally rises as the number of MAVs increases, and (2) the FAV is rarely very far below the lowest MAV even when only eight or nine MAVs are available. The most serious defect is that calculation of confidence limits does not seem possible. On the other hand, methods that would allow calculation of the FAV and confidence limits have worse defects.

16. Comment—Elimination of some nonlethal endpoints from acute toxicity data was good.

Response—The oyster shell deposition test was eliminated because the effect was not considered to be a severe adverse effect.

17. Comment—Eight MAVs only provide a rough estimate of the fifth percentile.

Response—EPA certainly prefers more MAVs, but it was decided that the additional confidence in the FAV did not necessarily justify the additional cost, especially in the derivation of site-specific criteria. EPA's focus was on kinds of species as well as numbers, and eight is not enough if the breadth requirements are not satisfied.

18. Comment—Many productive streams in Colorado, Oregon, and Pennsylvania contain natural background concentrations above criteria for at least one metal.

Response—The productivity of some pristine bodies of water might be depressed if the background concentrations of some materials are too high. Assuming, however, that this is not the case for these streams in Colorado, Oregon, and Pennsylvania, it is likely that the reported metal concentrations are for total metal, which measures some forms of metals which are not toxic and are not likely to become toxic under natural conditions. EPA is interested in use of a measurement such as "acid-soluble" which should give a more accurate measurement of toxicologically available forms of metals.

19. Comment—EPA should define what it means by "fishable".

Response—EPA has expanded its explanation in the Introduction to the Guidelines of the concept of protection of aquatic organisms and their uses.

20. Comment—The preferred duration of acute tests with daphnids and midges should be 48 hours.

Response—EPA has changed its preference from 96 hours, which would require feeding during acute tests with most, if not all, daphnids and midges, to 48 hours with no feeding of the animals during the test.

21. Comment—The FAV is too dependent on the number of MAVs in the data set.

Response—EPA considers the general relationship between the FAV and the number of MAVs in the data set to be a positive feature of the procedure used to calculate the FAV. As more is known about the sensitivities of aquatic animals to the pollutant of concern, the FAV should be more often determined by interpolation rather than extrapolation. This is a property of the definition of the FAV as corresponding to the fifth percentile; any method used to estimate the concentration corresponding to the fifth percentile will have the same feature. An acute value for a new species will lower, rather than raise, the FAV if the new species is sensitive enough.

22. Comment—The FAV is biased because most tests are with sensitive species.

Response—The range of values available for some materials indicates that at least some tests are conducted with resistant species. In addition, occasionally a species that is usually considered sensitive is found to be resistant to a test material. Usually when more than twenty MAVs are available, the FAV is higher than the lowest MAV. On the other hand, the lowest MAV is sometimes for an important species such as the rainbow trout.

23. Comment—Use of Family Mean Acute Values increases the chances that some species will not be protected.

Response—The same comment applies to the use of Genus Mean Acute Values, but national criteria are not intended to protect all species. Even though Genus Mean Acute Values are used, the FAV is lowered to protect important species when necessary.

24. Comment—Only lethality should be accepted as an acute effect.

Response—Any severe adverse effect on fifty percent of the individuals in a population should be considered unacceptable to the species.

25. Comment—A statistically acceptable test for identifying outliers is needed.

Response—A very sensitive or very resistant species might be a statistical outlier, but not a toxicological outlier. Statistics can only identify data that are statistically inconsistent, based on the statistical test used, with the bulk of the data. Even samplying from a prepared normally distributed set of values will occasionally select a very extreme value. Statistical and toxicological comparisons can identify values that should be examined closely and possibly retested, but only rarely should a value be discarded just because it is a statistical outlier.

26. Comment—The FAV should be calculated using a method that properly weights all data points.

Response—The method used to calculate the FAV does use all of the data in the calculation of the cumulative probabilities. The four lowest MAVs and their cumulative probabilities are then used to estimate the FAV by interpolation or extrapolation because these MAVs provide the best information about the location of the fifth percentile. Parametric methods using all the MAVs make the FAV too dependent on the assumption of a particular distribution and allow the data for resistant species to have too much effect on the prediction on the location of the fifth percentile.

27. Comment—The factor of 2 should be justified.

Response—It is not reasonable to consider a genus at the fith percentile to be adequately protected if fifty percent of the individuals of that genus are killed or otherwise severely adversely affected. It is also unacceptable to consider that an important species is adequately protected if fifty percent of that species are killed or otherwise severely affected. Division of the FAV by a factor of two is intended to ensure that substantially less than fifty percent of the individuals are affected.

28. Comment—Data from static acute tests should not be used.

Response—Although data from flow-through tests in which the concentrations of test material were measured are preferable for all test materials and might be necessary for some highly volatile or rapidly hydrolyzed materials, static acute tests do provide useful data on many materials.

29. Comment—A species cannot be considered protected if its most sensitive life stage is not protected.

Response—EPA agrees and now specifies that when available data for a species indicate that one or more life stages are more sensitive than another life stage, only data for the sensitive life stage(s) should be used in the calculation of the Species of Mean Acute Value.

30. Comment—Ecologically important species should be specifically protected.

Response—EPA does not feel that the concept of "ecologically important species" has been well enough defined or supported for it to be used in the derivation of national water quality criteria. On a site-specific basis, it might be appropriate to use a broader concept of important species than what is used in the derivation of national criteria.

31. Comment—National criteria should not be lowered to protect important species.

Response—EPA feels that some species are so commercially or recreationally important that most people would want these species protected in most bodies of water in which they exist.

32. Comment—If a criterion is lowered to protect an important species, more data should be required on that species.

Response—Criteria are not usually lowered to protect an important species unless the tests with that species were flow-through and the concentrations of test materials were measured.

33. Comment—Explain "socially important species".

Response—This concept has been deleted from the Guidelines, but it was used to cover such things as rare and endangered species.

34. Comment—The chronic data should be divided into four categories (reproduction, growth, mortality, and other) and the most sensitive used to derive the criterion.

Response—A life-cycle test covers effects on all life stages. In addition, different effects might be most sensitive for different species.

35. Comment—The interchanging of acute-chronic ratios (ACRs) between fresh and salt water should be justified.

Response—If the data themselves do not justify it, the ACRs are not used together.

36. Comment—Use of an acute-chronic ratio to calculate a Final Chronic Equation was not mentioned.

Response—Division of a Final Acute Equation by an acute-chronic ratio will automatically result in a Final Chronic Equation. This has been added to the Guidelines.

37. Comment—Chronic tests with daphnids should not have to last at least 21 days.

Response—EPA does not feel that the available data justify the acceptance of shorter tests for all test materials.

38. Comment—The Final Acute-Chronic Ratio should never be arbitrarily set at 2.0.

Response—EPA feels that it is appropriate in two situations to set the Final Acute-Chronic Ratio equal to the same number that is used to obtain the Criterion Maximum Concentration from the Final Acute Value. At present this number is 2. EPA feels that in both of these situations it is appropriate for the Final Chronic Value to be equal to the Criterion Maximum Concentration, and setting the Final Acute-Chronic Ratio equal to 2 is a convenient way to achieve this.

39. Comment—Acute-chronic ratios should not be applied to acute data obtained with larval invertebrates.

Response—This is one of the situations in which EPA feels it is appropriate to use an acute-chronic ratio of 2. The EC50 certainly cannot be considered an acceptable concentration for the species, but use of a ratio greater than 2 is probably not appropriate when the lower acute values were from tests with larval invertebrates.

40. Comment—A 30-day averaging period is more compatible with NPDES permits and the duration of chronic tests than a 24-hour averaging period.

Response—EPA has reexamined the issue of the durations of the averaging periods. Because of the way permit limits are derived, the duration of the averaging period in criteria is totally independent of any duration in a permit. And because organisms are usually exposed to nearly constant concentrations in laboratory tests and to fluctuating concentrations in the real world, the duration of the averaging period in criteria should be shorter than the duration of the test. The rationale for the selection of averaging periods for criteria is presented in the Introduction to the Guidelines. An explanation of the use of criteria in wasteload allocation, etc., is presented in the TSD.

41. Comment—Only published data should be used.

Response—EPA feels that all available data that are acceptable and pertinent should be used. On the other hand, EPA feels that it has a responsibility to make available all data that are used, and so it will not use any "privileged" data.

42. Comment—Is the percent lipid value being changed from 3 to 10 or 11?

Response—The value of 3 was used in the human health sections of the 1980 criteria documents, but was not used to derive water quality criteria for aquatic life. The values of 10 and 11 percent are based on newer data and are now used in place of the previous values of 15 and 16 percent in deriving water quality criteria for the protection of aquatic organisms and their uses.

43. Comment—"Other data" should only be used for deriving site-specific criteria.

Response—EPA feels that "other data" can be used in deriving national criteria under the circumstances specified.

44. Comment—More allowance should be made for deviations from the Guidelines when deriving criteria.

Response—The purpose of developing the Guidelines will be defeated if they are too flexible. EPA has presented as many options as it feels are desirable in the Guidelines. Further, it is stated in the Guidelines that, if the derived criterion is not consistent with sound scientific evidence, either a higher or a lower criterion should be derived using appropriate modifications of the Guidelines.

45. Comment—Better use should be made of field data.

Response—The Guidelines do allow the use of field data, but EPA does not know what guidance can be given concerning their use, nor does EPA see the need for such guidance.

46. Comment—Criteria should be based on the form of the chemical that is biologically available.

VOL 50 ISS 145 JL 29 1985 UMI

Response—This concept is certainly appealing, but the practical difficulties are substantial. For some pollutants such as cooper and mercury, it appears that more than one form is toxic and either the toxic forms have different toxicities or the toxic forms have different net accumulation rates. In addition, it is probably important to measure not only what is immediately biologically available, but also what can be readily converted from an unavailable to an available form. This is especially important because the measurement used to specify the criterion might also be used to measure the pollutant in effluents.

47. Comment—The Guidelines do not provide justification for many items.

Response—More explanatory material has been added, especially in the Introduction. However, a thorough justification of each item would require a consideration of nearly all aspects of aquatic toxicology. As a compromise, EPA has assumed that most users of the Guidelines have a reasonable background in aquatic toxicology.

48. Comment—Why is covariance analysis better for calculating a hardness slope?

Response—Covariance analysis weights the data for each species according to the data that are available for that species. The approximate manual procedure was only given to aid those people who do not have access to computerized statistical procedures. It has been found, however, that the results produced by the two methods sometimes do not agree very well, and that the manual version of covariance analysis is not too difficult for small data sets. Thus the approximate manual procedure has now been replaced by the manual version of covariance analysis. It is instructive to work through the manual version once in order to understand how covariance analysis handles the data in this situation.

49. Comment—The steady-state BCF should not be replaced by a higher value.

Response—This has been eliminated from the Guidelines because (a) it will probably be rarely observed in bioconcentration tests and if it is there will probably not be enough data available to determine whether it is real or is experimental error, and (b) the most likely cause is induced degradation or depuration, and organisms in the field will usually be exposed often enough that such induction will usually have taken place.

50. Comment—Derivation of criteria is too subjective.

Response—EPA has made the Guidelines as "cookbookish" as is technically acceptable. Unfortunately, aquatic toxicology is too complicated to allow simplistic answers to very many problems. The ranges of pollutants, species, and waters are so great that detailed instructions are often not valid for all situations.

51. Comment—Very few bodies of water are monitored more than once a month.

Response—Because of the way criteria are used, the important time to monitor bodies of water is during the critical condition that is the basis for the permit. The most common type of monitoring is compliance monitoring of an effluent, which is based directly on wasteland allocation considerations, and only indirectly on water quality criteria.

52. Comment—Protection of ninety-five percent of the species might not be enough.

Response—This is why EPA sometimes lowers criteria to protect important species.

53. Comment—EPA should not use whatever data are available if acceptable data are not available.

Response—EPA does not feel that the Guidelines allow the use of any unacceptable data.

54. Comment—The Guidelines are so conservative that national criteria will be met almost nowhere and site-specific criteria will have to be developed.

Response—As explained in the Introduction to the Guidelines, EPA feels that national criteria must be derived using a rationale that is reasonably conservative. The Guidelines do not try to protect all species at all times and places. If national criteria were derived to be less protective, any given site-specific criterion would have, for example, a 50–50 chance of being higher or lower, which is not really very useful information.

55. Comment—The Guidelines should not allow saltwater criteria for metals to be higher than the concentrations in the oceans.

Response—EPA feels that increasing the concentrations of metals above background concentrations will not necessarily cause unacceptable effects. On the other hand, in some places background concentrations might be high enough to cause unacceptable effects.

56. Comment—Only EPA analytical methods should be used in the specification of criteria.

Response—It would certainly be desirable to be able to deal with all problems in a timely manner so that EPA would not have to face the question of "Which should come first—the criteria or the EPA analytical method?" Those who establish EPA analytical methods need to know what methods are needed and how sensitive the methods should be. On the other hand, those who derive criteria are often told that the existing EPA methods do not measure the right forms or are not sensitive enough. Because criteria are meant to be based on the best available information and are not themselves enforceable, it does not seem necessary for water quality criteria to be restricted to the use of EPA analytical methods.

Specifically concerning metals, EPA believes that a measurement such as "acid-soluble" would provide a more scientifically correct basis upon which to establish criteria for metals. The criteria were developed on this basis. However, at this time, no EPA approved method for such a measurement is available to implement the criteria through the regulatory programs of the Agency and the States. The Agency is considering development and approval of methods for a measurement such as "acid-soluble". Until available, however, EPA recommends applying the criteria using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be analyzed directly because the total recoverable method cannot distinguish individual oxidation states, and (2) these criteria may be overly protective when based on the total recoverable method.

57. Comment—The Guidelines lack a consideration of the differences between the laboratory and natural environments.

Response—Some people argue that organisms are more sensitive in the laboratory than in the field and some argue the opposite. In spite of these and other arguments that criteria derived using these Guidelines are either always overprotective or always underprotective or sometimes one and sometimes the other, few direct data are available. The studies that have been conducted seem to indicate that the Guidelines are generally appropriate.

Controlled Airspace Designations in International Airspace; Advance Notice of Proposed Rulemaking

VOL 50 ISS 145 JL 29 1985 UMI

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 71 and 75

[Docket No. 24732, Notice No. 85-15]

Controlled Airspace Designations in International Airspace

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Advance notice of proposed rulemaking (ANPRM).

SUMMARY: This announces the FAA's intentions to consider adopting certain recommendations of the National Airspace Review (NAR) which are designed to: (1) Establish a uniform base altitude for FAA designations of controlled airspace in international airspace; (2) create a new designator for FAA airspace designations in international airspace; and (3) limit the naming of international airspace designations to proper names that can be readily identified on aeronautical charts and easily understood by pilots. The FAA also has issued an ANPRM (Notice No. 85-5) which addresses the classification of all airspace designations and which, if adopted, would impact these recommendations.

DATE: Comments must be received on or before October 28, 1985.

ADDRESSES: Comments may be mailed or delivered in duplicate to: Federal Aviation Administration, Office of Chief Counsel, Attention: Rules Docket (AGC-204), Docket No. 24732, 800 Indpendence Avenue SW., Washington, D.C., 20591. Comments may be examined in the Rules Docket weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Mr. William C. Davis, Airspace and Air Traffic Rules Branch, Air Traffic Operations Service, Office of the Associate Administrator for Air Traffic, Federal Aviation Administration, 800 Indpendence Avenue SW., Washington, D.C. 20591, telephone (202) 426-8783.

SUPPLEMENTARY INFORMATION

Comments Invited

This ANPRM is being issued in accordance with the FAA's policy of encouraging the early public participation in rulemaking proceedings. An ANPRM is issued when FAA finds there is a need to consider rulemaking but the resources of the FAA and reasonable outside inquiry do not yield a sufficient basis to propose a specific course of action. It would be helpful, therefore, to invite public participation in identifying and selecting a course of action before a Notice of Proposed Rulemaking (NPRM) is developed and issued.

Interested persons are invited to participate in these preliminary rulemaking procedures by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address above. All communications received on or before the closing date for comments will be considered by the Administrator before taking further rulemaking action. Persons wishing the FAA to acknowledge receipt of their comments submitted in response to this notice, must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 24732." The postcard will be date/time stamped and returned to the commenter. The proposals contained in this noticed may be changed in light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket. If it is determined to be in the public interest to proceed with further rulemaking after considering the available data and comments received in response to this advance notice, and NPRM will be issued.

Availability of ANPRM's

Any person may obtain a copy of this ANPRM by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this ANPRM. Persons interested in being placed on a mailing list for future notices should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

Background

On April 22, 1982, the NAR plan was published in the **Federal Register** (47 FR 17448). The plan encompasses a review of airspace use and the procedural aspects of the air traffic control (ATC) system. Organizations participating in the NAR task group include:

Federal Aviation Administration
Department of Defense
Air Line Pilots Association
Air Transport Association
National Business Aircraft Association
National Association of State Aviation Officials
Regional Airline Association
Aircraft Owners and Pilots Association
Experimental Aircraft Association
Helicopter Association International.

The three main objectives of the NAR are:

(1) To develop and incorporate into the air traffic system a more efficient relationship between traffic flows, airspace allocation, and system capacity. This will involve the use of improved air traffic flow management to maximize system capacity and improved airspace management.

(2) To review and eliminate, wherever possible, governmental restraints to system efficiency levied by Federal Aviation Regulations (FAR) and FAA directives—reducing complexity and simplifying the ATC system.

(3) To revalidate ATC services within the National Airspace System with respect to state-of-the-art and future technological improvements.

In concert with these objectives, Task Group 3-2.1 was assigned to examine the "offshore" airspace designation process and FAA procedures for such designations to determine if these processes could be simplified and made more understandable to the public.

The Current Situation

The FAA, through Order 7110.83, defines "offshore" airspace as that airspace between the U.S. territorial limits (3 miles from the shoreline) and an oceanic Flight Information Region/Control Area (CTA/FIR) boundary. Offshore airspace, and airspace within a CTA/FIR, is airspace for which a contracting state (nation) has accepted responsibility to provide ATC services through regional air navigational agreements approved by the Council of the International Civil Aviation Organization (ICAO). The type and extent of air traffic separation services provided within these airspace areas is predicated on the availability of, or lack of, accurate ground-based navigational aids and/or radar coverage. Theoretically, as technology advances, creating improved and expanded radar or ground-based navigational aid coverage, the FIR/CTA inner boundary would be moved outward resulting in an increase in the volume of offshore airspace.

Air traffic separation service provided by the U.S. in offshore controlled airspace is the same as that provided within the territorial limits of the U.S. (these services are called domestic procedures). This is provided for under Annex 11 to the Convention On International Civil Aviation; and facilitated by the existence of ground-based accurate navigational aid and/or radar coverage. Air traffic separation service provided by the U.S. within an Oceanic FIR/CTA (these services are called oceanic procedures) does not utilize airspace as efficiently as that provided in domestic or offshore airspace because of the absence of adequate ground-based navigational aids or radar coverage.

Since the U.S. provides domestic ATC services only within designated controlled airspace, the FAA must establish controlled airspace by regulation in offshore airspace in order to extend domestic ATC services offshore. Controlled airspace within offshore airspace is established in several ways. For example, the proximity of an airport, for which a terminal control area, control zone, or transition area is desired, can create a situation in which that area may penetrate offshore airspace. To facilitate continuity in airway navigation in offshore airspace, Federal airways, area high routes, area low routes, or jet routes are established. Where radar coverage is adequate and where ATC can facilitate random route navigation in offshore airspace, additional control areas are established. All of the above airspace designations are accomplished under the provisions of Part 71 or Part 75. Control area extensions may also be established in offshore airspace, under Part 71; at this time, however, none are in existence.

Task Group 3-2.1 Recommendations.

The task group sustained the need for the current airspace system, but with reservations. With regard to the methodology and terminology associated with offshore airspace establishment, the group was of the opinion that much confusion prevailed. They said that the designation of routes and areas of controlled airspace under the same generic name, regardless of whether in domestic or international airspace is especially confusing. To some degree, the FAA recognizes the potential for confusion in the airspace designators "control area" and "additional control area." FAA, in its procedures for handling airspace matters (Order 7400.2, Procedures for Handling Airspace Matters), uses the term "offshore control areas" to differentiate between domestic and international airspace designations.

The group believes that the term "offshore" has evolved as applicable to international airspace within the inner CTA/FIR boundary and that it should be formally adopted in both the regulatory and procedural aspects of this subject. The group also believes that for the purposes of simplification and standardization, a uniform base to offshore control areas should be adopted. This conclusion is based on the existence of more than 50 additional control areas with base altitudes ranging from 700 feet above ground level to altitudes above 10,000 feet mean sea level. The following recommendations summarize the task group's efforts to standardize and simplify airspace designation activity in international airspace:

NAR 3-2.1.1 Offshore Airspace Nomenclature

NAR Task Group 3-2.1 recommends that FAR 71, FAAH 7400.2, and the appropriate regulations and publications, be amended to adopt the term "Offshore Control Areas" to apply to that controlled airspace between the U.S. territorial limits (3 NM) and the CTA/FIR boundary which is not designated under any of the various terminal airspace designations, i.e., control zone, transition area, terminal control area, etc. This airspace is currently designated as "Additional Control Areas."

NAR 3-2.1.2 Offshore Control Area Uniform Base

NAR Task Group 3-2.1 recommends that "Offshore Control Areas" have a uniform base of 1200 feet AGL unless otherwise designated.

NAR 3-2.1.3 Offshore Control Area Identification

NAR Task Group 3-2.1 recommends that "Offshore Control Areas" be identified only as named areas, such as the current North Atlantic, Santa Barbara, Gulf of Alaska, etc., and that the current numbered areas such as Control 1142, Control 1154, Control 1217, etc., be included under the named designations if necessary to retain their airspace and otherwise provide for their function as a route.

NAR 3-2.1.4 Offshore Airspace Classification

NAR Task Group 3-2.1 recommends that the airspace classification (A, B, C, D, etc.) specified in the recommendations to TG 1-7 be applied as appropriate to "Offshore Control Areas"."

Discussion of the NAR Recommendations of the Proposal

The FAA believes there is merit in the task group's recommendations concerning airspace designations in international airspace and is providing advance notice proposing those recommendations. Recognizing the effects on existing rules, aeronautical charts, publications, and other material relating to aviation, the FAA solicits comments from all interested parties, on all aspects of the proposal. Any comments received will be given full consideration prior to any future action on this proposal.

The FAA's proposed actions, with regard to the task group's recommendations, are set forth below.

1. There would be no change in the regulation or process of designating Federal airways, area low routes, control zones, transition areas, and terminal control areas.

2. Part 71, Subpart E, presently entitled, "Control Areas and Control Area Extensions," would be modified and retitled, "Domestic Control Areas." Revised Subpart E would provide only for designating additional control areas over the U.S. The provisions for designating control area extensions and control areas associated with jet routes outside the continental control area would be deleted.

3. The provisions in Part 75, Subpart A, for designating control areas for area high routes in international airspace (Section 75.13(b)) would be deleted.

4. A new Subpart L would be added to Part 71, entitled, "Offshore Control Areas." The new subpart would provide specifically for the designation of the East Coast, West Coast, Gulf Coast, Alaskan, Caribbean, and Hawaiian Offshore Control Areas, and also would provide for the designation of offshore control areas which would include the areas now classified as additional control areas, control areas associated with jet routes outside the continental control area, and control area extentions.

5. Part 71, Subpart A, would be amended to include the definition of an offshore control area as follows:

The offshore control areas listed in Subpart L consist of controlled airspace outside the continental control area, excluding any airspace designated as an Oceanic Control Area under the provisions of the International Civil Aviation Organization (ICAO), extending upward from 1,200 feet or more above the surface of the earth, and within which the United States has accepted responsibility, under ICAO regional agreements, for applying air traffic control in the manner that is applied in the United States.

Economic Concerns and Questions

An important consideration in the FAA regulatory process is the

VOL 50 ISS 145 JL 29 1985 UMI

examination of the benefits and costs of rulemaking actions.

The FAA is unable to assess fully the costs and benefits of this proposal on the basis of existing information to the extent necessary to complete a regulatory evaluation. However, any regulatory proposal will be accompanied by an evaluation which will qualify or quantify, to the extent possible, the benefits and costs of such proposals. Therefore, it is essential that comments for or against the proposals discussed here are accompanied by statements of the economic impacts perceived by the commenter.

FAA specifically solicits comments from individuals, corporate entities, and organizations on the economic benefits and costs of the proposed regulations.

With this in mind, the FAA poses several questions:

1. What are the benefits associated with simplified and standard airspace terms and designations?

2. What are the incremental costs imposed on aviation training facilities, fixed-based operators, publishers of aviation textbooks and navigation charts?

3. What are the cost impacts on pilots and other aviation-related personnel who must reeducate themselves with the new airspace terms and designations?

4. Is the proposed rule believed to have a significant negative economic impact on small business, nonprofit organizations, or governmental jurisdictions? If so, what are the types and sizes of the entities affected? Also, what is the nature and magnitude of the negative economic impact?

5. How should these recommendations, if adopted, be reflected on aeronautical charts?

Responses to these questions should fully address the nature of the impact and the groups or types of operators, businesses, or entities that are impacted. Commenters should describe and quantify the specific benefits and costs supported by factual data to the extent possible, or explain why costs are not quantifiable. Commenters should also provide the rationale for their opinions, which might include information pertaining to type of operation and typical aviation practices, or publication practices. The FAA will examine separately the costs imposed on the Federal Government (e.g. reeducation and training).

The benefit and cost questions outlined above cover the broad areas of the ANPRM. The FAA desires comments pertaining to these areas of impact and other areas which the commenter feels may be of impact. The FAA invites particularly interested groups to gather the preferences, ideas, and comments of their group members, through such devices as articles in membership publications and polls of their membership.

The FAA has determined that this proposal is considered nonsignificant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A full regulatory evaluation will be prepared with the assistance of comments received as a result of this advance notice, if necessary, in conjunction with any notice of proposed rulemaking that may be issued on this subject.

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

Last List July 26, 1985

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily **Federal Register** as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $550 domestic, $137.50 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783–3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

Federal Register

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 50, No. 146
Tuesday, July 30, 1985

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

MERIT SYSTEMS PROTECTION BOARD

5 CFR Part 1201

Practices and Procedures; Correction

AGENCY: Merit System Protection Board.

ACTION: Final rule; Correction.

SUMMARY: In the issue of Wednesday, July 17, 1985, in the document appearing at pages 28895 to 28898, which revised 5 CFR 1201.114, two sentences were inadvertently omitted. The corrections are listed below.

FOR FURTHER INFORMATION CONTACT: Joseph Ellis, Deputy Clerk of the Board, Merit Systems Protection Board, (202) 653–7262.

1. At 50 FR 28896, the following should be added as the final paragraph of the Supplementary Information on paragraph (h): For purposes of clarity, the Board added a sentence which establishes the date of service as the date of filing, as set forth in paragraph (d) of this section.

2. At 50 FR 28898, in § 1201.114, paragraph (h) is corrected by adding the following sentence at the beginning of the paragraph:

§ 1201.114 Filing of petition and cross-petition for review.

* * * * *

(h) *Service.* For purposes of § 1201.114, service occurs upon filing, as determined under paragraph (d) of this section. * * *

* * * * *

Dated: July 25, 1985.

Herbert E. Ellingwood,
Chairman.

[FR Doc. 85–17990 Filed 7–29–85; 8:45 am]
BILLING CODE 7400–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 908

[Valencia Orange Regulation 354, Amdt. 1; Valencia Orange Regulation 355]

Valencia Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Amendment 1 of Regulation 354 increases the quantity of fresh California-Arizona Valencia oranges that may be shipped to market during the period July 26–August 1, 1985. Regulation 355 establishes the quantity of such fruit that may be shipped to market during the period August 2–8, 1985. The amendment and regulation are needed to provide for orderly marketing of fresh Valencia oranges for the periods specified due to the marketing situation confronting the orange industry.

DATES: Regulation 354, Amendment 1 (§ 908.654) is effective for the period July 26–August 1, 1985. Regulation 355 (§ 908.655) is effective for the period August 2–8, 1985.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone: 202–447–5975.

SUPPLEMENTARY INFORMATION: *Findings.* These rules have been reviewed under USDA procedures and Executive Order 12291 and have been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that these actions will not have a significant economic impact on a substantial number of small entities.

The amendment and the regulation are issued under Marketing Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The actions are based upon the recommendation and information submitted by the Valencia Orange Administrative Committee (VOAC) and upon other available information. It is hereby found that these actions will tend to effectuate the declared policy of the act.

The amendment and the regulation are consistent with the marketing policy for 1984–85. The committee met publicly on July 23, 1985, to consider the current and prospective conditions of supply and demand and recommended a quantity of Valencia oranges for the specified weeks. The committee reports the demand for Valencia oranges has improved, and prices are stable.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because there is insufficient time between the date when information upon which these regulations are based became available and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the amendment and the regulation at an open meeting. To effectuate the declared policy of the act, it is necessary to make the regulatory provisions effective as specified, and handlers have been notified of the amendment and regulation and their effective dates.

List of Subjects in 7 CFR Part 908

Marketing agreements and orders, California, Arizona, Oranges (Valencia).

PART 908—[AMENDED]

1. The authority citation for 7 CFR Part 908 continues to read as follows:

Authority: (Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

2. Section 908.654 is added to read as follows:

§ 908.654 Valencia Orange Regulation 354.

The quantities of Valencia oranges grown in California and Arizona which may be handled during the period July 26, 1985, through August 1, 1985, are established as follows:

(a) District 1: 312,000 cartons;
(b) District 2: 488,000 cartons;
(c) District 3: Unlimited cartons.

3. Section 908.655 is added to read as follows:

§ 908.655 Valencia Orange Regulation 355.

The quantities of Valencia oranges

installation of placards on Boeing Model 727 and 737 airplanes, and divider

List of Subjects in CFR Part 39

14 CFR Part 39

The first commenter stated that there are no requirements in the proposal for

recalibration of the airspeed indicators and Mach overspeed warning switch,

§ 908.655 Valencia Orange Regulation 355.

The quantities of Valencia oranges grown in California and Arizona which may be handled during the period August 2, 1985, through August 8, 1985, are established as follows:

(a) District 1: 312,000 cartons;
(b) District 2: 488,000 cartons;
(c) District 3: Unlimited cartons.

Dated: July 25, 1985.

Thomas R. Clark,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 85-18030 Filed 7-29-85; 8:45 am]

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 85-NM-28-AD; Amdt. 39-5111]

Airworthiness Directives; Boeing Model 727 and 737 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) which improves fire safety in lavatories on Boeing Model 727 and Model 737 airplanes. This AD requires installation of divider panels on Model 727 airplanes to isolate the lavatory waste enclosure, and "No Stowage" placards in areas not suitable for storing combustible materials on both the Model 727 and Model 737 airplanes. Stowage of combustible materials in these areas could result in a fire if a component overheats or otherwise fails.

DATE: Effective September 6, 1985.

ADDRESSES: The service information cited in this AD may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Jeff Gardlin, Aerospace Engineer, Airframe Branch, ANM-120S; telephone (206) 431-2932. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring installation of placards on Boeing Model 727 and 737 airplanes, and divider panels on Model 727 airplanes lavatories, was published in the Federal Register on April 30, 1985 (50 FR 18269). These modifications will improve fire safety in the affected airplanes by preventing stowage of combustible materials in areas not designed for such stowage and by better isolating the waste enclosure on certain airplanes.

The comment period closed on June 21, 1985. Interested persons have been afforded an opportunity to comment on the proposed AD. Due consideration has been given to all comments received.

Two comments were received in response to the Notice of Proposed Rulemaking. Neither commenter objected to the need for the modification.

One commenter stated his intentions for incorporating the requirements of the AD within the proposed compliance time.

Another commenter requested that the compliance time be extended to two years because at least one operator's fleet size will make it difficult to accomplish the modifications within one year. The FAA does not concur with the request. Since the AD would require only the installation of a placard on Model 727 and 737 airplanes, and the installation of a divider panel (on one lavatory) on Model 727 airplanes, the FAA considers one year sufficient time for compliance.

After careful review of all available data, including all of the comments received the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 1500 planes of U.S. registry will be affected by this AD. Approximately 4 manhours at an average cost of $40 per manhour are required to modify each airplane. The cost of parts is estimated at $100 per airplane. Based on these figures, the total cost impact of this AD on U.S. operators is estimated to be $390,000.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities because few, if any, Model 727 and 737 airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 727 and Model 737 series airplanes as specified in Boeing Service Bulletins 727-25-277 dated February 23, 1984, and 737-25-1171 dated August 10, 1984, respectively, certificated in any category. To assure adequate lavatory fire protection, accomplish the following within one year after the effective date of this amendment, unless previously accomplished:

A. For Boeing Model 727 airplanes, modify lavatories in accordance with Boeing Service Bulletin 727-25-277 dated February 23, 1984, or later FAA approved revisions.

B. For Boeing Model 737 airplanes, install lavatory placards in accordance with Boeing Service Bulletin 737-25-1171 dated August 10, 1984, or later FAA approved revisions.

C. An alternate means of compliance which provides an acceptable level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received Boeing Service Bulletins 727-25-277 and 737-25-1171 may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 9010 East Marginal Way South, Seattle, Washington.

This Amendment becomes effective September 6, 1985.

Issued in Seattle, Washington, on July 23, 1985.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

[FR Doc. 85-18012 Filed 7-29-85; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 85-NM-16-AD; Amdt. 39-5110]

Airworthiness Directives; Gates Learjet Model 35 and Model 36 Airplanes Modified by Raisbeck STC SA766NW

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) applicable to certain Gates Learjet Model 35 and 36 airplanes modified in accordance with Raisbeck Supplemental Type Certificate (STC) SA766NW, which would reduce the maximum operating limit speed on affected airplanes to prevent encountering certain potentially hazardous conditions. This action is the result of several reported incidents of aileron buffet or buzz experienced during high speed cruise. The aileron buffet or buzz can result in deterioration of the aircraft lateral control system characteristics to an unacceptable level.

DATE: Effective September 6, 1985.

ADDRESSES: The service bulletin specified in this AD may be obtained upon request from the Jet Air Corporation, P.O. Box 245, Bellevue, Washington 98009. This information also may be examined at the Federal Aviation Administration, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Les Berven, Flight Test Branch, ANM-160S, telephone (206) 431-2889; or Mr. Stanton Wood, Airframe Branch, ANM-120S telephone (206) 431-2924. Mailing address: Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive that would require the operators of certain Gates Learjet Models 35 and 36 to permanently reduce the maximum operating Mach limit (M_{MO}) in order to reduce the probability of encountering aileron buffet or buzz was published in the Federal Register on April 8, 1985. The comment period for the proposal closed on May 21, 1985.

Interested parties have been afforded an opportunity to participate in the making of this amendment. Three commenters responded to the proposal.

The first commenter stated that there are no requirements in the proposal for reidentification of the airspeed indicators and the Mach overspeed warning switch after the modifications required in accordance with the AD, and that this could lead to confusion between the modified and unmodified parts. The FAA concurs and the AD is revised to require reidentification of the modified parts.

The commenter also suggested that the criteria for issuance of an exemption, which was discussed in the preamble to the proposal, should be better defined and very closely monitored. The commenter further states that the number of flights accomplished at high weight, high altitude, and high speed for a specified airplane does not necessarily provide justification for granting an exemption. While some of the considerations for exemption requests were discussed in the preamble to the notice, this is not a proper subject for the rule itself. The FAA notes the factors suggested by the commenter and will consider these and all pertinent information furnished in any petition for exemption which may be received.

Finally, the commenter stated that aileron rigging affects the onset of aileron buffet or buzz, and any re-rigging of the ailerons could cause new incidents of aileron buffet or buzz. The FAA has determined that if the rigging is maintained in accordance with the Raisbeck Aileron Balance Tab Rigging Procedures, Report Number REI-81-3, and the airplane does not currently experience the problem, then it should not experience the problem in the future.

The second commenter stated that the AD was unjustified because he had never experienced the problem. He suggested that the problem is caused by poor maintenance and poor training. The FAA recognizes that the problem may not affect all airplanes modified by STC SA766NW. However, the FAA has found little evidence that this problem is caused merely by poor maintenance or poor training, and maintains that the actions required by the proposed AD are necessary in order to provide an acceptable level of safety.

The final commenter agreed with the AD as proposed.

The FAA has reviewed the available data, including all of the comments received, and has determined that air safety and the public interest require the adoption of the rule with the changes previously noted.

There are 29 U.S. registered airplanes that will be affected by this AD. It will take approximately 5 hours to accomplish the removal and recalibration of the airspeed indicators and Mach overspeed warning switch, and to revise the FAA approved Airplane Flight Manual Supplement. Average labor costs are estimated to be $40 per man-hour. It is estimated that it will cost $950 per airplane to reset the airspeed indicators and Mach overspeed warning switch. Based on these figures, the total cost impact of this AD is estimated to be $33,350.

For the reasons discussed above, the FAA has determined that this regulation in not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities because few, if any, Learjet Model 35/36 airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Gates Learjet: Applies to Model 35, 35A, 36, and 36A series airplanes modified by Raisbeck Group Supplemental Type Certificate (STC) SA766NW, certificated in any category. The affected airplane serial numbers are: 35-023, 35-034, 35-042, 35-044, 35-047, 35A-088, 35A-073, 35A-075, 35A-076, 35A-086, 35A-092, 35A-093, 35A-095, 35A-118, 35A-127, 35A-132, 35A-135, 35A-145, 35A-172, 35A-185, 35A-192, 35A-203, 36A-206, 35A-207, 35A-209, 35A-228, 35A-231, 35A-244, 35A-245, 36-003, 36-004, 36-017, 36A-028, 36A-029, 36A-031, 36A-036, 36A-043, and 36A-044.

To prevent deterioration of the airplane lateral control characteristics as a result of aileron buffet or buzz accomplish the following, unless previously accomplished.

A. Within the next 200 hours time in service or six months after the effective date of this AD, whichever comes first, accomplish either paragraph 1. or 2., as follows:

1. Reduce M_{MO} by accomplishing the following:

a. Submit the FAA approved STC SA766NW Airplane Flight Manual Supplement to the Manager, Flight Test Branch, ANM-160S, Seattle Aircraft

Certification Office, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

b. Accomplish the following:

(1) Remove the airspeed indicators and Mach overspeed warning switch.

(2) Recalibrate the airspeed indicators and Mach overspeed warning switch.

(3) Reidentify the airspeed indicators and Mach overspeed warning switch.

(4) Revise the FAA approved Airplane Flight Manual Supplement.

c. Reset the airspeed indicators and Mach overspeed warning switch.

2. Accomplish the following:

a. Submit the FAA approved STC SA766NW Airplane Flight Manual Supplement to the Manager, Flight Test Branch, ANM-160S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

b. Accomplish the following:

(1) Remove the airspeed indicators and Mach overspeed warning switch.

(2) Reidentify the airspeed indicators and Mach overspeed warning switch.

(3) Revise the FAA approved Airplane Flight Manual Supplement.

c. Reset the airspeed indicators and Mach overspeed warning switch.

B. Within the next 200 hours time in service or six months after the effective date of this AD, whichever comes first, accomplish the following:

1. Remove the airspeed indicators and Mach overspeed warning switch.

2. Recalibrate the airspeed indicators and Mach overspeed warning switch.

3. Reidentify the airspeed indicators and Mach overspeed warning switch.

4. Revise the FAA approved Airplane Flight Manual Supplement.

5. Reset the airspeed indicators and Mach overspeed warning switch.

C. Airplanes may be flown in accordance with FAR 21.197 and 21.199 to a base where the AD can be accomplished.

D. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

All persons affected by this directive who have not already received the Raisbeck Supplemental Type Certificate SA766NW Airplane Flight Manual Supplement may obtain copies upon request to Raisbeck Group, 2901 Third Avenue, Seattle, Washington 98121. This document may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective September 6, 1985.

Issued in Seattle, Washington, on July 23, 1985.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

[FR Doc. 85-18013 Filed 7-29-85; 8:45 am]

BILLING CODE 4910-13-M

total cost impact of this AD on U.S. operators is estimated to be $205,800.

Accumulated landings (on effective date of this AD)	Inspection

from the manufacturer may obtain copies upon request to McDonnell Douglas

Certification Office, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168, to change the limit Mach number from .83 to .80;

b. Remove the "Mach Overspeed Warning Switch" and have it reset from Mach .83 to .80. Contact the manufacturer PRECISION SENSOR, P.O. Box 509, Milford, Connecticut 06460, telephone number (203) 877–2795, to have the instrument recalibrated. Reidentify the Mach overspeed warning switch by ink stamping "Mach limit .80" adjacent to the part number. Reinstall the "Mach Overspeed Warning Switch" after it has been calibrated; and

c. Remove pilot's and copilot's airspeed indicators and have them modified by changing the "Barber Pole" from Mach number .83 to .80. The instrument must be recalibrated by the instrument manufacturer or a certified repair station. Reidentify the airspeed indicators by ink stamping "Mach limit .80" adjacent to the part number. Reinstall the pilot's and copilot's airspeed indicators after they have been recalibrated.

2. Remove the modifications installed by Raisbeck Group STC SA766NM, and return the aircraft to the original type design configuration or to the Gates Learjet "Softflight" configuration.

B. Airplanes may be ferried to a maintenance base for repair in accordance with FAR 21.197 and 21.199.

C. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Jet Air Corporation, P.O. Box 245, Bellevue, Washington 98009. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at 9010 East Marginal Way South, Seattle, Washington.

This Amendment becomes effective September 6, 1985.

Issued in Seattle, Washington, on July 23, 1985.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

[FR Doc. 85–18011 Filed 7–29–85; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 85–NM–35–AD; Amdt. 39–5109]

Airworthiness Directives; McDonnell Douglas Model DC–9–10, –20, –30, –40, –50, and C–9 (Military) Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) that supersedes an existing airworthiness directive (AD) which requires visual/borescope inspection (NDI) and replacement, as necessary, of the aft pressure bulkhead tee cap on McDonnell Douglas Model DC–9–10, –20, –30, –40, –50, and C–9 (Military) series airplanes with 60,000 or more landings. This amendment requires the inspection and/or repair of the tee cap of airplanes with 35,000 or more landings and, in addition, requires repetitive inspection of all affected airplanes. This action is prompted by reports of cracks in the aft pressure bulkhead tee caps, the failure of which could result in rapid depressurization and severe structural damage to the aircraft.

DATE: Effective September 6, 1985.

Compliance schedule as prescribed in the body of the AD, unless already accomplished.

ADDRESSES: The applicable service information may be obtained from McDonnell Douglas Company, P.O. Box 1771, Long Beach, California 90801, Attention: Publications Department, C1–L65, Mail Code: (54–60). This information also may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South C–68966, Seattle, Washington, or 4344 Donald Douglas Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Michael N. Asahara, Sr., Aerospace Engineer, Airframe Branch, ANM–122L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808; telephone (213) 548–2826.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include a new airworthiness directive (AD) to require inspection and repair, as necessary, of the aft pressure bulkhead tee cap on certain McDonnell Douglas DC–9 series airplanes was published in the **Federal Register** on May 3, 1985 (50 FR 18871). The comment period for the proposal closed May 23, 1985.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the five comments received. Two commenters have suggested that the FAA review the NPRM requirements in view of the results of recent strain gaged flight testing and results of an eddy current inspection program from the forward side of the tee cap. The FAA has reviewed the recent developments of flight testing and has determined that the resultant data cannot support the delay in the issuance of this AD or any changes in the repetitive inspection intervals. The FAA has been apprised by the manufacturer of an eddy current inspection procedure currently being developed for use from the forward side of the subject tee cap; however, this procedure has not yet been formally submitted to the FAA for review. Should an eddy current inspection program be approved by the FAA, further rulemaking may be considered to revise the AD to incorporate this program, or accomplishment of this inspection program may be submitted to FAA for acceptance as an alternate means of compliance under paragraph D. of this AD.

The third commenter suggested that the proposed compliance threshold of 1,500 landings be extended to 2,000 landings. Based on the anticipated effective date of the final rule, the cause and nature of cracking, and the prediction of crack locations, the FAA considers a compliance threshold of 1,500 landings appropriate. The final rule remains unchanged in this regard.

The fourth commenter made two suggestions. The first was to extend the initial inspection time to allow the inspection to be accomplished at a long down time maintenance visit. The FAA considers the problem too critical to extend the initial inspection time beyond those proposed in the NPRM. The second suggestion was to incorporate an inspection program in which the areas of the tee cap where cracks have been detected are inspected first (between longerons 6 and 18 on both left and right sides of the airplane), with the entire tee cap inspected within 4,000 landings. The FAA concurs with the concept of the second suggestion which merely reduces the scope of the initial inspection to the sides of the aft pressure bulkhead tee cap, between longerons 6 and 18. Subsequent inspections, however, will include the entire bulkhead periphery as proposed.

The fifth commenter (the manufacturer) suggested that various editorial changes be made for clarification and consistency. The FAA has noted these editorial changes in the final rule. In addition, the manufacturer advised the FAA that an eddy current inspection procedure from the forward side of the tee cap will be incorporated into McDonnell Douglas DC–9 Service Bulletin 53–191. However, as of yet, this procedure has not yet been submitted to the FAA for review as an acceptable alternate inspection program.

It is estimated that 514 airplanes of U.S. registry will be affected by this AD, that it will take approximately 10 manhours per airplane to accomplish the required inspections, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of this AD on U.S. operators is estimated to be $205,600.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously noted.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities because few, if any, Model DC–9 and C–9 airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

Aviation safety, Aircraft.

Adoption of Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulation by superseding AD 85–06–03, Amendment 39–5014 (50 FR 10936), with the following new airworthiness directive:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new AD:

McDonnell Douglas: Applies to McDonnell Douglas Model DC–9–10, –20, –30, –40, –50 and C–9 (Military) series aircraft, certificated in any category, with 35,000 or more landings. Compliance required as indicated unless previously accomplished within the last 3500 landings.

To detect cracks which could result in structural failure of the fuselage aft pressure bulkhead, accomplish the following:

A. Inspect from aft side of the bulkhead tee cap, between longerons 6 and 18 of the fuselage (ventral bulkhead P/N 5910130–53/–54 (LH and RH) or non-ventral bulkhead P/N 5910163–61/–62 (LH and RH)), in accordance with McDonnell Douglas DC–9 Alert Service Bulletin A53–191, dated March 13, 1985 (hereinafter referred to as ASB A53–191), or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region. The inspections must be performed in accordance with the compliance schedule shown in the following tabulation:

Accumulated landings (on effective date of this AD)	Inspection
35,000 to 49,999	1,500
50,000 to 59,999	1,000
60,000 or more	300

[1] Initial inspection from effective date of AD (landings).

For airplanes with less than 35,000 landings on the effective date of this AD, conduct the initial inspection before the accumulation of 36,500 landings.

Note.—The specific areas of concern include the forward end/or aft face of the upstanding leg of the tee, starting at the outboard edge of the bulkhead web. The area extends outboard to approximately the inboard point of tangency for the .166-inch tee fillet radius on the upstanding leg.

B. If no cracks are found, accomplish repetitive inspections in accordance with section 2., Accomplishment Instructions, of ASB A53–191, at intervals not to exceed 3,500 landings from the initial inspection in accordance with this AD.

C. If cracks are found, before further flight, accomplish one of the following:

1. Repair by replacing cracked tee cap with a new part, in accordance with McDonnell Douglas Service Rework Drawing SR09530001 (originally identified as MDC–J080305), dated February 15 1985, or later FAA approved revision; or

2. Repair by splicing in a section of tee cap, in accordance with McDonnell Douglas Service Rework Drawing SR09530001, dated February 15, 1985, or later FAA approved revision.

After repair, resume repetitive inspection in accordance with paragraph B., above.

D. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

Note.—Compliance with paragraph 1.D. of ASB A53–191, (with the exception of the noted initial inspection compliance period) constitutes an acceptable alternate means of complying with this AD.

E. Upon request of an operator, an FAA Maintenance Inspector, subject to prior approval of the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region, may adjust the repetitive inspection intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the adjustment for that operator.

F. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplanes unpressurized to a base to comply with the requirements of this AD.

G. For the purposes of complying with this AD, existing records of landings will be used subject to acceptance of the assigned FAA Maintenance Inspector. In the absence of such records, the number of landings may be determined by dividing each airplane's time in service by the operator's fleet average time per flight for the DC–9 airplanes with the approval of the assigned FAA Maintenance Inspector.

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1–750 (54–60). These documents also may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California.

This amendment becomes effective September 6, 1985.

Issued in Seattle, Washington, on July 23, 1985.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

[FR Doc. 85–18014 Filed 7–29–85; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 85–NM–69–AD; Amdt. 39–5108]

Airworthiness Directives; McDonnell Douglas Model DC–10 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires inspection and replacement of parts, as necessary, of lower galley hot entree cart wiring installations on certain McDonnell Douglas DC–10 airplanes. This action is prompted by a fire on the ground which began in the area of the lower galley tunnel, and resulted in substantial damage to the airplane. This action is necessary to prevent a recurrence in other airplanes.

DATE: Effective August 19, 1985.

Compliance schedule as prescribed in the body of the AD, unless already accomplished.

ADDRESSES: The applicable service information may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1–750 (54–60). This information may also be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at 4344 Donald Douglas Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. E.F. Huettner, Aerospace Engineer, Systems & Equipment Branch, ANM–130L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808; telephone (213) 548–2831.

SUPPLEMENTARY INFORMATION: On July 13, 1985, one operator reported a fire on the ground in the lower galley right-hand

1. The authority citation for Part 39 continues to read as follows:

SUMMARY: This amendment adds a new airworthiness directive (AD) which

assemblies in $652 per tube (one tube per engine). Based on these figures, the

assembly P/N–ASL0538–503 in accordance with McDonnell Douglas DC–10 Alert Service

FOR FURTHER INFORMATION CONTACT: Stanley Nichols, 202–453–1904

VOL 50 ISS 146 JL 30 1985 UMI

SUPPLEMENTARY INFORMATION: On July 13, 1985, one operator reported a fire on the ground in the lower galley right-hand tunnel area between fuselage stations 675 and 750, which caused substantial damage to the airplane. There is evidence to believe that this fire was the result of misting hydraulic fluid combined with electrical arcing from wiring associated with the lower galley hot entree carts. Evidence indicates that some hot entree cart wiring installations may not conform to Douglas drawings in that clamping of the wiring conduit to hydraulic lines may be missing or the wiring incorrectly routed. Douglas DC–10 Alert Service Bulletin A24–131, dated July 17, 1985, has been released which prescribes inspection of the lower galley hot entree cart wiring installation for conformity to Douglas drawings, and correction, if necessary.

Since this situation is likely to exist or develop on other airplanes of the same type design, this AD requires inspection of the lower galley hot entree cart wiring installation for conformity to Douglas drawings, and correction, if necessary.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The Federal Aviation Administration has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT."**

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulation as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a); 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

McDonnell Douglas: Applies to McDonnell Douglas Model DC–10 series airplanes, certificated in any category, which are listed in McDonnell Douglas Alert Service Bulletin A24–131, dated July 17, 1985. Compliance required within 15 days after the effective date of this AD, unless previously accomplished.

To prevent hydraulic line damage and/or arcing of the electrical wiring installation associated with the lower galley hot entree cart, accomplish the following:

A. Inspect the lower galley electrically heated hot entree cart wiring and conduit installation in accordance with Douglas Alert Service Bulletin A24–131, dated July 17, 1985, or later FAA approved revision, Accomplishment Instructions A and B. Install or replace parts as necessary.

B. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1–750 (54–60). These documents also may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California.

This Amendment becomes effective August 19, 1985.

Issued in Seattle, Washington, on July 23, 1985.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

[FR Doc. 85–18013 Filed 7–29–85; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 85–NM–24–AD; Amdt. 39–5112]

Airworthiness Directives; McDonnell Douglas Model DC–10–15, –30, and KC–10A (Military) Series Airplanes; and CF6–50C–Powered Airbus Industrie Model A–300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) which requires installation of modified fuel flowmeter tube assemblies. This action is prompted by reports of failures of the fuel flowmeter tube assembly. This condition, if not corrected, could result in fuel being pumped into the nacelle and lead to engine flameout in flight.

DATE: Effective September 6, 1985.

Compliance schedule as prescribed in the body of the AD, unless already accomplished.

ADDRESSES: The applicable service information may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1–750 (54–60). This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at 4344 Donald Douglas Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Roy A. McKinnon, Aerospace Engineer, Propulsion Branch, ANM–140L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808; telephone (213) 548–2835.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include a new airworthiness directive (AD) to require installation of modified fuel flowmeter tube assemblies was published as a Notice of Proposed Rulemaking (NPRM) in the **Federal Register** on March 26, 1985 (50 FR 11894). The comment period for the proposal closed on May 20, 1985.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to all comments received. Two comments were received. Both commenters had no objections to the issuance of the proposed AD. The foreign aircraft manufacturer requested that a reference to its appropriate service bulletin be added to the final rule; the FAA concurs with this suggestion and a reference to the service bulletin has been added in paragraph A. of the amendment.

It is estimated that 39 DC–10 airplanes (3 engines per airplane) of U.S. registry, and 35 A–300 airplanes (2 engines per airplane) of U.S. registry will be affected by this AD. It is estimated that it will require approximately 7.7 manhours per airplane to accomplish the inspection, and 4.7 manhours per airplane to accomplish the required installation. The average labor cost is $40 per manhour. The cost of the new tube assemblies in $652 per tube (one tube per engine). Based on these figures, the total cost impact of this AD to U.S. registered owners is estimated to be $158,628 (based on a single inspection).

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the following rule.

For the reasons discussed above, the FAA had determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact on a substantial number of small entities because few, if any, Model DC–10 or KC–10A, or CF6–50C–powered A300 series airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulation as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new AD:

McDonnell Douglas and Airbus Industrie: Applies to McDonnell Douglas Model DC–10–15, –30, and KC–10A (Military) series airplanes, and CF6–50C powered Airbus Industrie Model A–300 series airplanes. Compliance is required as indicated.

To prevent failure of the fuel flowmeter tube assembly, accomplish the following, unless already accomplished:

A. Within the next 1000 flight hours after the effective date of this AD, inspect the fuel flowmeter tube assemblies in accordance with McDonnell Douglas Alert Service Bulletin A73–20, dated January 7, 1985, or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region; or Airbus Industrie Service Bulletin A300–73–007 (associated with modification 5912), as appropriate. Perform the inspection every 1000 flight hours until paragraph B., below, is accomplished. If any cracks are found, accomplish the requirements of paragraph B. before any further revenue flight.

B. Within one year after the effective date of this AD, install the fuel flowmeter tube assembly P/N–ASL0538–503 in accordance with McDonnell Douglas DC–10 Alert Service Bulletin A73–20, dated January 7, 1985, or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

D. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to the McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1–750 (54–60). These documents also may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California.

This amendment becomes effective September 6, 1985.

Issued in Seattle, Washington, on July 23, 1985.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

[FR Doc. 85–18010 Filed 7–29–85; 8:45 am]

BILLING CODE 4910–13–M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1214

Space Transportation System; Reimbursement for Spacelab Services

AGENCY: National Aeronautics and Space Administration.

ACTION: Interim final rule with request for public comment.

SUMMARY: This interim final rule, in conjunction with Subparts 1214.1 and 1214.2, provides an equitable basis for reimbursement for Spacelab services provided in conjuction with a Shuttle flight.

DATE: This interim final rule is effective on July 30, 1985. This action is subject to revision following a comment period of 60 days from the date of publication.

ADDRESS: Written comments should be submitted to the Office of Space Flight, Code MC, National Aeronautics and Space Administration, Washington, D.C. 20546. All written comments will be available for public inspection in Room 421M, FB–10B, 600 Independence Avenue, SW., Washington, D.C. during regular working hours.

FOR FURTHER INFORMATION CONTACT: Stanley Nichols, 202–453–1904.

SUPPLEMENTARY INFORMATION: On September 25, 1980, NASA published a proposed rule in the **Federal Register** (45 FR 63506–63512) concerning reimbursement for Spacelab services. Interested parties were given until November 24, 1980, to submit written comments or objections.

Full and careful consideration was given to all comments received. A number of comments received were related to the basic Shuttle policies, launch services agreements, or quantitative aspects of setting prices. Replies to such comments were sent directly to the commenters and are not included herein. Based on the comments received, as well as actual operational experience, several basic issues were re-examined and some substantive and editorial changes have been made to the proposed rule. The disposition of those comments regarding the proposed rule are discussed herein and a second comment period on this interim final rule is provided. Establishment of this interim final rule will not affect obligations incurred prior to its publication.

Except as otherwise noted, paragraph numbers referenced in this discussion below are as shown in the interim final rule.

Applicable Time Period

The proposed rule was developed to cover the entire STS operational era. As defined in § 1214.600, this interim final rule only applies to the second phase of STS operations. (U.S. government fiscal years 1986, 1987, and 1988). NASA will define policies for subsequent periods when more experience is gained with Spacelab operations.

FMDM/MPESS Offer

Since publication of the proposed rule, NASA has developed the flexible multiplexer-demultiplexer/multipurpose experiment support structure (FMDM/MPESS) as an adjunct to the ESA-developed Spacelab hardware. This interim final rule offers the services of the FMDM/MPESS on a dedicated-element basis [§ 1214.600(c)].

Mandatory Use of Dedicated Flights

Certain Spacelab configurations effectively preclude the manifesting of other payloads. In § 1214.604(a), these configurations are defined as requiring the customers to contract for a dedicated flight. Provisions are made, however, to provide some financial relief to the customer if a sharee can be found and manifested on the same flight.

Postponement and Termination

Since publication of the proposed rule,

Flight Crews and Payload Operations

Two mission-specialist

Options

The

who provide their own Spacelab

New assumed flight configurations

procurement, Security measures, Space

Postponement and Termination

Since publication of the proposed rule, experience in Spacelab operations has indicated that the charges for postponement and termination should be separated into Spacelab operations charges and Shuttle transportation charges. Therefore, § 1214.804(c) has been modified accordingly. The adjusted values shall be used as the basis for computing charge factors and prorating services.

Payload Removal Cutoff Date

Because it is not always practical to remove a Spacelab payload near the launch date, § 1214.804(c)(5) requires the establishment of a payload removal cutoff date. This date will be set by NASA and will be based on the nature of individual payloads. It is NASA's intention to be as flexible as practical in accommodating late removals. Note that the customer may still exercise the postponement/termination provisions even though the payload is not removed from the flight.

Minor Delay

The minor delay provisions of the Shuttle policy were not offered to shared-element customers under the proposed rule. In § 1214.804(d), these provisions are extended to all customers whose payload has a Shuttle load factor equal to or greater than 0.05. This puts Spacelab payloads on an equal footing with other Shuttle payloads.

Standard Days on Orbit

Some commenters questioned the use of 1 day of on-orbit operations as the basis for the standard price for dedicated-Shuttle Spacelab flights [§ 1214.804(e)(2)(ii)] and dedicated pallet flights [§ 1214.804(f)(2)(iii)] when 7 days of on-orbit operations forms the basis for the standard flight price for complete-element [§ 1214.804(g)(2)(ii)] and shared-element [§ 1214.804(h)(2)(iv)] flights. NASA realizes that few, if any, Spacelab flights will involve 1-day missions. The pricing structure gives the customer the opportunity to reduce costs on those occasions when the customer's mission can be accomplished in less than 7 days. By basing the standard flight price for complete-pallet and shared-element customers on a 7-day mission, NASA can offer these customers the opportunity to fly on a 7-day mission while paying only a pro rata share of the extra-days-on-orbit charge. For these reasons no changes were made in the number of days used as the basis for standard services.

Flight Crews and Payload Operations

Two mission specialists now are assigned to all STS flights, and their available payload operation time now constitutes the standard service in this area [§ 1214.812(d)].

Responding to comments on the desirability of two-shift operation for Spacelab payloads, NASA has modified § 1214.804(g)(2)(ii) and § 1214.804(h)(2)(iv) to incorporate two-shift operation as a standard service for complete-pallet and shared-element missions. Because dedicated-pallet and dedicated FMDM/MPESS payloads may not require two-shift operation and are designed to fly as mixed cargo on standard Shuttle flights, one-shift operation remains the standard for service and price for these elements. Using single-shift operation as a standard for dedicated flights provides minimum cost to any customers who may not need two-shift service. Customers may contract for two-shift operation, if required, as an optional service.

One commenter felt that § 1214.804(g)(2)(ii) should be modified to allow the customer's payload to continue to operate so long as it did not use more than its share of resources and did not interfere with other operations. It is essential to establish the maximum amount of service to which a customer is entitled for the standard flight price, and § 1214.804(g)(2)(ii) does this. NASA will likely permit continued operation of the customer's payload at no extra cost if and when this is practical. However, it appears inappropriate to encourage customers to plan on obtaining operating time in excess of their pro rata share. Therefore, no change is made in § 1214.804(g)(2)(ii).

Rules regulating the use of customer-selected payload specialists are defined in § 1214.812. One commenter requested details on criteria for selection of customer-selected payload specialists. These criteria will be established in other NASA documents.

Dedicated-Element Standard Orbit

Experience to date indicates that the offer to fly dedicated elements (and other Shuttle payloads as well) to the 57° inclination on a standard shared-flight basis poses excessive financial risk to NASA because there are too few potential sharees to permit cost-effective missions. The only standard orbit for dedicated elements and dedicated FMDM/MPESS payloads is thus defined to be 28.5°, 160 nautical miles (nmi) in § 1214.804(f)(2)(iv).

Options

The launch options offered under the proposed rule have been withdrawn by § 1214.804(k). There has been no customer interest in these options and it is planned that they will be deleted from the Shuttle policy in an upcoming revision.

Premature Termination of Spacelab Flights

Some commenters felt that § 1214.806 as stated in the proposed rule was unduly discriminatory against Spacelab. NASA has deleted this distinction. Because dedicated-Shuttle, dedicated-pallet, and dedicated FMDM/MPESS customers pay for all extra days on orbit as optional services, and because NASA's practice is to refund charges for unused or undamaged optional services, affected customers automatically would be entitled to a refund in case of premature termination. For complete-pallet and shared-element flights, NASA previously established a standard 7-day-on-orbit mission to accommodate the needs of all customers. This standard mission duration is included in the standard flight price. NASA normally provides no refunds for unused standard services; however, NASA will give refunds of a pro rata share of extra-days-on-orbit charges to complete-pallet and shared-element customers whose missions are, in NASA's judgment, adversely affected by the premature termination.

Standby Spacelab Flights

Some customers felt that the standby provisions of the Shuttle policy should be extended to Spacelab customers. Because (1) NASA has a limited supply of Spacelab hardware and cannot permit it to be tied up for extended periods, and (2) it is essential that standby payloads be capable of being manifested on relatively short notice and, with a wide variety of other payloads, the standby provisions are not offered to Spacelab customers requiring NASA-furnished Spacelab hardware [§ 1214.808]. Customers who supply their own Spacelab hardware and require only Level I integration may fly under the standby provisions of the Shuttle policy.

Charges for Customer-Furnished Spacelab Hardware

Some commenters noted that there is little difference between the charges for NASA-furnished and customer-furnished hardware. The differences in cost for Level III/II integration are in fact relatively minor. NASA has modified § 1214.810 such that customers who provide their own Spacelab hardware and do not require Level III/II integration are not charged for these services as a part of their standard services price.

Reflight Guarantees

Based on a number of comments as well as experience to date, a major revision of § 1214.811 was made. It is planned that most of the principles stated therein will be incorporated in § 1214.1 and § 1214.2 in upcoming revisions.

Consistent with current Shuttle practice for the second phase of STS operations, there is now no reflight premium for Spacelab shared-flight payloads to the 28.5°, 160 nmi standard orbit or for any dedicated-flight Spacelab mission [§ 1214.811(a)].

Provisions are made in § 1214.811(b) to negotiate reflight guarantees for nonstandard missions. NASA will negotiate any such guarantees on a case-by-case basis.

Because it is not practical to refly parts of payloads, § 1214.811(c) requires that reflight guarantees, if provided, must cover a customer's entire payload.

Several commenters felt that the Spacelab reflight guarantees did not provide adequate coverage. After lengthy deliberation, § 1214.811(d) was modified to guarantee that selected Spacelab systems would be within nominal limits, at the normal monitoring points for such systems, at the time of first turn-on of each customer's payload. In this context, the term "payload" encompasses all experiments covered by a single Launch Services Agreement. It is not NASA's intent to guarantee that Spacelab systems will be operational at the initiation of each individual experiment within a payload. In NASA's opinion, attempting to assess fault in case of subsequent Spacelab and/or Shuttle failures would prove unmanageable. NASA believes that providing this clear demarcation line, well beyond the achievement of orbit, is a reasonable compromise between the customers' desires and the realities of negotiating Launch Services Agreements and reflight guarantees.

Pricing Algorithms

A number of comments prompted a fundamental re-examination of the basic pricing algorithms. As a result, the sharing algorithms for all but shared-module flights are now based on the Shuttle length-or-upweight algorithms. Prices for shared modules are still based on the long module configuration because that provides the lowest cost to the customer consistent with cost recovery.

New assumed flight configurations and new data on element capacities have been factored into the computational procedures defined in § 1214.813. Under these conditions, the Shuttle load factors for dedicated and complete pallets are always length-limited. Fixed values for load factor, charge factor, and capacity are thus defined for these offers.

Adjustments of Load Factors

Some commenters felt that the provisions of § 1214.813(a)(5) negated the other computational procedures defined in § 1214.813. NASA did rather substantial analyses of the alternatives available for establishing standards for load factors. It was concluded that no simple algorithms could be established which would meet every conceivable need. Instead, a procedure was developed which permits a customer with a geometrically regular payload with nominal requirements for services to estimate a price rather exactly. Provision is then made for NASA, at the time of Launch Services Agreement signing, to adjust the load factor up or down for payloads which depart significantly from the nominal case. NASA still believes that this is the best approach, and no changes are made except to delete the provision which dealt with up-weight vs. down-weight.

Reduction in Minimum Price for Shared-Element Users

Some commenters felt that the price for minimum-sized shared-element payloads was too high and would discourage preliminary experimentation. NASA's justification for establishing the minimum prices is based on the fact that there are certain costs inherent in dealing with a payload covered by its own Launch Services Agreement, regardless of the size of the payload. NASA has, however, responded to the commenters' concerns by modifying § 1214.813(g) such that the minimum payload charges are substantially reduced.

The National Aeronautics and Space Administration has determined:

1. This rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601–612, since it will not exert a significant economic impact on a substantial number of small entities.

2. This rule is not a major rule as defined in Executive Order 12291.

List of Subjects in 14 CFR Part 1214

Payload Specialist, Mission Manager, NASA-related payload, Mission Specialist, Investigator Working Group, Government employees, Government procurement, Security measures, Space transportation and exploration, SSUS procurement, Small self-contained payloads, Reimbursement for shuttle services, Authority of Space Transportation Systems (STS) Commander, Articles authorized to be carried on space transportation system flights, Space Transportation System Personnel Reliability Program, Nonscientific payloads, Space flight participants.

PART 1214—SPACE TRANSPORTATION SYSTEM

14 CFR Part 1214 is amended by adding Subpart 1214.8 to read as follows:

Subpart 1214.8—Reimbursement for Spacelab Services

Sec.

1214.800 Scope.

1214.805 Unforeseen customer delay.
1214.806 Premature termination of Spacelab flights.
1214.807 Exceptional payloads.
1214.808 Standby payloads.
1214.809 Short-term call-up and accelerated launch.
1214.810 Integration of payloads.
1214.811 Reflight guarantee.
1214.812 Payload specialists.
1214.813 Computation of sharing and pricing parameters.

Authority: Sec. 203, Pub. L. 85–568, 72 Stat. 429, amended (42 U.S.C. 2473).

Subpart 1214.8—Reimbursement for Spacelab Services

§ 1214.800 Scope.

This Subpart 1214.8 establishes the special reimbursement policy for Spacelab services provided to Space Transportation System (STS) customers governed by the provisions of Subpart 1214.1 or Subpart 1214.2. It applies to flights occurring in the second phase of STS operations (U.S. Government fiscal years 1986, 1987, and 1988). The following five types of Spacelab flights are available to accommodate payload requirements:

(a) Dedicated-Shuttle Spacelab flight [Ref. § 1214.804(e)].

(b) Dedicated-pallet flight [Ref. § 1214.804(f)].

(c) Dedicated-FMDM/MPESS (flexible multiplexer-demultiplexer/multipurpose experiment support structure) flight [Ref. § 1214.804(f)].

(d) Complete-pallet flight [Ref. § 1214.804(g)].

(e) Shared-element flight [Ref. § 1214.804(h)].

§ 1214.803 Reimbursement policy.

(a) *Reimbursement basis.* (1) This

(as defined in the Shuttle policy) from sharees actually flown.

(5) At the time of signing of the Launch Services Agreement, NASA

MPESS) and form the basis for establishing the standard flight price

(iv) Assignment, with the customer's

VOL 50 ISS 146 JL 30 1985 UMI

(e) Shared-element flight [Ref. § 1214.804(h)].

§ 1214.801 Definitions.

(a) *Shuttle policy.* The appropriate Subpart (1214.1 or 1214.2) governing use of the Shuttle. Determinaltion of the appropriate Subpart for each customer shall be made by reference to § 1214.101 and § 1214.201.

(b) *Spacelab elements.* Pallets (3-meter segments), pressurized modules (long or short), and the FMDM/MPESS (1-meter cross-bay structure), all as maintained in the NASA-approved Space lab configuration.

(c) *Standard flight price.* The price for standard Shuttle and standard Spacelab services provided. If a customer elects not to use a portion of the standard services, the standard flight price shall not be affected.

(d) *Shuttle load factor.* The parameter used to compute the customer's pro rata share of Shuttle services and used to compute the Shuttle charge factor. Means of computing this parameter are defined in § 1214.813.

(e) *Spacelab load fraction.* The parameter used to compute the customer's pro rata share of each element's services and used to compute the element charge factor. Means of computing this parameter are defined in § 1214.813.

(f) *Shuttle charge factor and element charge factor.* Parameters used in computation of the customer's flight price. Means of computing these parameters are defined in § 1214.813.

(g) *Dedicated flight price for Spacelab missions.* (1) The single-shift operation dedicated flight price for Spacelab missions is identical to the Shuttle dedicated flight price as defined in the Shuttle policy.

(2) The two-shift operation dedicated flight price for Spacelab missions is the sum of:

(i) The Shuttle dedicated flight price as defined in the Shuttle policy.

(ii) The standard price for additional services required to support a second shift of on-orbit operations.

§ 1214.802 Relationship to Shuttle policy.

Except as specifically noted, the provisions of the Shuttle policy also apply to Spacelab payloads. Although some language in the Shuttle policy is Shuttle-specific, it is the intent of this Subpart 1214.8 that the Shuttle policy be applied to Spacelab also, including the policy on patent and data rights. However, in the event of any inconsistencies in the policies, the Spacelab policy will govern with respect to Spacelab services.

§ 1214.803 Reimbursement policy.

(a) *Reimbursement basis.* (1) This policy is established for the second phase of STS operations (U.S. Government fiscal years 1986, 1987, and 1988).

(2) *Standard flight price.* During this phase, customers covered by Subpart 1214.1 or Subpart 1214.2 shall reimburse NASA for standard Spacelab services an amount which is a pro rata share of:

(i) The appropriate dedicated flight price for the customer's Spacelab mission.

(ii) The standard price for use of the selected Spacelab elements during the second phase of STS operations.

(3) The price shall be held constant for flights during this phase of STS operations.

(4) Reimbursement policies for subsequent phases of STS operations will be developed after NASA has obtained more operational experience.

(b) *Escalation.* Payments shall be escalated in accordance with the Shuttle policy.

(c) Customers shall reimburse NASA an amount which is the sum of the customer's standard flight price and the price for all optional services provided.

(d) *Earnest money.* For those customers required to pay earnest money by the Shuttle policy, the total earnest money payment per payload for Spacelab payloads (including Shuttle services) shall be the lesser of $150,000 or 10% of the customer's estimated standard flight price. Earnest money will be applied to the first payment for standard services made for each payload by the customer or will be retained by NASA if a Launch Services Agreement is not signed.

§ 1214.804 Services, pricing basis, and other considerations.

(a) *Mandatory use of dedicated-Shuttle Spacelab flight.*

(1) Customers shall be required to fly under the provisions of paragraph (e) of this section if the customer requires exclusive use of any of the following:

(i) Pressurized module (long or short).

(ii) Three pallets in the "1+1+1" configuration.

(iii) Four pallets in the "2+2" configuration.

(2) In the cases cited in paragraph (a)(1) of this section, if the customer requests, NASA will attempt to find compatible sharees to fly with the customer's payload. If NASA is successful, the customer's Shuttle standard flight price shall be the greater of:

(i) The appropriate dedicated flight price for the customer's Spacelab mission less adjusted reimbursements (as defined in the Shuttle policy) from sharees actually flown.

(ii) The computed shared-flight Spacelab flight price for the customer's payload.

(b) *Apportionment and assignment of services.* Subject to NASA approval, a customer contracting for a Spacelab flight shall be permitted to apportion and assign services under the provisions of the Shuttle policy.

(c) *Postponement and termination.* (1) A customer may postpone the flight of a Spacelab payload one time with no additional charge if postponement occurs more than 18 months before the scheduled launch date.

(2) Postponement or termination fees for Spacelab payloads shall consist of the sum of:

(i) A fee for Shuttle transporation.

(ii) A fee for use of the Spacelab elements.

(3) *Shuttle transportation fee.* Customers shall be governed by the provisions of the Shuttle policy with the following exception. When computing occupancy fees for shared-element payloads, the "adjusted reimbursements from other customers" shall be defined as the adjusted reimbursements from those customers who subsequently contract for the use of the element being shared.

(4) *Spacelab use fee.* The postponement and termination fees for use of the Spacelab elements are computed as a percentage of the customer's price for use of the Spacelab elements and shall be based on the table below. When postponement or termination occurs less than 18 months before launch, the fees shall be computed by linear interpolation using the points provided.

Time when postponement or termination occurs, months before scheduled launch date	Fee for use of Spacelab element(s), percent of price for use of element(s)	
	Post-ponement	Termi-nation
Dedicated Flights, Dedicated Elements, and Dedicated FMOM/MPESS		
0	75	100
3	60	85
12	14	20
18	5	10
More than 18	5	10
Complete Pallets and Shared Elements		
Less than 8	95	100
8	95	100
9	32	95
12	18	80
18	5	10
More than 18	5	10

(5) At the time of signing of the Launch Services Agreement, NASA shall define a payload removal cutoff date (relative to the launch date) for each Spacelab payload to be flown on a shared flight. A customer may still postpone or terminate a flight after the payload's cutoff date; however, NASA shall not be required to remove the payload before flight.

(d) *Minor delays.* The minor delay provisions of the Shuttle policy shall apply only to those Spacelab payloads whose Shuttle load factor is equal to or greater than 0.05.

(e) *Dedicated-Shuttle Spacelab flight.* (1) A dedicated-Shuttle Spacelab flight is a Shuttle flight sold to a single customer who is entitled to select the Spacelab elements used on the flight.

(2) In addition to the standard services listed in paragraph (i) of this section, the following standard services are provided to customers of dedicated-Shuttle Spacelab flights and form the basis for the standard flight price:

(i) Use of the full standard services of the Shuttle and the Spacelab elements selected.

(ii) One day of one-shift on-orbit operations.

(iii) Standard mission destinations as defined in the Shuttle policy.

(iv) Launch within a prenegotiated 90-day period in accordance with the dedicated flight scheduling provisions of the Shuttle policy.

(v) The available payload operations time of two NASA-furnished mission specialists.

(3) Customers contracting for a dedicated-Shuttle Spacelab flight shall reimburse NASA an amount which is the sum of:

(i) The one-shift operation dedicated flight price for a 1-day Spacelab mission.

(ii) The price for the use of all Spacelab elements used (including all necessary mission-independent Spacelab equipment).

(iii) The price for all optional services provided.

(f) *Dedicated 3-meter pallets and dedicated FMDM/MPESS.* (1) A dedicated pallet (or a dedicated FMDM/MPESS) is one which is sold to a single customer and which includes all Spacelab hardware necessary to permit it to be flown on any shared Shuttle flight as an autonomous payload (e.g., a dedicated 3-meter pallets may either be supplied with its own exclusive igloo or may fly without an igloo if it requires only standard Shuttle services).

(2) In addition to a pro rata share of the standard service listed in paragraph (i) of this section, the following standard services are provided to customers of dedicated pallets (or dedicated FMDM/MPESS) and form the basis for establishing the standard flight price:

(i) A pro rata share of the Shuttle services normally provided, where the basis for proration is the customer's Shuttle load factor as defined in § 1214.813(d)(1) for dedicated pallets and in § 1214.813(e)(2) for dedicated FMDM/MPESS.

(ii) The exclusive services of the pallet (or FMDM/MPESS) and all Spacelab hardware provided to support the pallet (or FMDM/MPESS).

(iii) One day of one-shift on-orbit operations.

(iv) Launch to the standard mission destination of 160 nmi, 28.5° as defined in the Shuttle policy.

(v) Launch within a prenegotiated 90-day period in accordance with the shared-flight scheduling provisions of the Shuttle policy.

(vi) A pro rata share of the on-orbit payload operations time of two NASA-furnished mission specialists, where the basis of proration shall be the customer's Shuttle load factor.

(3) Customers contracting for a dedicated pallet (or FMDM/MPESS) flight shall reimburse NASA an amount which is the sum of:

(i) The product of the customer's Shuttle charge factor and the one-shift-operation dedicated flight price of a 1-day Spacelab mission.

(ii) The price for the use of the pallet (or FMDM/MPESS) selected (including all necessary mission-independent Spacelab equipment).

(iii) The price for all optional services provided.

(g) *Complete pallet.* (1) A complete Spacelab pallet is one which is sold to a single customer but flies with other Spacelab elements on a NASA or NASA-designated Spacelab flight and shares the common standard Spacelab services, e.g., shares an igloo with other pallets.

(2) In addition to a pro rata share of the standard services listed in paragraph (i) of this section, the following standard services are provided to customers of complete pallets and form the basis for the standard flight price.

(i) The pallet's pro rata share of standard Shuttle services, where the basis of proration shall be the customer's Shuttle load factor as defined in § 1214.813(f)(1).

(ii) A pro rata share of 7 days of two-shift on-orbit operations, where the basis of proration shall be the customer's Shuttle load factor.

(iii) Mission destination selected by NASA in consultation with the customer.

(iv) Assignment, with the customer's concurrence, to a Spacelab flight designated by NASA.

(v) Launch date established by NASA.

(vi) A pro rata share of the on-orbit payload operations time of two NASA-furnished mission specialists, where the basis of proration shall be the customer's Shuttle load factor.

(vii) Use of the entire volume above a pallet.

(3) Users contracting for complete pallet flights shall reimburse NASA an amount which is the sum of:

(i) The product of the customer's Shuttle charge factor and the two-shift-operation dedicated flight price of a 7-day Spacelab mission. The dedicated flight price for a 7-day complete-pallet mission is the sum of the dedicated flight price for a 1-day two-shift mission and the charge for 6 extra days of two-shift on-obit operation.

(ii) The price for the use of a complete pallet, including all necessary mission-independent Spacelab equipment.

(iii) The price for all optional services provided.

(h) *Shared element.* (1) A shared element is a Spacelab pallet or module which:

(i) Is shared by two or more customers on a NASA-designated Spacelab flight.

(ii) Shares common standard Spacelab services with other Spacelab elements on the same flight.

(2) In aditional to a pro rata share of the standard services listed in paragraph (i) of this section, the following standard services are provided to customers of shared elements and form the basis for the standard flight price:

(i) For shared pallets, a pro rata share of the standard services provided by a pallet. The basis of proration shall be the customer's Spacelab load fraction as defined in § 1214.813(g)(1)(i).

(ii) For shared modules, a pro rata share of the standard services provided by a long module flown on a dedicated-Shuttle Spacelab flight. The basis of proration shall be the customer's Spacelab load fraction as defined in § 1214.813(g)(1)(ii). The type of pressurized module actually used to meet a customer's requirement for a shared module shall be determined by NASA subsequent to contract negotiations.

(iii) A pro rata share of the element's share of standard Shuttle services, where the basis for proration shall be the customer's Spacelab load fraction.

(iv) A pro rata share of 7 days of two-shift on-orbit operations, where the basis of proration shall be the

customer's Shuttle load factor as defined in § 1214.813(g)(1)

(12) Use of NASA-furnished standard payload monitoring and control

requested by the customer, make all

(b) All physical integration (and de-integration) of payloads into stacks and

with no charge for standard Spacelab

procedure contained in the Shuttle

customer's Shuttle load factor as defined in § 1214.613(g)(1).

(v) Mission destination selected by NASA in consultation with the customer.

(vi) Assignment, with the customer's concurrence, to a Spacelab flight designated by NASA.

(vii) Launch date established by NASA.

(viii) A pro rata share of the on-orbit operations time of two NASA-furnished mission specialists, where the basis of proration shall be the customer's Shuttle load factor.

(3) Customers contracting for shared-element flight shall reimburse NASA an amount which is the sum of:

(i) The product of the customer's Shuttle charge factor and the two-shift operation dedicated flight price of a 7-day Spacelab mission. The dedicated flight price for a 7-day shared-element mission is the sum of the dedicated flight price for a 1-day two-shift-mission and the charge for 6 extra days of two-shift on-orbit operations.

(ii) The product of the customer's element charge factor and the price for the use of the Spacelab element being used, including all necessary mission-independent Spacelab equipment.

(iii) The price for all optional services provided.

(i) *Common standard Spacelab services.* The following standard Spacelab services are common to all Spacelab flights:

(1) Use of Shuttle [1] and Spacelab hardware.

(2) Spacelab interface analysis.

(3) Kennedy Space Center (KSC) launch.[1]

(4) A five-person NASA flight crew consisting of commander, two pilots, and two mission specialists.

(5) Accommodations for a five-person flight crew.

(6) Prelaunch integration and interface verification of preassembled racks and pallets (Levels III, II, and I for NASA-furnished Spacelab hardware; Level I only for customer-furnished Spacelab hardware).

(7) Shuttle [1] and Spacelab flight planning.

(8) Payload electrical power.

(9) Payload environmental control.

(10) On-board data acquisition and processing services.

(11) Transmission of data to a NASA-designed monitoring and control facility via the basic STS Operational Instrumentation (OI) telemetry system.

(12) Use of NASA-furnished standard payload monitoring and control facilities.

(13) Voice communications between personnel operating the customer's payload and a NASA-designated payload monitoring and control facility.

(14) NASA payload safety review.[1]

(15) NASA support of payload design reviews.[1]

(j) *Typical optional Spacelab services.* The following are typical optional Spacelab services:

(1) Use of special payload support equipment, e.g., instrument pointing system.

(2) Vandenberg Air Force Base (VAFB) launch.

(3) Nonstandard mission destination.

(4) Additional time on orbit.

(5) Mission-independent training, use of, and accommodations for all flight personnel in excess of five.

(6) Mission-dependent training of all NASA-furnished personnel and backups.

(7) Analytical and/or hands-on integration (and de-integration) of the customer's payload into racks and/or onto pallets.

(8) Unique integration or testing requirements.

(9) Additional resources beyond the customer's pro rata share.

(10) Additional experiment time or crew time beyond the customer's pro rata share.

(11) Special access to and/or operation of payloads.

(12) Customer unique requirements for: software development for the Command and Data Management Subsystem (CDMS) onboard computer, configuration of the Payload Operations Control Center (POCC), and/or CDMS utilized during KSC ground processing.

(13) Extravehicular Activity (EVA) services.

(14) Payload flight planning services.

(15) Transmission of Spacelab data contained in the STS OI telemetry link to a location other than a NASA-designated monitoring and control facility.

(16) Transmission of Spacelab data not contained in the STS OI telemetry link.

(17) Level III and/or Level II integration of customer-furnished Spacelab hardware.

(k) *Options.* The provisions of § 1214.102(e) and § 1214.202(e) do not apply to Spacelab payloads.

§ 1214.805 Unforeseen customer delay.

Should an unforeseen customer payload problem pose a threat of delay to the Shuttle launch schedule or critical off-line activities, NASA shall, if requested by the customer, make all reasonable efforts to prevent a delay, contingent on the availability of facilities, equipment, and personnel. In requesting NASA to make such special efforts, the customer shall agree to reimburse NASA the estimated additional cost incurred.

§ 1214.806 Premature termination of Spacelab flights.

If a dedicated-Shuttle Spacelab flight, a dedicated-pallet flight, or dedicated-FMDM/MPESS flight is prematurely terminated, NASA shall refund the optional services charges for planned, but unused, extra days on orbit. If a complete-pallet or shared-element flight is prematurely terminated, NASA shall refund a pro rata share of the charges for planned, but unused, extra days on orbit to customers whose payload operations are, in NASA's judgment, adversely affected by such premature termination. The basis for proration shall be the customers' Shuttle load factor.

§ 1214.807 Exceptional payloads.

Customers whose payloads qualify under the NASA Exceptional Program Selection Process shall reimburse NASA for Spacelab and Shuttle services on the basis indicated in the Shuttle policy.

§ 1214.808 Standby payloads.

The standby payload provisions of the Shuttle policy do not apply to Spacelab flights.

§ 1214.809 Short-term call-up and accelerated launch.

The short-term call-up and accelerated launch provisions of the Shuttle policy normally are not offered to Spacelab customers. NASA will negotiate any such customer requirements on an individual basis.

§ 1214.810 Integration of payloads.

(a) The customer shall bear the cost of performing the following typical Spacelab-payload mission management functions:

(1) Analytical design of the mission.

(2) Generation of mission requirements and their documentation in the Payload Integration Plan (PIP).

(3) Provision of mission unique training and payload specialists (if appropriate).

(4) Physical integration of experiments into racks and/or onto pallets.

(5) Provision of payload unique software for use during ground processing, on orbit, or in POCC operations.

(6) Supporting operations.

(7) Assuring the mission is safe.

(b) All physical integration (and de-integration) of payloads into racks and/or onto pallets will normally be performed at KSC by NASA. When the customer provides Spacelab elements, these physical integration activities may be done by the customer at a location chosen by the customer.

(c) With the exception of the restrictions noted in paragraph (b) of this section, customers contracting for dedicated-Shuttle and dedicated-pallet flights may perform the Spacelab-payload mission management functions defined in paragraph (a) of this section. NASA will assist customers in the performance of these functions, if requested. Charges for this service will be based on estimated actual costs, or actual costs where appropriate, and will be in addition to the price for standard services.

(d) For complete pallets or shared elements, NASA will normally perform the Spacelab-payload mission management functions listed in paragraph (a) of this section. Charges for this service will be based on estimated actual costs, or actual costs where appropriate, and will be in addition to the price for standard services.

(e) Integration of payload entities mentioned in paragraphs (b)–(d) of this section with NAS-furnished Spacelab support systems and with the Shuttle shall be performed by NASA as a standard service for all payloads flown on customer-furnished Spacelab elements. Customers shall be available to participate as required by NASA in these levels of integration. Customer equipment shall be operated only to the extent necessary for interface verification. Customers requiring additional payload operation after delivery of the payload to NASA shall negotiate such operation as an optional service.

§ 1214.811 Reflight guarantee.

(a) During the second phase of STS operations, there is no additional reflight premium for those shared-flight Spacelab payloads which can be accommodated on a standard Shuttle launch to 160 nmi, 28.5° as defined in the Shuttle policy and all dedicated-flight Spacelab payloads.

(b) NASA and the customer may negotiate appropriate reflight provisions (e.g., scheduling, reflight premiums) for payloads not covered by paragraph (a) of this section. Otherwise, no reflight services shall be provided.

(c) Reflight guarantees, if provided, must cover the customer's entire payload.

(d) Payloads covered by reflight guarantees shall be entitled to a reflight with no charge for standard Spacelab and Shuttle services if both the following occur:

(1) Through no fault of the customer or defect in the customer's payload, Spacelab systems (i.e., data, power, and cooling) are not within nominal specifications, as measured by NASA at normal Spacelab monitoring points, at the time of first turn-on of the customer's payload, all as defined in the Launch Services Agreement.

(2) The customer's mission objective is not achieved solely as a direct result of the occurrence, at the time of first turn-on of the customer's payload, of events described in paragraph (d)(1) of this section.

(e) If more than one reflight is required, no additional reflight premium shall be charged.

(f) If a payload being reflown was not initially covered by a reflight guarantee, the reimbursements for the reflight shall be the same as for a newly-scheduled launch.

§ 1214.812 Payload specialists.

(a) The use of customer-furnished payload specialists shall be subject to the approval of the NASA Administrator or the Administrator's designee.

(b) Customers with payloads whose Shuttle load factor is equal to or greater than 0.5 are entitled to request that a customer-selected payload specialist be flown with the customer's payload. Dedicated-flight customers are entitled to request the flight of two customer-selected payload specialists.

(c) NASA may approve the flight of a customer-selected payload specialist with payloads whose Shuttle load factor is less than 0.5 if, in NASA's judgment, there is sufficient scientific need to warrant such a flight.

(d) The standard Spacelab flight price is based on operation of the customer's payload by two NASA-furnished mission specialists. Accommodations for, and mission-independent training of, any payload specialists and backups required for the customer's mission shall be provided as optional services and shall be paid for by the customer. The price for this service shall be the same for both customer-furnished and NASA-furnished payload specialists.

§ 1214.813 Computation of sharing and pricing parameters.

(a) *General.* (1) Computational procedures as contained in the following subparagraphs of this paragraph of this section shall be applied as indicated. The procedure for computing Shuttle load factor, charge factor, and flight price for Spacelab payloads replaces the procedure contained in the Shuttle policy.

(2) Shuttle charge factors as derived herein apply to the standard mission destination of 160 nmi altitude, 28.5° inclination. Customers shall reimburse NASA an optional services fee for flights to nonstandard destinations.

(3) The customer's total Shuttle charge factor shall be the sum of the Shuttle charge factors for the customer's individual (dedicated, complete, or shared) elements, with the limitation that the customer's Shuttle charge factor shall not exceed 1.0.

(4) Customers contracting for pallet-only payloads are entitled to locate minimal controls as agreed to by NASA in a pressurized area to be designated by NASA. There is no additional charge for this service.

(5) NASA shall, at its discretion, adjust up or down the load factors and load fractions calculated according to the procedures defined in this section. Adjustments shall be made for special space or weight requirements which include, but are not limited to:

(i) Sight clearances, orientation, or placement limits.

(ii) Clearances for movable payloads.

(iii) Unusual access clearance requirements.

(iv) Clearances extending beyond the bounds of the normal element envelope.

(v) Extraordinary shapes.

The adjusted values shall be used as the basis for computing charge factors and prorating services.

(b) *Definitions used in computations.*

(1) L_C=Chargeable payload length, m. The total length in the cargo bay occupied by the customer's experiment and the Spacelab element(s) used to carry it.

(2) W_C=The weight of the customer's payload and the customer's pro rata share of the weight of NASA mission-peculiar equipment carried to meet the customer's needs, kg.

(c) *Dedicated-Shuttle Spacelab flight (1-day mission).* The total reimbursement is as defined in § 1214.804(e)(3).

(d) *Dedicated-pallet flight (1-day mission).* (1) The Shuttle load factors and charge factors for dedicated-pallet flights are shown in Table 1. Subject to other STS Spacelab structural limits, customers are entitled to utilize the payload weight capability of the pallets as indicated in Table 1. Payload weights in excess of those shown are subject to NASA approval and may entail optional services charges.

[1] Typical standard Shuttle services repeated for clarity

TABLE 1.—SHUTTLE LOAD FACTORS, CHARGE FACTORS, AND NOMINAL CAPACITIES FOR DEDICATED PALLETS

Number of pallets	Load factor		Charge factor		Nominal payload capacity, kg	
	With Igloo	FMDM configuration	With Igloo	FMDM configuration	With Igloo	FMDM configuration
1	0.228	0.189	0.305	0.252	2,325	2,950
2	0.392	NA	0.523	NA	4,470	NA
3-pallet train [1]	0.556	NA	0.742	NA	4,435	NA
2+1 configuration	0.594	NA	0.792	NA	7,750	NA

[1] Three pallets requiring the "1+1+1" configuration shall be flown on a dedicated flight basis (See § 1214.804(a)).

(2) *Total reimbursement.* The customer's total reimbursement is as defined in § 1214.804(f)(3).

(e) *Dedicated FMDM/MPESS flight (1-day mission).*

(1) *Shuttle charge factor.* The computed charge factor for dedicated FMDM/MPESS flights is defined as:

$$\frac{\text{Shuttle Load Factor}}{0.75}$$

(2) *Shuttle load factor.* (i) The Shuttle load factor is defined as the maximum of:

$$\frac{L_C}{18.29} \text{ or } \frac{W_C+767}{29,478}$$

(ii) The minimum value of L_C is based on the element length, plus clearances, and is 1.18 m.

(3) *Total reimbursement.* The customer's total reimbursement is as defined in § 1214.804(f)(3).

(f) *Complete pallets (7-day mission).*

(1) The Shuttle load factor and charge factor for a complete pallet are 0.198 and 0.228, respectively, and its payload weight capability is 2,583 kg. Subject to other STS or Spacelab structural limits, customers are entitled to utilize this payload weight capability. Payload weight in excess of 2,583 kg is subject to NASA approval and may entail optional service charges.

(2) *Total reimbursement.* The customer's total reimbursement is as defined in § 1214.804(g)(3).

(g) *Shared elements (7-day mission).*

(1) *Spacelab load fractions and Shuttle load factors.*

(i) *Pallet.* Spacelab load fraction is the greater of:

$$\frac{W_C}{2,583} \text{ or } \frac{\text{Payload volume, m}^3}{15}$$

Shuttle load factor is the greatest of:

$$\frac{W_C}{13,045} \text{ or } \frac{\text{Payload volume, m}^3}{76}$$

(ii) *Pressurized module.* Spacelab load fraction and Shuttle load factor are identical and are the greater of:

$$\frac{W_C}{4,319} \text{ or } \frac{2\times(\text{Experiment volume})+\text{Storage volume, m}^3}{40}$$

(2) *Shuttle charge factors and element charge factors for pressurized modules.* Shuttle charge factors and element charge factors are identical and are defined as follows:

If the Spacelab load fraction (and Shuttle load factor) is—	The element charge factor and Shuttle charge factor shall be—
Less than 0.00435	.005.
0.00435 to 0.87	Spacelab load fraction divided by 0.87.
Greater than 0.87	1.0.

(3) *Element charge factors for shared pallets.*

If the Spacelab load fraction is—	The element charge factor shall be—
Less than 0.0189	0.0218.
0.0189 to 0.87	Spacelab load fraction divided by 0.87.
Greater than 0.87	1.0.

(4) *Shuttle charge factors for shared pallets.*

If the Shuttle load factor is—	The Shuttle charge factor shall be—
Less than 0.00375	0.005.
0.00375 to 0.75	Shuttle load factor divided by 0.75.
Greater than 0.75	1.0.

(5) *Total reimbursement.* (i) The customer's total reimbursement is as defined in § 1214.804(h)(3).

(ii) If a customer contracts for portions of more than one element, the charges for the use of the elements shall apply individually to each element used.

(6) Experiment volume in the pressurized module is defined to be the sum of the customer's payload volume in racks and in the center aisle.

(i) Rack volume is defined relative to basic Air Transportation Rack (ATR) configurations. The customer's rack volume shall be defined as the volume of one or more rectangular parallelepipeds (rectangular-sided box) which totally enclosed the customer's payload. Width dimensions shall be either 45.1 or 94.0 centimeters. Height dimensions shall be integral multiples of 4.45 centimeters. Depth dimensions shall be 61.2 or 40.2 centimeters.

(ii) Center aisle space volume is defined as the volume of a rectangular parallelepiped which totally encloses the customer's payload. No edge of the parallelepiped shall be less than 30 centimeters in length.

(7) Storage volume in the pressurized module is defined as the volume of one or more rectangular parallelepipeds enclosing the customer's stowed payload. No edge of the parallepiped(s) shall be less than 30 centimeters in length.

(8) Volume of the customer's pallet-mounted payload is defined as the volume of a rectangular parallelepiped enclosing the pallet payload and customer-dictated mounting hardware. No edge of the parallelepiped shall be less than 30 centimeters in length.

James M. Beggs,

Administrator.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM80-53]

Natural GW Policy Act; Ceiling Prices; Maximum Lawful Prices and Inflation Adjustment Factors

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order of the Director, OPPR.

SUMMARY: Pursuant to the authority delegated by 18 CFR 357.307(1), the Director of the Office of Pipeline and Producer Regulation revises and publishes the maximum lawful prices prescribed under Title I of the Natural Gas Policy Act (NGPA) for the months of August, September and October, 1985. Section 101(b)(6) of the NGPA requires that the Commission compute and publish the maximum lawful prices before the beginning of each month for which the figures apply.

EFFECTIVE DATE: August 1, 1985.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Williams, Director, OPPR, (202) 357-8500.

In the matter of, Publication of Prescribed Maximum Lawful Prices Under the Natural Gas Policy Act of 1978; Docket No. RM80-53.

Order of the Director, OPPR

Issued: July 24, 1985.

Section 101(b)(6) of the Natural Gas Policy Act of 1978 (NGPA) requires that the Commission compute and make available maximum lawful prices and inflation adjustments prescribed in Title I of the NGPA before the beginning of any month for which such figures apply.

Pursuant to this requirement and § 375.307(l) of the Commission's regulations, which delegates the publication of such prices and inflation adjustments to the Director of the Office of Pipeline and Producer Regulation, the maximum lawful prices for the months of August, September and October, 1985 are issued by the publication of the price tables for the applicable quarter. Pricing tables are found in § 271.101(a) of the Commission's regulations. Table I of § 271.101(a) specifies the maximum lawful prices for gas subject to NGPA sections 102, 103(b)(1)(2), 105(b)(3), 106(b)(1)(B), 107(c)(5), 108 and 109. Table II of § 271.101(a) specifies the maximum lawful prices for sections 104 and 106(a) of the NGPA. Table III of § 271.102(c) contains the inflation adjustment factors. The maximum lawful prices and the inflation adjustment factors for the periods prior to August 1985 are found in the tables in §§ 271.101 and 271.102.

List of Subjects in 18 CFR Part 271

Natural gas.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

§ 271.101 [Amended]

1. Section 271.101(a) is amended by inserting the maximum lawful prices for August, September and October, 1985 in Tables I and II and inserting footnote numbers one and three in the text of Table I.

§ 271.102 [Amended]

2. Section 271.102(c) is amended by inserting the inflation adjustment for the months of August, September and October, 1985 in Table III.

TABLE I.—NATURAL GAS CEILING PRICES

[Other than NGPA sections 104 and 106(a)]

Subpart of Part 271	NGPA section and category of gas	Maximum lawful price per MMBtu for deliveries in—		
		Aug. 1985	Sept. 1985	Oct. 1985
B	102: New natural gas, certain OCS gas.[4]	$4.045	$4.068	$4.091
C	103(b)(1): New onshore production wells.[5]	3.024	3.031	3.038
	103(b)(2): New onshore production wells.[5]	3.535	3.550	3.565
E	105(b)(3): Intrastate existing contracts.	4.023	4.043	4.063
F	106(b)(1)(B): Alternative maximum lawful price for certain intrastate rollover gas.[1]	1.731	1.735	1.739
G	107(c)(5): Gas produced from tight formations.[2]	6.046	6.062	6.076
H	108 Stripper gas	4.330	4.354	4.379
I	109 Not otherwise covered.	2.506	2.512	2.518

[1] Section 271.602(a) provides that for certain gas sold under an intrastate rollover contract the maximum lawful price is the higher of the price paid under the expired contract, adjusted for inflation or an alternative Maximum Lawful Price specified in this Table. This alternative Maximum Lawful Price for each month appears in this row of Table I. Commencing January 1, 1985, the price of some intrastate rollover gas is deregulated. (See Part 272 of the Commission's regulations.)

[2] The maximum lawful price for tight formation gas is the lesser of the negotiated contract price or 200% of the price specified in Subpart C of Part 271. The maximum lawful price for tight formation gas applies on or after July 16, 1979. (See § 271.703 and § 271.704.)

[4] Commencing January 1, 1985, the price of natural gas finally determined to be new natural gas under section 102(c) is deregulated. (See Part 272 of the Commission's regulations.)

[5] Commencing January 1, 1985, the price of some natural gas finally determined to be natural gas produced from a new, onshore production well under section 103 is deregulated. (See Part 272 of the Commission's regulations.)

TABLE II.—NATURAL GAS CEILING PRICES: NGPA SECTIONS 104 AND 106(a)

[Subpart D, Part 271]

Category of natural gas and type of sale or contract	Maximum lawful price per MMBtu for deliveries made in—		
	Aug. 1985	Sept. 1985	Oct. 1985
Post-1974 gas: All producers	$2.506	$2.512	$2.518
1973-1974 Biennium gas:			
Small producer	2.119	2.124	2.129
Large producer	1.616	1.620	1.624
Interstate rollover gas: All producers	.930	.932	.934
Replacement contract gas or recompletion gas:			
Small producer	1.190	1.193	1.196
Large producer	.911	.913	.915
Flowing gas:			
Small producer	.603	.604	.605
Large producer	.509	.510	.511
Certain Permian Basin gas:			
Small producer	.708	.710	.712
Large producer	.627	.629	.631
Certain Rocky Mountain gas:			
Small producer	.708	.710	.712
Large producer	.603	.604	.605
Certain Appalachian Basin gas:			
North subarea contracts dated after Oct. 7, 1969	.572	.573	.574
Other contracts	.527	.528	.529
Minimum rate gas:[1] All producers	.311	.312	.313

[1] Prices for minimum rate gas are expressed in terms of dollars per Mcf, rather than MMBtu.

BILLING CODE 6717-01-M

18 CFR Part 282

[Docket No. RM79-14]

Order of the Director, OPPR of Publication of Incremental Pricing Acquisition Cost Thresholds Under Title II of the NGPA

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order Prescribing Incremental Pricing Thresholds.

SUMMARY: The Director of the Office of Pipeline and Producer Regulation is issuing the incremental pricing acquisition cost thresholds prescribed by Title II of the Natural Gas Policy Act and 18 CFR 282.304. The Act requires the Commission to compute and publish the threshold prices before the beginning of each month for which the figures apply. Any cost of natural gas above the applicable threshold is considered to be an incremental gas cost subject to incremental pricing surcharging.

EFFECTIVE DATE: August 1, 1985.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Williams, Federal Energy Regulatory Commission, 825 N. Capitol Street, N.E., Washington, D.C. 20426, (202) 357-8500.

Order of the Director, OPPR

In the matter of Publication of Prescribed Incremental Pricing Acquisition Cost Threshold of the NGPA of 1978; Docket No. RM79-14.

Issued: July 24, 1985.

Section 203 of the NGPA requires that the Commission compute and make available incremental pricing acquisition cost threshold prices prescribed in Title II before the beginning of any month for which such figures apply.

Pursuant to that mandate and pursuant to § 375.307(l) of the Commission's regulations, delegating the publication of such prices to the Director of the Office of Pipeline and Producer Regulation, the incremental pricing acquisition cost threshold prices for the month of August 1985 is issued by the publication of a price table for the applicable month. The incremental pricing acquisition cost threshold prices for months prior to August 1985 are found in the tables in § 282.304.

BILLING CODE 6717-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 602

[T.D. 8041]

Income Tax; Designation of Principal Campaign Committee

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to the designation of a principal campaign committee by a candidate for Congress. Changes to the applicable tax law were made by the Economic Recovery Tax Act of 1981 and the Tax Reform Act of 1984. These regulations provide candidates for Congress and their principal campaign committees with the guidance needed to comply with these Acts.

DATES: The amendments to the regulations apply to taxable years beginning after December 31, 1981 and are effective July 30, 1985.

FOR FURTHER INFORMATION CONTACT: Susan Thompson Baker of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC: LR: T) (202-566-3294).

SUPPLEMENTARY INFORMATION:

Background

On April 20, 1983, the Federal Register published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 527 of the Internal Revenue Code of 1954 (48 FR 16911). The amendments were proposed to conform the regulations to section 128 of the Economic Recovery Tax Act of 1981 (95 Stat. 172, 203). No written comments responding to this notice were received, and no public hearing was requested or held. This Treasury decision adopts these amendments as proposed, with certain clarifying changes, and conforms the regulations to a change made by section 722 (c) of the Tax Reform Act of 1984 (98 Stat. 973).

Explanation of Provisions

Section 128 of the Economic Recovery Tax Act of 1981 adds new section 527(h) to the Internal Revenue Code of 1954. That section provides that the political organization taxable income of a "principal campaign committee" of a candidate for Congress shall be taxed at the appropriate corporate rate specified in section 11 (b) of the Code rather than at the highest rate specified in that section. The highest corporate rate of tax is the rate of tax applicable to other political organizations.

In order to qualify for the more favorable rate of tax, a committee must be designated in writing as a "principal campaign committee" by a candidate for Congress. A copy of this written designation, which may be made on Federal Election Commission Form 2 or or equivalent document, must be appended to the Form 1120-POL filed by the principal campaign committee for each taxable year for which the designation is effective. Only a candidate for Congress, and not a candidate for other Federal or State office, may make a designation of a principal campaign committee. A candidate for Congress may have only one designation under 527(h) in effect at any time. If, however, a candidate for Congress has only one campaign committee, no designation is required.

Non-Application of Executive Order 12291

The Commissioner of Internal Revenue has determined that this final rule is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required.

Regulatory Flexibility Act

Although a notice of proposed rulemaking that solicited public comment was issued, the Internal Revenue Service concluded when the notice was issued that the regulations are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 did not apply. Accordingly, the final regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Paperwork Reduction Act

The collection of information requirements contained in these regulations has been submitted to the Office of Management and Budget (OMB) in accordance with the requirement of Paperwork Reduction Act of 1980. These requirements have been approved by OMB.

Drafting Information

The principal author of this regulation is Susan Thompson Baker of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Service and Treasury Department participated in developing the regulation, both substantively and stylistically.

List of Subjects

Income taxes, Exempt organizations, Foundations, Non-profit organizations, Cooperatives, Political organizations, Homeowners associations.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, the amendments to 26 CFR Part 1 and Part 602 are adopted as proposed, with certain clarifying changes. The amendments read as follows:

PART 1—[AMENDED]

26 CFR Part 1 is amended as follows:

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Sec. 1.527-9 also issued under 26 U.S.C. 527(h)(2)(B)(i).

Par. 2. Section 1.527-1 is revised to read as follows:

§ 1.527-1 Political organizations; Generally.

Section 527 provides that a political organization is considered an organization exempt from income taxes for the purpose of any law which refers to organizations exempt from income taxes. A political organization is subject to tax only to the extent provided in section 527. In general, a political organization is an organization that is organized and operated primarily for an exempt function as defined in § 1.527-2(c). Section 527 provides that a political organization is taxed on its political organization taxable income (see § 1.527-4) which, in general, does not include the exempt function income (see § 1.527-3) of the political organization. Furthermore, section 527 provides that an exempt organization, other than a political organization, may be subject to tax under section 527 when it expends an amount for an exempt function, see § 1.527-6. The taxation of newsletter funds is provided under section 527(g) and § 1.527-7. A special rule for principal campaign committees is provided under section 527(h) and § 1.527-9.

Par. 3. Section 1.527-2 is amended by adding a new paragraph (e) immediately following paragraph (d). New paragraph (e) reads as follows:

§ 1.527-2 Definitions.

* * * * *

(e) *Principal campaign committee.* A "principal campaign committee" is the political committee designated by a candidate for Congress as his or her principal campaign committee for purposes of section 302(e) of the Federal Election Campaign Act of 1971 (2 U.S.C. section 432(e)), as amended, and section 527(h) and § 1.527-9.

Par. 4. Section 1.527-6(d) is revised to read as follows:

§ 1.527-6 Effective date; filing requirements; and miscellaneous provisions.

* * * * *

(d) *Effective date.* Except as provided in paragraph (b)(2) of § 1.527-6 and in paragraph (a) of § 1.527-9, the regulations under section 527 apply to taxable years beginning after December 31, 1974.

Par. 5. A new § 1.527-9 is added immediately following § 1.527-8. New § 1.527-9 reads as follows:

§ 1.527-9 Special rule for principal campaign committees.

(a) *In general.* Effective with respect to taxable years beginning after December 31, 1981, the tax imposed by section 527(b) on the political organization taxable income of a principal campaign committee shall be computed by multiplying the political organization taxable income by the appropriate rates of tax specified in section 11(b). The political organization taxable income of a campaign committee not a principal campaign committee is taxed at the highest rate of tax specified in section 11(b). A candidate for Congress may designate one political committee to serve as his or her principal campaign committee for purposes of section 527(h)(1). If a designation is made, it shall be made in accordance with the requirements of paragraph (b) of this section. A candidate for Congress may have only one designation in effect at any time. Under 11 CFR 102.12, no political committee may be designated as the principal campaign committee of more than one candidate for Congress. Further, no political committee that supports or has supported more than one candidate for Congress may be designated as a principal campaign committee. No designation need be made where there is only one political campaign committee with respect to a candidate.

(b) *Manner of designation.* If a candidate for Congress elects to make a designation under section 527(h) and this section, he or she shall designate his or her principal campaign committee by appending a copy of his or her Statement of Candidacy (that is, the Federal Election Commission Form 2, or equivalent statement that the candidate filed with the Federal Election Commission under 11 CFR 101.1(a)), to the Form 1120-POL filed by the principal campaign committee for each taxable year for which the designation is effective. This designation may also be made by appending to the Form 1120-POL statement containing the following information: The name and address of the candidate for Congress; his or her taxpayer identification number; his or her party affiliation and the office sought; the district and State in which the office is sought; and the name and address of the principal campaign comittee. This designation shall be made on or before the due date (as extended) for filing Form 1120-POL. Only a candidate for Congress may make a designation in accordance with this paragraph.

(c) *Manner of revoking designation.* A designation of a principal campaign committee that has been filed in accordance with this section may be revoked only with the consent of the Commissioner. In general, the Commissioner will grant such consent in every case where the candidate for Congress has revoked his or her designation in compliance with the requirements of the Federal Election Commission by filing an amended Statement of Organization or its equivalent pursuant to 11 CFR 102.2(a)(2). In the case of the revocation of the designation of a principal campaign committee by a candidate followed by the designation of another principal campaign committee by such candidate, for purposes of determining the appropriate rate of tax under section 11(b) for a taxable year, the political organization taxable income of the first principal campaign committee shall be treated as that of the subsequent principal campaign committee. In a case where consent to revoke a designation of a principal campaign committee is granted and a new designation is filed, the Commissioner may condition his

VOL 50 ISS 146 JL 30 1985 UMI

consent upon the agreement of the candidate for Congress to insure compliance with the preceding sentence.

PART 602—[AMENDED]

Par. 6. The authority for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.101 [Amended]

Par. 7. Section 602.101(c) is amended by inserting in the appropriate places in the table "§ 1.527–9 . . . . 1545–0129".

Approved: June 17, 1985.

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

Ronald A. Pearlman,
Assistant Secretary of the Treasury.

BILLING CODE 4830–01–M

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[T.D. ATF–211; Notice No. 560]

North Yuba Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Treasury.

ACTION: Treasury decision, final rule.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms is establishing in Yuba County, California, an American viticultural area known by the appellation "North Yuba." This final rule results from a petition filed by Karl Werner and James R. Bryant, officers of Renaissance Vineyard and Winery, Inc., located near Oregon House, California.

The establishment of this viticultural area and the use of the name as an appellation of origin in the labeling and advertising of wine allows the proprietor of a winery to designate the area as the locale in which grapes used in the production of a wine are grown and enables the consumer to identify and to differentiate between that wine and other wines offered at retail.

EFFECTIVE DATE: This final rule is effective August 30, 1985.

FOR FURTHER INFORMATION CONTACT: Michael J. Breen, Coordinator, FAA, Wine and Beer Branch, Room 6237, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226, Telephone: (202) 566–7626.

SUPPLEMENTARY INFORMATION:

Background

On August 23, 1978, ATF published Treasury Decision ATF–53 (43 FR 37672, 54624) revising regulations in Title 27, Code of Federal Regulations, Part 4. These regulations allow the establishment of definite American viticultural areas. The regulations also allow the name of an approved viticultural area to be used as an appellation of origin in the labeling and advertising of wine. On October 2, 1979, ATF published Treasury Decision ATF–60 (44 FR 56692) which added to Title 27 a new Part 9 providing for the listing of approved American viticultural areas.

Section 4.25a(e)(1) defines an American viticultural area as a delimited grape growing region distinguishable by geographical features. Section 4.25a(e)(2), outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area. The petition shall include—

(a) Evidence that the name of the proposed viticultural area is locally and/or nationally known as referring to the area specified in the petition;

(b) Historical or current evidence that the boundaries of the viticultural area are as specified in the petition;

(c) Evidence relating to the geographical features (climate, soil, elevation, physical features, etc.) which distinguish the viticultural features of the proposed area from surrounding areas;

(d) A description of the specific boundary of the proposed viticultural area, based on features which can be found on United States Geological Survey (U.S.G.S.) maps of the largest applicable scale; and,

(e) A copy (or copies) of the appropriate U.S.G.S. map(s) with the proposed boundary prominently marked.

Petition

On November 13, 1984, ATF received the petition for the establishment of the "North Yuba" viticultural area in the middle and upper foothills in north-central Yuba County, California. Upon completing a review of the data furnished with the petition, ATF consulted with the petitioner regarding expansion of the petitioned boundary to include areas of land of the same soil associations as are common to the area covered by the petition. ATF published the proposed boundary in Notice No. 560 (50 FR 12038) dated March 27, 1985.

Comments

ATF received one comment in response to the proposal to establish the "North Yuba" viticultural area. The commenter, the executive officer of the Board of Forestry for the State of California, favors the establishment of the viticultural area as proposed.

Name

The name "North Yuba" is well documented in the petition. Yuba County is named after the Yuba River which took its name from the Indian tribe which populated the area. "North Yuba" is the name used locally to designate the area in north central Yuba County in which are located the towns of Dobbins and Oregon House. This is the name used by Pacific Bell Telephone to designate the area. Included with the petition are letters from the county sheriff and the local chamber of commerce attesting to local usage and acceptance of the name "North Yuba" to designate the area.

Historically, viticulture came to Yuba County in the 1950's. Documents show the planting of wine grapes and the establishment of a winery in 1855. By 1860, Yuba County had five wineries and 800 acres were devoted to wine grape cultivation. By 1930, there were 1,000 acres devoted to wine grape cultivation. However, as a consequence of National Prohibition, the vineyards were replaced by orchards of peaches and prunes and the wineries closed.

Today, however, there are 360 acres of vineyards and one winery operating in the "North Yuba" viticultural area.

Geography

The North Yuba viticultural area consists of the middle and upper foothills in Yuba County immediately west of the Sierra Nevadas and north of the Yuba River. The 2,000-foot contour line of the Sierra Nevada Mountains forms the eastern and northern portions of the boundary of the proposed viticultural area and the 1,000-foot contour line north of the Yuba River canyon forms the southern portion of the boundary. The eastern bank of Woods Creek forms part of the western portion of the boundary. The area is approximately 7 miles in length from north to south and 3 to 6 miles in width from west to east.

The principal streams which drain the area are Dobbins Creek and the upper portions of Dry Creek. Both streams flow into the Yuba River. The land drained by these streams shares similar geological history, topographical features, soils, and climatic conditions. The portions of the area which are currently devoted to viticulture consist of foothill slopes between 1,000 and 2,000 feet above sea level.

Distinguishing Characteristics

The viticultural area is not only distinguished historically from surrounding areas but geographically by its topography, elevation, geology, soils, temperature, and rainfall.

Topography and Elevation

The topography of the viticultural area ranges from gently rolling hills to steeper slopes at the base of the Sierra Nevadas and generally ranges in elevation from 1,000 feet to 2,000 feet above sea level. Lying between the high Sierras to the east and the lowlands of the Sacramento Valley to the west, the boundary of the viticultural area defines a region well suited for viticulture. The topography of the area ensures adequate ventilation for viticulture. The area escapes both the early frosts and snow of higher elevations in the Sierra Nevadas and the heat, humidity and fog common to the lowlands in the Sacramento Valley.

Geology

The area is an example of a middle foothill to lower mountain landscape that has been formed during a long period of geologic time. The area is underlain by igneous rocks and granitic rocks that extend along the base of the Sierra Nevadas. It is geologically well defined by the Sierra Nevadas to the north and east, by greenstone rock to the west, and by the Yuba River canyon to the south.

Soil Characteristics

The three major physiographic units in Yuba County are the valley lands of the Sacramento Valley, the Sierra Nevadas to the east of the valley, and the foothills region which lies between the valley and the mountains. There are nine soil associations common to the valley lands, three common to the foothills region, and six common to the mountainous terrain. Of the 18 soil associations found in Yuba County, basically three distinguish the soils of the viticultural area from the soils in surrounding areas of the county and the adjoining counties of Butte and Nevada in California.

The soil associations common to the proposed area are Sierra-Auberry, Englebright-Rescue, and Dobbins. These soils are typical of those developed from granitic and igneous rocks. The soils are shallow to very deep, rocky, cobbly and rocky, or noncobbly and rocky and are generally well drained.

"Soils of the Yuba County, California", a 1969 soil survey published jointly by the Department of Soils and Plant Nutrition of the University of California at Davis and by the County of Yuba, California, contains a color coded general soil map which clearly shows a pattern of these three soil associations in the middle and upper foothills region of Yuba County between the predominant soil association of the lower foothills, Auburn-Sobrante-Las Posas, and the predominant soil association of the mountains, Challenge-Tish Tang. The boundary includes small areas of Auburn-Sobrante-Las Posas, Challenge-Tish Tang and Rackerby-Dobbins, a mountain soil association.

Data from the soil survey of Yuba County and the
1975 soil survey of Nevada County, which lies south of Yuba County, strongly support the boundary established in this final rule.

Climatological Characteristics

Generally, Yuba County has an interior "Mediterranean" type climate. However, the location of the "North Yuba" viticultural area in the middle to upper foothills region approaching the mountainous terrain of the Sierra Nevadas allows a subtle distinction in climatological characteristics from the rest of the county in that the area escapes both the heat and fog common to the lowlands of the Sacramento Valley and the early frosts and snow of the higher elevations of the Sierra Nevadas.

The lands of the Sacramento Valley in Yuba County range from 30 to 250 feet above sea level and the mean average rainfall is 20 to 25 inches. The valley lands are an extensive area of floodplains, terraces, alluvial fans and basins.

The mountains of Yuba County are part of the western slope of the Sierra Nevadas. This is a region of gently rounded ridges, moderately steep rolling hillsides, and rugged, steep canyon slopes, that is deeply entrenched by the Yuba River and its tributaries. Basic metavolcanic rocks are dominant in this area. Elevations range from 1,600 feet to more than 4,800 feet above sea level. Rain increases with elevation and ranges from 45 inches to more than 80 inches, much of which falls as snow at higher elevations.

The middle to upper foothills in which the viticultural area lies occupy the lower western slope of the Sierra Nevadas between the valley lands and the mountainous uplands of the county. This is an area of rolling to steep hills with conspicuous ridges and peaks. Rock outcroppings are common. The central foothills region ranges in elevation from 250 feet to 2,700 feet above sea level. However, the viticultural area generally ranges in elevation from 1,000 to 2,000 feet above sea level and can be distinguished from surrounding areas by rainfall. The rainfall within the area increases gradually with elevation from 25 to 50 inches. For example, the mean annual precipitation at the Dobbins-Colgate weather station is 40.4 inches compared to 61.9 inches at the Camptonville station to the east of the area and 20.7 inches at Marysville to the west of the area.

Such statistics are corroborated by a map adapted from the State of California Department of Water Resources Seasonal Isohyetal Map (1905 to 1955) to show mean annual precipitation for Yuba County. The map distinguishes by rainfall the central foothills region from the areas to the west and to the east.

The growing season of the viticultural area is distinctly cooler than the neighboring Sacramento Valley to the west and warmer than the mountainous area to the east. The climate of the area is characterized by cool summer night temperatures, often dropping to 30 degrees below daytime highs and allowing the grapes to retain sufficient acidity to balance the high sugar levels induced by daytime sunshine.

Foothill winds are an additional cooling factor in summer, contributing further to the development of proper acidity in the area's grapes. These cooling winds are distinguished from those of the valley. At the higher foothill elevations, the winds conform more closely with the free-flowing westerly winds over northern California rather than the southwesterly winds which come up from the Straits of Carquinez into the lowland area of Yuba County.

Climatological data from three weather stations of the U.S. Department of Commerce National Oceanographic and Atmospheric Administration document the climatological differences between "North Yuba" and adjoining areas. The data from these stations when compared with data compiled over the 10-year period 1975 to 1984 from vineyards in the vicinity of Oregon House show the following differences in climate between "North Yuba" and surrounding areas:

Location	Elevation (feet)	Mean annual	Rainfall (inches)	Growing season (days)
Marysville	60	62.9 °F	20.7	273.
Dobbins-Colgate	600	62.6 °F	40.4	267.

Location	Elevation (feet)	Mean annual	Rainfall (inches)	Growing season (days)
Oregon House	1,500	59.0 °F	35 to 40	215 to 225.
Camptonville	2,755	57.5 °F	61.9	185.

Boundary

The boundary of the North Yuba viticultural area is found on four United States Geological Survey maps of the 7.5 minute series, scale 1:24,000. The boundary is described in § 9.106.

The boundary of the proposed viticultural area encompasses approximately 35 square miles or 22,400 acres. Within the area there are approximately 360 acres devoted to the cultivation of wine grapes and one bonded winery.

Compliance with Executive Order 12291

It has been determined that this final rule is not a "major rule" within the meaning of Executive Order 12291 of February 17, 1981, because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to a final regulatory flexibility analysis (5 U.S.C. 604) are not applicable to this final rule because it will not have a significant economic impact on a substantial number of small entities. The final rule will not impose, or otherwise cause, a significant increase in reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The final rule is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this final rule, will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Pub. L. 96–511, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR Part 1320, do not apply to this final rule because no requirement to collect information is imposed.

The principal author of this document is Michael J. Breen, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 9

Administrative practices and procedures, Consumer protection, Viticultural areas, and Wine.

PART 9—[AMENDED]

27 CFR Part 9—American Viticultural Areas is amended as follows:

Par. 1. The authority citation for 27 CFR Part 9 continues to read as follows:

Authority: August 29, 1935, Chapter 814, sec. 5, 49 Stat. 981, as amended (27 U.S.C. 205), unless otherwise noted.

Par. 2. The Table of Sections in 27 CFR Part 9 is amended by adding § 9.106 to Subpart C to read as follows:

* * * * *

Subpart C—Approved American Viticultural Areas

Sec.

* * * * *

9.106 North Yuba.

* * * * *

Par. 3. Subpart C is amended by adding § 9.106 which reads as follows:

§ 9.106 North Yuba.

(a) *Name.* The name of the viticultural area described in this section is "North Yuba."

(b) *Approved maps.* The appropriate maps for determining the boundary of North Yuba viticultural area are the following four U.S.G.S. topographical maps of the 7.5 minute series:

(1) "Oregon House Quadrangle," edition of 1948, photo-revised 1969.

(2) "Rackerby Quadrangle," edition of 1948, photo-revised 1969.

(3) "Challenge Quadrangle," edition of 1948 photo-revised 1969.

(4) "French Corral Quadrangle," edition of 1948, photo-revised 1969.

(c) *Boundary.* The North Yuba viticultural area is located in Yuba County in the State of California. The boundary is as follows:

(1) Beginning on the "Oregon House Quadrangle" map at the point where the Browns Valley Ditch crosses Woods Creek in the southwest corner of section 25, T. 17 N., R. 6 E., the boundary proceeds northeasterly in a meandering line approximately 1.5 miles along the east bank of Woods Creek to the point near Richards Ranch where the paved light duty road crosses said creek;

(2) Then west and north, approximately 0.33 mile to the point where the paved light duty road meets the unimproved dirt road accessing Dixon Hill and Texas Hill;

(3) Then northwest continuing along the paved light duty road approximately 2.75 miles to the intersection at Oregon House of said light duty road with the medium duty road which travels east and west between Virginia Ranch Reservoir of Dry Creek and the Yuba County Forestry Headquarters near Dobbins;

(4) Then northeasterly, 0.7 mile, along same light duty road to its intersection with the unimproved dirt road to Lake Mildred, located in the northwest corner of section 2, T. 17 N., R. 6 E.;

(5) Then northwesterly, 1.0 miles, along the unimproved dirt road to the end of said road at the shoreline of Lake Mildred;

(6) Then southwest along the shoreline of Lake Mildred to the Los Verjeles Dam at the westernmost end of said lake;

(7) Then across the face of said dam and continuing northeast along the shoreline of Lake Mildred to the point where the stream running through Smokey Ravine flows into Lake Mildred;

(8) Then north and west along said stream to the point where the stream crosses the 1,900-foot contour line in the northeast corner of section 27, T. 18 N., R. 6 E.;

(9) Then southwest in a meandering line along the 1,900-foot contour line of Lamb Hill;

(10) Then northwest along the 1,900-foot contour line of High Spring Ridge to the point where the medium duty paved road running north and south along Willow Glen Creek crosses the 1,900-foot contour line, approximately 0.75 mile north of Finley Ranch;

(11) Then north along said road, approximately 1 mile, to its intersection at Willow Glen Ranch near the west boundary line of section 15, T. 18 N., R. 6 E., with the light duty road which crosses Critterden Ridge;

(12) Then in a generally easterly direction along said road, approximately 2.0 miles, to its point of intersection with the light duty paved road named Frenchtown Road which runs north and south between Brownsville and Frenchtown;

(13) Then south along the Frenchtown Road to the point where the road crosses the 1,600-foot contour line in the northwest corner of section 24, T. 18 N., R. 6 E.;

(14) Then east along the 1,600-foot contour line to the point where Dry Creek crosses the 1,600-foot contour line near the south boundary line of section 13, T. 18 N., R. 6 E.;

(15) Then south along Dry Creek, approximately 0.16 mile, to the confluence of Indiana Creek with Dry Creek;

(16) Then in a generally easterly direction, approximately 1 mile, along Indiana Creek to the confluence of Keystone Creek with Indiana Creek;

(17) Then north along indiana Creek, approximately 0.87 mile, to the point where Indiana Creek meets the 2,000-foot contour line of Oregon Hills;

(18) Then in a generally southeasterly direction along the 2,000-foot contour line of Oregon Hills, approximately 6 miles, to the point near the east boundary line of section 9, T. 17 N., R. 7 E., where the power transmission line on Red Bluff crosses the 2,000-foot contour line;

(19) Then southwest along the right of way of said power transmission line to the point near the south boundary of section 9, T. 17 N., R. 7 E., where it meets the power transmission line running northwest and southeast between Dobbins and the Colgate Power House;

(20) Then southeast along the power transmission line between Dobbins and Colgate Power House to the Colgate Power House;

(21) Then in a generally westerly direction from the Colgate Power House along the power transmission line which crosses over Dobbins Creek to the point west of Dobbins Creek where the power transmission line intersects the 1,000-foot contour line;

(22) Then in a generally southwesterly direction along the 1,000-foot contour line above the north bank of the Yuba River and Harry L. Englebright lake of the Yuba River to the intersection of the 1,000-foot contour line with Woods Creek in the northeast corner of section 36, T. 17 N., R. 6 E.;

(23) Then east and north along the east bank of Woods Creek, approximately 0.5 miles, to the point of beginning.

Signed: June 28, 1985

Stephen E. Higgins,

Director.

Approved: July 15, 1985.

Edward T. Stevenson,

Deputy Assistant Secretary (Operations).

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1952

[Docket No. T–011]

Minnesota State Plan; Approval of Revised Compliance Staffing Benchmarks and Final Approval Determination

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Approval of Revised Compliance Staffing Benchmarks and Final State Plan Approval.

SUMMARY: This document amends Subpart N of 29 CFR Part 1952 to reflect the Assistant Secretary's decision approving revised compliance staffing requirements and granting final approval to the Minnesota State Plan. As a result of this affirmative determination under section 18(e) of the Occupational Safety and Health Act of 1970, Federal OSHA standards and enforcement authority no longer apply to occupational safety and health issues covered by the Minnesota plan, and authority for Federal concurrent jurisdiction is relinquished. Federal enforcement jurisdiction is retained over offshore maritime employment in the private sector. Federal jurisdiction remains in effect with respect to Federal government employers and employees and employment at the Twin Cities Army Ammunition Plant.

EFFECTIVE DATE: July 30, 1985.

FOR FURTHER INFORMATION CONTACT: James Foster, Director, Office of Information and Consumer Affairs, Occupational Safety and Health Administration, U.S. Department of Labor, Room N–3637, 200 Constitution Avenue NW., Washington, D.C. 20210. Telephone (202) 523–8148.

SUPPLEMENTARY INFORMATION:

Introduction

Section 18 of the Occupational Safety and Health Act of 1970 (the "Act") provides that States which desire to assume responsibility for the development and enforcement of occupational safety and health standards may do so by submitting, and obtaining Federal approval of, a State plan. Procedures for State plan submission and approval are set forth in regulations at 29 CFR Part 1902. If the Assistant Secretary, applying the criteria set forth in section 18(c) of the Act and 29 CFR 1902.3 and 1902.4, finds that the plan provides or will provide for State standards and enforcement which are "at least as effective" as Federal standards and enforcement, initial approval is granted.

A State may commence operations under its plan after this determination is made, but the Assistant Secretary retains discretionary Federal enforcement authority during the initial approval period as provided by section 18(e) of the Act. A State plan may receive initial approval even though, upon submission, it does not fully meet the criteria set forth in 29 CFR 1902.3 and .4 if it includes satisfactory assurances by the State that it will take the necessary "developmental steps" to meet the criteria within a 3-year period. 29 CFR 1902.2(b). The Assistant Secretary publishes a notice of "certification of completion of developmental steps" when all of a State's developmental commitments have been satisfactorily met. 29 CFR 1902.34.

When a State plan that has been granted initial approval is developed

opportunity to submit data, views and

Employees are likewise required to

(compliance staffing benchmarks)

A copy of the October 1982–March

VOL 50 ISS 146 JL 30 1985 UMI

When a State plan that has been granted initial approval is developed sufficiently to warrant a suspension of concurrent Federal enforcement activity, it becomes eligible to enter into an "operational status agreement" with OSHA. 29 CFR 1954.3(f). A State must have enacted its enabling legislation, promulgated State standards, achieved an adequate level of qualified personnel, and established a system for review of contested enforcement actions. Under these voluntary agreements, concurrent Federal enforcement will not be initiated with regard to Federal occupational safety and health standards in those issues covered by the State plan, where the State program is providing an acceptable level of protection.

Following the initial approval of a complete plan, or the certification of a developmental plan, the Assistant Secretary must monitor and evaluate actual operations under the plan for a period of at least one year to determine, on the basis of actual operations under the plan, whether the criteria set forth in section 18(c) of the Act and 29 CFR 1902.3, 1902.4 and 1902.37 are being applied. An affirmative determination under section 18(e) of the Act (usually referred to as "final approval" of the State plan) results in the relinquishment of authority for Federal concurrent jurisdiction in the State with respect to occupational safety and health issues covered by the plan. 29 U.S.C. 667(e).

An additional requirement for final approval consideration is that a State must meet the compliance staffing levels, or benchmarks, for safety and health compliance officers established by OSHA for that State. This requirement stems from a 1976 Court Order by the U.S. District Court for the District of Columbia (*AFL–CIO* v. *Marshall*, C.A. No. 74–406), pursuant to a U.S. Court of Appeals decision, that directed the Assistant Secretary to calculate for each State plan State the number of enforcement personnel needed to assure a "fully effective" enforcement program.

History of the Minnesota Plan and Its Compliance Staffing Benchmarks

Minnesota Plan

On August 22, 1972, Minnesota submitted an occupational safety and health plan in accordance with section 18(b) of the Act and 29 CFR Part 1902, Subpart C, and on November 25, 1972, a notice was published in the **Federal Register** (37 FR 25083) concerning submission of the plan, announcing that initial Federal approval was at issue and offering interested persons an opportunity to submit data, views and arguments concerning the plan. Comments were received from: The American Federation of Labor and Congress of Industrial Organizations (AFL–CIO); United States Steel Corporation; Porter Inc.; Honeywell, Inc.; Abrams and Spector, P.A.; Northwestern Bell Co.; Naegele Outdoor Advertising Co.; Inc.; International Brotherhood of Electrical Workers; United Auto Workers; Minnesota Association of Commerce and Industry; Winona Area Chamber of Commerce; and Patrick Lee Reagan. The Winona Area Chamber of Commerce and Patrick Lee Reagan requested a hearing. In response to these comments, as well as to OSHA's review of the plan submission, the State made changes in its plan which were discussed in the notice of initial approval. Because the comments did not indicate that the plan failed in any material way to meet the criteria for acceptability as set forth in section 18(c) of the Act and 29 CFR Part 1902, no hearing was held.

On June 6, 1973, the Assistant Secretary published a notice granting initial approval of the Minnesota plan as a developmental plan under section 18(b) of the act (38 FR 15076). The State's program began operating on August 1, 1973. The plan provides for a program patterned in most respects after that of the Federal Occupational Safety and Health Administration.

The Minnesota Department of Labor and Industry is designated as having responsibility for administering the plan throughout the State. The day-to-day administration of the plan is directed by the Assistant Commissioner of Labor and Industry and the Director of the Minnesota Occupational Safety and Health Division. Health inspections are conducted by the Minnesota Department of Health, Division of Environmental Health, under contract. Health inspection findings are forwarded to the Department of Labor and Industry for action. The Department of Health also provides laboratory services in support of the plan.

The plan provides for the adoption by Minnesota of standards which are at least as effective as Federal occupational safety and health standards, including emergency temporary standards.

The plan requires employers to furnish employment and a place of employment which are free from recognized hazards that are causing or are likely to cause death or serious physical harm and to comply with all occupational safety and health standards promulgated by the agency. Employees are likewise required to comply with standards applicable to their conduct. The plan contains provisions similar to Federal procedures for, among others, imminent danger proceedings, variances, safeguards to protect trade secrets, and employer and employee rights to participate in inspection and review proceedings. Appeals of citations, penalties and abatement periods are heard by the Minnesota Occupational Safety and Health Review Board. Decisions of the Review Board may be appealed to the appropriate State District Court.

The notice of initial approval noted a few distinctions between the Federal and Minnesota programs. In addition to adopting all Federal occupational safety and health standards, the State promulgates standards for which there are no corresponding Federal standards. The plan includes prohibition of denial of pay to an employee for participating in an inspection as part of its provision prohibiting discrimination against employees for exercising their rights under the law. State law also provides that standards requiring personal protective equipment mandate that such equipment be made available by or at the cost of the employer. In addition, in 1983 Minnesota enacted its Employee Right-to-Know Law which requires employers to provide information and training to employees concerning hazardous substances in their workplaces. (This law was subsequently amended in 1985 to conform with the provisions of the OSHA Hazard Communication Standard.)

The Assistant Secretary's initial approval of the Minnesota developmental plan, a general description of the plan, a schedule of required developmental steps and a provision for discretionary concurrent Federal enforcement during the period of initial approval were codified in the Code of Federal Regulations (29 CFR Part 1952, Subpart N; 38 FR 15076 (June 8, 1973)).

In accordance with the State's developmental schedule, all major structural components of the plan were put in place and appropriate documentation submitted for OSHA approval during the three-year period ending June 30, 1976. These "developmental steps" included: amendments to the Minnesota Occupational Safety and Health Act; promulgation of State Occupational Safety and Health Act; promulgation of State occupational safety and health standards and program regulations, and revision of the State's Field Compliance Manual. In completing these

developmental steps, the State developed and submitted for Federal approval all components of its enforcement program including, among other things, a merit staffing and a safety and health poster for private and public employees.

These submissions were carefully reviewed by OSHA; after opportunity for public comment and modification of State submissions where appropriate, the major plan elements were approved by the Assistant Secretary as meeting the criteria of section 18 of the Act and 29 CFR 1902.3 and 1902.4. The Subpart of 29 CFR Part 1952 designated as relating to Minnesota was amended to reflect each of these approval determinations (see 29 CFR 1952.204).

On September 28, 1976, in accordance with procedures at 29 CFR 1902.34 and 1902.35, the Assistant Secretary certified that Minnesota had satisfactorily completed all developmental steps (41 FR 42659). In certifying the plan, the Assistant Secretary found the structural features of the program—the statute, standards, regulations, and written procedures for administering the plan—to be at least as effective as corresponding Federal provisions. Certification does not entail findings or conclusions by OSHA concerning adequacy of actual plan performance. As has already been noted, OSHA regulations provide that certification initiates a period of evaluation and monitoring of State activity to determine, in accordance with section 18(e) of the Act, whether the statutory and regulatory criteria for State plans are being applied in actual operations under the plan and whether final approval should be granted.

Although Minnesota had not sought previously to enter into an operational status agreement, in 1981 OSHA determined that such agreements should be concluded with all qualified States. Thus, a **Federal Register** notice was published on June 11, 1982 (47 FR 25325), announcing that an operational status agreement had been signed on October 9, 1981, for Minnesota. Under the terms of that agreement, OSHA voluntarily suspended the application of concurrent Federal enforcement authority with regard to Federal occupational safety and health standards in all issues covered by the Minnesota plan.

Minnesota Benchmarks

In 1978, the Assistant Secretary was directed by the U.S. District Court for the District of Columbia (*AFL–CIO* v. *Marshall*, C.A. No. 74–406), pursuant to a U.S. Court of Appeals decision, to calculate for each State plan state the number of enforcement personnel (compliance staffing benchmarks) needed to assure a "fully effective" enforcement program. In 1980, OSHA submitted a Report to the Court containing the benchmarks and requiring Minnesota to allocate 56 safety compliance officers and 74 industrial hygienists to conduct inspections under the plan.

In September 1984 the Minnesota State designee in conjunction with OSHA completed a review of the components and requirements of the 1980 compliance staffing benchmarks established for Minnesota. Pursuant to an initiative begun in August 1983 by the State plan designees as a group with OSHA and in accord with the formula and general principles established by that group for individual State revision of the benchmarks, Minnesota reassessed the staffing necessary for a "fully effective" occupational safety and health program in the State. This reassessment resulted in a proposal to OSHA contained in comprehensive documents of revised compliance staffing benchmarks of 31 safety and 12 health compliance officers.

History of the Present Proceedings

Procedures for final approval of State plans are set forth at 29 CFR Part 1902, Subpart D. On January 16, 1985, the Occupational Safety and Health Administration published notice of its proposal to approve revised compliance staffing benchmarks for Minnesota and the resultant eligibility of the Minnesota State plan for determination under section 18(e) of the Act as to whether final approval of the plan should be granted (50 FR 2467). The determination of eligibility was based on monitoring of State operations for at least one year following certification, State participation in the Federal-State Unified Management Information System, and staffing which meets the proposed revised State staffing benchmarks.

The January 16 **Federal Register** notice set forth a general description of the Minnesota plan and summarized the results of Federal OSHA monitoring of State operations during the period from October 1982 through March 1984. In addition to the information set forth in the notice itself, OSHA submitted, as part of the record in this rulemaking proceeding, extensive and detailed exhibits documenting the plan, including copies of the State legislation, administrative regulations and procedural manuals under which Minnesota operates its plan, and copies of all previous **Federal Register** notices regarding the plan.

A copy of the October 1982–March 1984 Evaluation Report of the Minnesota plan ("18(e) Evaluation Report"), which was extensively summarized in the January 16 proposal and which provided the principal factual basis for the proposed 18(e) determination, was included in the Record (Ex. 3–13). Copies of all OSHA evaluation reports on the plan since its certification as having completed all development steps were made part of the record.

The January 16 **Federal Register** also contained notice of the Occupational Safety and Health Administration's proposed approval of revised compliance staffing benchmarks for Minnesota. A detailed description of the methodology and State-specific information used to develop the revised compliance staffing benchmarks for Minnesota was included in the notice. In addition, OSHA submitted, as a part of the record (Docket No. T–011), Minnesota's detailed submission containing both a narrative explanation and supporting data (Ex. 2–10). A summary of the benchmark revision process was likewise set forth in a separate **Federal Register** notice on January 16, 1985, concerning the Wyoming State plan (50 FR 2491). An informational record was established in a separate docket (No. T–018) and contained background information relevant to the benchmark issue in general and the current benchmark revision process.

To assist and encourage public participation in the benchmark revision process and 18(e) determination, copies of the complete record were maintained in the OSHA Docket Office in Washington, D.C., in the OSHA Region V Office in Chicago, Illinois, and the office of the Minnesota Department of Labor and Industry in St. Paul, Minnesota. A summary of the January 16 proposal, with an invitation for public comments, was published in Minnesota on January 28, 1985 (Ex. 5).

The January 16 proposal invited interested persons to submit, by February 20 (subsequently extended to March 22, 1985, 50 FR 6956, in response to a request from James N. Ellenberger, Department of Occupational Safety, Health and Social Security, AFL–CIO), written comments and views regarding the Minnesota plan, whether the proposed revised compliance staffing benchmarks should be approved, and whether final approval should be granted. Opportunity to request an informal public hearing on the issue of final approval was likewise provided. Twelve letters of comment were received in response to these notices:

four from local, State and national labor organizations; one from an employer; four from non-governmental

United Steelworkers of America, Mary Win O'Brien, Assistant General Counsel

investigators. These reviews have shown the reports to present a complete

four from local, State and national labor organizations; one from an employer; four from non-governmental organizations, other than management or labor groups, concerned with occupational safety and health issues; one from a firm of attorneys; one from a group of physicians; and one from a 12-member body within the State government, composed of representatives of labor, management, the occupational safety and health professions, and the general public, appointed to provide advice on occupational safety and health matters. No requests for an informal hearing were received.

Summary and Evaluation of Comments Received

During this proposed rulemaking OSHA has encouraged interested members of the public to provide information and views regarding operations under the Minnesota plan, to supplement the information already gathered during OSHA monitoring and evaluation of plan administration, and regarding the proposed revised compliance staffing benchmarks for Minnesota.

In response to the January 16 Federal Register notice, OSHA received comments from: Minnesota Safety Council, Inc., Robert L. Anderson, President (Ex. 4–2); Apprenticeship Coordinators Association of Minnesota, James H. Gustafson, President (Ex. 4–3); Northern States Power Company, E.I. Malone, General Manager, Industrial Relations, Safety and Workers' Compensation, and J.J. Pineault, Manager, Occupational Safety and Health (Ex. 4–4); State of Minnesota Occupational Safety and Health Advisory Council, Edwin Conrad, Chairman (Ex. 4–5); Minnesota State Building and Construction Trades Council, William R. Peterson, President (Ex. 4–6); Koll and McCoy, Attorneys at Law, Laurence F. Koll, Attorney at Law (Ex. 4–7); Midwest Center for Occupational Health and Safety, Ruth K. McIntyre, Director, Continuing Education (Ex. 4–8); Occupational Health Services, Paul B. Johnson, M.D. *et al.* (Ex. 4–9); International Brotherhood of Electrical Workers, Local Union No. 160, Robert M. Sable, Safety Chairman, and David C. Ring, Business Manager (Ex. 4–10); American Industrial Hygiene Association (AIHA), James R. Thill, President, Midwest Section (Ex. 4–11); American Federation of Labor and Congress of Industrial Organizations (AFL–CIO), Margaret Seminario, Association Director, Department of Occupational Safety, Health and Social Security (Ex. 4–12); United Steelworkers of America, Mary Win O'Brien, Assistant General Counsel (Ex. 4–13). Ivan Russell, Director, Occupational Safety and Health Division, Minnesota Department of Labor and Industry, responded to the public comments (Ex. 4–14).

The Minnesota Safety Council's response was supportive of the Minnesota plan (Ex. 4–2). The Council has been associated with the program since its inception, having participated in the drafting of the plan, and has closely observed State activities since the program became operational. Thus, Council President Robert L. Anderson felt that there was a firm basis for its favorable appraisal of the State's enforcement effort and the level of compliance obtained.

A similarly supportive position was taken by the Apprenticeship Coordinators Association of Minnesota (Ex. 4–3). The Association's President, James H. Gustafson, expressed the view that the State's performance had been skilled and professional.

Messrs. Malone and Pineault, representing the Northen States Power Company, had both been administrators of the State plan (Ex. 4–4). On the basis of this dual perspective as employers and former program officials, they asserted that the State was protective of employees' rights to a safe and healthful workplace and employers' rights to an equitable review of disputed State actions. It was felt that the final approval of the Minnesota plan would be a significant advance for the employees of Minnesota.

Edwin Conrad, Chairman of the State of Minnesota's Occupational Safety and Health Advisory Council, noted a decline in the total injury and illness incidence rate and the reduction in the total number of work-related fatalities as ultimate evidence of the Minnesota program's effectiveness (Ex. 4–5). The 12 members of the Council, representing management, labor, the occupational safety and health professions and the general public, have observed the development of a working relationship between the State and employers and employees which has contributed to this achievement.

The competence of State personnel was commended by Lawrence F. Koll of Koll and McCoy, Attorneys at Law (Ex. 4–7). Mr. Koll had been a former Minnesota Workers' Compensation Commissioner and is currently a member of the Workers Compensation Advisory Council, and thus has had an opportunity to examine accident investigation reports of Division of Occupational Safety and Health field investigators. These reviews have shown the reports to present a complete and cogent analysis of the accidents in question.

The Midwest Center for Occupational Health and Safety has gone on record as affirming its support of the Minnesota program (Ex. 4–8). Ruth K. McIntyre, Director of Continuing Education for the Center, noted the strong administration and management of the program, resulting in a stringent enforcement of standards and, consequently, greater protection for employees. She also views the revised staffing benchmarks favorably.

On the basis of their experiences with the State plan, Paul B. Johnson, M.D., and four other physicians associated with Occupational Health Services, a program of St. Paul-Ramsey Medical Center, have asserted their belief in the plan's value (Ex. 4–9). They claim that the knowledge and effectiveness of State personnel have been frequently demonstrated and advocate final approval.

James R. Thill, President, Midwest Section of the American Industrial Hygiene Association, wrote on behalf of the board and officers of the Association to urge final approval of the Minnesota plan and approval of the State's revised staffing benchmarks (Ex. 4–11). Speaking from personal experience gained in assisting the State in its development of the Minnesota Employee Right-to-Know Law, serving as an expert witness in workers' compensation cases, and advising cited employers, Mr. Thill gave a positive appraisal of the State's program. He had been favorably impressed with the technical competence of the staff, their cooperative attitude, and their practical and realistic approach to solving problems affecting the health of workers.

Two State affiliates of the AFL–CIO expressed their support of the Minnesota program and its proposed final approval. William R. Peterson of the Minnesota State Building and Construction Trades Council (AFL–CIO) noted, as an indication of the State's effectiveness, that compliance with the State's housekeeping standards has resulted in a 50% reduction in minor injuries at one construction site in Becker, Minnesota (Ex. 4–6).

Presenting the position of the International Brotherhood of Electrical Workers, Local Union No. 160 (AFL–CIO), Robert M. Sable, Safety Chairman, and David C. Ring, Business Manager, have endorsed a determination in favor of Minnesota's final approval (Ex. 4–10). They maintain that by working vigorously for employees' safety and health and by maintaining good relations with both labor and management, the State has established and continues to operate a program which exceeds the requirement that it be "at least as effective" as OSHA.

The March 22 comments submitted by Margaret Seminario, Associate Director, Department of Occupational Safety, Health and Social Security of the AFL–CIO, contained a number of criticisms, which fall into three broad categories relating to State plans and the evaluation thereof: OSHA's data-based State monitoring system; Minnesota plan performance discussed in the 18(e) Evaluation Report for the period October 1, 1982 through March 31, 1984; and OSHA's revised compliance staffing benchmarks both in general terms and as they relate specifically to Minnesota (Ex. 4–12). Regarding the first area of concern, a brief description of OSHA's State plan monitoring and evaluation system is appropriate.

The evaluation of the Minnesota plan was conducted in accordance with OSHA's new State plan monitoring and evaluation system. This system uses statistical data to compare Federal and State performance on a number of criteria, or measures. Significant differences between the two are evaluated to determine whether these differences, viewed within the framework of overall State plan administration, detract from the State's effectiveness and potentially render it less effective than the Federal program.

The AFL–CIO expressed concern that Federal OSHA's monitoring system with its reliance on statistical indicators fails to accurately reflect the overall conduct of the State program and tries to limit those areas of State performance which exceed OSHA's enforcement efforts in several areas. However, OSHA never intended that superior performance would result in any negative conclusion. Statistical outliers display differences, not necessarily deficiencies. If further review related to an outlier determines stronger State performance, clearly no negative determination will be made.

The AFL–CIO's comments on specific State performance issues are addressed in the appropriate sections of the Findings and Conclusions portion of this notice. Ivan Russell, the Director of the Minnesota Occupational Safety and Health Division, responded in detail to the issues raised by the AFL–CIO on both the benchmarks and State-specific issues (Ex. 4–14).

Comments by both the AFL–CIO and the United States Steelworkers of America addressing the proposed revised benchmarks for Minnesota reflected, for the most part, the commenters' concerns regarding the benchmark revision process generally. Thus, the comments question whether the benchmark's formula as applied in Minnesota should have assumed a need for routine, general schedule inspections at all covered workplaces; question whether the proposed staffing levels will be sufficient to respond to new hazards or future standards; and question the appropriateness of the inclusion or exclusion of various industry groups in Minnesota's general inspection universe unless corresponding industries are treated identically in other States. As was specifically discussed in the Federal Register notice of June 13, 1985, dealing with approval of revised benchmarks for the Kentucky State plan (50 FR 24884), the concept of universal general schedule coverage has been replaced by more sophisticated targeting systems which deploy enforcement resources where they are most needed, and universal coverage is as inappropriate a concept for benchmarks formulation as it is for inspection scheduling. The possible effect of new hazards or future standards cannot be ascertained with any precision, and in any case both OSHA and the States have generally been able to effectively enforce new standards with no additions to staff for that purpose. As to the need for "uniformity," OSHA believes the greatest strength of the current formula is that it takes into account actual State program needs as shown by State data and experience. OSHA has found that the formula used to derive benchmarks for Minnesota and other States involved in the 1984 revision process employs the best information and techniques currently available; properly takes into account each of the factors set forth in the District Court Order in *AFL–CIO* v. *Marshall* and is an appropriate means of establishing fully effective benchmarks which provide proper program coverage in the context of each State's specific program needs. A more detailed discussion of the general concerns raised by the AFL–CIO and the Steelworkers can be found in the June 13, 1985, Federal Register notice on Kentucky (50 FR 24884).

The comments filed by the AFL–CIO also addressed several specific issues relating to calculation of the benchmarks for Minnesota. The union indicated that although Minnesota had added many industries and establishments to its general schedule safety inspection universe, no workplaces with ten or fewer employees in high hazard industries were added. This comment is in error. Minnesota added 530 small establishments with an experience of above-average Workers' Compensation Insurance premiums in industries with high injury rates to its safety universe. Moreover, in all industry groups and workplaces covered by the Minnesota plan, the State provides coverage by responding to employee complaints of unsafe or unhealthful conditions and to accidents.

The AFL–CIO also commented that although Minnesota added some high hazard non-manufacturing establishments to its initial health inspection universe, the State did not allocate general schedule resources to certain industries with serious health hazards, including bottled and canned soft drinks, wood products, auto repair shops, and hospitals. Minnesota responded that many of the industries about which the AFL–CIO expressed concern are already included in the State's safety inspection universe and would receive inspection coverage by safety compliance personnel cross-trained in the recognition of health hazards. In many instances the safety personnel make referrals to the Minnesota Department of Health for referral inspections to be conducted by industrial hygienists. Of course, these industries would also be subject to inspections under the State's employee complaint and accident investigation provisions. OSHA concurs that inclusion of these industries in the initial health universe is not required for proper program coverage. (It should also be remembered that assumptions made in determining a State's theoretical workload for benchmark purposes are not binding upon the State in determining specific employers for general schedule enforcement visits. The initial universe is not in itself a targeting system but rather a method for determining a reasonable estimate of workplaces with industrial exposures likely to produce hazards.)

The AFL–CIO asserted that Minnesota's allocation of enforcement resources to health inspections in the public sector and the construction industry, which the State based on past experience, is inadequate. Minnesota responded that 17% of its covered workforce is in the public sector, with only a very small percentage of those employees engaged in "high-risk" occupations. The State also noted that health hazards in the construction industry are most often cited by cross-trained safety compliance officers, or as the result of referral or health complaint inspections. Minnesota further responded that health hazards warranting special State attention,

VOL 50 ISS 146 JL 30 1985 UMI

either in construction or the public sector, will be addressed through special emphasis programs without any negative impact upon the State's overall enforcement program.

Finally, both the AFL-CIO and the Steelworkers allege that the number of enforcement personnel now found appropriate for a fully effective program in Minnesota and other States is lower than the staffing levels allocated by the States in 1980 or projected in the benchmarks issued by OSHA during its first effort to implement the *AFL-CIO* v. *Marshall* Court Order in 1980. However, the District Court Order on which the revision process has been based does not assume or require that revised benchmarks must provide a comparative increase over past levels. The adequacy of the revised benchmarks cannot be determined by whether they are greater or smaller than the 1980 benchmarks or earlier enforcement levels. Such direct numerical comparison of staffing levels is no more valid than was direct comparison of State to Federal staffing levels under the "at least as effective" test rejected by the Court of Appeals in 1978. The objective assigned to OSHA by the Court of Appeals decision and District Court Order was, in sum, to measure the workload assumed by each State under its plan and to determine, using the best available information and techniques, but avoiding direct numerical comparisons, the staffing levels needed for fully effective coverage. This is precisely what has been done in the present revision process. The review of each State's illness and injury data, industrial mix, demographics and enforcement history has been far more detailed than was the case when benchmarks were first issued in 1980. As discussed above, the concept of universal routine inspection has been replaced by far more sophisticated targeting, devoting resources to the relative minority of industries where the majority of enforcement-preventable injuries occur. These factors have resulted in the more realistic enforcement staffing requirements embodied in the revised benchmarks for Minnesota.

For these reasons, and in light of other comments by groups and individuals directly affected and knowledgeable about safety and health enforcement needs in Minnesota, OSHA believes application of the current benchmark formula for Minnesota has resulted in staffing levels which result in fully effective enforcement in the State of Minnesota.

Findings and Conclusions

Minnesota Benchmarks

As provided in the 1978 Court Order in *AFL-CIO* v. *Marshall*, Minnesota, in conjunction with OSHA, has undertaken to revise the compliance staffing benchmarks originally established in 1980 for Minnesota. OSHA has reviewed the State's proposed revised benchmarks and supporting documentation and has carefully considered the public comments received with regard to this proposal, and has determined that compliance staffing levels of 31 safety and 12 health compliance officers meet the requirements of the Court and provide staff sufficient to ensure a fully effective enforcement program.

Minnesota Final Approval

As required by 29 CFR 1902.41, in considering the granting of final approval to a State plan, OSHA has carefully and thoroughly reviewed all information available to it on the actual operation of the Minnesota State plan. This information has included all previous evaluation findings since certification of completion of the State plan's developmental steps, especially data for the period of October 1982 through March 1984 and information presented in written submissions. Findings and conclusions in each of the areas of performance are as follows:

(1) *Standards.* Section 18(c)(2) of the Act requires State plans to provide for occupational safety and health standards which are at least as effective as Federal standards. Such standards where not identical to the Federal must be promulgated through a procedure allowing for consideration of all pertinent factual information and participation of all interested persons (29 CFR 1902.4(b)(2)(iii)); must, where dealing with toxic materials or harmful physical agents, assure employee protection throughout his or her working life (29 CFR 1902.4(b)(2)(i)); must provide for furnishing employees appropriate information regarding hazards in the workplace through labels, posting, medical examinations, etc. (29 CFR 1902.4(b)(2)(vi)); must require suitable protective equipment, technological control, monitoring, etc. (29 CFR 1902.4(b)(2)(vii)); and where applicable to a product must be required by compelling local conditions and not pose an undue burden on interstate commerce (29 CFR 1902.3(c)(2)).

As documented in the approved Minnesota State plan and OSHA's evaluation findings made a part of the record in this 18(e) determination proceeding, and as discussed in the January 16 notice, the Minnesota plan provides for the adoption of standards and amendments thereto which are identical to, or at least as effective as, Federal standards. The State's law and regulations, previously approved by OSHA and made a part of the record in this proceeding (Exs. 2–2 and 2–3), include provisions addressing all of the structural requirements for State standards set out in 29 CFR Part 1902.

In order to qualify for final State approval, a State program must be found to have adhered to its approved procedures (29 CFR 1902.37(b)(2)); to have timely adopted identical or at least as effective standards, including emergency temporary standards and standards amendments (29 CFR 1902.37(b)(3)); to have interpreted its standards in a manner consistent with Federal interpretations and thus to demonstrate that in actual operation State standards are at least as effective as the Federal (29 CFR 1902.37(b)(4)); and to correct any deficiencies resulting from administrative or judicial challenge of State standards (29 CFR 1902.37(b)(5)).

During the evaluation period, the State experienced some difficulty in complying with the six-month time frame for adopting Federal standards changes. The average lapse time for adoption of standards was 6.9 months. This appears to be due to the State's past practice of publishing notices of adoption of standards semi-annually. A recent change in State procedures now provides for quarterly adoption of standards (18(e) Evaluation Report, p. 14).

When a State adopts Federal standards, the State's interpretation and application of such standards must ensure consistency with Federal interpretation and application. The State has generally adopted standards interpretations, which are at least as effective as the Federal, in a timely fashion. OSHA's monitoring has found that the State's application of its standards is comparable to Federal standards application. No challenges to standards have occurred in Minnesota.

Therefore, in accordance with section 18(c)(2) of the Act and the pertinent provisions of 29 CFR 1902.3, 1902.4 and 1902.37, OSHA finds the Minnesota program in actual operation to provide for standards adoption, correction when found deficient, interpretation and application, in a manner at least as effective as the Federal program.

(2) *Variances.* A State plan is expected to have the authority and procedures for the granting of variances comparable to those in the Federal program (29 CFR 1902.4(b)(2)(iv)). The Minnesota State plan contains such provisions in both law and regulations which have been previously approved by OSHA. In order to qualify for final State plan approval permanent variances granted must assure employment equally as safe and healthful as would be provided by compliance with the standard (29 CFR 1902.37(b)(6)); temporary variances granted must assure compliance as early as possible and provide appropriate interim employee protection (29 CFR 1902.37(b)(7)). The twelve permanent variances granted during the evaluation period were granted in a timely manner in accordance with approved State procedures and were deemed to provide equivalent protection (18(e) Evaluation Report, p. 17). The three temporary variances granted by Minnesota during the period met the established criteria (18(e) Evaluation Report, p. 18).

Accordingly, OSHA finds that the Minnesota program effectively grants variances from its occupational safety and health standards.

(3) *Enforcement.* Section 18(c)(2) of the Act and 29 CFR 1902.3(d)(1) require a State program to provide a program for enforcement of State standards which is and will continue to be at least as effective in providing safe and healthful employment and places of employment as the Federal program. The State must require employer and employee compliance with all applicable standards, rules and orders (29 CFR 1902.3(d)(2)) and must have the legal authority for standards enforcement including compulsory process (29 CFR 1902.4(c)(2)).

The Minnesota Occupational Safety and Health Act of 1973, as amended, and implementing regulations previously approved by OSHA, establish employer and employee compliance responsibility and contain legal authority for standards enforcement in terms substantially identical to those in the Federal Act. In order to be qualified for final approval, the State must have adhered to all approved procedures adopted to ensure an at least as effectivce compliance program (29 CFR 1902.37(b)(2)). The 18(e) Evaluation Report data show no lack of adherence to such procedures.

(a) *Inspections.* A plan must provide for inspection of covered workplaces, including in response to complaints, where there are reasonable grounds to believe a hazard exists (29 CFR 1902.4(c)(2)(i)). As noted in the January 16, 1985 Federal Register notice, Minnesota attempts to formalize all complaints submitted and responds to all written employee complaints by inspection. The State has a procedure similar to OSHA's for handling non-formal complaints by a letter to the employer. During the evaluation period, however, this procedure was not in effect, and 81.4% of complaints received by the State were responded to by inspection. Complaint response was timely (18(e) Evaluation Report, pp. 40–42).

In order to qualify for final approval, the State program, as implemented, must allocate sufficient resources toward high-hazard workplaces while providing adequate attention to other covered workplaces (29 CFR 1902.37(b)(8)). Minnesota's safety targeting plan is based upon the Federal system, supplemented by a special emphasis program which targets inspections in individual facilities in relation to their safety performance and history. The State's health inspection targeting system is comparable to the Federal system. Data contained in the 18(e) evaluation indicate that 95.4% of State programmed safety inspections and 91.0% of State programmed health inspections were conducted in high-hazard industries, which are comparable to the Federal data (18(e) Evaluation Report, p. 37).

The AFL-CIO criticized the State's adoption of the Federal system of recognizing records reviews as inspections (Ex. 4–12). Under State procedures, similar to those used Federally, employers eligible for a general schedule safety inspection may qualify for a "records review" inspection if their lost workday injury (LWDI) rate is less than the national average for all industries. OSHA believes that this is an efficient use of resources. In addition, the State points out in its response that a partial walk-through inspection is attempted or conducted if the investigator observes a serious hazard or imminent danger during the opening conference, if a safety complaint is filed during the opening conference, or if the review of injury and illness records reveals an unusual number or type of injury occurring in a particular area of the facility. Employers who qualify for a "records review" inspection must still post a notice to employees notifying them that such an inspection has occurred and providing the name, address and phone number of the nearest Minnesota Area Office (Ex. 4–14).

(b) *Employee Notice and Participation in Inspections.* In conducting inspections the State plan must provide an opportunity for employees and their respresentatives to point out possible violations through such means as employee accompaniment or interviews with employees (29 CFR 1902.4(c)(2)(ii)). The State's procedures require compliance officers to provide this opportunity. During the evaluation period employees elected to exercise their right to accompany the inspector on the walkaround in 13.3% of initial inspections (18(e) Evaluation Report, p. 50). Minnesota's statutory requirement that employers pay employees for the time spent participating in inspections was praised by the AFL-CIO in its comments (Ex. 4–12).

In addition, the State plan must provide that employees be informed of their protections and obligations under the Act by such means as the posting of notices (29 CFR 1902.4(c)(2)(iv)) and provide that employees have access to information on their exposure to regulated agents and access to records of the monitoring of their exposure to such agents (29 CFR 1902.4(c)(vi)).

To inform employees and employers of their protections and obligations, Minnesota requires that a poster, which was previously approved by OSHA (40 FR 13211), be displayed in all covered workplaces. Requirements for the posting of the poster and other notices such as citations, contests, hearings and variance applications, are set forth in the previously approved State law and regulations which are substantially identical to Federal requirements. Information on employee exposure to regulated agents and access to medical and monitoring records is provided through State standards, including the Access to Employee Exposure and Medical Records standard. Federal OSHA's evaluation concludes that the State performance is satisfactory.

(c) *Nondiscrimination.* A State is expected to provide appropriate protection to employees against discharge or discrimination for exercising their rights under the State's program including provision for employer sanctions and employee confidentiality (29 CFR 1902.4(c)(2)(v)). The Minnesota Act and regulations provide for discrimination protection which is at least as effective as the Federal. The State investigated 15 complaints out of 16 complaints received. The State settled administratively all three complaints initially found meritorious. Average lapse time between receipt of a complaint and the notification to the complainant of the investigation results for the State is 44 days, which compares favorably to the Federal lapse time (18(e) Evaluation Report, p. 68).

(d) *Restraint of Imminent Danger; Protection of Trade Secrets.* A State

plan is required to provide for the prompt restraint of imminent danger situations (29 CFR 1902.4(c)(2)(vii) and to provide adequate safeguards for the protection of trade secrets (29 CFR 1902.4(c)(2)(viii)). The State has provisions concerning imminent danger and protection of trade secrets in its law, regulations and Field Compliance Manual which are similar to the Federal. The 18(e) Evaluation Report indicates that there were no imminent danger situations identified during the period. In the 10-year history of the Minnesota program, there have been no instances of complaints about the protection of trade secrets (18(e) Evaluation Report, p. 50).

(e) *Right of Entry: Advance Notice.* A State program is expected to have authority for right of entry to inspect and compulsory process to enforce such right equivalent to the Federal program (section 18(c)(3) of the Act and 29 CFR 1902.3(e)). Likewise, a State is expected to prohibit advance notice of inspection, allowing exception thereto no broader than in the Federal program (29 CFR 1902.3(f)). Section 182.659 of the Minnesota Occupational Safety and Health Act authorizes the Commissioner to enter and inspect all covered workplaces in terms substantially identical to those in the Federal Act. State law allows the Attorney General to obtain a warrant from the State District Court if gaining entry is impeded by the employer. State procedures differ from the Federal in that, at several stages, attempts are made to persuade the employer to permit entry. The Minnesota law likewise prohibits advance notice, and implementing procedures for exceptions to this prohibition are substantially identical to the Federal.

In order to be found qualified for final approval, a State is expected to take action to enforce its right of entry when denied (29 CFR 1902.37(b)(9)) and to adhere to its advance notice procedures. Of the 42 denials of entry during the evaluation period, the State was able to gain warrantless entry, or otherwise resolve the issue, in 19 cases and successfully obtained warrants in 15 cases (18(e) Evaluation Report, p. 48). The evaluation report did not note any improper use of advance notice.

The AFL–CIO alleged that the State's practice of negotiating with employers who had denied entry violated the prohibition against advance notice (Ex. 4–12). OSHA's monitoring of this aspect of the State's program has shown that Minnesota does not negotiate with employers in lieu of seeking a warrant, but performs both operations concurrently. Upon denial of entry, the legal process for obtaining a warrant is initiated while, simultaneously, dialogue with the employer continues as repeated attempts are made to obtain entry. The State believes that this procedure has been proven more effective in expediting entry, a conclusion supported by OSHA's monitoring which has revealed that an average of 27.3 days elapsed from the date of the warrant application to the date of entry, while normally negotiation required no more than a few days. As the State notes in its response to the AFL–CIO's comments, the time needed for negotiating with an employer is minimal when compared with the time needed to seek and obtain a warrant through the Court system. Whether entry is negotiated or obtained through a warrant, the employer is not notified of the date on which the inspection will be conducted (Ex. 4–14).

(f) *Citations, Penalties, and Abatement.* A State plan is expected to have authority and procedures for promptly notifying employers and employees of violations identified during inspection, for the proposal of effective first-instance sanctions against employers found in violation of standards and for prompt employer notification of such penalties (29 CFR 1902.4(c)(2) (x) and (xi)). The Minnesota plan through its law, regulations and Field Compliance Manual, which have all been previously approved by OSHA, has established a system similar to the Federal for prompt issuance of citations to employers delineating violations and establishing reasonable abatement periods, requiring posting of such citations for employee information and proposing penalties.

In order to be qualified for final approval, the State, in actual operation, must be found to conduct competent inspections in accordance with approved procedures and to obtain adequate information to support resulting citations (29 CFR 1902.37(b)(10)), to issue citations, proposed penalties and failure-to-abate notifications in a timely manner (29 CFR 1902.37(b)(11)), to propose penalties for first instance violations that are at least as effective as those under the Federal program (29 CFR 1902.37(b)(12)), and to ensure abatement of hazards including issuance of failure-to-abate notices and appropriate penalties (29 CFR 1902.37(b)(13)).

The Minnesota Field Compliance Manual has been updated through the issuance of Division Policies (internal memoranda to State staff), and thus the State follows inspection procedures, including documentation procedures, which are similar to the Federal.

Minnesota's provisions governing classification of violations differ in some respects from the Federal. However, both the number of violations cited per initial inspection (2.2) and the percentage of violations which are considered serious (21.5%) are comparable to Federal statistics. In addition, the State percentage of programmed inspections found not-in-compliance (safety—60.7%; health—39.8%) is comparable to the Federal percentage.

Minnesota's lapse time from inspection to issuance of citation is comparable to the Federal for safety (10 days) but longer for health (30 days). The AFL–CIO in its comments criticized the health citation lapse time and suggested that it is related to an insufficient number of health inspectors (Ex. 4–12). However, as the State points out in its response, it appears that this discrepancy is due to the larger percentage of apparent violations requiring analysis of samples found on State health inspections, Minnesota's former policy of delaying issuance of citations for all violations found on inspections until laboratory analysis is completed, and clerical staffing shortages in the Minnesota Health Department (Ex. 4–14). As noted in the 18(e) Evaluation Report, a recently instituted State policy of issuing citations for which laboratory analysis is not needed without awaiting sampling results for other potential violations, as well as decreased clerical time since implementation of the new Integrated Management Information System, should reduce the health citation lapse time (18(e) Evaluation Report, pp. 72–73). The size of the State's health compliance staff is totally unrelated to this issue.

Neither the data nor any comments suggest that the State has a problem in adequately documenting inspections to support citations. Further, Lawrence Koll, of the law firm of Koll and McCoy, commented that he has found the investigative files of accidents which he has reviewed to be thorough and conclusive (Ex. 4–7).

The 18(e) Evaluation Report indicates that the State of Minnesota's average proposed penalty for serious violations was somewhat lower than the Federal ($150 for safety and $198 for health) (18(e) Evaluation Report, p. 59). Analysis has shown the State's penalty average to have been acceptable.

Minnesota conducts follow-up inspections on all serious, willful and repeat violations, and therefore the State conducts a proportionately greater number of follow-up inspections (16.4% of not-in-compliance inspections) than does Federal OSHA (18(e) Evaluation Report, p. 55).

During the report period the State conducted 21 follow-up inspections that resulted in failure-to-correct citations out of 242 follow-up inspections (18(e) Evaluation Report, p. 56).

State abatement periods are somewhat longer than those set Federally (12.6 days for safety and 37 days for health). The State grants Petitions for the Modification of Abatement (PMA's) only when appropriate and reasonable. (PMA's were granted in 1.6% of total violations cited (18(e) Evaluation Report, pp. 56–57)).

(g) *Contested Cases.* In order to be considered for initial approval and certification, a State plan must have authority and procedures for employer contest of citations, penalties and abatement requirements at full administrative or judicial hearings. Employees must also have the right to contest abatement periods and the opportuntity to participate as parties in all proceedings resulting from an employer's contest (29 CFR 1902.4(c)(2)(xii)). Minnesota's procedures for employer contest of citations, penalties and abatement requirements and for ensuring employee rights are contained in the law, regulations and Field Compliance Manual made a part of the record in this proceeding and are substantially identical to the Federal procedures. Appeals of citations, penalties and abatement periods are heard by the Occupational Safety and Health Review Board and may be further appealed to the appropriate State District Court.

During the 18(e) evaluation period, 125 cases, representing 8.4% of inspections with citation, resulted in contests. Although this percentage is higher than the percentage of formal contests Federally, most contested cases in Minnesota are settled without a hearing. The report concludes that the State's contest results are generally the same as those in the Federal program, with no additional resources used and the rights of all parties respected (18(e) Evaluation Report, p. 65).

To qualify for final approval, the State must seek review of any adverse adjudications and take action to correct any enforcement program deficiencies resulting from adverse administrative or judicial determinations (29 CFR 1902.37(b)(14)). The State had no adverse decisions which would require review or corrective action. Accordingly, OHSA finds that the Minnesota plan effectively reviews contested cases.

(h) *Enforcement Conclusion.* In summary, the Assistant Secretary finds that enforcement operations provided under the Minnesota plan are competently planned and conducted, and are overall at least as effective as Federal OSHA enforcement.

(4) *Public Employee Program.* Section 18(c)(6) of the Act requires that a State which has an approved plan must maintain an effective and comprehensive occupational safety and health program applicable to all employees of public agencies of the State and its political subdivisions, which program must be as effective as the standards contained in an approved plan. 29 CFR 1902.3(j) requires that a State's progam for public employees be as effective as the State's program for private employees covered by the plan.

Minnesota's plan provides a program in the public sector which is identical to that in the private sector, including the proposal of penalties. During the evaluation period, the State conducted 337 inspections in the public sector and cited 1064 violations. Penalties proposed for safety violations (serious—$172; other than serious—$83) were similar to those in the private sector. No health violations were penalized in the public sector. Injury and illness rates for State and local government employment for 1982 (all case rate 7.0; lost workday case rate 2.9) are somewhat lower than those for the private sector (18(e) Evaluation Report, pp. 28–29).

Because the State treats the public sector in the same manner as the private sector, as evidenced by its written procedures, which are applicable to all covered employees, public or private, and since monitoring indicates similar performance in the public and private sectors, OSHA concludes that the Minnesota program meets the criterion in 29 CFR 1902.3(j).

(5) *Staffing and Resources.* Section 18(c)(4) of the Act requires State plans to provide the qualified personnel necessary for the enforcement of standards. In accordance with 29 CFR 1902.37(b)(1), one factor which OSHA must consider in evaluating a plan for final approval is whether the State has a sufficient number of adequately trained and competent personnel to discharge its responsibilities under the plan.

Minnesota has committed itself to funding the State share of salaries for 31 safety inspectors and 12 health enforcement officers as evidenced by the FY 1984 Application for Federal Assistance (Ex. 2–6) as well as its subsequent FY 1985 application. These compliance staffing levels meet the revised benchmarks proposed for Minnesota.

As noted in the Federal Register notice announcing certification of the completion of developmental steps for Minnesota (41 FR 42659) all personnel under the plan meet civil service requirements under the State merit system, which was found to be in substantial conformity with the Standards for a Merit System of Personnel Administration by the U.S. Civil Service Commission.

The State provides continuing training for its staff. During the evaluation period, compliance officers received an average of 89 hours of formal training (18(e) Evaluation Report, p. 25). The comments from the Midwest Section of the American Industrial Hygiene Association and from Occupational Health Services, a group of physicians, both praised the training and competence of State personnel (Exs. 4–9, 4–11).

Because Minnesota has allocated sufficient enforcement staff to meet the revised benchmarks for that State, and personnel are trained and competent, the requirements for final approval set forth in 29 CFR 1902.37(b)(1), and in the 1978 Court Order in *AFL–CIO* v. *Marshall, supra,* are being met by the Minnesota plan.

Section 18(c)(5) of the Act requires that the State devote adequate funds to administration and enforcement of its standards. The Minnesota plan was funded at $3,262,488 in FY 1984. (50% of the funds were provided by Federal OSHA and 50% were provided by the State.)

As noted in the Evaluation Report, Minnesota's funding appears sufficient in absolute terms; moreover, the State manages its resources in a cost effective manner (18(e) Evaluation Report, pp. 79–81). On this basis, OSHA finds that Minnesota has provided sufficient funding for the various activities carried out under the plan.

(6) *Records and Reports.* State plans must assure that employers in the State submit reports to the Secretary in the same manner as if the plan were not in effect (section 18(c)(7) of the Act and 29 CFR 1902.3(k)). The plan must also provide assurances that the designated agency will make such reports to the Secretary in such form and containing such information as he may from time to time require (section 18(c)(8) of the Act and 29 CFR 1902.3(l)).

Minnesota's employer recordkeeping requirements are substantially identical to those of Federal OSHA, except that Minnesota has elected not to adopt the Federal recordkeeping exemption for

certain low-hazard industry groups, and the State participates in the BLS Annual Survey of Occupational Illnesses and Injuries. Minnesota's lost workday injury and illness all case rate for Minnesota workers was reduced from 11.0 in 1973 to 7.3 in 1983 (Ex. 4–5). This is

workplaces. This requirement includes submitting all required reports to the Assistant Secretary as well as

retains his authority under section 11(c) of the Act with regard to complaints

operations under the Federal program, or if the State does not submit program

certain low-hazard industry groups, and the State participates in the BLS Annual Survey of Occupational Illnesses and Injuries. As noted in the January 16 proposal, the State participates and has assured its continuing participation with OSHA in the Federal-State Unified Management Information System as a means of providing reports on its activities to OSHA.

For the foregoing reasons, OSHA finds that Minnesota has met the requirements of sections 18(c) (7) and (8) of the Act on employer and State reports to the Secretary.

(7) *Voluntary Complionce Program.* A State plan is required to undertake programs to encourage voluntary compliance by employers by such means as conducting training and consultation with employers and employees (29 CFR 1902.4(c)(2)(xiii)).

The State conducts a training and education program covering the private and public sectors. During the 18(e) evaluation period, Minnesota provided training to 2,587 employers and supervisors and 659 employees (18(e) Evaluation Report, p. 22).

In the private sector, Minnesota provides on-site consultative services to employers under a cooperative agreement with OSHA made pursuant to section 7(c)(1) of the Act and 29 CFR Part 1908.

In addition, as discussed in the 18(e) Evaluation Report (p. 19), Minnesota has indicated its intention to establish a public sector on-site consultation program in FY 1985. (That program has now been initiated.)

Accordingly, OSHA finds that Minnesota has established and is administering an effective voluntary compliance program.

(8) *Injury and Illness Statistics.* As a factor in its 18(e) determination, OSHA must consider the Bureau of Labor Statistics annual occupational safety and health survey and other available Federal and State measurements of program impact on worker safety and health (29 CFR 1902.37(b)(15)).

The 1981 and 1982 Bureau of Labor Statistics injury and illness rates for Minnesota (private sector all case rate for 1981, 8.2; 1982, 7.7; lost workday case rate for 1981, 3.7; 1982, 3.4) were similar to rates in States where Federal OSHA provides enforcement coverage. In 1982, the lost workday case rates for the private sector, manufacturing and construction, experienced a greater decline in Minnesota than in States with Federal enforcement jurisdiction (18(e) Evaluation Report, pp. 82–83). Comments from the Minnesota Occupational Safety and Health Advisory Council noted that the injury and illness all case rate for Minnesota workers was reduced from 11.0 in 1973 to 7.3 in 1983 (Ex. 4–5). This is comparable to the reduction in the Federal rate. In addition, comments from both the Advisory Council and the Occupational Safety and Health Division pointed out that work-related fatalities in Minnesota declined from 85 in 1973 to 25 in 1984 (Exs. 4–5, 4–14).

Comments from the AFL–CIO expressed concern that Minnesota's all case rates for the private sector, manufacturing and construction, and the lost workday case rate for construction for 1982 exceeded the Federal rates (Ex. 4–12). However, the State rates were only slightly higher than the Federal rates and were within the prescribed limits. OSHA does not view these differences as significant, especially when considered within the context of changes in the rates.

Therefore, OSHA finds that the trends in injury and illness statistics in Minnesota compare favorably with those in States with Federal enforcement.

Decision

OSHA has carefully reviewed the record developed during the above described proceedings, including all comments received thereon. The present **Federal Register** document sets forth the findings and conclusions resulting from this review.

In light of all the facts presented on the record, the Assistant Secretary has determined that (1) the revised compliance staffing levels proposed for Minnesota meet the requirements of the 1978 Court Order in *AFL–CIO* v. *Marshall* in providing the number of safety and health compliance officers necessary for a "fully effective" enforcement program, and (2) the Minnesota State plan for occupational safety and health in actual operation, which has been monitored for at least one year subsequent to certification, is at least as effective as the Federal program and meets the statutory criteria for State plans in section 18(e) of the Act and implementing regulations at 29 CFR Part 1902. Therefore, the revised compliance staffing benchmarks of 31 safety and 12 health are approved, and the Minnesota State plan is hereby granted final approval under section 18(e) of the Act and implementing regulations at 29 CFR Part 1902, effective July 30, 1985.

Under this 18(e) determination, Minnesota will be expected to maintain a State program which will continue to be at least as effective as operations under the Federal program in providing employee safety and health at covered workplaces. This requirement includes submitting all required reports to the Assistant Secretary as well as submitting plan supplements documenting State initiated program changes, changes required in response to adverse evaluation findings, and responses to mandatory Federal program changes. In addition, Minnesota must continue to allocate sufficient safety and health enforcement staff to meet the benchmarks for State staffing established by the Department of Labor, or any revision to those benchmarks.

Effect of Decision

The determination that the criteria set forth in section 18(c) of the Act and 29 CFR Part 1902 are being applied in actual operations under the Minnesota plan terminates OSHA authority for Federal enforcement of its standards in Minnesota, in accordance with section 18(e) of the Act, in those issues covered under the State plan. Section 18(e) provides that upon making this determination "the provisions of sections 5(a)(2), 8 (except for the purpose of carrying out subsection (f) of this section), 9, 10, 13, and 17, and standards promulgated under section 6 of this Act, shall not apply with respect to any occupational safety or health issues covered under the plan, but the Secretary may retain jurisdiction under the above provisions in any proceeding commenced under section 9 or 10 before the date of determination."

Accordingly, Federal authority to issue citations for violation of OSHA standards (sections 5(a) (2) and 9); to conduct inspections (except those necessary to conduct evaluations of the plan under section 18(f), and other inspections, investigations or proceedings necessary to carry out Federal responsibilities which are not specifically preempted by section 18(e)) (section 8); to conduct enforcement proceedings in contested cases (section 10); to institute proceedings to correct imminent dangers (section 13); and to propose civil penalties or initiate criminal proceedings for violations of the Federal Act (section 17) is relinquished as of the effective date of this determination. (Because of the effectiveness of the Minnesota plan, there has been no exercise of concurrent Federal enforcement authority in issues covered by the plan since the signing of the Operational Status Agreement in October 1981.)

Federal authority under provisions of the Act not listed in section 18(e) are unaffected by this determination. Thus, for example, the Assistant Secretary retains his authority under section 11(c) of the Act with regard to complaints alleging discrimination against employees because of the exercise of any right afforded to the employee by the Act although such complaints may be initially referred to the State for investigation. Jurisdiction over any proceeding initiated by OSHA under sections 9 and 10 of the Act prior to the date of this final determination remains a Federal responsibility. The Assistant Secretary also retains his authority under section 6 of the Act to promulgate, modify or revoke occupational safety and health standards which address the working conditions of all employees, including those in States which have received an affirmative 18(e) determination. In the event that a State's 18(e) status is subsequently withdrawn and Federal authority reinstated, all Federal standards, including any standards promulgated or modified during the 18(e) period, would be Federally enforceable in the State.

In accordance with section 18(e), this determination relinquishes Federal OSHA authority only with regard to occupational safety and health issues covered by the Minnesota plan, and OSHA retains full authority over issues which are not subject to State enforcement under the plan. Thus, for example, Federal OSHA retains its authority to enforce all provisions of the Act, and all Federal standards, rules or orders which relate to safety or health in offshore private sector maritime employment and at the Twin Cities Army Ammunition Plant. In addition Federal OSHA may subsequently initiate the exercise of jurisdiction over any issue (hazard, industry, geographical area, operation or facility) for which the State is unable to provide effective coverage for reasons not related to the required performance or structure of the State plan.

As provided by section 18(f) of the Act, the Assistant Secretary will continue to evalute the manner in which the State is carrying out its plan. Section 18(f) and regulations at 29 CFR Part 1955 provide procedures for the withdrawal of Federal approval should the Assistant Secretary find that the State has substantially failed to comply with any provision or assurance contained in the plan. Additionally, the Assistant Secretary is required to initiate proceedings to revoke an 18(e) determination and reinstate concurrent Federal authority under procedures set forth in 29 CFR 1902.47 *et seq.*, if his evaluations show that the State has substantially failed to maintain a program which is at least as effective as operations under the Federal program, or if the State does not submit program change supplements to the Assistant Secretary as required by 29 CFR Part 1953.

Explanation of Changes to 29 CFR Part 1952

29 CFR Part 1952 contains, for each State having an approved plan, a subpart generally describing the plan and setting forth the Federal approval status of the plan. 29 CFR 1902.43(a)(3) requires that notices of affirmative 18(e) determinations be accompanied by changes to Part 1952 reflecting the final approval decision. This notice makes several changes to Subpart N of Part 1952 to reflect the final approval of the Minnesota plan.

A new § 1952.203, Compliance staffing benchmarks, has been added to reflect the approval of the 1984 revised benchmarks for Minnesota.

A new § 1952.204, Final approval determination, has been added to reflect the determination granting final approval of the plan. The new paragraph contains a more accurate description of the scope of the plan than the one contained in the initial approval decision.

Newly redesignated § 1952.205, Level of Federal Enforcement, has been added to reflect the State's 18(e) status. The new paragraph replaces former § 1952.202, which described the relationship of State and Federal enforcement under an Operational Status Agreement which was entered into on October 9, 1981. Federal concurrent enforcement authority has been relinquished as part of the present 18(e) determination for Minnesota, and the Operational Status Agreement is no longer in effect. § 1952.205 describes the issues where Federal authority has been terminated and the issues where it has been retained in accordance with the discussion of the effects of the 18(e) determination set forth earlier in the present **Federal Register** notice.

While most of the existing Subpart N has been retained, paragraphs within the subpart have been rearranged and renumbered so that the major steps in the development of the plan (initial approval, developmental steps, certification of completion of developmental steps and final plan approval) are set forth in chronological order. Related editorial changes to the subpart include modification of the heading of § 1952.200, to clearly identify the 1973 initial plan approval decision to which it relates. The addresses of locations where State plan documents may be inspected have been updated and are found in § 1952.206.

Regulatory Flexibility Act

OSHA certifies pursuant to the Regulatory Act of 1980 (5 U.S.C. 601, *et seq.*) that this rulemaking will not have a significant economic impact on a substantial number of small entities. Final approval will not place small employers in Minnesota under any new or different requirements nor would any additional burden be placed upon the State government beyond the responsibilities already assumed as part of the approved plan. Certification to this effect was previously forwarded to the Chief Counsel for Advocacy, Small Business Administration.

List of Subjects in 29 CFR Part 1952

Intergovernmental relations, Law enforcement, Occupational safety and health.

(Sec. 18, 84 Stat. 1608 (29 U.S.C. 667); 29 CFR Part 1902, Secretary of Labor's Order No. 9–83 (48 FR 35736))

Signed at Washington, D.C., this 30 day of July 1985.

Patrick R. Tyson,

Acting Assistant Secretary.

PART 1952—[AMENDED]

Accordingly, Subpart N of 29 CFR Part 1952 is hereby amended as follows:

1. The authority citation for Part 1952 continues to read:

Authority: Sec. 18, 84 Stat. 1608 (29 U.S.C. 667); 29 CFR Part 1902, Secretary of Labor's Order No. 9–83 (48 FR 35736).

2. Section 1952.200 is amended by revising the heading to read: *§ 1952.200 Description of the plan as initially approved.*

§ 1952.201, 1952.202, and 1952.203, and 1952.204 [Redesignated as 1952.206, 1952.205, 1952.201, and 1952.202 respectively]

3. Section 1952.201 Redesignated as § 1952.206.

4. Section 1952.202 Redesignated as § 1952.205.

5. Section 1952.203 Redesignated as § 1952.201.

6. Section 1952.204 Redesignated as § 1952.202.

7. The Table of Contents for Part 1952, Subpart N is revised to read as follows:

Subpart N—Minnesota

Sec.

1952.200 Description of the plan as initially approved.
1952.201 Developmental schedule.
1952.202 Completion of developmental steps and certification.
1952.203 Compliance staffing benchmarks.
1952.204 Final approval determination.
1952.205 Level of Federal enforcement.
1952.206 Where the plan may be inspected.

8. New §§ 1952.203 and 1952.204 are added to read as follows:

§ 1952.206 Where the plan may be inspected.

Note.—Issue 19 contains all DMM revisions published between February 28, 1985, and June 6, 1985 (Postal Bulletins 21502 through

detached labels used with second- and third-class mail to include on the face of

VOL 50 ISS 146 JL 30 1985 UMI

8. New §§ 1952.203 and 1952.204 are added to read as follows:

§ 1952.203 Compliance Staffing Benchmarks.

Under the terms of the 1978 Court Order in *AFL–CIO* v. *Marshall*, compliance staffing levels (benchmarks) necessary for a "fully effective" enforcement program were required to be established for each State operating an approved State plan. In September 1984 Minnesota, in conjunction with OSHA, completed a reassessment of the levels initially established in 1980 and proposed revised compliance staffing benchmarks of 31 safety and 12 health compliance officers. After opportunity for public comment and service on the AFL–CIO, the Assistant Secretary approved these revised staffing requirements on July 30, 1985.

§ 1952.204 Final approval determination.

(a) In accordance with section 18(e) of the Act and procedures in 29 CFR Part 1902, and after determination that the State met the "fully effective" compliance staffing benchmarks as revised in 1984 in response to a Court Order in *AFL–CIO* v. *Marshall* (CA 74–406), and was satisfactorily providing reports to OSHA through participation in the Federal-State Unified Management Information System, the Assistant Secretary evaluated actual operations under the Minnesota State plan for a period of at least one year following certification of completion of developmental steps (41 FR 42659). Based on the 18(e) Evaluation Report for the period of October 1982 through March 1984, and after opportunity for public comment, the Assistant Secretary determined that in operation the State of Minnesota's occupational safety and health program is at least as effective as the Federal program in providing safe and healthful employment and places of employment and meets the criteria for final State plan approval in section 18(e) of the Act and implementing regulations at 29 CFR Part 1902. Accordingly, the Minnesota plan was granted final approval, and concurrent Federal enforcement authority was relinquished under section 18(e) of the Act effective July 30, 1985.

(b) The plan which has received final approval covers all activities of employers and all places of employment in Minnesota except for private sector offshore maritime employment and employment at the Twin Cities Army Ammunition Plant.

(c) Minnesota is required to maintain a State program which is at least as effective as operations under the Federal program; to submit plan supplements in accordance with 29 CFR Part 1953; to allocate sufficient safety and health enforcement staff to meet the benchmarks for State staffing established by the U.S. Department of Labor, or any revisions to those benchmarks; and, to furnish such reports in such form as the Assistant Secretary may from time to time require.

9. Newly designated §§ 1952.205 and 1952.206 are revised to read as follows:

§ 1952.205 Level of Federal enforcement.

(a) As a result of the Assistant Secretary's determination granting final approval to the Minnesota plan under section 18(e) of the Act, effective July 30, 1985, occupational safety and health standards which have been promulgated under section 6 of the Act do not apply with respect to issues covered under the Minnesota plan. This determination also relinquishes concurrent Federal OSHA authority to issue citations for violations of such standards under sections 5(a)(2) and 9 of the Act; to conduct inspections and investigations under section 8 (except those necessary to conduct evaluation of the plan under section 18(f) and other inspections, investigations, or proceedings necessary to carry out Federal responsiblilities not specifically preempted by section 18(e)); to conduct enforcement proceedings in contested cases under section 10; to institute proceedings to correct imminent dangers under section 13; and to propose civil penalties or initiate criminal proceedings for violations of the Federal Act under section 17. The Assistant Secretary retains jurisdiction under the above provisions in any proceeding commenced under section 9 or 10 before the effective date of the 18(e) determination.

(b) In accordance with section 18(e), final approval relinquishes Federal OSHA authority only with regard to occupational safety and health issues covered by the Minnesota plan. OSHA retains full authority over issues which are not subject to State enforcement under the plan. Thus, Federal OSHA retains its authority relative to safety and health in private sector offshore maritime activities and will continue to enforce offshore all provisions of the Act, rules or orders, and all Federal standards, current or future, specifically directed to maritime employment (29 CFR Part 1915, shipyard employment; Part 1917, marine terminals; Part 1918, longshoring; Part 1919, gear certification) as well as provisions of general industry standards (29 CFR Part 1910) appropriate to hazards found in these employments. Federal jurisdiction is also retained at the Twin Cities Army Ammunition Plant, and with respect to Federal government employers and employees.

In addition, any hazard, industry, geographical area, operation or facility over which the State is unable to effectively exercise jurisdiction for reasons not related to the required performance or structure of the plan shall be deemed to be an issue not covered by the plan which has received final approval and shall be subject to Federal enforcement. Where enforcement jurisdiction is shared between Federal and State authorities for a particular area, project, or facility, in the interest or administrative practicability Federal jurisdiction may be assumed over the entire project or facility. In either of the two aforementioned circumstances, Federal enforcement may be exercised immediately upon agreement between Federal OSHA and the State designated agency.

(c) Federal authority under provisions of the Act not listed in section 18(e) is unaffected by final approval of the plan. Thus, for example, the Assistant Secretary retains his authority under section 11(c) of the Act with regard to complaints alleging discrimination against employees because of the exercise of any right afforded to the employee by the Act, although such complaints may be referred to the State for investigation. The Assistant Secretary also retains his authority under section 6 of the Act to promulgate, modify or revoke occupational safety and health standards which address the working conditions of all employees, including those in States which have received an affirmative 18(e) determination, although such standards may not be Federally applied. In the event that the State's 18(e) status is subsequently withdrawn and Federal authority reinstated, all Federal standards, including any standards promulgated or modified during the 18(e) period, would be Federally enforceable in that State.

(d) As required by section 18(f) of the Act, OSHA will continue to monitor the operations of the Minnesota State program to assure that the provisions of the State plan are substantially complied with and that the program remains at least as effective as the Federal program. Failure by the State to comply with its obligations may result in the revocation of the final determination under section 18(e), resumption of Federal enforcement, and/or proceedings for withdrawal of plan approval.

§ 1952.206 Where the plan may be inspected.

A copy of the principal documents comprising the plan may be inspected and copied during normal business hours at the following locations: Office of State Programs, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N3476, Washington, D.C. 20210; Office of the Regional Administrator, Occupational Safety and Health Administration, U.S. Department of Labor, 230 S. Dearborn, 32nd Floor, Chicago, Illinois 60604; and the Minnesota Department of Labor and Industry, 444 Lafayette Road, St. Paul, Minnesota 55101.

POSTAL SERVICE

39 CFR Part 111

Domestic Mail Manual; Miscellaneous Amendments

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Postal Service hereby describes the numerous miscellaneous revisions consolidated in the Transmittal Letter for Issue 19 of the Domestic Mail Manual (DMM), which is incorporated by reference in the Code of Federal Regulations, 39 CFR 111.1.

Most of the revisions are minor, editorial or clarifying. Substantive changes, such as the revised regulations on merchandise return service and the payment of the annual fee by bulk third-class mailers, have previously been published in the Federal Register.

EFFECTIVE DATE: June 7, 1985.

FOR FURTHER INFORMATION CONTACT: Paul J. Kemp, (202) 245–4638.

SUPPLEMENTARY INFORMATION: The Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations (see 39 CFR 111.1) has been amended by the publication of a transmittal letter for issue 19, dated June 7, 1985. The text of all published changes is filed with the Director of the Federal Register. Subscribers to the Domestic Mail Manual receive these amendments automatically from the Government Printing Office.

The following excerpt from the Summary of Changes section of the transmittal letter for issue 19 covers the minor changes not previously described in interim or final rules published in the Federal Register.

Note.—Issue 19 contains all DMM revisions published between February 28, 1985, and June 6, 1985 (Postal Bulletins 21503 through 21517).

Summary of Changes

Major Revisions

* * * * *

Other Revisions

1. Exhibit 122.63e is revised to reflect changes in the Optional Area Distribution Center (ADC) labeling list (PB 21516, 5–30–85).

2. Section 123.44b is revised to make mail of foreign origin containing matter determined by a court of competent jurisdiction or by the International Trade Commission to violate a mask work owner's exclusive statutory right is nonmailable matter (PB 21505, 3–14–85).

3. Exhibit 125.2 is revised to update the conditions applicable to mail addressed to military post offices overseas (PB 21506, 3–21–85).

4. Section 137.252 is revised to update agency names, sampling numbers and permit imprint numbers (PB 21514, 5–16–85).

5. Sections 153, 159, 224 and 291 are revised to (1) establish policy on redelivery of Express Mail Next Day Service items undeliverable on the first attempt; and (2) clarify procedures on holding Express Mail; and (3) emphasize the necessity of providing directory service for Express Mail (PB 21503, 2–28–85).

6. Section 159.225 is revised to reflect changes in the forwarding of second-class publications for servicemen. The Department of Defense now pays for the fowarding of second-class publications for a period not to exceed sixty days when a serviceman moves due to permanent change of station orders (PB 21511, 4–25–85).

7. Section 159.334b is amended to enhance Postal Service response to customer inquiries regarding the delivery of Express Mail (PB 21510, 4–18–85).

8. Sections 159.42, 159.43, 159.45, 159.52 through 159.54 are revised to: (1) establish $5 or more as the cutoff for filing of dead letters; (2) eliminate the registry fee for reforwarding of registered dead letters; and (3) provide for the deduction of the money order fee from cash amounts of $10 or more returned by money orders and miscellaneous editorial changes (PB 21514, 5–16–85).

9. * * *

10. Section 369.3 is revised to reflect the correct optional endorsement lines and formats that First-Class Presort mailers may use (PB 21510, 4–18–85).

11. Sections 452.41, 661.331 and 664.23 are amended to permit mailers of detached labels used with second- and third-class mail to include on the face of the labels pictures and information on missing children provided by the National Center for Missing and Exploited Children (PB 21514, 5–16–85).

12. Sections 467.222, 667.622 and 767.521 are revised to reduce the minimum weight requirements of packages prepared for palletized mailings (PB 21516, 5–30–85).

13. Section 622.12a is amended to include a provision that 50 pieces or 10 pounds of mail for a 5-digit destination will qualify for the bulk third-class, 5-digit presort level rate when prepared in packages and bundles presented on pallets in accordance with section 667.6 (PB 21509, 4–11–85).

14. * * *

15. Section 767.411 is revised to require the owner or the mailing agent to submit the application to the Regional Postmaster General of the region when the mailing is to be made. Section 767.423 is revised to require mailers to use a nonstandard facing slip to label bedloaded carrier route and carrier route bundles (PB 21505, 3–14–85).

16. Section 917.343 is revised to reflect the current rates for Business Reply Mail returned through a postage due account or through a business reply account (PB 21508, 4–4–85).

17. Section 917.352 is amended to clarify refund procedures for business reply mail bearing stamps (PB 21507, 3–28–85).

18. Minor editorial and typographical changes have been made in 132, Exhibit 137.275d(1), Exhibit 137.275d(2), 143.421b, 143.422b, 144.13, 146.122, 148.2, 149.251e(4), 159.42, 367.221, 367.313b(5), 421.3, 422.3, 423.132b(1), 423.14b, 425.3c, 482.1, 667.3b(5), 667.92, Exhibit 667b, Exhibit 722.1, 724.1a, 767.811, 767.812, 767.82, 767.822, 911.521b(3), 932.1, 932.32, 932.34, 933.1, 933.42, 942.241, 944.3, Exhibit 945.32g.

BILLING CODE 7710-12-M

39 CFR Part 111

Addressing Mail

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This final rule changes the postal regulations which govern the addressing of mail matter in order to promote a clearer understanding of proper addressing procedures. Formerly, addressing regulations provided some guidelines but did not clearly differentiate between requirements, restrictions, and recommendations. Thus, some post offices attempted to enforce addressing recomendations as requirements. To solve this problem we have revised the regulations to use the word "must" when requirements or restrictions are imposed; when recommendations are intended the regulations use the word "should." The Postal Service believes that if customers will follow the changed regulations, whether required to do so or not, the Postal Service will be able to operate at a more efficient and less costly level, and customers will, at the same time, increase the likelihood that their own mail will be delivered more expeditiously.

EFFECTIVE DATE: August 29, 1985.

FOR FURTHER INFORMATION CONTACT: Mr. George E. Thomas, (202) 245-4512.

SUPPLEMENTARY INFORMATION: On February 13, 1985, the Postal Service published for comment in the **Federal Register** (50 FR 6007) proposed changes in certain sections of the Domestic Mail Manual relating to addressing. Interested persons were invited to submit comments on the proposed changes by March 15, 1985.

Written views were received from ten commenters, none of whom were opposed to adoption of the proposed regulations. However, some questions were raised and suggestions were made for further clarification.

For example, one commenter suggested that section 129 of the rule should be amended to make it clear that in window envelopes, the window may be the "standard" ½ inch from the bottom edge of the envelope, but that ⅝ inch is preferred. We amended the rule as suggested.

Two commenters suggested that the name or identification of the intended recipient should not be required, but only recommended. The Postal Service declines to make the suggested change because of its negative effect on our ability to deliver mail to the person intended by the sender. Moreover, previous regulations were not ambiguous on this point. The proposed regulation was merely carrying forward existing long-standing regulations.

One commenter suggested that proposed 122.12 and 122.33 of the DMM imply that an address with the ZIP Code as the bottom line is an acceptable address format. The commenter said there ought to be an illustration of this format if it is acceptable. We refer the commenter to existing 122.642 of the DMM, which shows such an illustration. The same commenter also suggested that an address which contains the name of the addressee plus the house number and the street name need not contain the city and State so long as the ZIP Code is contained in the address. Theoretically, mail that lacks the city and State but has the correct ZIP Code will be delivered to the intended addressee. However, in the absence of city and State information mail might well be undeliverable should one or more digits of the ZIP Code be incorrect. Accordingly, in the interest of more consistent delivery, the Postal Service continues to require the city and State to be part of the address.

Another commenter said that it would be very beneficial for direct mail efforts if the same information would be available about post office boxholders as is available about the rural routes. Under new 122.43c postmasters will furnish without charge information on the route numbers and the number of families on each rural route. However, information about post office boxholders does not specify whether the box is used by a family or a business. We are not adopting this suggestion at the present time, but are referring it to the appropriate division for further study.

Another commenter said that the second line of an address, the line that follows the name or identification of the intended receipient, may not always be available and gave an example of mail addressed to Postmaster, Englewood, New Jersey 07631-9998 which would supposedly not be mailable under the terms of proposed section 122.12(b). Perhaps the commenter has not noticed that the street number and street name etc., must be used "if necessary". The requirement is not absolute.

Another commenter appears to be confused over the requirement to use in the address the name of the post office, which is actually the city and State where the post office is located. The commenter seems to believe that putting the branch, the station, the community post office or the place name might conflict with the requirement to use the name of the parent post office. Since the branch or station is merely a part of the parent post office, the city and State is the proper address to use.

One commenter thought the placement of the postage stamp should be optional and not required to be placed in the upper right corner of a letter size envelope, or in the upper right corner of the address area on other mail. Cancellation of stamps on letter mail, which is done mostly by machines, and other practical considerations make it necessary that stamps be in a particular place and not any place the mailer decides, so we cannot change this requirement.

We have also made the following minor changes, some at the request of commenters, and some at our own instigation. We changed some of the examples in 122.16 to show current endorsements. The illustration in 122.22 has been changed to add the post office station or branch name after the post office box number as a preferred address format.

Former sections 122.23, 122.24 and 122.25, which were inadvertently omitted from the proposed rule, have been renumbered 122.37, 122.37a and 122.37b and adopted as renumbered without change.

New 122.38 has been added, dealing with enclosing inside a parcel the address of the sender and the addressee. While this has not been a requirement, and is not here, it seems prudent to follow this practice in view of the possibility of obliteration or defacing of the outside address. This recommendation also appears at 121.41a of the DMM.

A new 122.39 has also been added, recommending that the address be parallel or nearly parallel to the longest edge of the mailing piece. This puts into the regulations the "normal" or "usual" way of addressing mail.

We eliminated the proposed revision of 122.635, dealing with directory assistance, since that subject is being handled in another, later proposed rule on correct ZIP Codes that was published in the **Federal Register** on March 19, 1985 (50 FR 10991).

Certain erroneous typographical references have also been corrected, and minor textual changes have been adopted or illustrations added to improve clarity in the following DMM sections: 122.12b; 122.12d; 122.12d(7); 122.12d(9); 122.12d(10); 122.13; 122.14; 122.15; 122.16; 122.17; 122.31; 122.33; 122.641; 127c; 129.3b; 352.21c; 452.1f; and 651.212c.

Finally, a commenter observed that bulk third-class mail, other than carrier route rated, is not exempt from the address placement restriction in 651.2. The commenter's observation is accurate. However, bulk third-class mail is not subject to a nonstandard surcharge. Thus, as a practical matter, address placement on bulk third-class mail can only affect its ability to meet minimum size standards governing mailability.

Upon consideration of all the comments, the Postal Service hereby adopts the following amendments to the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 111.1.

List of Subjects in 39 CFR Part 111

Postal Service, Incorporation by reference.

PART 111—[AMENDED]

The authority citation for 39 CFR Part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 401, 404, 407, 408, 3001-3011, 3201-3219, 3403-3405, 3601, 3621; 42 U.S.C. 1973 cc-13, 1973 cc-14.

PART 122—ADDRESSES

Revise 122 to read DELIVERY ADDRESS.

Revise 122.1 thru 122.3 to read as follows:

122.1 Requirements.

The purpose of an address is to indicate the specific delivery location of a mailing piece.

.11 Mail must bear the legible address of the intended recipient on one side only. See 124.63a(13) for exception on live-day-old poultry.

.12 At a minimum, an address must consist of the following elements and appear in the following order (except simplified address mail as prescribed in 122.51):

a. Name or identification of the intended recipient;

b. Street and number, or box number, or general delivery, or rural or highway contract route designation and box number, if necessary;

c. City and state. The "city" is the name of the post office serving the intended recipient (the delivery post office), and

d. ZIP Code (5-digit or ZIP+4 codes) where required. ZIP Codes (5-digit or ZIP+4 codes) are required on:

(1) Presort First-Class Mail (361.3);

(2) ZIP+4 First-Class Mail (361.4);

(3) Postal cards and post cards, not mailed as presorted First-Class Mail, which are mailed under 322.31h, i, or j (322.32);

(4) Second-class mail (452 and 455.2f);

(5) Bulk third-class mail (661.2); and

(6) Fourth-class (761.1);

(7) Business Reply mail (917.525);

(8) Merchandise Return (919.43, 919.531 and 919.532);

(9) Mail sent to Military Addresses within the United States (122.82);

(10) Penalty mail (137.263a(3));

(11) Printed stamped envelopes (141.242);

(12) Return addresses of mail on which postage is paid by stamps precanceled by bars only (143.421a);

(13) The sender's return address where return service is requested on second-class mail (493).

122.13 Placement of Address.

.131 Letter-Size Mail. See section 322.3 regarding address placement on post cards. The placement of the address on letter-size mail determines which dimensions constitute the height and length, and may subject the mail to a surcharge or render it nonmailable (see sections 127, 324, 352.21, 353, 651.212 and 652).

.132 Other Mail Processing Categories. See Exhibit 452.6 regarding address placement on second-class publications. A clear space must be provided on other mail for the address, stamps, postmarks, and postal endorsements.

.14 Return Address. The return address contains elements corresponding to those for the destination address in 122.12. The mail listed below must bear, in legible form, the return address of the actual sender:

a. Mail of any class, when its return, and/or address correction service is desired —122.16;

b. Penalty mail—137.27 and 137.285;

c. Mail matter on which postage is paid by stamps precanceled by bars only—143.421

d. Matter bearing company permit imprints—145.44;

e. Priority mail—361.2;

f. Second-class mail in envelopes or wrappers—453.2a;

g. Fourth-class mail—761.12;

h. Registered mail—911.31;

i. Insured mail—913.13e;

j. COD mail—914.131.

.15 Special Addressing Instructions. The following mail items must be addressed in accordance with the sections listed below:

a. Overseas military mail—122.8;

b. Department of State mail—126.2;

c. Window envelope mail—129.3;

d. International mail—International Mail Manual.

.16 A mailer's specific instructions for forwarding mail (see 159.2), as well as requests for address correction service or return (see 159.3) must appear below the sender's return address. A full return address must be used with these endorsements. On letter-size mail, the information must appear in the upper left corner of the address side of the piece; on other mail, the information must appear in the upper left corner of the address area. The endorsements must be clearly visible.

EXAMPLES:

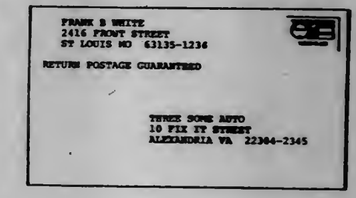
a. FRANK B WHITE
2416 FRONT STREET
ST LOUIS MO 63135-1234
RETURN POSTAGE GUARANTEED

b. FRANK B WHITE
2416 FRONT STREET
ST LOUIS MO 63135-1234
FORWARDING & RETURN POSTAGE GUARANTEED

c. FRANK B WHITE
2416 FRONT STREET
ST LOUIS MO 63135-1234
ADDRESS CORRECTION REQUESTED

d. FRANK B WHITE
2416 FRONT STREET
ST LOUIS MO 63135-1234
FORWARDING & RETURN POSTAGE GUARANTEED
ADDRESS CORRECTION REQUESTED

e. FRANK B WHITE
2416 FRONT STREET
ST LOUIS MO 63135-1234
FORWARDING & ADDRESS CORRECTION REQUESTED



.17 At the sender's request the delivery post office will retain mail, other than registered, insured, and certified, for not less than 3 days or more than 30 days. To request a specific retention time, the sender in his return address must request that mail be held. Requests to lengthen or shorten retention periods to not less than 3 nor more than 30 days will be honored only at the sender's request. See 159.333 for registered, insured, and certified mail retention periods.

Examples:

a. Return in 3 days to:

to the address element appearing on the line immediately above the city and

.33 The Postal Service also requests that mailers follow certain addressing

.36 Addresses should not be inverted (upside down).

postmasters will furnish, without charge, information as follows:

c. The provisions in Part 122 governing addressing also apply to window

Examples:

a. Return in 3 days to:
Frank B. White,
2416 Front Street,
St. Louis, MO 63135-2134

b. Return in 30 days to:
Frank B. White,
2416 Front Street,
St. Louis, MO 63135-2134
RETURN POSTAGE GUARANTEED

122.2 Restrictions.

.21 Mail bearing both a street address and a post office box number on different address lines will be delivered

EXAMPLES:

PREFERRED ADDRESS FORMAT

Mail will be delivered here → GRAND PRODUCTS INC
100 MAJOR STREET
P O BOX 200 MORGAN STATION
NEW YORK N Y 10001-0200

Mail will be delivered here → GRAND PRODUCTS INC
P O BOX 200 MORGAN STATION
100 MAJOR STREET
NEW YORK N Y 10045-2345

NOT RECOMMENDED

Mail will be delivered to P. O. Box → GRAND PRODUCTS INC
P O BOX 200 100 MAJOR ST
NEW YORK N Y 10001-0200

Mail will be delivered to P. O. Box → GRAND PRODUCTS INC
100 MAJOR ST P O BOX 200
NEW YORK N Y 10001-0200

.23 Mail bearing the name of more than one post office in either the address or return address is not acceptable for mailing.

.24 An endorsement directing return to point of mailing (postmark) will not be honored.

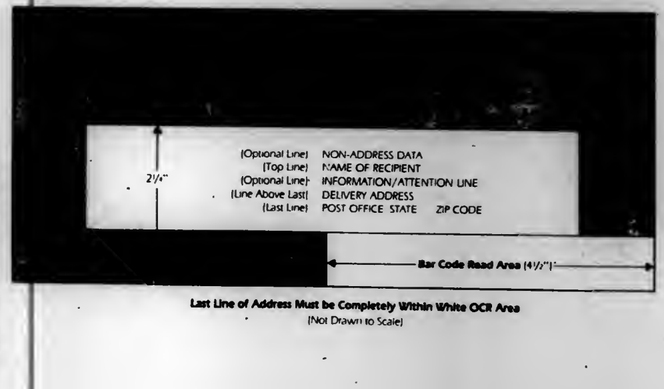
.25 Postage (stamps, meter stamps, or permit imprints) must be placed in the upper right corner of the address side for letter size mail (see 128.2). All other processing categories (see 128.1) must have the postage in the upper right corner of the address area (see 122.132).

122.3 Recommendations.

.31 The return address should be included on all mail. The return address on letter-size mail (see 128.2) should be located in the upper left corner of the address side. Other processing categories (see 128.1) should have the return address in the upper left corner of the address area (see 122.132). The return address should not be placed below the delivery address. It should not appear on any but the address side.

.32 The use of ZIP Codes is recommended on all mail because they enable the Postal Service to achieve greater reliability and efficiency in dispatch and delivery. Although its use is voluntary, except where a ZIP + 4 discount is claimed, use of the ZIP + 4 Code is preferred over the 5-digit ZIP Code to the address element appearing on the line immediately above the city and state. If a ZIP Code (ZIP + 4 or 5-digit code) is used, it must correspond with the address element immediately above the city and state. These restrictions also apply to return addresses on mail matter.

.22 Mail bearing both a street address and a post office box number on the same address line will be delivered to the post office box. If a ZIP Code (ZIP + 4 or 5-digit code) is used, it must correspond with the post office box number in the address. This type of addressing is not recommended.



Last Line of Address Must be Completely Within White OCR Area
(Not Drawn to Scale)

.33 The Postal Service also requests that mailers follow certain addressing guidelines which permit the efficient processing of letter-size mail on automated optical character readers (OCRs) and bar code sorters (BCSs). The address, or at a minimum, the city, state, and ZIP Code line(s) of the address, on letter-size mail should be located within an imaginary rectangle (the OCR read area) on the front of the mail piece formed by the following boundaries:

a. At least 1 inch from the left edge;
b. At least 1 inch from the right edge;
c. At least ⅝ inch from the bottom edge (bottom line of rectangle);
d. No more than 2¼ inches from the bottom edge (top line of rectangle.)

Note. See OCR Read Area and Bar Code Read Area Illustration.

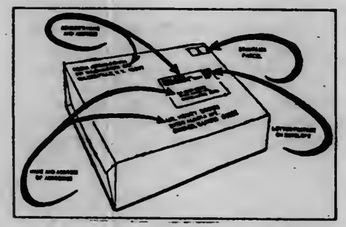
.34 Nonaddress printing, computer punch holes, etc., should not be placed within the OCR read area, alongside or below the city, state, and ZIP Code line(s) of the address.

.35 Unit, apartment, mail receptacle, office, or suite number should be included in the address. Place that information at the end of the delivery address line. If there is not enough space on this line, place it on the line immediately above the delivery address. Special service endorsements should be placed on the right side below the postage and above the address.

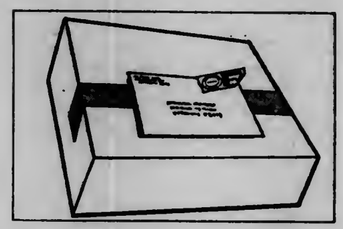
.36 Addresses should not be inverted (upside down).

.37 Addresses on Parcels

Illustration of how to affix a first-class letter on a parcel:



a. Parcels which bear address labels shall have the regular or postage meter stamps affixed by accepting postal employees so that the stamps overlap the upper right corner of the label, as shown in the following illustration:



b. Postmasters should seek the cooperation of business mailers by asking them to affix postage in this manner. Parcels bearing address labels covering any portion of the postage or showing other significant evidence of overlabeling shall be withheld from dispatch or delivery and must be immediately reported to the nearest postal inspector or postal inspector in charge.

.38 A slip should be attached to articles enclosed in parcels showing the address of the sender and addressee.

.39 On all mail processing categories the address should be parallel or nearly parallel to the longest edge of the mailing piece. (See the requirement for letter-size mail in 122.131.)

122.4 Simplified Address.

Revise 122.43 to read as follows:

.43 Number of Customers. Delivery statistics for all carrier routes and post office box sections are included in the CRIS Scheme. See 622.11(e) for CRIS ordering information. On request, postmasters will furnish, without charge, information as follows:

a. Number of post office boxholders;
b. Route number and number of boxholders on each rural and highway contract route;
c. Route numbers and number of families on each rural route;
d. Number of families served or number of business places served within the total delivery area or on particular carrier routes.

122.6 ZIP Code System.

Revise 122.61 to correct typographical error on the penultimate line "routine" is changed to read "route." Revise 122.632 to correct typographical error on line 5 "signed" is changed to the read "assigned."

Revise 122.641 and 642 to omit punctuation marks in the examples.

Revise the text of 122.641 to delete the words "A space not less than 5/10 of an inch nor more than 9/10 of an inch", and insert the words "From one to two character spaces."

122.8 Military Mail.

All examples appearing in this section are revised to omit punctuation marks.

127 Minimum Sizes.

Omit the "Note" following 127b and insert new 127c reading as follows:

c. Address placement can subject First-Class Mail and single piece third-class mail to a nonstandard surcharge or render it incompatible with the above minimum size standards. Mailing pieces which do not meet the minimum size standard are prohibited from the mails.

Note.—With the exception of mail sent at third-class carrier route rates, the placement of the address establishes which dimensions are the height and length.

129 Envelopes and Cards.

Revise 129.3 a, b and c to read as follows:

a. The address window on all lettersize envelopes should be located within the area described in 122.33. The window can be placed ½ inch from the bottom of the envelope, but ⅝ inch is preferred. See 122.131 regarding address position. The address window must be parallel with any edge of the envelope on flat-size mail (see 128.3). See 122.38 for recommendation. See 127 for size standards.

b. The window must be of sufficient size and transparency so that each character in the address and optional endorsement line (if used) is visible throughout an insert's movement within its envelope. Mail which does not conform to this standard may be rejected or returned.

c. The provisions in Part 122 governing addressing also apply to window envelopes. Nonaddress printing, computer punch holes, or other extraneous information should not be placed alongside or below the city, state, or ZIP Code line of the address.

159.3 Address Correction Service and Return.

Revise 159.332b to change reference 122.32 to read 122.17.

322.3 Restrictions on the Use of Double and Single Postal and Post Cards.

Revise 322.32b to read as follows:

b. The addresses on the cards must include either the ZIP + 4 code or the 5-digit ZIP Code and must be placed in accordance with 122.131.

323 Presorted First-Class Mail.

Revise 323.2 to insert the word CRIS after Postal Service and before scheme on line 19.

352.2 Shape, Ratio, and Sealing.

Omit the "Note" following 352.21b and insert new 352.21c reading as follows:

c. Address placement can subject First-Class Mail to a nonstandard surcharge or render it incompatible with the above minimum size standards. First-Class Mail which does not meet these minimum standards is prohibited from the mails.

Note.—The placement of the address establishes which dimensions are the height and length of First-Class Mail.

452 Addressing.

Revise 452.1f to read as follows:

See 122.131 and 127 regarding address placement and minimum size standards on letter-size pieces. On unenveloped and unwrapped flat size pieces (see 128.3) it is suggested the address be placed so that when the bound (or folded) edge is grasped in the right hand, the address should be along the bound edge or the top edge near the bound edge as illustrated in Exhibit 452.6.

651.2 Size, Shape, and Ratio.

Omit the "Note" following 651.212b(3) and add new 651.212c reading as follows:

c. Address placement can render third-class mail incompatible with the minimum size standards above or subject single piece rated third-class mail to a nonstandard surcharge. Third-class mailing pieces other than keys and identification devices which do not meet these minimum size standards are prohibited from the mails.

Note.—With the exception of mail sent at third-class carrier route rates, the placement

of the address establishes which dimensions are the height and length.

951 Post Office Box (P.O. Box) Service.

Revise 951.86 to change reference 122.32 to 122.17.

952 Caller Service.

Revise 952.46 to change reference 122.32 to 122.17.

A transmittal letter making these changes in the pages of the Domestic Mail Manual will be published and will be transmitted to subscribers automatically. Notice of issuance of the transmittal letter will be published in the **Federal Register** as provided by 39 CFR 111.3.

W. Allen Sanders,

Associate General Counsel, Office of General Law and Administration.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Parts 400 and 433

[BPO-11-F]

Medicaid Program; Medicaid Management Information Systems; Conditions of Approval and Reapproval and Procedures for Reduction of Federal Financial Participation

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This final rule provides the additional requirements to the conditions and procedures for initial approval and reapproval of Medicaid Management Information Systems (MMIS) that were added by section 1903(r) of the Social Security Act (as amended by section 901 of the Mental Health Systems Act of 1980, Pub. L. 96-398). These provisions are intended to improve States' MMIS, ensure efficient system operations, and make the procedures for detection of fraud, waste, and abuse more effective. In addition, this final rule specifies the procedures we follow in reducing the level of Federal financial participation in State administrative expenditures if a State fails to meet the conditions for initial operation, initial approval, or reapproval of an MMIS.

EFFECTIVE DATE: These regulations are effective August 29, 1985. Paragraphs (e) and (g) of 42 CFR 433.116 contain information collection requirements with which the public is not required to comply until the office of Management and Budget approves these requirements. (See Section VI for this preamble for a discussion of information collection.)

FOR FURTHER INFORMATION CONTACT: Guy Harriman, (301) 594-4880

SUPPLEMENTARY INFORMATION:

I. Background

A. Medicaid Management Information Systems

An MMIS is a mechanized system of claims processing and information retrieval used in State Medicaid programs under title XIX of the Social Security Act (the Act). The system is used to process Medicaid claims and to retrieve and produce utilization data and management information about recipients and services. Under section 1903(a)(3)(A) of the Act and regulations at 42 CFR 433.112, Federal financial participation (FFP) is available at a rate of 90 percent in State expenditures for design, development, installation or improvement of the systems. (As with all Medicaid FFP rates for fiscal years (FY) 1982-1984, the rates presented in this preamble and in the regulations are subject to any adjustment that occurs under sections 1903 (s) and (t) of the Act.) Under section 1903(a)(3)(B) of the Act and § 433.116, FFP is available at 75 percent for operation of an approved MMIS. These rates are higher than the normal matching rate of 50 percent under section 1903(a)(7) of the Act for general administrative operations of the State agency.

B. Title IX of the Mentol Health Systems Act of 1980

Title IX of Pub. L. 96-398, the Mental Health Systems Act of 1980, added a new paragraph (r) to section 1903 of the Social Security Act (42 U.S.C. 1396b(r)). That legislation requires each State with a Medicaid program, with certain exceptions, to have an approved operating MMIS before established deadlines and, if the State fails to do so, prescribes FFP reductions by increments in the funding available under sections 1903(a) (2) and (7) of the Act. (Those sections provide 75 percent FFP for compensation and training of skilled medical, professional and support staff, and 50 percent FFP for general administrative expenditures.) The legislation also imposes new conditions for approval and reapproval of systems and prescribes FFP reductions by increments for failure to meet the conditions. However, the law requires us to waive the FFP reductions and modify deadlines if we determine that a State has good cause for being unable to comply or the State cannot comply due to circumstances beyond its control. We are required to report to Congress all waivers of FFP reductions, the bases for the determinations, and modifications of deadlines.

Because the basic requirements of section 1903(r) of the Act were sufficiently complete and clear to take effect without regulations, we have already put into effect the portions of that section for which we had to act by specific dates. We notified the States of the statutory requirements well before the deadlines.

C. Overview of the Notice of Proposed Rulemaking

On March 3, 1983, we published in the **Federal Register** at 48 FR 9039 a notice of proposed rulemaking (NPRM) to solicit comments on our proposed changes to the regulations that govern MMIS. That NPRM included additional requirements added by section 1903(r) of the Act (as amended by section 901 of the Mental Health Systems Act of 1980, Pub. L. 96-398) and specified procedures for reducing the level of FFP in a State's administrative expenditures when a State fails to meet the conditions for initial operation, initial approval, or reapproval of an MMIS. In addition, we proposed procedures for waivers of the conditions of approval and reapproval and appeals of adverse decisions.

As part of the process for development of the performance standards for reapproval to be used during fiscal year 1984, we also solicited comments on Part 11 of the State Medicaid Manual (SMM), which contains both the performance standards (including their factors and elements) for reapproval and system requirements for initial approval and reapproval. After consideration of the public comments concerning the NPRM and Part 11 of the SMM, we have decided to adopt the proposed rule without substantial modification as a final rule. (Changes included in this final rule that were not included in the NPRM are explained in section IV. Summary of Changes, below.) The reader is referred to the NPRM for a more complete discussion of the provisions of these regulations. However, for the convenience of the reader, we have briefly summarized the major provisions, below.

II. Major Provisions of These Regulations

The provisions of these regulations revise 42 CFR Part 433, Subpart C, Mechanized Claims Processing and Information Retrieval Systems.

A. Advance Planning Document

We have clarified § 433.112 of the regulations to state more clearly that FFP is available at the 90 percent rate in State expenditures for the design, development, installation, or improvement of mechanized claims processing and information retrieval system only if the advance planning document (APD) is approved by HCFA prior to the State's expenditure of funds for these purposes. (An APD is a written plan of action to acquire the initial system or a replacement system.) This means that a State expenditure may qualify for the 90 percent rate only if the expenditure is made after HCFA approves the APD.

Section 433.112 is required by section 1903(a)(3)(A) of the Act, which provides for FFP at the 90 percent rate in State expenditures for the design, development, and installation of mechanized claims processing and information retrieval systems "which the Secretary determines are likely to provide more efficient, economical and effective administration of the plan. . . ." (The Secretary has delegated the approval of mechanized claims processing systems for Medicaid to HCFA.) We believe that section 1903(a)(3)(A) of the Act requires HCFA to approve the APD before the State's expenditure of funds, for FFP to be provided at the 90 percent rate, because it is important that HCFA know at the outset, that is, before the system is developed, about the system the State is proposing. The APD provides HCFA with this information.

Regulations at 45 CFR Part 95, Subpart F prescribe the conditions under which the Department will approve FFP at applicable rates for costs of automatic data processing incurred under an approved Medicaid State plan and may appear to conflict with the regulations at 42 CFR 433.112. However, unless the Secretary makes the determination that the system is likely to satisfy the section 1903(a)(3)(A) requirements, the applicable rate of FFP would be 50 percent. 45 CFR Part 95 restricts us in imposing prior approval requirements at the 50 percent rate, since the statute does not require an advance determination in order for a State to receive this percentage rate. However, since the Secretary must make this prospective determination in order for the State expenditures to qualify for the 90 percent rate, the prior approval demanded by the MMIS regulations (§ 433.112) is to obtain the enhanced rate and is not a condition limiting State procurements, which would be precluded by 45 CFR Part 95. Therefore, there is no conflict between 45 CFR Part 95, which limits our authority to require prior approval, and the requirements of § 433.112.

The § 433.112 requirement that the APD be approved before a State's expenditure of FFP for design, development, installation, or improvement of a system for receipt of the 90 percent rate of FFP applies to both an initial system and a replacement system. Section 433.113 contains other rules for obtaining approval of a State's original system. Section 433.117 contains the rules for approval of a replacement system and incorporates rules contained in § 433.113.

B. Initial Operation

Section 433.113(a) provides that a State (unless a waiver was obtained) must have in operation an MMIS that the State detailed in an advance planning document (APD) that was approved by HCFA. Under § 433.113(a), the system must have been in operation by the earlier of—(1) September 30, 1982; or (2) the last day of the sixth month following the date specified for operation of the system in the State's most recently approved APD submitted before October 7, 1980 (the date of enactment of Pub. L. 96-398). This means that a State that submitted an APD after October 7, 1980 had to have its system operating by September 30, 1982. If the State submitted an APD before October 7, 1980 that was approved by HCFA and that contained an operating date before March 1, 1982, the system must have been operating by the last day of the sixth month following the specified operating date. These deadlines were delayed only if HCFA determined under § 433.131 that the State was unable to comply for good cause or for circumstances beyond its control (see sections II-M and II-N below).

When system operation begins, the State receives 50 percent FFP in its expenditures for system operation until the system is approved. Under § 433.116, FFP in State expenditures for system operation increases to 75 percent, effective with the first day of the calendar quarter after the system was determined to be operating safisfactorily. Section 1903(r)(3) (A) of the Act provides for the 75 percent rate if we determine the system to have been operational for an entire calendar quarter before the quarter in which the system received its initial approval.

If a system had not been in operation by the specified deadline, under § 433.113(b), we would have reduced the rate of FFP in both State expenditures for skilled medical personnel and staff (section 1903(a)(2)) and general administrative expenses (section 1903(a)(7)) by 5 percentage points for every two-quarter period of non-operation beyond the deadline described above. (The rate of FFP under section 1903(a) (2) and (7) would not have been reduced more than 25 percentage points for each type of FFP.)

C. Initial Approval of an Operating System

Section 433.113(a)(3) provides that a State must have an operating system initially approved by HCFA by the last day of the fourth quarter that begins after the date on which HCFA establishes that the system became operational or be subject to reductions in FFP, described below.

Retroactive funding at the 75 percent rate is provided under § 433.116 for operation of an approved system from the first quarter beginning after the system became operational. If a system is operating but not approved by the specified deadline, under § 433.113, we reduce FFP in State expenditures under section 1903(a) (2) and (7) by 5 percentage points each for every two-quarter period for which the system is operating but not approved beyond that deadline. Again, the rate of FFP may not be reduced more than 25 percentage points for each type of FFP.

If the State is subject to a reduction of FFP because it did not meet the deadline for initial approval, § 433.113(c) requires that the State be subject to reductions in the retroactive FFP otherwise available for operating an approved system at the rate of five percentage points for every two-quarter period beyond the deadline for initial approval. Funding of the system for the quarters following the the quarter in which the system is initially approved is at the 75 percent rate.

To determine whether a system qualifies for initial approval, HCFA needs information retrieved from six months of system operation. Since FFP reductions could occur if there is a delay in the approval process, we encourage States to contact us to request initial approval of the system, when the State's system has been in operation between three and six months. At that time, we will review and evaluate State-furnished information developed by the system.

A State that is now without an operating system or that wishes to replace a currently approved system must submit its request for approval with the supporting documentation within three months after the system begins operating to allow us the needed

time to complete our evaluation within the first year of system operation.

reapproved. Section 1903(r)(4)(A) of the

disallowed; i.e., the State will not be

American Samoa, and the Northern

time to complete our evaluation within the first year of system operation.

D. Appeals of Initial Operations and Approval Decisions

A State may appeal reductions in FFP resulting from the denial of initial approval and reductions in FFP for expenses of the system for initial operations under the procedures of the Departmental Grant Appeals Board contained in 45 CFR Part 16 (governing reconsiderations of disallowances of claims for FFP under section 1903 of the Act). The appeal may be filed only when a claim (or a portion of a claim) made by the State for FFP in these expenditures has been disallowed.

E. Replacement Systems

Rules for initial approval of replacement systems are located at § 433.117. Replacement systems have to be approved by us in accordance with the initial approval conditions, and the APD, which the State files for a new system, must include: (1) The date the new system will become operational; and (2) a plan that assures an orderly transition from the system being replaced.

FFP is available at 90 percent in expenditures for the design, development and installation of the replacement system if the State owns the software. While the replacement system is being prepared to become operational, we will continue to fund, at 75 percent, the already approved operating system. (If the current system has been disapproved, it would be funded at a reduced rate under § 433.120, the regulation governing FFP in expenditures for disapproved systems.) When a replacement system becomes operational, FFP is available at 50 percent of expenditures for operation of the replacement system until we approve it. At that time, FFP is increased to 75 percent of expenditures for operation of the approved replacement system, retroactively to the date HCFA determines the replacement system met all conditions for initial approval. However, although a State may be operating both systems for a limited period of time, FFP is available at 75 percent of expenditures for operation of only one system at any time. (FFP is available at 50 percent of expenditures for the other operating system.)

F. Replacement of System Operators

A State may replace the operator of an approved MMIS. FFP continues to be available at 75 percent for an approved operating system regardless of who operates it. The following Departmental requirements apply also; 45 CFR Part 74, Administration of Grants, and 45 CFR Part 95, which prescribes the conditions under which the Department will provide FFP for the costs of automated data processing.

G. Conditions of Approval and Reapproval

In order to receive 75 percent FFP for operation of an MMIS, States must meet these new requirements of 42 CFR 433.116:

1. The State must provide that information on probable fraud or abuse obtained from, or developed by, the system, is made available to the State's Medicaid fraud control unit (if any) certified under section 1903(q) of the Act.

2. The system must meet all performance standards and other conditions for initial approval that we develop and about which we notify the States.

Except for the requirements in 1 and 2 above, there are no changes in the existing conditions in the regulations for initial approval in redesignated § 433.116 (c) through (g). In addition, no changes have been made in the conditions for initial approval in Part 11 of the SMM on which we solicited public comments in the NPRM. For yearly reapproval under § 433.119, States are required to meet the first requirement above, and also, performance standards and other conditions for reapproval. These include the system requirements in Part 11 of the SMM. The initial list of performance standards that must be met for reapproval has also been published in the **Federal Register** (see 46 FR 33653—June 30, 1981 and 48 FR 24204—May 31, 1983) and Part 11 of the SMM. For purposes of clarity, we publish separate notices in the **Federal Register** to specify conditions for initial approval and conditions for reapproval.

H. Reapproval: Basis for and Amount of Reduction

Section 1903(r)(4)(B) of the Act requires us to reduce FFP to no more than 70 percent, but not less than 50 percent, for an MMIS that fails to meet the conditions of reapproval. We may not reduce FFP by more than 10 percentage points in any four-quarter period. That is, a State whose system fails to meet the conditions of reapproval three years in a row and that is subject to the maximum potential reduction each year will receive 65 percent FFP the first year, 55 percent FFP the second year, and 50 percent the third year. In such a case, only 50 percent FFP will be available to the State until it meets the conditions of reapproval in a subsequent yearly review period.

Under § 433.120, we will reduce FFP by increments from 75 percent to 50 percent of State expenditures, in accordance with the statutory provisions, if successive yearly reviews of a State's MMIS operations show that the system no longer meets the requirements for reapproval specified in § 433.119 (performance standards, system requirements, and other conditions of reapproval). To avoid a further reduction in FFP because of the requirements, the State must demonstrate that the system meets all the current requirements during the next annual review.

I. Reapproval: Notice of Results of Review

During each yearly review, we evaluate performance for each State's MMIS over a period of at least six months. We are continuing to provide technical assistance, as in the past, to aid States in correcting system deficiencies. As early as possible in the first quarter after the end of the fiscal year under review, we notify each State whether its system has met the conditions of reapproval. If the system failed to meet these conditions, the notice includes—

1. A statement that the State's FFP for systems operation will be reduced, and the percentage to which it is reduced, for the four quarters immediately following the quarter in which the notice is issued;

2. The findings of fact on which we made our determination; and

3. A statement that State claims in excess of the reduced FFP rate will be disallowed and that any such disallowance will be appealable to the Grant Appeals Board.

J. Reapproval: Timing, Duration and Restoration of the FFP Reduction

By law (section 1903(r)(6)(C) of the Act), the first review that could have resulted in a reduction of FFP to a State could not begin before Federal fiscal year 1982 (October 1, 1981 to September 30, 1982). Under § 433.119, review periods continue to coincide with Federal fiscal years and any reduction of FFP begins in the January following the end of the fiscal year.

We interpret section 1903(r) of the Act to establish the mechanism under which States that have had their MMIS disapproved will have their FFP reduced for at least four quarters after the quarter in which the disapproval is made and up to the first quarter beginning after the system is

reapproved. Section 1903(r)(4)(A) of the Act requires us to review at least once each fiscal year; we are conducting reviews and making review determinations only once each fiscal year. We conduct the required regular yearly reviews in all MMIS States to determine whether systems receiving reduced funding subsequently meet the conditions of reapproval, and whether systems receiving full funding continue to meet those conditions.

As we make regular review determinations once each calendar year, we do not resume full FFP for a system receiving reduced funding until we complete the next regular yearly review that results in a favorable determination. Yearly review determinations actually take effect after the end of the calendar year (i.e., we resume 75 percent FFP for MMIS operation, or reduce it if applicable, effective the following January).

Under § 433.122, a State that receives reduced FFP because of deficiencies found during the review process could receive the withheld amount retroactively, if the next yearly review determination shows that the system then meets all conditions of reapproval. The restoring of withheld FFP is also subject to our judgment that return of the funds would improve the effective administration of the State's plan. This provision for retroactive adjustment is intended as an incentive for States to correct the system deficiencies as soon as possible.

Our decision whether to restore one, two, three, four or five quarters of FFP is discretionary and, therefore, not subject to appeal to the Grant Appeals Board. In making this decision we will consider any relevant information, including the amount of improvement shown as a result of the latest yearly review.

Because section 1903(r)(4)(C) of the Act precludes restoration of the withheld FFP for more than four quarters immediately prior to the quarter in which the system is approved, the withheld FFP will be lost permanently for the first three quarters of the calendar year in question if the subsequent yearly review shows the system still failing to meet any condition of reapproval. Thus, the Secretary has the discretion to retroactively restore the enhanced FFP that was reduced because of a disapproval of a system, but only for a maximum period of five quarters—the quarter in which the system is reapproved plus the immediately preceding four quarters.

During the period in which a State receives FFP for MMIS operation at a reduced rate, claims by the State for FFP at any higher level for MMIS will be disallowed; i.e., the State will not be eligible to receive 75 percent FFP for MMIS funding.

K. Reconsideration by the Departmental Grant Appeals Board

States have the opportunity to request a reconsideration from the Board of the disallowance of claims for FFP. Where FFP in State expenditures for operating an MMIS is reduced or FFP under section 1903 (a)(2) and (a)(7) is reduced because of the State's failure to meet the requirements of section 1903(r) of the Act, the State could request Grant Appeals Board review of the resulting disallowance by filing a written request with the Board. Procedures for consideration of such requests were described in the preamble of the NPRM and are detailed in § 433.121.

L. Notification to States of Changes in Conditions of Approval and Reapproval

We announce the changes in conditions of approval and reapproval once a year by publishing a notice in the **Federal Register** describing the proposed revisions and inviting public comment. We then respond in the **Federal Register** to comments on revisions making substantive changes.

Also, we publish changes in performance standards, system requirements, and other conditions for reapproval in the SMM after first publishing a notice in the **Federal Register** advising the public of the changes and inviting comment, and after responding to the comments received, if any, in a subsequent **Federal Register** notice. Under section 1903(r) of the Act, we are required to inform the States of conditions of reapproval at least three months before the beginning of the review period in which the procedures, standards and other conditions will be used.

M. Waiver of Conditions for Initial Operation and Approval

We will continue to waive the requirements for initial approval and for operating an MMIS for States with small populations if a State has demonstrated to HCFA's satisfaction that an MMIS will not significantly improve the efficiency of the administration of the State plan.

Section 1903(r)(7)(A)(ii) also directs the Secretary to waive these requirements for the Commonwealths, territories, and possessions of the United States under the same conditions as described above for States with small populations. Therefore, without necessity for a further showing, we granted waivers of MMIS requirements to Guam, Puerto Rico, the Virgin Islands, American Samoa, and the Northern Mariana Islands.

N. Waiver of Reductions for Good Cause

Under §433.131(a), we will waive the FFP reductions for failure to gain initial approval or reapproval for not more than two quarters if we determine that a State is unable to comply with a requirement of these regulations for good cause. We interpret the two-quarter waiver to apply to FFP reductions arising from two quarters of inadequate performance of a State's system.

This means that absent significantly poor performance for more than two quarters, we have the discretion to completely waive the reductions in FFP in State expenditures for operation of the State's system if good cause exists to do so. For example, in the first two quarters of a fiscal year, a State fails to produce its reports timely or accurately; however, in the next two quarters, the State's reports are both timely and accurate. Because the FFP reductions result from State performance in the first two quarters only, and we found good cause for the State's poor performance (for example, because of the lack of experience with a new requirement), HCFA would apply the good cause waiver and not reduce FFP during the next fiscal year even though this State system has not been reapproved. (Since passage of section 1903(r) of the Act in 1980, we have granted a number of good cause waivers for State inability to comply with several provisions in section 1903(a) of the Act.)

O. Waiver of Reductions Due to Circumstances Beyond the Control of the State

We will waive the FFP reductions for a period during which a State is unable to comply due to circumstances beyond its control, as provided in § 433.131(b). This situation will exist when a State or the contractor responsible for the MMIS is without fault in being unable to comply; e.g., a natural disaster occurred or a delay was caused by us. We will also defer all remaining deadlines for the initial approval process for the same length of time.

III. Analysis and Response to Public Comments

We received seven letters concerning the proposed regulations, all from State agencies. These State agencies express concern that the proposed regulations will be applied too stringently and that the concerns of State agencies will not continue to be taken into account.

Reapproval Requirements That Measure Performance Not Within the

Postponement of FFP Reductions

Reapproval Requirements That Measure Performance Not Within the Scope of the MMIS

Comment: One State agency, while agreeing that the proposal reflects the provisions of section 1903(r) of the Act, requests that we apply the FFP reduction provisions only to MMIS items on which there is wide agreement. For example, the commenter urges us not to apply these funding provisions to any items not included in present rules or in the MMIS General System Design documents (explained in § 11300 of Part 11 of the SMM). The commenter says that this comment is consistent with the position taken by State members of the Systems Technical Advisory Group, who object to including items in the MMIS reapproval requirements that measure functions outside the scope of the system itself.

Response: An MMIS is described both in sections 1903(a)(3) and 1903(r) as a system that the Secretary determines is likely to provide more efficient, economical, and effective administration of the State plan for medical assistance. To this end, Congress has authorized enhanced FFP for design, development, installation, and operation of a system that meets this objective. In turn, the Secretary has determined that a system is not likely to provide more efficient, economical, and effective administration of the plan unless it is provided with quality data. Thus, in making the statutory determination of what qualifies a system for enhanced FFP, the Secretary has decided not to look at MMIS in a vacuum. Instead she has decided to look at it in the context of the Medicaid program as a whole. In complying with the mandate of section 1903(r), which requires her to adopt performance standards, the Secretary opted to measure the performance of an MMIS by reference to the quality of the data that is put into the system as well as the quality of the system that manipulates that data. Since adopting the commenter's proposal could result in enhanced funding for a system that merely processes worthless data (that is, garbage in; garbage out), we have chosen to reject the commenter's suggestion.

We have worked with and will continue to work with States through the Systems Technical Advisory Group to identify items to be included in reapproval reviews. In addition, through the MMIS Relook Project, we are reviewing the relationship between system operations funding and system evaluation. Based on these efforts, some revision may be made in the FY 1985 reapproval review package and subsequent reviews. We will also retain the perspective of approving systems operations which contribute to efficient, economical and effective administration of the State plan, as required by sections 1903(a)(3) and 1903(r) of the Act. We will continue to seek consensus with States on the best means of applying the law through system reviews.

Frequency of Review

Comment: One State agency recommends that a complete reapproval procedure take place once every three years, rather than on an annual basis as we proposed. This commenter suggests that only system functions requiring frequent monitoring be reviewed annually.

Response: This comment would require a legislative change. Section 1903(r)(4)(A) of the Act requires the Secretary to review all approved systems and to reapprove or disapprove such systems not less often than once each fiscal year. The statute does not allow exceptions so that certain areas of the MMIS will be subject to review on a less frequent basis. We make annual changes to our reapproval requirements to reflect changes in State performance, new conditions of approval, and Medicaid needs. These changes are applied uniformly to all systems.

Failure To Comply With Reapproval Standards

One commenter requests that we provide technical assistance, instead of fiscal sanctions, to resolve State agency dificiencies, suggesting that it is contradictory to impose fiscal sanctions at a time when a State needs funds to eliminate deficiencies.

Response: Section 1903(r)(4)(B) of the Act requires that the Secretary impose FFP reductions if an MMIS is disapproved.

Since the inception of the annual MMIS reapproval process, it has been our policy to make technical assistance available to States upon request in an effort to assist in improving their MMIS operations and avoiding FFP reductions. This technical assistance is provided principally by HCFA regional offices. In addition, since FY 1982, an early warning system has been in place to alert any State as early as possible to actual or potential failure of the reapproval requirements. The early warning system requires reviews to be conducted during the first two quarters of each fiscal year of elements and standards failed by any State during the preceding reapproval review cycle. This aids a State in avoiding final failure by alerting it to needed remedial actions. If requested, we will provide technical assistance so that a State can take actions to avoid system disapproval and FFP reductions. Furthermore, if deficiencies are rectified promptly, the reductions of FFP for operating a disapproved system may be restored retroactively.

Reduction of FFP for a Disapproved MMIS

The proposed rules indicated that upon disapproving an MMIS, we would reduce FFP by increments of up to 10 percentage points beginning with the next calendar quarter and continuing until the "next yearly review." This implies that the reduction always will be applied for a minimum of four full quarters regardless of when the State modified its system to conform to the MMIS standards. One State agency suggests that a State be allowed to request a review when the State has made the necessary changes in order to reduce the potential loss of funds. The commenter claims that this type of request is allowable in the law but the proposed rules refer to yearly reviews only, with no other options available.

Response: Section 1903(r)(4)(A) of the Act indicates that the Secretary shall reapprove or disapprove an MMIS and notify the State not later than the end of the first quarter following the review period. We have established the review period as the Federal fiscal year; that is, four quarters. There will not be another notification or reapproval determination until after the next yearly review.

As noted above, we have established an early warning system to alert States to operational problems in certain key functions and in areas where the States experienced difficulties during the previous reapproval review cycle. This early warning affords States an opportunity to adjust system operations and avoid failure of performance standards and other conditions of reapproval.

It is simply not administratively feasible for us to be on call for follow-up reviews. The staffing and paperwork burdens inherent in the State's proposal are unmanageable. Indeed, our recent experience with reapproving two previously disapproved State systems prior to the end of the fiscal year demonstrated that we do not have the capacity to handle follow-up reviews if they become a widespread practice. This is one reason why we have established the review cycle on a fiscal year basis. We do not have the resources to staff more frequent reviews.

Of course, as provided in § 433.122(b), HCFA may restore the reduced FFP if the system meets all conditions of reapproval in the next yearly review and if HCFA determines that restoring the reduced FFP could improve the administration of the State Medicaid plan.

Time period for an appeal to the Grant Appeals Board

Comment: One State agency claimed that there was an inconsistency between the preamble and the proposed regulations text concerning when we will notify the State agency of disapproval of a system and the time period for the State agency to appeal to the Grant Appeals Board. The commenter claimed that the proposed rule stated that an appeal must be filed within 30 days from the date of the letter notifying the State of the disapproval. The preamble indicates that the States would not be able to challenge the disallowance until after the end of the first quarter in which FFP is reduced. The commenter suggested that an appeal be allowed as soon as the written notice is received, with a reasonable amount of time provided in which to file the appeal, such as sixty days.

Response: We do not believe that there is a conflict between the preamble and the regulations text of the NPRM. The commenter apparently confused the notice of disapproval (which does not confer an immediate right to appeal) with the notice of disallowance (which does confer an immediate right to appeal).

The Act provides a mechanism by which a State is able to contest a reduction in FFP. Specifically, section 1116(d) of the Act provides for a reconsideration by the Secretary (which the Secretary has delegated to the Departmental Grants Appeal Board) of a determination concerning any item for which FFP is claimed and disallowed. Because there is no disallowance until a State submits a claim for FFP and a letter of disallowance is sent to the State, the Grant Appeals Board does not have the authority to take any action on the earlier notice of disapproval. If we were to provide a predisallowance appeal right, a State could relitigate the issue at a later time by claiming enhanced FFP that had been denied in the predisallowance appeal and then, by contesting the resulting predisallowance before the Board under section 1116(d) of the Act. We do not believe it would be appropriate to provide for duplicative appeals.

Under 42 CFR 433.121(a) and 45 CFR Part 16, Procedures of the Departmental Grant Appeals Board, the State has 30 days to file a notice of appeal (the notice can be very brief) from the date it receives a letter of disallowance. Under 45 CFR 16.8, the State will also have an additional 30 days to prepare its argument after the Grant Appeals Board acknowledges the notice of appeal.

Decisions That May Not Be Appealed to the Grant Appeals Board

Comment: One State agency objects to the provisions of proposed § 433.121 that decisions concerning the following issues are not subject to appeal to the Grant Appeals Board—

(1) The amount of the percentage reduction of FFP (if within the range set by title XIX of the Act);

(2) Whether to restore FFP retroactively; and

(3) The number of quarters restored.

The commenter's objection is based on the absence of these exclusions in title XIX of the Act.

Response: We have determined that these issues are not subject to appeal. Section 1903(r)(4)(C) indicates that decisions involving the restoration of FFP are within the Secretary's discretion. In addition, section 1903(r)(4)(B) of the Act explicitly covers the authorized range for the Secretary's reducing FFP. Therefore, such decisions are not subject to review or appeal to the Grant Appeals Board unless they exceed the range authorized by law or unless the Secretary delegates review of this exercise of discretionary authority to the Board. For the reasons presented below, we concluded that it would be unwise to delegate review of this discretionary authority.

The law explicitly authorized the Secretary the discretion to establish the appropriate reduction within certain statutory limits upon a finding of disapproval, we believe that the Board's proper role should be limited to questions of fact; that is, whether the performance of the MMIS failed to meet the standards, requirements, or other conditions of reapproval. The amount of actual reduction must, out of necessity, be based on multiple operational and administrative issues that do not readily admit to quasi-judicial review. As for the decisions for restoration and the number of quarters to be restored, the statute does not establish restoration as a State right. Even were a State to meet all criteria for restoration, no obligation to grant such restoration is imposed upon the Secretary. Therefore, to allow a reconsideration review by a third party is not desirable.

Postponement of FFP Reductions

Comment: One State agency, believing that section 1903(r) of the Act does not require immediate reductions in FFP, urges us to modify § 433.121(c) to allow postponement of FFP reductions for failure to meet the conditions of reapproval until completion of all administrative appeals. If the disallowance is upheld, this commenter suggests that the State would pay interest from the date of the disallowance.

Response: This recommendation is not compatible with section 1903(r) of the Act, and therefore, a legislative change would be required to delay the reduction of funding until a final decision by the Grant Appeals Board. Section 1903(r)(4)(A) of the Act requires us to reapprove or disapprove a State's MMIS and to notify the State by the end of the first quarter following the yearly review period. This requirement is the basis for § 433.119(b).

In the event HCFA disapproves a State's MMIS, HCFA is required to reduce the State's FFP in accordance with the range specified in section 1903(r)(4)(B) of the Act. That section of the statute also requires us to implement the reduction for the four quarters beginning after the determination of disapproval. Should the State request a reconsideration, such request does not delay implementation of the reduction in FFP because, once the disapproval notice is issued, the State is no longer eligible for full enhanced funding for MMIS operations.

Section 1903(d) of the Act provides for interim payments to the State based upon an estimate of what its quarterly expenditures will be for the upcoming quarter. Therefore, since section 1903(r)(4)(B) requires FFP to be reduced if the system is not reapproved (and since section 1904(r)(4)(C) contemplates retroactive waivers of the reduction if the system is reapproved in the next review and certain other conditions are met), we believe delaying the reduction until all administrative appeals are exhausted would frustrate the Congressionally-enacted scheme of reduction of FFP for disapproved systems with a possibility for retroactive restoration of FFP.

Moreover, specific statutory authority would be necessary to permit a State to receive the full enchanced matching after its system is disapproved and then compel the State to pay interest from the date of the disallowance on the increment of FFP that could have been reduced. However, section 1903(d)(5) of the Act provides a mechanism under

which a State may keep FFP that has been overpaid pending a final

which a State may keep FFP that has been overpaid pending a final determination on the disallowance. If a State keeps the disallowed funds during this period, section 1903(d)(5) of the Act requires the State to repay the amount plus interest if the disallowance is upheld. However, this provision applies only when the State has been overpaid and does not apply in the context of an MMIS reduction under section 1903(r) of the Act because section 1903(r) of the Act requires that the FFP be reduced prospectively, thereby eliminating the possibility of an overpayment. Since section 1903(d)(5) of the Act provides the exclusive authority for a State to keep disallowed funds and then repay them with interest at the end of the appeals process if the State does not prevail, and since it does not apply to the reductions under section 1903(r) of the Act, we could not adopt the comment without a legislative change.

Use of Published Summaries of Changes to MMIS Performance Standards, System Requirements, and Other Conditions of Reapproval

Comment: One State agency is concerned that our proposal to publish for comment a summary of proposed changes rather than the changes themselves will not provide sufficient opportunity for the States to interpret the proposed changes. The commenter recommends that either the content of the entire change be published or the comment period be extended so that the States can obtain the details of the proposed changes and assess them thoroughly.

Response: States will be notified of the detailed text for the MMIS performance standards, system requirements, and other conditions of reapproval concurrent with or prior to the publication of the summary of those conditions of reapproval in the **Federal Register.** This has in fact been our practice over the past few years.

As was indicated in the preamble to the proposed rule, section 1903(r)(6)(E) of the Act requires us to inform the States of the conditions of reapproval at least three months before the beginning of the review period in which the procedures, standards, or other conditions will be used. For example, in addition to HCFA's publishing a notice in the **Federal Register** that summarizes any changes, the States will have the detailed text of any change at least one quarter before the date of expected implementation. This will also enable the States to have sufficient time to comment on the summary or to obtain more detailed information and comment on all the changes.

Also, whenever HCFA proposes to modify the performance standards, system requirements or other conditions of approval or reapproval, these proposals will be published in a notice in the **Federal Register,** and there will be opportunity for comment (at least 30 days) on these proposals. HCFA will respond in a subsequent **Federal Register** notice to any comments that were received and will announce any changes.

State Participation in the Development of Performance Standards and System Requirements

Comment: One State agency suggests that we develop new performance standards, system requirements or other conditions of reapproval with State agency participation because—

- State participation worked well in the original MMIS development.
- The use of the notice and comment procedure by itself is not adequate for changes that will have great impact upon State funding.

Response: In the future, we will make greater use of both the State Medicaid Directors Group and the Systems Technical Advisory Group, which is composed of State agency representatives, whenever possible in developing the new standards and systems requirements. In addition, since 1980 whenever we have modified system requirements and other conditions for initial approval or annual reapproval, we have first published the proposal in the **Federal Register** to provide an opportunity for States and members of the public to comment on the proposals.

Reducing the Approval Procedure Burden for New System Requirements

Comment: One State agency suggests that the approval procedure for new system requirements be streamlined to reduce the inappropriate burden on the States.

Response: In a further effort to foster State participation, approval of enhanced FFP (at the 90 percent rate) for improvements made to a system in order to meet new system requirements has been moved to the regional offices. The requirements for approval for improvements to existing approved systems have been added to the language of the regulation at § 433.112(b). The procedure to be followed to obtain prior approval is detailed in Part 11 of the SMM. At any time, a State may submit recommendations about how the process may be further streamlined.

Length of Time Period Allowed for Compliance With New Conditions of Reapproval

Comment: One State agency is worried that the "appropriate period" allowed for the States to comply with new MMIS conditions of reapproval will not be long enough for the many States whose legislatures appropriate funds on a two-year basis.

Response: The time period for implementing new conditions of reapproval is set forth in each proposed rule or notice with a comment period that proposes new conditions of reapproval. During the notice and comment period, a State that needs additional time to implement the new requirements should write to us explaining just how much time the State needs. Then, we will take that into account when issuing the effective date in the final rule or notice. So far this procedure has worked well, and, to our knowledge, all States have had enough time to comply with any new conditions of reapproval.

In addition, § 433.123 requires that HCFA provide at least one calendar quarter before the review period to which the new or modified performance standards and other conditions for reapproval apply.

Time Period To Dispute a Finding of Disapproval

Comment: One State agency suggest that a State would need more time than we propose to allow to dispute a finding that the State has not met a condition of reapproval.

Response: The State actually has a great deal of time to present its case. In addition to responding to the regional office findings, the State may submit evidence of satisfactory performance at any time prior to receipt of the notice of disapproval. The State may then continue to prepare its case for use before the Grant Appeals Board should it intend to contest the disallowance.

Notification of Proposed Changes to Performance Standards and System Requirements

Comment: Two State agencies quoted section 1903(r)(6)(E) of the Act, which requires the Secretary to "notify all States of proposed procedures, standards, and other requirements at least one quarter prior to the fiscal year in which such procedures, standards, and other requirements will be used for conducting reviews for reapproval." The commenters questioned whether the statute's time frame coincided with our proposal in § 433.123(c) that we will notify agencies at least one calendar

quarter before the review period to which the new or modified standards or conditions apply. The State agencies recommended that we allow the maximum time to respond to changes and provide for State participation in developing new performance standards, system requirements or other conditions of approval or reapproval.

Response: The reapproval review package containing the required standards of performance for reapproval of a State's MMIS is issued by the end of June each year to all State Medicaid directors. The actual review is conducted on the Federal fiscal year basis. This means the period to be reviewed is from October through September annually. This time frame, as reflected in this final regulation, corresponds to the statutory requirements. We do discuss proposed changes with States and have postponed adding requirements, based on the concerns of States. Implementation of proposed claims processing review requirements has been delayed and is being revised as a result of the notice and comment process.

Comments Concerning the Claims Processing Assessment System (CPAS)

A number of comments addressed a statement in the Supplementary Information portion of the NPRM that we intended to include a quality control component as a condition of MMIS approval and reapproval. Subsequent to publication of this NPRM, we published a notice and NPRM (August 9, 1983, 48 FR 36151) dealing with a new claims processing assessment system (CPAS), which we proposed as a new condition for MMIS approval and reapproval.

Comments relating to the quality control component were considered and responded to in the final rule concerning CPAS, which is entitled Medicaid Program: Claims Processing Assessment System (CPAS), BQC–18–F. That final rule was published on May 29, 1985 (40 FR 21839).

IV. Summary of Changes

42 CFR 400.310 has been amended to include the currently valid OMB control numbers for the information collection requirements in 42 CFR 433.112 and 433.117 (see section VI. Reporting Requirements, below, for additional information). In addition, although these final regulations contain the same substantive rules that were proposed in the NPRM, the following sections of the regulations have been changed solely for clarity:

(1) Section 433.110 has been revised to indicate that the requirements under section 1903(r) of the Act do not apply to American Samoa.

(2) In § 433.112, FFP for design, development, installation or improvement of mechanized claims processing and information retrieval systems, paragraph (b) has been changed to indicate that HCFA will approve the APD (rather than the system) if the several listed conditions are met. For purposes of obtaining 90 percent FFP in expenditures for design, development, or installation of a system, it may not be appropriate to refer to "approving the system".

This is because the "system" may not exist in the developmental stage. Therefore, we have changed the reference to "approval of the system" to approval of the APD. Approval of the APD prior to the expenditure of funds is a prerequisite to receipt of 90 percent FFP. This approval must be received prior to the award of the enhanced FFP.

(3) Section 433.112(b)(4) now refers to peer review organizations; that term currently includes Professional Standards Review Organizations and Utilization and Quality Control Peer Review Organizations, rather than Professional Standards Review Organizations only.

(4) Section 433.113(c) has been amended to provide that the amount of FFP that would be available retroactively for operating a system that later receives initial approval will be reduced by HCFA by the same percentage points for the same periods of time as the reduction in FFP in expenditures for compensation and training of skilled medical personnel and support staff and for general administration until the system is approved.

(5) Section 433.120(b) has been amended to explain that HCFA—

(a) Will not reduce FFP by more than 10 percentage points (rather than 10 percent) in any four-quarter period; and

(b) Will also consider the actual and potential program impact attributable to the unsatisfactory conditions in determining the amount of the FFP percentage reduction.

V. Regulatory Impact Analyses

Executive Order 12291

The Secretary has determined, in accordance with Executive Order 12291, that this final rule does not constitute a major rule because it will not have an annual impact on the economy of $100 million or more, result in a major increase in costs or prices for consumers, any industries, any governmental agencies or any geographic regions, or otherwise meet the thresholds of the Executive Order.

We believe that this final rule will not result in any significant economic impact. The final regulations implement statutory provisions for which the estimated annual impact will be no more than $34 million in FY 1985. The difference between the NPRM estimate of $25 million in FFP reductions and the current $34 million figure is the impact of inflation between FY 1982 and FY 1985. As in the NPRM, our FY 1985 figure is based on a "worst case" estimate in which ten percent in FFP for system operations would be reduced if all currently approved systems were found deficient during the next yearly review. However, based on program experience, we do not expect the actual impact of this rule to be anywhere close to $34 million in FY 1985 or meet any of the other threshold criteria of the Executive Order. Therefore, this rule does not constitute a major rule.

Regulatory Flexibility Act

The Secretary certifies under 5 U.S.C. 605(b), as enacted by the Regulatory Flexibility Act (Pub. L. 96–354), that this final rule will not have a significant economic impact on a substantial number of small entities. As defined by the Regulatory Flexibility Act, a "small entity" includes the term "small governmental jurisdiction", which means "governments of cities, counties, towns, townships, villages, school districts or special districts, with a population of less than fifty thousand". No State or the District of Columbia meets this definition, and, as these regulations only affect States and the District of Columbia, a regulatory flexibility analysis is not required.

VI. Reporting Requirements

The system requirements in 42 CFR 433.112 (a) and (b)(2), 433.116 (e) and (g), and 433.117(b) of this final rule contain information collection requirements. As required by section 3507 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), we submitted a copy of this rule to the Office of Management and Budget (OMB) for its approval of these information collection requirements. OMB approved the information collection requirements in §§ 433.112(a) and 433.117(b) under control number 0990–0058, and the information collection requirements in § 433.112(b)(2) under control number 0938–0247. When we obtain OMB approval of the information collection requirements in paragraphs (e) and (g) of § 433.116, we will publish the control number in the **Federal Register.**

Comments on the information collection requirements in this final rule should be sent directly to the Office of Information and Regulatory Affairs, OMB, New Executive Office Building (Room 3208), Washington, D.C., 20503; Attn: Fay Iudicello.

List of Subjects

42 CFR Part 400

OMB control numbers, Reporting and recordkeeping requirements.

42 CFR Part 433

Administrative practice and procedure, Assignment of rights, Claims, Contracts (agreements), Cost allocation, Federal Financial participation (FFP), Federal matching provision, Grant-in-Aid program—health, Mechanized Claims Processing and Information Retrieval Systems (MMIS), Medicaid, State fiscal administration, Third party liability.

42 CFR Chapter IV is amended as set forth below:

I. Part 400 is amended as follows:

PART 400—INTRODUCTION; DEFINITIONS

The authority citation for Part 400 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh) and 44 U.S.C. Chapter 35.

Subpart C—OMB Control Numbers for Approved Collection of Information

42 CFR 400.310 is amended by reprinting the title of the table for the convenience of the reader and adding the following in section numerical order as follows:

§ 400.310 Display of currently valid OMB control numbers.

Sections in 42 CFR that contain collections of information	Current OMB control number
• • • • •	
433.112(a)	0990–0058
• • • • •	
433.112(b)(2)	0938–0247
• • • • •	
433.117(b)	0990–0058

Subpart C—Mechanized Claims Processing and Information Retrieval Systems

Sec.
433.110 Basis, purpose, and applicability.
433.111 Definitions.
433.112 FFP for design, development, installation, or improvement of mechanized claims processing and information retrieval systems.
433.113 Reduction of FFP for failure to operate a system and obtain initial approval.
433.114 Procedures for obtaining initial approval; notice of decision.
433.116 FFP for operation of mechanized claims processing and information retrieval systems.
433.117 Initial approval of replacement systems.
433.119 Conditions for yearly reapproval; notice of decision.
433.120 Procedures for reduction of FFP after yearly reapproval review.
433.121 Reconsideration of the decision to reduce FFP after the yearly review.
433.122 Reapproval of a disapproved system.
433.123 Notification of changes in system requirements, performance standards or other conditions for approval or reapproval.
433.127 Termination of FFP for failure to provide access to claims processing and information retrieval systems.
433.130 Waiver of conditions of initial operation and approval.
433.131 Waiver for noncompliance with conditions of approval and reapproval.

• • • • • •

Authority: Secs. 1102, 1902(a)(4), 1902(a)(25), 1903(a)(3), 1903(d)(2), 1903(d)(5), 1903(o), 1903(p), 1903(r), and 1912 of the Social Security Act; 42 U.S.C. 1302, 1396a(a)(4), 1396a(a)(25), 1396b(a)(3), 1396b(d)(2), 1396b(d)(5), 1396b(o), 1396b(p), 1396b(r) and 1396k, unless otherwise noted.

2. Section 433.110 is revised to read as follows:

§ 433.110 Basis, purpose, and applicability.

(a) This subpart implements the following sections of the Act:

(1) Section 1903(a)(3) of the Act, which provides for FFP in State expenditures for the design, development, or installation of mechanized claims processing and information retrieval systems and for the operation of certain systems. Additional HHS regulations and HCFA procedures for implementing these regulations are in 45 CFR Part 74, 45 CFR Part 95, Subpart F, and Part 11, State Medicaid Manual; and

(2) Section 1903(r) of the Act, which—

(i) Requires reductions in FFP otherwise due a State under section 1903(a) if a State fails to meet certain deadlines for operating a mechanized claims processing and information retrieval system or if the system fails to meet certain conditions of approval or conditions of reapproval;

(ii) Requires at least an annual Federal performance review of the mechanized claims processing and information retrieval systems; and

(iii) Allows waivers of conditions of approval, conditions of reapproval, and FFP reductions under certain circumstances.

(b) The requirements under section 1903(r) of the Act do not apply to Puerto Rico, Guam, the Virgin Islands, American Somoa and the Northern Mariana Islands.

3. Section 433.111 is amended by reprinting the introductory text of the section for the convenience of the reader and revising the first definition to read as follows:

§ 433.111 Definitions.

For purposes of this section:

"Advance Planning Document (APD)" means a written plan of action to acquire the proposed system. Content requirements for the APD are in 45 CFR Part 95, Subpart F, and in Part 7–71–00 of the Medical Assistance Manual.

• • • • • •

4. Section 433.112 is amended by changing the words "the Administrator" to "HCFA" wherever they appear, and by revising paragraph (a), the introductory text of paragraph (b) and paragrahs (b) (2), (4), and (7) to read as follows:

§ 433.112 FFP for design, development, installation or improvement of mechanized claims processing and information retrieval systems.

(a) FFP is available at the 90 percent rate in State expenditures for the design, development, installation, or improvement of a mechanized claims processing and information retrieval system only if the APD is approved by HCFA prior to the State's expenditure of funds for these purposes.

(b) HCFA will approve the system described in the APD if the following conditions are met:

• • • • • •

(2) The system meets the system requirements and performance standards in Part 11 of the State Medicaid Manual, as periodically amended.

• • • • • •

(4) The system supports the data requirements of peer review organizations established under Part B of title XI of the Act.

• • • • • •

(7) The costs of the system are determined in accordance with 45 CFR 74.171.

§ 433.113 [Redesignated from § 433.116]

5. Section 433.113 is redesignated as § 433.116.

6. A new § 433.113 is added to read as follows:

§ 433.113 Reduction of FFP for failure to operate a system and obtain initial approval.

(a) Except as waived under § 433.130 or 433.131, FFP will be reduced as specified in paragraph (b) of this section unless the Medicaid agency has in continuous operation a mechanized claims processing and information retrieval system that meets the following conditions:

(1) The APD for the system was approved by HCFA;

(2) The system is operational by the earlier of—

(i) September 30, 1982; or

(ii) The last day of the sixth month following the date specified for operation in the State's most recently approved APD that was submitted before October 7, 1980; and

(3) The system is initially approved by the last day of the fourth quarter that begins after the date the system became operational as determined by HCFA.

(b) HCFA will reduce FFP in expenditures for compensation and training of skilled professional medical personnel and support staff under section 1903(a)(2) of the Act, and for general administration under section 1903(a)(7) of the Act, by the following increments applied separately to those two categories of expenditures:

(1) Five percentage points for the first two quarters beginning after a deadline in paragraph (a) of this section;

(2) An additional five percentage points during each additional two-quarter period, through the quarter in which the State achieves compliance with the conditions for initial operation or initial approval of an operating system. FEP reductions will not exceed 25 percentage points for each type of reduction.

(c) The amount of FFP (determined under section 1903(a)(3)(B)) that would be available retroactively for operating a system that later receives initial approval will be reduced by HCFA by the same percentage points for the identical periods of time described in subparagraph (b)(1) of this section, until the system is initially approved. No reduction will be made after the first quarter during which the system is initially approved.

§ 433.114 [Redesignated as § 433.127]

7. Section 433.114 is redesignated as §433.127.

8. A new § 433.114 is added to read as follows:

§ 433.114 Procedures for obtaining initial approval; notice of decision.

(a) To obtain initial approval, the Medicaid agency must inform HCFA in writing that the system meets the conditions specified in § 433.116(c) through (h).

(b) If HCFA disapproves the system, or determines that the system met requirements for initial approval on a date later than the date required under § 433.113(a)(3), the notice will include—

(1) The findings of fact upon which the determination was made; and

(2) The procedures for appeal of the determination in the context of a reconsideration of the resulting disallowance, to the Departmental Grant Appeals Board.

§ 433.115 [Redesignated as § 433.123]

9. Section 433.115 is redesignated as § 433.123.

10. The redesignated § 433.116 is amended by revising paragraphs (a), (b), (c), and (h) to read as follows:

§ 433.116 FFP for operation of mechanized claims processing and information retrieval systems.

(a) Subject to § 433.113(c), FFP is available at 75 percent of expenditures for operation of a mechanized claims processing and information retrieval system approved by HCFA, from the first day of the calendar quarter after the date the system met the conditions of initial approval, as established by HCFA (including a retroactive adjustment of FFP if necessary to provide the 75 percent rate beginning on the first day of that calendar quarter).

(b) HCFA will approve the system operation if the conditions specified in paragraphs (c) through (h) of this section are met.

(c) The conditions of § 433.112(b) (1) through (4) and (7) through (9), as periodically modified under § 433.112(b)(2), must be met.

• • • • • •

(h) If the State has a Medicaid fraud control unit certified under section 1903(q) of the Act and § 455.300 of this chapter, the Medicaid agency must have procedures to assure that information on probable fraud or abuse that is obtained from, or developed by, the system is made available to that unit. (See § 455.21 of this chapter for State plan requirements.)

11. New §§ 433.117, 433.119, 433.120, 433.121, 433.122 are added to read as follows:

§ 433.117 Initial approval of replacement systems.

(a) A replacement system must meet all conditions of initial approval of a mechanized claims processing and information retrieval system.

(b) The agency must submit a APD that includes—

(1) The date the replacement system will be in operation; and

(2) A plan for orderly transition from the system being replaced to the replacement system.

(c) FFP is available at—

(1) 90 percent in expenditures for design, development, and installation in accordance with the provisions of § 433.112; and

(2) 75 percent in expenditures for operation of an approved replacement system in accordance with the provisions of § 433.16(b) through (h), from the date that the system met the conditions of initial approval, as established by HCFA.

(d) FFP is available at 75 percent in expenditures for the operation of an approved system that is being replaced (or at a reduced rate determined under § 433.120 of this subpart for a system that has been disapproved) until the replacement system is in operation and approved.

§ 433.119 Conditions for yearly reapproval; notice of decision.

(a) HCFA will review yearly each system operation initially approved under § 433.114 and reapprove it for FFP at 75 percent of expenditures if the following conditions are met:

(1) The system meets the conditions of § 433.112(b) (1), (3), (4), and (7) through (9).

(2) The system meets the conditions of § 433.116 (d) through (h).

(3) The system meets the performance standards for reapproval and the system requirements in Part 11 of the State Medicaid Manual as periodically amended,

(b) HCFA will issue to each Medicaid agency, by the end of the first quarter after the fiscal year of the review, a written notice informing the agency whether its system is reapproved or disapproved. If the system is disapproved, the notice will also include—

(1) HCFA's decision to reduce FFP for system operations, and the percentage

to which it is reduced, beginning with the next calendar quarter;

(c) An agency's request for a reconsideration before the Board under

one calendar quarter before the review period to which the new or modified

beyond its control. When HCFA grants the waiver, HCFA will also defer all

SUPPLEMENTARY INFORMATION: The FWS is seeking to reduce losses of waterfowl

As stated in the FWS proposal of January 16, 1985 (50 FR 2298–2301) the

VOL 50 ISS 146 JL 30 1985 UMI

to which it is reduced, beginning with the next calendar quarter;

(2) The findings of fact upon which the determination was made; and

(3) A statement that State claims in excess of the reduced FFP rate will be disallowed and that any such disallowance will be appealable to the Grant Appeals Board.

§ 433.120 Procedures for reduction of FFP after yearly reapproval review.

(a) If HCFA determines after the yearly review that the system no longer meets the conditions of reapproval in § 433.119, HCFA will reduce FFP for system operations for at least four quarters. However, no system will be subject to reduction of FFP for at least the first four quarters after the quarter in which the system is initially approved as eligible for 75 percent FFP.

(b) HCFA will reduce FFP in expenditures for system operations from 75 percent to no more than 70 percent and no less than 50 percent; however, HCFA will not reduce FFP by more than 10 percentage points in any four-quarter period. The percentage to which the FFP is reduced will depend primarily on the following criteria:

(1) The number of conditions judged unsatisfactory;

(2) The extent to which conditions were not met;

(3) The significance of the unsatisfactory conditions in overall mechanized claims processing and information retrieval system operations; and

(4) The actual and potential program impact attributable to the unsatisfactory conditions.

§ 433.121 Reconsideration of the decision to reduce FFP after the yearly review.

(a) The agency may appeal to the Departmental Grant Appeals Board, under 45 CFR Part 16, a disallowance concerning a reduction in FFP claimed for system operation caused by a disapproval of the State's MMIS. If the Board finds such a disallowance to be appropriate, the discretionary determination to reduce FFP by a particular percentage amount (instead of by a lesser percentage) is not subject to review by the Board unless the percentage reduction exceeds the range authorized by section 1903(r)(4)(B) of the Act.

(b) The decisions concerning whether to restore any FFP retroactively and the actual number of quarters for which FFP will be restored under § 433.122 of this subpart are not subject to administrative appeal to the Grant Appeals Board under 45 CFR part 16.

(c) An agency's request for a reconsideration before the Board under paragraph (a) of this section does not delay implementation of the reduction in FFP. However, any reduction is subject to retroactive adjustment if required by the Board's determination on reconsideration.

§ 433.122 Reapproval of a disapproved system.

When FFP has been reduced under § 433.120(a), and HCFA determines upon subsequent yearly review that the system meets all current performance standards, system requirements and other conditions of reapproval, the following provisions apply:

(a) HCFA will resume FFP in expenditures for system operations at the 75 percent level beginning with the quarter following the yearly review determination that the system again meets the conditions of reapproval.

(b) HCFA may retroactively waive a reduction of FFP in expenditures for system operations if HCFA determines that the waiver could improve the administration of the State Medicaid plan. However, HCFA cannot waive this reduction for any quarter before the fourth quarter immediately preceding the quarter in which HCFA issues the determination (as part of the yearly review process) stating that the system is reapproved.

12. The redesignated § 433.123 is revised to read as follows:

§ 433.123 Notification of changes in system requirements, performance standards or other conditions for approval or reapproval.

(a) Whenever HCFA modifies system requirements or other conditions for approval under § 433.112 or § 433.116, or performance standards or other conditions of reapproval under § 433.119, HCFA will—

(1) Publish a notice in the **Federal Register** making available the proposed changes for public comment;

(2) Respond in a subsequent **Federal Register** notice to comments received; and

(3) Issue the new or modified standards or conditions in the State Medicaid Manual.

(b) For changes in system requirements or other conditions for approval, HCFA will allow an appropriate period for Medicaid agencies to meet the requirement determining this period on the basis of the requirement's complexity and other relevant factors.

(c) For performance standards and other conditions for reapproval, HCFA will notify Medicaid agencies at least one calendar quarter before the review period to which the new or modified standards or conditions apply.

§ 433.127 [Amended]

13. The redesignated § 433.127 is amended by changing the words "The Administrator" to "HCFA" wherever they appear.

14. New §§ 433.130 and 433.131 are added to read as follows:

§ 433.130 Waiver of conditions of initial operation and approval.

(a) HCFA will waive requirements for initial operation and approval of systems under § 433.113 for a State meeting the requirements of paragraph (b) of this section and that had a 1976 population of less than one million and made total Federal and State Medicaid expenditures of less than $100 million in fiscal year 1976. Population figures are those reported by the Bureau of the Census. Expenditures for fiscal year 1976 are those reported by the State for that year.

(b) To be eligible for this waiver, the agency must submit its reasons to HCFA in writing and demonstrate to HCFA's satisfaction that an MMIS will not significantly improve the efficiency of the administration of the State plan.

(c) If HCFA denies the waiver request, the notice of denial will include—

(1) The findings of fact upon which the denial was made; and

(2) The procedures for appeal of the denial.

(d) If HCFA determines, after granting a waiver, that an MMIS would significantly improve the administration of the State Medicaid program, HCFA may withdraw the waiver and require that a State obtain initial approval of an MMIS within two years of the date of waiver withdrawal.

433.131 Waiver for noncompliance with conditions of approval and reapproval.

If a State is unable to comply with the conditions of approval or of reapproval and the noncompliance will cause a percentum reduction in FFP, HCFA will waive the FFP reduction in the following circumstances:

(a) *Good Cause.* If HCFA determines that good cause existed, HCFA will waive the FFP reduction attributable to those items for which the good cause existed. A waiver of FFP consequences of the failure to meet the conditions of approval or reapproval based upon good cause will not extend beyond two consecutive quarters.

(b) *Circumstances beyond the control of a State.* The State must satisfactorily explain the circumstances that are beyond its control. When HCFA grants the waiver, HCFA will also defer all other MMIS deadlines for the same length of time that the waiver applies.

BILLING CODE 4120-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

Migratory Bird Hunting; Guidelines on Minimum Criteria for Identification of Nontoxic Shot Zones for Waterfowl Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of Final Guidelines.

SUMMARY: This final notice contains guidelines for determining areas where sickness and/or death of waterfowl from lead poisoning due to ingestion of spent lead shotshell pellets is considered to be a significant problem and where nontoxic shot should be used by waterfowl hunters. When waterfowl eat spent lead shotshell pellets during the course of feeding, and when these pellets are retained in the digestive tract, the birds receive a hightly concentrated dosage of lead. Sickness and death may result. The use of nontoxic shot has been found to reduce lead poisoning sickness and mortality from this source of lead. The only nontoxic shot currently available on the market is steel shot. These criteria have been developed on the basis of extensive consultation with state wildlife agencies, conservation organizations, and other interested groups. The Fish and Wildlife Service believes that they represent a practical, scientific way to identify areas that should be considered as nontoxic shot zones.

EFFECTIVE DATE: July 30, 1985.

FOR FURTHER INFORMATION CONTACT: Rollin D. Sparrowe, Chief, Office of Migratory Bird Managment, Fish and Widlife Service, Department of the Interior, Washington, D.C. 20240 (telephone 202-254-3207).

SUPPLEMENTARY INFORMATION: The FWS is seeking to reduce losses of waterfowl from preventable causes such as disease and lead poisoning. When waterfowl eat spent lead shotshell pellets, the birds may become sick or die. The ingested pellets provide a highly concentrated and intensive dosage of lead in a rather short period of time.

In dealing with the lead problem, the FWS initiated several actions in recent months of which this criteria proposal is one of the most important. Other actions include: implementation of a lead monitoring program; preparation of a technicial supplement to the 1976 Final Environmental Impact Statement on the Use of Steel Shot for Waterfowl Hunting; in-depth analysis of the nature and extent of lead poisoning in bald eagles and other species; implementation of nontoxic shot zones to minimize the threat of lead poisoning in bald eagels; analysis of research needs relevants to the issue; analysis of past and on-going efforts to develop nontoxic shot substitutes as well as identifying opportunities for expediting such development work; and development of an information plan to ensure delivery of objective scientific information to waterfowl hunters and other concerned groups and individuals.

The reason that the criteria are important is that they provide a scientifically sound and practical way to identify and designate nontoxic shot zones on a reasonably uniform basis throughout each waterfowl flyway within the United States. Since 1976, the manner in which these zones were established has varied by region and state. Because of this, the method of zone selection has been controversial. By having developed these criteria in an open manner, with full public input, the FWS believes that the criteria represent a general consensus of the states, conservation organizations, waterfowl hunters and other interested groups.

Further, this public input has been an important supplement to the FWS's data and analysis.

As indicated in 50 CFR 20.21(j) and 50 CFR 20.108, nontoxic shot is required for hunting waterfowl in certain designated zones. Since 1978, no nontoxic shot zone could be implemented or enforced by the FWS without approval of the appropriate authorities in each state affected. The restriction on use of funds by FWS has been contained in the Interior Department Appropriations Bill each year since 1978. As a consequence, the FWS has proposed additions and deletions to the designated nontoxic shot zones for hunting waterfowl only with the approval of state authorities.

As stated in the FWS proposal of January 16, 1985 (50 FR 2296-2301) the Department's policies on lead poisoning are designed to focus designation of nontoxic shot zones on problem areas, in a partnership basis with the states. Futher, the Department's efforts in this regard apply only to hunting of ducks, geese, swans, and coots (*Fulica americana*).

Officials of the Department have heard from many interested organizations, states, and individuals concerning the nature, extent, and significance of lead poisoning of waterfowl. Through these discussions it has become clear that states, flyway councils, private organizations, and individuals want greater participation from the FWS in dealing with this problem. The FWS has responded to these requests by implementing the various actions outlined above. Specific actions leading to these final guidelines are described below.

On Spetember 25, 1984, the FWS published in the **Federal Register** a Notice of Intent (49 FR 37672). The notice solicited comments and recommendations from interested parties as to the specific criteria that should be used in proposing and selecting nontoxic shot zones within the four administrative flyways used in managing the waterfowl resource. Comments were received until October 30, 1984.

On January 16, 1985, the FWS published in the **Federal Register** (50 FR 2298-2301) a notice of draft guidelines. These guidelines contained two proposals that would provide guidance in making decisions on the use of nontoxic shot. One was recommended by representatives of the flyway councils, the other FWS. Both proposals would have established two levels of criteria: triggering criteria and decision criteria.

Triggering criteria identify counties or other designated waterfowl habitat areas as having a potential for a significant lead poisoning problem. Desiganted areas may be specific units of waterfowl habitat within a county or within several counties, as identified by the state.

Under the FMS proposal a county or designated area would have been triggered for further monitoring if it had a 3-year average annual harvest of 10 waterfowl per square mile or if 3 or more birds were diagnosed to have died from lead poisoning. Under the council representatives' proposal, the triggering would have been a harvest of 5 waterfowl per square mile or one dead bird.

VOL
50
ISS
146
JL
30
1985
UMI

Decision criteria would have been used to determine whether or not a significant lead poisoning problem exists in areas meeting either of the triggering criteria.

Under the FWS proposal, three decision criteria were specified. Under the proposal of the flyway council representatives, three of the four flyways would also use three criteria. A county or area identified by either one of the triggering criteria would then have been monitored for at least two of the decision criteria.

Under the council representatives' proposal, the Pacific flyway decision criteria would have been based essentially upon the number of dead birds diagnosed as having died from lead poisoning.

On January 27, 1985, the Pacific Flyway Council approved decision criteria that were procedurally similar but somewhat quantitatively different from the other three flyways and the FWS proposal. Specifically, a harvest level of 20 birds per square mile or a mortality of 5 dead birds would be used as the triggering criteria. This action represented a positive and constructive move by the Pacific flyway states toward consensus agreement on the criteria.

On May 7, 1985, the FWS published in the **Federal Register** (50 FR 19268–19277) modified criteria based upon public comment received on the January 16, 1985, proposal. This proposal specified a phased-in approach to implementation as recommended by the International Association of Fish and Wildlife Agencies, the ammunition companies, and certain others. Other changes included: the addition of protoporphryin as a decision criterion; a provision to allow states to use existing monitoring data that they considered current; a provision to enable states to consider bottom firmness as a means to establish priorities for monitoring; and adjustments in the criteria based upon the Pacific Flyway Council's action referenced above.

Summary of Public Comment

The comments received on the modified guidelines published on May 7, 1985, are summarized below. Many of the concerns raised were repeats of comments generated by the proposed guidelines published on January 16, 1985, and to which the FWS responded in the May 7, 1985, publication. Therefore, only those concerns that have not previously surfaced are addressed in a comprehensive way herein. FWS responses in the May 7, 1985, proposal remain as published as no respondent submitted scientific, technical or other such information or data to warrant any changes.

Comments of State Wildlife Agencies

Eleven state wildlife agencies sent letters in response to the modified guidelines published on May 7, 1985. Indiana stated its disappointment that the FWS requires three confirmed lead poisoning deaths for the triggering criteria since three of the four flyways selected one bird and that conversion to nontoxic shot zones is delayed by these criteria until 1987. South Dakota supported the modified proposal, but urged FWS to abandon the decision criteria and use only the triggering criteria as the basis for designation of nontoxic shot zones. Oregon generally approved the FWS modified guidelines, but did express concern about the cost involved with monitoring and suggested that the FWS pay the cost of liver analysis. Oregon also stated its preference that counties with less than five birds harvested per square mile be exempt from the monitoring program except in instances where the death of birds from lead poisoning or other factors dictate the need for monitoring. Finally, they felt that the criteria should address only lead shot found in gizzards and not steel. Missouri stated its concerns that included opposition to the sampling period requirement; ensuring that soft tissue samples be required only when necessary to supplement gizzard data or when proposing zone rejection; ensuring that counties with harvest levels of less than five birds per square mile be included; and that the use of existing monitoring data (gizzard samples) should be sufficient to establish a nontoxic shot zone. Arizona, Massachusetts, and Mississippi generally supported the FWS modified criteria but each state had some concerns. Arizona felt that one confirmed lead poisoned duck or goose was sufficient for the triggering criteria, and that ample time be given to allow for an orderly conversion of an area to nontoxic shot. Massachusetts opposed the late sampling period requirement. Mississippi questioned the precision of the county harvest data and opposed the collection of soft tissue data as being repetitious. Maine opposed the FWS proposal based on their doubts that nontoxic shot zones will be effective in achieving the desired acceptance of steel shot by waterfowl hunters. Florida expressed concern over the minimum lead measures proposed for liver and blood and questioned the value of liver lead content as an indicator of lead toxicosis. Their basic problem with the FWS proposal is that they see no need for the decision criteria and that the triggering criteria are adequate for establishment of nontoxic shot zones. Wisconsin commented that the modified guidelines were an improvement over previous proposals and urged the FWS to be aggressive in assuring that the guidelines are applied uniformly in all states. Wisconsin also questioned the requirement to sample 100 ducks and felt that this is unneeded and an unnecessary expense. Michigan basically supported the guidelines and felt that such guidelines were the only fair and equitable way to implement nontoxic shot regulations. Michigan also requested a review of FWS harvest data for certain Michigan counties and indicated that it may wish to pursue these and certain other counties with FWS at a future date. Michigan also commented that FWS should list the species known to be susceptible to lead poisoning, and that would cooperate fully in implementing the new guidelines.

Comments from Organizations

Comments were received from nine organizations. Two of the organizations, including the Wildlife Management Institute, favored the approach proposed by the FWS. One organization supported the FWS plan but would go further to totally ban lead shot for waterfowl hunting. One organization supported the proposal if it would help increase the number of ducks. Another organization, the National Wildlife Federation (NWF), endorsed the proposal but reiterated several of their concerns expressed on the January 16, 1985, proposal, including: any of the decision criteria alone are adequate to demonstrate a lead poisoning problem; the proposal still lacks regulatory authority; and the final criteria should be a regulation having the force of law in their view. In addition, the Federation also commented: that a protocol be developed for measuring protoporphyrin; that the final criteria will render the "Stevens Amendment" inoperative; and that a requirement be included that areas identified as having lead poisoning problems should not be opened to waterfowl hunting in non-consenting states.

Four organizations opposed the FWS proposal. Each reiterated some of the same concerns submitted in response to the January 16, 1985, proposal. These concerns included: increased crippling losses with steel shot; unsubstantiated losses due to lead poisoning; unscientific approach to the lead poisoning problem; low minimum thresholds in the FWS proposal; and the relatively minor contribution of lead pollution to the environment by hunters when compared to the total lead pollution from all sources.

The National Rifle Association (NRA), in addition to its prior stated concerns in response to the January 16, 1985, proposal, objected on the grounds that, "there is no correlation between the proposed criteria and lead shot ingestion in the determination of a hot spot."

Comments from Individuals

Comments were received from 24 individuals. Eleven of the respondents favored the phased-in approach proposed by the FWS and 13 were in opposition. The respondents opposing the FWS proposal gave as their reasons such things as: Higher crippling losses for steel shot; unsubstantiated lead poisoning deaths; need for an alternative to steel shot, and that the amount of lead deposited in the environment annually in the form of lead shot is insignificant compared to the total deposited from all sources.

FWS Response to Comments

Most of the comments received in response to the May 7, 1985, modified proposal were essentially repetitive of concerns expressed on the January 16, 1985, proposal. For such comments FWS responses contained in the May 7, 1985, proposal still apply and will not be repeated herein. With respect to the NRA comment that "there is no correlation between the proposed criteria and lead shot ingestion in the determination of a hot spot," the FWS would like to clarify the situation. The FWS feels that there is clearly a direct correlation between the criteria and lead shot ingestion. The facts are that for any area to qualify for consideration as a nontoxic shot zone, it must meet the gizzard criterion PLUS either one of the other three decision criterion.

In addition, the FWS would like to supplement its comments to concern No. 10 as published in the May 7, 1985, proposal that pertains to environmental lead. NRA and certain others commented that lead pollution from spent shot shell pellets was relatively minor when compared with other lead sources. In a nationwide sense, the FWS would agree. Unfortunately, such lead is not evenly distributed. What respondents may have overlooked is that the continued use of lead shot shells can result in a concentrated source of lead in many of the areas where waterfowl feed. Because of this concentrated source of lead, and because of the concentrated intensive dosage that lead pellets provide to the birds, it is a far more dangerous and insidious form of pollution than is lead entering the environment from atmospheric or other sources. Although it is clear that lead from sources other than spent shot shell pellets can be picked up within the food chain, there is no evidence to show that foods containing such lead, when eaten by waterfowl or birds of prey, result in any clinical signs of lead poisoning within the birds. The FWS believes that the scientific evidence is clear, that the birds must be exposed to a highly concentrated form of lead, such as a lead shotshell pellet, fishing sinker, or other such lead object, in order for clinical signs of lead poisoning to appear.

As to the concern of Mississippi and Michigan about the precision of the county harvest data, the FWS will continue to work with the states to improve the quality of this data for this and other uses.

As to the monitoring of counties with a harvest level of less than 5 birds per square mile, the FWS believes that monitoring at this level should be left to the discretion of the states due to the extensive workload already imposed by the higher harvest levels. The FWS will, of course, continue to cooperate in any such monitoring programs to the extent practical.

The FWS firmly believes that both gizzards and soft tissue must be monitored. Gizzard ingestion data outlines the extent of exposure to spent lead shot shell pellets while soft tissue data substantiates the extent that lead has been assimilated into the body tissues, as well as the degree of sickness from lead. As outlined in the guidelines that follow, the FWS does recognize the authority of the various states to designate nontoxic shot zones based on less evidence than these guidelines require.

One state requested that FWS identify susceptible species for monitoring. The FWS would prefer that where any questions arise on the part of the states as to which species are to be monitored, this can be determined on a site-by-site basis, based upon consultation between the states and the FWS.

The FWS fully recognizes and concurs in the need for sufficient lead time to provide adequate notification to waterfowl hunters and others affected by nontoxic shot proposals. The FWS believes that it is incumbent upon all cooperators and interested groups to work in a positive and constructive manner to ensure such awareness and understanding on the part of waterfowl hunters. The adequate notification of waterfowl hunters, along with the lead time needed by ammunition manufacturers, are the principal reasons for the phased-in approach to implementation.

The NWF suggested that a rigid protocol for handling protoprophyrin samples be developed and distributed. The FWS will explore the need for this. If such a need is found to exist, such procedures will be developed and distributed as suggested.

The NWF also insists that the final guidelines constitute a regulation that carries the force of law. The FWS does not concur with this interpretation and stands by the explanation provided in response to concern No. 18 as contained in the proposal published on May 7, 1985.

The NWF believes that publication of the final guidelines will satisfy the 1985 Appropriations Act Conference Report language and that the restrictive language in the Interior Appropriations Act will be rendered inoperative. The FWS believes that the language of the statute contains a clear bar to action. The report, in an ambiguous explanation, states that this provides a continued bar "until" specific baseline criteria are promulgated. The explanation can be reconciled with the face of the statute only if it is understood as a statement of Congressional intent to drop the amendment if such criteria are created. The explanation would conflict with the face of the statute if it were read to explain a self-executing termination of the appropriations limitation . . . a termination Congress did not place in the statute. In the event of such conflict, the FWS is bound by the clear language of the statute itself.

The NWF further recommended that language be inserted in the guidelines that would keep qualifying areas closed to waterfowl hunting until such time that nontoxic shot is required on the area. The FWS believes that this is unnecessary as the states are already fully aware of the FWS authority to do this. Further, inclusion of such language in these guidelines would serve no useful purpose, especially since the guidelines do not constitute a regulation.

Final Guidelines for Identification and Establishment of Nontoxic Shot Zones

The criteria and procedures specified below are the guidelines to be followed in the identification and establishment of nontoxic shot zones to minimize lead poisoning in waterfowl.

Triggering Criteria

A county or waterfowl habitat area within one or a combination of adjoining counties, as identified by the state, will

be triggered for monitoring of the decision criteria if it meets either of the two criterion below.

Harvest per square mile. The waterfowl harvest level specified below will be used as this criterion. The specified numbers are outlined in the implementation schedule below.

Harvest level (birds per square mile)	Hunting season that monitoring is to begin	Hunting season in which nontoxic shot is to be required in qualifying areas
20	1985–86	1987–88
15	1986–87	1988–89
10	1987–88	1989–90
5	1988–89	1990–91

A state may monitor areas with a harvest level of less than 5 per square mile, if it feels there is a need to do so. Monitoring would automatically be required if the three dead bird triggering criterion is met. Otherwise, monitoring at harvest levels below 5 per square mile is purely at the discretion of the respective state.

The number of birds determined to be harvested in a county or other designated area will be based upon periodic reports issued by the FWS or upon other reliable data for the counties or designated areas in question.

Obviously, if a state has no counties or designated areas meeting the 20 bird harvest criterion, then it should proceed to monitor the 15 or 10 bird level, whichever is applicable. On the other hand, a few states have so many counties at the 20 and 15 bird harvest levels that it may not be possible to adhere to this schedule. In such cases, the states and the FWS must negotiate an appropriate schedule and any cooperative monitoring work. This will be achieved as follows: Within 90 days of determining that a triggering criterion has been met, the state(s) must make a commitment to monitor and that such monitoring will begin within one year. Such commitment and a proposed schedule for monitoring will be submitted to FWS for approval by the Director. This is the preliminary step to negotiating an acceptable cooperative approach to the monitoring and tissue analysis workload.

Number of dead waterfowl diagnosed as having died from lead poisoning during the year. This criterion is three dead waterfowl. The FWS feels, as indicated in previous proposals, that this number is more likely to be representative of a significant problem in a given location, since it is likely that the birds picked up the lead in the area where they died. Not only will this help focus monitoring efforts on areas where problems are most likely to exist, it will significantly reduce the initial costs associated with monitoring as required under decision criteria discussed below.

Decision Criteria

An area identified by either triggering criterion will be monitored for ingested shot, and at least one of the other three decision criterion. A sample size of at least 100 birds is required.

One or more ingested shot in five percent or more of the gizzards examined, PLUS 2ppm lead (wet weight), in a minimum of five percent of the liver tissues sampled OR 0.2ppm lead in five percent of the blood samples drawn from hunter-killed or live-trapped waterfowl, OR a protoporphyrin level of 40μg/dl in five percent of the blood samples would serve as the decision criterion.

Gizzard samples are a required part of the monitoring process. Shot in the gizzards reflects the degree of exposure to lead shot. Lead in the liver or blood reveals that either lead pellets or some other type of lead has been assimilated in tissues. Lead in the liver or blood, when analyzed in combination with the incidence of shot in gizzards, provides basic scientific data for making decisions on the source and extent of lead poisoning within a given area.

Use of existing monitoring data. States are free to use existing monitoring data on triggered areas, provided the data is recent. Many states have already completed extensive monitoring for some areas. If the state feels that the data are current and can be realistically defended, then no additional monitoring would be necessary or required. This approach would further reduce the financial requirements imposed by these criteria.

Recognition of state authority. The FWS recognizes that state wildlife agencies have the authority to require nontoxic shot on any additional areas where they determine that a problem exists by means other than these criteria. The FWS in no way implies to the states that areas not meeting these criteria should be excluded from nontoxic shot. Individual states may therefore determine for their own management purposes, that the use of lead shot in waterfowl feeding areas in any degree should be prohibited. The FWS will continue to honor States' requests to establish nontoxic shot zones in areas not meeting established minimum Federal criteria. It is the responsibility of the individual states to justify and defend any such actions they take in this regard.

Action upon completion of monitoring. If the results of monitoring are *positive* for the gizzard criterion PLUS either the liver, blood or protoporphyrin criterion, the county or designated area will be proposed as a nontoxic shot zone during the next scheduled update of the Federal regulations for nontoxic shot zones for waterfowl. If the results of monitoring are *negative*, the area will be considered not to have a lead poisoning problem unless, at a subsequent date, three or more dead waterfowl confirmed as lead poisoned are reported from the area. In that event, monitoring will be reinstituted. The state may, however, decide to remonitor the county or area for a second successive year or to reschedule it for monitoring at some point in the future when all other counties or areas that have met a triggering criterion have been checked. This additional effort is purely at the option of the state.

If an area is designated as a nontoxic shot zone and then is remonitored and found not to meet the decision criteria, it should remain as a nontoxic shot zone because this is strong evidence that lead poisoning is being reduced. Should, however, the state decide to revert back to the use of lead on such areas, it would be necessary to remonitor the area at a later date to determine if the area should remain in lead for an additional period. Once any such converted area has been found to have a reoccurrence of the lead poisoning problem, it should not in the future be converted back to a lead area.

Use of bottom data. The FWS recognizes that some specific areas where waterfowl are hunted may have bottoms that are very oozy and are so soft that they resemble whipped cream in firmness. Thus, spent lead shotshell pellets may soon sink out of reach of feeding waterfowl. In such areas identified by the state, the state may delay monitoring to focus initial monitoring efforts on what it considers to be higher priority areas.

Dated: July 10, 1985.

Robert A. Jantzen,

Director.

TABLE 1.—FWS FINAL MINIMUM CRITERIA OR GUIDELINES FOR ESTABLISHING NONTOXIC SHOT ZONES

Harvest level	Monitoring begins	Qualifying areas converted
I. Triggering Criteria [1]		
Harvest per sq. mi. (by county, or other designated areas as jointly agreed by State and FWS; harvest estimate based on most recent FWS or State data):		
20 or more	1985–86	1987
15 or more	1986–87	1988
10 or more	1987–88	1989

TABLE 1.—FWS FINAL MINIMUM CRITERIA OR GUIDELINES FOR ESTABLISHING NONTOXIC SHOT ZONES—Continued

Harvest level	Monitoring begins	Qualifying areas converted
5 or more	1988–89	1990
Dead waterfowl (individual specimens confirmed as lead poisoned during the year).	3.	
II. Decision Criteria [4]		
Gizzard (ingested shot) [5]	1 or more shot in 5%	
Liver (lead content)	2 ppm wet weight in 5%.	
Blood (lead content)	0.2 ppm in 5%.	
Protoporphyrin [6]	40 μg/dl in 5%.	
III. Other Conditions		
Sample size (species known to be susceptible to lead poisoning.[6]	100 (hunter killed or trapped).	
Sampling procedures [6]	Most susceptible species only.	

[1] In areas where one or more of the triggering criteria are met, a state must monitor the gizzard criterion and any one of the other three decision criteria. Within 90 days of making a determination that any triggering criterion has been met, the state must provide the FWS with either a commitment to monitor the area within 1 year or submit a proposed schedule for monitoring to begin within 1 year for approval by the Director.

[2] Any area meeting the gizzard criterion plus 1 of the other decision criterion will be proposed for nontoxic shot.

[3] X-ray examination of gizzards is preferred.

[4] Sample techniques and procedures must be approved by FWS so as to ensure the proper sampling and processing techniques are followed. The FWS also reserves the right to subsample up to 10 percent of the samples for lead concentration.

[5] Applies only to decision criteria.

[6] Specimens can be collected by shooting or trapping. No more than 25% of a hunter-killed sample should occur in the first week of the hunting season. At least 50% of a sample of hunter-killed birds should occur in the last half of the waterfowl season.

BILLING CODE 4310–55–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 285

[Docket No. 31012–199]

Atlantic Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of inseason adjustment.

SUMMARY: NOAA issues this notice to increase the Harpoon Boat category quota of giant Atlantic bluefin tuna from 60 short tons (st) to 75 st and to decrease the inseason adjustment amount from 104 st to 89 st accordingly. The increase is necessary to prevent an early closure of this segment of the fishery.

EFFECTIVE DATE: July 29, 1985.

FOR FURTHER INFORMATION CONTACT: William C. Jerome, Jr., 617–281–3600, extension 325; or David S. Crestin, 617–281–3600, extension 253. The address for both individuals is National Marine Fisheries Service, Northeast Region, Management Division, State Fish Pier, Gloucester, Massachusetts 01930–3097.

SUPPLEMENTARY INFORMATION: Final regulations governing the Atlantic bluefin tuna fishery were published on June 17, 1983 (48 FR 27745). Section 285.22(g) provides that the Regional Director may allocate during the fishing season any portion (from zero to 100 percent) of the inseason adjustment amount (104 st) to any segment of the fishery. The Regional Director is required to publish a notice of allocation in the **Federal Register** before such allocation becomes effective. Consistent with § 285.22(g), the Regional Director has considered the following factors:

(1) The usefulness of information obtained from catches of the particular gear segment of the fishery for biological sampling and monitoring the status of the stock;

(2) The catches of the particular gear segment to date and the likelihood of closure of that segment of the fishery if no allocation is made;

(3) The projected ability of the particular gear segment to harvest the additional amount of Atlantic bluefin tuna before the anticipated end of the fishing season; and

(4) The estimated amounts by which quotas established for other gear segments of the fishery might be exceeded.

The Regional Director has determined that a 15 st allocation to the Harpoon Boat category is appropriate based on these factors.

Current landing reports indicate that the Harpoon Boat quota of 60 short tons of giant Atlantic bluefin tuna will be taken by July 29, 1985. Without an allocation from the inseason adjustment amount, fishing for giant Atlantic bluefin tuna by vessels permitted in the Harpoon Boat category will cease for the remainder of 1985. A significant increase in the number of vessels permitted in the Harpoon Boat category has occurred from 1980 to the present (30 to 226). This increase in the number of vessels actively engaged in this fishery has occurred at the same time as a substantial reduction in the quota (150 st to 60 st). There is little doubt that, with the increased number of vessels permitted in the Harpoon Boat category and landings to date, a 15 st increase in the quota could be taken prior to the end of the 1985 fishing season.

An allocation of 15 st from the inseason adjustment amount would leave 89 st available for potential allocation to other gear categories later in the fishing season. Based on current landings data for all gear categories in the Atlantic bluefin tuna fishery, the 89 st remaining in the inseason adjustment amount should be more than sufficient to provide for potential shortages in other gear segments.

The Regional Director, therefore, increases the Harpoon Boat quota in § 285.22(b) from 60 st to 75 st and decreases the inseason adjustment amount in § 285.22(g) from 104 st to 89 st. When the adjusted Harpoon Boat quota is reached, the further taking and retention of Atlantic bluefin tuna by vessels permitted in this category will be prohibited for the remainder of 1985.

Notice of this action has been mailed to all Atlantic bluefin tuna dealers and vessel owners holding a valid vessel permit for this fishery.

Other Matters

This action is taken under the authority of 50 CFR 285.22, and is taken in compliance with Executive Order 12291.

50 CFR Part 652

[Docket No. 50575–5075]

Atlantic Surf Clam and Ocean Quahog Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of Georges Bank area closure.

SUMMARY: NOAA issues this notice closing the Georges Bank surf clam fishery. The action is necessary because harvest from the fishery will reach the allocation for the third quarter of the fishing year on or about July 25, 1985. The intended effect of the closure is to prevent harvests from exceeding the annual quota for the fishery.

EFFECTIVE DATE: 0001 hours Eastern daylight time (E.d.t.) July 26, 1985, through 2400 hours E.d.t. September 30, 1985.

FOR FURTHER INFORMATION CONTACT: Monique Rutledge, 617–281–3600, ext. 351.

SUPPLEMENTARY INFORMATION: Emergency regulations implementing portions of proposed Amendment 6 to the Fishery Management Plan for Atlantic Surf Clam and Ocean Quahog Fisheries (FMP) were published May 30,

1985 (50 FR 23014). The regulations provide at § 652.22(h)(2) that if the Regional Director determines, based on the Georges Bank Area and set the maximum annual quota at 300,000 bushels with the following quarterly regulations currently in effect are extended, or Amendment 6 to the FMP is

Proposed Rules

Federal Register
Vol. 50, No. 146

VOL 50 ISS 146 JL 30 1985 UMI

1985 (50 FR 23014). The regulations provide at § 652.22(h)(2) that if the Regional Director determines, based on logbook reports, processor's reports, vessel inspections, or other information, that the quarterly allocation for surf clams will be exceeded, the Secretary will publish a notice in the **Federal Register** stating the determination and stating a date and time for closure of the fishery.

Dense beds of surf clams were discovered on Georges Bank in mid-1984. Subsequent research resulted in a stock assessment by the NMFS Northeast Fisheries Center supporting an optimum yield range of 25,000–300,000 bushels. Management measures for the Georges Bank fishery were incorporated into Amendment 6, which is currently under Secretarial review. Emergency regulations implementing portions of Amendment 6 established the Georges Bank Area and set the maximum annual quota at 300,000 bushels with the following quarterly allocations: 30,000 bushels in the first quarter; 120,000 bushels in the second quarter; 120,000 bushels in the third quarter; and 30,000 bushels in the fourth quarter.

As of July 12, 1985, approximately 225,000 bushels of surf clams had been harvested on Georges Bank. The cumulative allocation for the first three quarters of 1985 is 270,000 bushels. The Regional Director has reviewed the landing data and information which indicate that this allocation will be reached by July 25, 1985. The Regional Director has determined, therefore, that the fishery will close at the end of the fishing day on July 25, 1985. It is expected that the fishery will reopen on October 1, 1985 with the fourth quarter allocation, if either the emergency regulations currently in effect are extended, or Amendment 6 to the FMP is approved by the Secretary of Commerce (review in progress).

Other Matters

This action is taken under the authority of 50 CFR Part 652 and is taken in compliance with Executive Order 12291.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 916 and 917

Nectarines, Pears, Plums and Peaches Grown in California; Proposed Amendment of Container and Pack Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the container and pack regulations for nectarines, peaches, and plums grown in California. The principal changes would add labeling requirements for consumer packages and a new metric container, the No. 22G standard lug box used in shipping. This action would be in accordance with the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Orders 916 and 917. These actions were unanimously recommended by the commodity committees established under these orders.

DATE: Comments are due by August 14, 1985.

ADDRESS: Comments should be sent to: Docket Clerk, F&V, AMS, Room 2069–S, U.S. Department of Agriculture, Washington, D.C. 20250. Two copies of all written material shall be submitted, and they will be made available for public inspection at the office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone (202) 447–5975.

SUPPLEMENTARY INFORMATION: This action has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities.

This proposed rule is issued under the marketing agreements, as amended, and Marketing Orders 916 and 917, as amended (7 CFR Parts 916 and 917), regulating the handling of nectarines, pears, plums, and peaches grown in California. The agreements and orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). Shipments of these California fruits are regulated by container and pack under Nectarine Regulation 8 (7 CFR Part 916), Peach Regulation 8 (7 CFR Part 917), and Plum Regulation 17 (7 CFR Part 917). Because these regulations do not change substantially from season to season, they were issued on a continuing basis subject to amendment, modification or suspension as may be recommended by the applicable committee and approved by the Secretary. This proposed rule is based upon recommendations and information submitted by the committees and other available information.

The proposed marking requirements for master containers of consumer packages of nectarines, peaches and plums are designed to prevent misrepresentation of the pack, size and net weight of the specific fruits and promote buyer confidence. The proposal would also require marking requirements for individual consumer packages of fruit. Since consumer packages are removed from master containers, they should also be marked to inform the buyer of the contents of the package. The proposal would also specify marking requirements for a new metric container (No. 22G standard lug box) for plums and nectarines and experimental containers for peaches to assure that fruit packed in these containers is appropriately represented to the trade.

This proposed rule would exempt master containers of consumer packages of nectarines and peaches and individual consumer packages of such fruit from the requirements of standard pack except that nectarines shall be fairly uniform in size. A similar size uniformity requirement is currently in effect for peaches and plums. Other standard pack requirements are generally applicable to fruit packed in boxes and not consumer packages, e.g. polybags. The proposal would require that master containers of consumer packages of nectarines, peaches and plums be marked with the number of individual consumer packages and the net weight of each individual consumer package within the master container, minimum size of the fruit (e.g. 80 size), and name and address of the shipper. Individual consumer packages of the specified fruits would have to be marked with the net weight and name and address of the shipper. Currently only the regulation for plums requires that master containers of consumer packages and individual consumer packages be marked with the net weight.

This proposed rule would also require the new metric container, the No. 22G standard lug box, of nectarines and plums and experimental containers of peaches packed in molded forms to be marked with the number of fruit in each container such as "80 count", "88 count", etc. and to be marked with the size corresponding to the number of such fruit when packed in molded forms in the No. 22D standard lug box. The proposal would require each No. 22G standard lug box of loose-filled nectarines to be marked with the words "25 pounds net weight". This is the same requirement in effect for loose-filled nectarines in the No. 22D standard lug box.

This proposed rule provides a 15-day comment period. A longer comment period would be contrary to the public interest and would serve no useful purpose since fresh shipments of California nectarines, peaches, and plums are currently underway.

1. The authority citations for 7 CFR Parts 916 and 917 continue to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

PART 916—NECTARINES GROWN IN CALIFORNIA

2. Section 916.350 is revised to read as follows:

§ 916.350 Nectarine Regulation 8.

(a) No handler shall ship any package or container of nectarines unless such nectarines meet the requirements of paragraphs (b) and (c) of this section and unless each such package or container is marked on at least one outside panel, in plain sight and in plain letters, the following information:

(i) **The size of peaches packed in molded forms (tray-packs) in No. 22D**

(9) Each individual consumer package shall bear the name and address of the

lugs and of wrapped plums packed in No. 12B fruit (peach) boxes shall be

Dated: July 25, 1985.

Thomas R. Clark,

VOL 50 ISS 146 JL 30 1985 UMI

§ 916.350 Nectarine Regulation 8.

(a) No handler shall ship any package or container of any variety of nectarines except in accordance with the following terms and conditions:

(1) Such nectarines, when packed in any closed package, or container, except master containers of consumer packages and individual consumer packages therein, shall conform to the requirements of standard pack: *Provided*, That nectarines in any container shall be fairly uniform in size.

(2) Each package or container of nectarines shall bear, on one outside end in plain sight and in plain letters, the name "nectarines" and except for consumer packages in master containers the name of the variety, if known or, when the variety is not known, the words "unknown variety."

(3) Each package or container of nectarines shall bear, on one outside end in plain sight and in plain letters, the following count and/or size description of the nectarines as applicable:

(i) The size of nectarines packed in molded forms (tray-packs) in No. 22D standard lug boxes, No. 22G standard lug boxes, cartons, No. 12B fruit (peach) boxes or flats and the size of wrapped nectarines packed in rows in No. 12B fruit (peach) boxes shall be indicated in accordance with the number of nectarines in each container, such as "80 count," "88 count," etc.

(ii) The size of nectarines in molded forms (tray packs) in No. 22G standard lug boxes shall be indicated according to the number of such nectarines when packed in molded forms in the No. 22D standard lug box in accordance with the requirements of standard pack, such as "80 size," "88 size," etc. along with count requirements in paragraph (a)(3)(i).

(iii) The size of nectarines loose-filled or tight-filled in any container shall be indicated according to the number of such nectarines when packed in molded forms in the No. 22D standard lug box in accordance with the requirements of standard pack, such as "80 size," "88 size," etc.

(4) Each No. 22D standard lug box and No. 22G standard lug box of loose-filled nectarines shall bear on one outside end, in plain sight and in plain letters, the words "25 pounds net weight."

(5) Each No. 22E standard lug box of loose-filled nectarines shall bear on one outside end, in plain sight and in plain letters, the words "35 pounds net weight."

(6) Each bulk bin container of loose-filled nectarines shall contain not less than 400 pounds net weight, and bear on one outside panel, in plain sight and in plain letters, the following information:

(i) The name and address (including zip code) of the shipper.

(ii) The net weight.

(7) Each master container when filled with nectarines packed in consumer packages shall bear on one outside end in plain sight and in plain letters the following information:

(i) The number of individual consumer packages, the net weight of each consumer package, and the size description of the contents.

(ii) The name and address (including zip code) of the shipper.

(8) Each individual consumer package shall bear the name and address of the shipper and the net weight.

(b) As used herein, "standard pack" and "fairly uniform in size" shall have the same meaning as set forth in U.S. Standards for Grades of Nectarines (§§ 51.3145 to 51.3160) and all other terms shall have the same meaning as when used in the amended marketing agreement and order. "No. 12B standard fruit box" measures 2⅜ to 7⅛ x 11½ x 16⅛ inches, "No. 22D standard lug box" measures 2⅞ to 7⅛ x 13½ x 16⅛ inches, "No. 22E standard lug box" measures 8¾ x 13½ x 16⅛ inches, "No. 22G standard lug box" measures 7⅜ to 7½ x 13¼ x 15 ⅞ inches. All dimensions are given in depth (inside dimension) by width by length (outside dimension).

PART 917—FRESH PEARS, PLUMS, AND PEACHES GROWN IN CALIFORNIA

3. Section 917.442 is revised to read as follows:

§ 917.442 Peach Regulation 8.

(a) No handler shall ship any package or container of any variety of peaches except in accordance with the following terms and conditions:

(1) Such peaches, when packed in any closed package or container, except master containers of consumer packages and individual consumer packages therein, shall conform to the requirements of standard pack.

(2) Each package or container of peaches shall bear, on one outside end in plain sight and in plain letters the name "peaches" and except for consumer packages in master containers the name of the variety, if known or, when the variety is not known, the words "unknown variety."

(3) Each package or container of peaches shall bear, on one outside end, in plain sight and in plain letters, the following count and/or size description of the peaches as applicable:

(i) The size of peaches packed in molded forms (tray-packs) in No. 22D standard lug boxes, experimental containers, cartons, No. 12B fruit (peach boxes, or flats and the size of wrapped peaches packed in rows in No. 12B fruit (peach) boxes shall be indicated in accordance with the number of peaches in the container, such as "80 count, "88 count," etc.

(ii) The size of peaches in molded forms in experimental containers shall be indicated according to the number of such peaches when packed in molded forms in the No. 22D standard lug box in accordance with the requirements of standard pack, such as "80 size," "88 size," etc, along with count requirements in paragraph (a)(3)(i).

(iii) The size of peaches loose-filled or tight-filled in any container shall be indicated according to the number of such peaches when packed in molded forms in the No. 22D standard lug boxes, in accordance with the requirements of standard pack, such as "80 size," "88 size," etc.

(4) The variation in diameter between the smallest and largest peach in any individual container shall not exceed one-fourth (¼) inch for size 80 and smaller and three-eight (⅜) inch for peaches larger than size 80: *Provided*, That not more than five (5) percent, by count, of the peaches in any individual container may fail to meet the diameter requirements of this paragaph.

(5) Each No. 22D standard lug box of loose-filled peaches shall bear on one outside end, in plain sight and in plain letters, the words "25 pounds net weight."

(6) Each No. 22E standard lug box of loose-filled peaches shall bear on one outside end, in plain sight and in plain letters, the words "35 pounds net weight."

(7) Each bulk bin container of loose-filled peaches shall contain not less than 400 pounds net weight, and bear on one outside panel, in plain sight and in plain letters, the following information:

(i) The name and address (including zip code) of the shipper.

(ii) The net weight.

(8) Each master container when filled with peaches packed in consumer packages shall bear on one outside end in plain sight and in plain letters the following information:

(i) The number of indiv idual consumer packages, the net weight of each consumer package, and the size description of the contents.

(ii) The name and address (including zip code) of the shipper.

(9) Each individual consumer package shall bear the name and address of the shipper and the net weight.

(b) As used herein, "standard pack" shall have the same meaning as set forth in U.S. Standards for Grades of Peaches (§§ 51.1210 to 51.1223) and all other terms shall have the same meaning as when used in the amended marketing agreement and order. "No. 12B standard fruit box" measures 2⅜ to 7⅛ x 11½ x 16⅛ inches, "No. 22D standard lug box" measures 2⅞ to 7⅛ x 13½ x 16⅛ inches. "No. 22E standard lug box" measures 8¾ x 13½ x 16⅛ inches. All dimensions are given in depth (inside dimensions) by width by length (outside dimension).

4. Section 917.454 is amended by revising paragraphs (a) and (d) to read as follows:

§ 917.454 Plum Regulation 17.

(a) No handler shall ship any package or container of any variety of plums except in accordance with the following terms and conditions:

(1) Such plums, when shipped in closed packages or containers, except master containers of consumer packages and individual consumer packages therein, shall conform to the requirements of standard pack:

(2) The diameters of the smallest and largest plums in any individual package or container shall not vary more than one-fourth (¼) inch: *Provided*, That a total of not more than five (5) percent, by count, of the plums in any package or container may fail to meet this requirement.

(3) Each package or container of plums shall bear on one outside end, in plain sight and in plain letters, the name "plums" and except for consumer packages in master containers the name of variety if known or, when the variety is not known, the words "unknown variety".

(4) Each package or container of plums shall bear on one outside end, in plain sight and in plain letters, the size description of the contents which description shall conform to the following as applicable:

(i) The size of plums in four-basket crates shall be indicated in accordance with the arragnement of the plums in the top layer of the baskets, such as "4 x 4 size," "4 x 5 size," etc.

(ii) The size of plums loose-filled or tight-filled in standard lug boxes, cartons, or other packages or containers shall be indicated in accordance with the equivalent size designation for such plums when packed in four-basket crates, such as "4 x 4 size," etc.

(iii) The size of plums packed in molded forms (tray-packs) in carton or lugs and of wrapped plums packed in No. 12B fruit (peach) boxes shall be indicated in accordance with the number of plums in the container, such as "88 count," "108 count, " etc.

(iv) The size of plums packed in molded forms (tray-packs) in No. 22G standard lug boxes shall be indicated according to the number of such plums when packed in molded forms in the No. 22D standard lug box in accordance with the requirements of standard pack, such as "80 size," "88 size," etc., along with count requirements in paragraph (a)(4)(iii).

(5) Each package or container of loose-filled or tight-filled plums other than bulk bin containers, master containers of consumer packages, and individual consumer packages in master containers shall bear on one outside end, in plain sight and in plain letters, the words "28 pounds net weight."

(6) Each bulk bin container of loose-filled plums shall contain not less than 400 pounds net weight, and bear on one outside panel, in plain sight and in plain letters, the following information:

(i) The name and address (including zip code) of the shipper.

(ii) The net weight.

(7) Each master container when filled with plums packed in consumer packages shall bear on one outside end in plain sight and in plain letters the following information:

(i) The number of individual consumer packages, the net weight of each consumer package, and the size description of the contents.

(ii) The name and address (including zip code) of the shipper.

(8) Each individual consumer package shall bear the name and address of the shipper and the net weight.

(b) * * *

(c) * * *

(d) When used herein "standard pack" and "diameter" shall have the same meanings as set forth in the U.S. Standards for Grades of Fresh Plums and Prunes (§§ 51.1520 to 51.1536) and all other terms shall have the same meaning as when used in the amended marketing agreement and order. "No. 12B standard fruit box" measures 2⅜ to 7⅛ x 11½ x 16⅛ inches, "No. 22D standard lug box" measures 2⅞ to 7⅛ x 13½ x 16⅛ inches and "No. 22G standard lug box" measures 7⅜ to 7½ x 13¼ x 15⅞ inches. All dimensions are given in depth (inside dimensions) by width by length (outside dimensions).

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 85-081]

African Swine Fever

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Exension of comment period for proposed rule.

SUMMARY: A document published in the **Federal Register** on June 28, 1985, proposed to amend the regulations to provide a mechanism to allow, under certain conditions, pork and pork products originating in a country believed to be free of African swine fever (ASF) to be imported into the United States after being processed in a country where ASF exists or is reasonably believed to exist. This document extends the comment period for this proposed rule for an additional 30 days. The extension of the comment period is needed to allow industry representatives and other interested persons adequate time in which to prepare comments.

DATE: Written comments must be received on or before August 29, 1985.

ADDRESS: Written comments should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Comments should state that they are in response to Docket Number 85-034. Written comments received may be inspected at Room 728 of the Federal Building, 8 a.m. to 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Mark P. Dulin, Import-Export Animals and Products Staff, VS, APHIS, USDA, Room 841, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8499.

SUPPLEMENTARY INFORMATION: On June 28, 1985, the Department published in the **Federal Register** (50 FR 26782-26785) a document which proposed to amend the regulations to provide a mechanism to allow, under certain conditions, pork and pork products originating in a

country believed to be free of African swine fever (ASF) to be imported into

Information Services, Securities and Exchange Commission, 450 5th Street

amendment affect the availability of records through the Commission's Public

BILLING CODE 3410-34-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 200

[Release No. 34-22243; S7-37-85]

Public Reference Facilities in Regional Offices of the Commission

AGENCY: Securities and Exchange Commission.

ACTION: Proposed amendment of rule.

SUMMARY: The Commission proposes to revise the rule which requires certain categories of records to be maintained on file for reference by members of the public in regional offices other than New York and Chicago. Because of the increasing availability of information through private sector services, Commission resource limitations and changes in the needs of the public for information, certain corporate filings will no longer be maintained for public use in these offices. Various reference materials generated by the agency concerning Commission activities will continue to be available.

DATE: Comments must be received by August 29, 1985.

ADDRESS: Interested persons should submit three copies of their comments to John Wheeler, Secretary, SEC, Washington, D.C. 20549. Reference should be made to File No. S7-37-85.

FOR FURTHER INFORMATION CONTACT: Jonathan G. Katz (202) 272-7440, Director, Office of Consumer Affairs and Information Services, Securities and Exchange Commission, 450 5th Street NW., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission is proposing for public amendments to rule 80(c)(1)(ii) of the Commission's regulations regarding information and requests (17 CFR 200.80(c)(1)(ii), by which regional offices other than those in New York and Chicago would no longer be required to maintain certain regional firm information. The Commission's regional offices in New York and Chicago have public references facilities containing microform records of all public filings made with the Commission. Present Commission regulations (See 17 CFR 200.80(c)(1)(ii) also require regional offices to maintain certain documents on file and available for public reference, principally the public filings of all registered companies headquartered in the Region, broker/dealer and investment adviser applications and Regulation A filings by firms within each respective region.

Most regional offices other than New York and Chicago do not have 302.019 adequate staff resources or facilities to accommodate public access to these records. Some of the items are no longer available in all regional offices or are maintained for very limited periods of time. There is not significant public interest in reference facilities which specialize only in information on companies headquartered in a given region.

For these reasons, Regional offices other than those in New York and Chicago will no longer be required to maintain for public access the reports by entities headquartered in the region. Such records will be available through the Commission's Public Reference Branch in Washington, D.C., or through any of a number of private firms offering such information to the public. The Commission believes that these changes will have no significant impact on any substantial number of small entities. It seems that there is little or no utilization of those services proposed to be eliminated. However, the Commission requests in particular comments specifically addressing the issue of public utilization of the *SEC Docket* and the *SEC News Digest*. Availability of other reference materials in the regional offices will be left to the discretion of each Regional Administrator.

The proposed amendment does not affect the maintenance of microform records at the New York and Chicago regional offices which will continue to make available copies of all filing with the Commission, nor does the amendment affect the availability of records through the Commission's Public Reference Branch in Washington, D.C. The Commission will simultaneously update its regulations at §§ 200.80(c)(1), 200.80(c)(1)(iii), and 200.90e, to reflect the closing of public reference facilities at the Los Angeles Regional Office.

Regulatory Flexibility Certification

Pursuant to section 605(b) of the Regulatory flexibility Act (5 U.S.C. 605(b)), the Chairman of the Commission has certified that the proposed amendments to Rule 80(c)(1)(ii) of the Commission's regulations regarding information and requests [17 CFR 200.80(c)(1)(ii)] will not, if adopted, have a significant economic impact on a substantial number of small entities. This certification, including the reasons therefor, is attached to this release.

List of Subjects in 17 CFR Part 200

Administrative practice and procedure, Freedom of information, Privacy Securities.

Statutory Basis and Text of Proposed Amendment

Pursuant to the Securities Exchange Act of and particularly Section 23(a) thereof, 15 U.S.C. 78w(a), the Commission proposes to amend § 200.80 of Title 17, Chapter II, of the Code of Federal Regulations to read as follows:

PART 200—ORGANIZATION; CONDUCT AND ETHICS: AND INFORMATION AND REQUEST

1. The authority citation for Part 200, Subpart D is amended by adding a citation for § 200.80 as follows:

Authority: 80 Stat. 383, as amended, 31 Stat. 54, secs. 19, 23, 48 Stat. 85, 901, as amended, sec. 20, 49 Stat. 833, sec. 319, 53 Stat. 1173, secs. 38, 211, 54 Stat. 841, 855; 5 U.S.C. 552, 15 U.S.C. 77s, 78w, 79t, 77sss, 80a-37, 80b-11, Section 200.80 also issued under 5 U.S.C. 552b; Pub. L. 87-592, 76 Stat. 394, 15 U.S.C. 78d-1 78d-2; Pub. L. 93-502; Pub. L. 93-579; 15 U.S.C. 78a et seq., as amended by Pub. L. 84-29 and by secs. 11a, 15, 19 anmd 23 of Pub. L. 98-38 (15 U.S.C. 78k-1, 78o, 78s and 78w); 11 U.S.C. 901, 1109(a). * * *

2. In § 200.80 by revising the second sentence of paragraph (c)(1) introductory text, and paragraph (c)(1)(ii), and by amending paragraph (c)(1)(iii) introductory text, by revising the phrase, "In the New York, Chicago and Los Angeles regional offices," to read "In the New York and Chicago regional offices."

§ 200.80 Commission records and information.

(c)(1) * * * Coin-operated machines, which are available to requesters on a self-service basis, can be used to make immediate copies up to 8½ by 14 inches in size of materials that are available for inspection in the Washington, D.C., New York and Chicago offices.

* * * * *

(ii) All regional Offices of the Commission have available for public examination the materials set forth in paragraph (a)(2) of this section and the *SEC Docket, SEC News Digest* and other SEC publications. Blank forms as well as other general information about the operations of the Commission described in paragraph (a)(1) of this section may also be available at particular regional offices.

* * * * *

3. In § 200.80e by revising the first sentence in the paragraph captioned *"Public reference copying facilities"* to read as follows:

§ 200.80e Appendix E—Schedule of fees for records services.

* * * * *

Public reference copying facilities. In addition to the demand-order facsimile copying services described above, the service contractor maintains customer operated paper-to-paper and fiche-to-paper copiers in the public reference rooms of the Commission in Washington, D.C., New York City and Chicago. * * *

* * * * *

By the Commission.

John Wheeler,

Secretory.

July 15, 1985.

Regulatory Flexibility Act Certification

I, John S.R. Shad, Chairman of the Securities and Exchange Commission, hereby certify, pursuant to 5 U.S.C. 605(b), that the proposed amendments to 17 CFR 200.80 pertaining to material maintained for public reference in regional offices other than New York and Chicago published in Release No. 34-22243 [July 16, 1985) will not, if promulgated, have a significant economic impact on a substantial number of small entities. There is no evidence of significant utilization of public reference facilities in the affected regional offices by a substantial number of issuers, broker/dealers, transfer agents, investment companies or other small entities.

John S.R. Shad,

Chairman.

BILLING CODE 8010-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM85-7-000]

Revised Procedures for Stripper Gas Well Category Determinations Under the NGPA; Proposed Rulemaking

July 25, 1985.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is proposing to amend its stripper gas well regulations to eliminate certain burdensome filing requirements. The proposed rule would eliminate the requirement in 18 CFR 271.804(c) (1984) that new applications for temporary pressure build-up determinations be filed each time a well overproduces as a result of temporary pressure build-up. Instead, the producer could obtain a one-time pressure build-up determination which would permit continued qualification for stripper gas well prices so long as total production during any 90-day production period did not exceed 5400 Mcf. The Commission is also proposing to eliminate the requirement that producers file subsequent notices of disqualification for stripper gas wells determined to be subject to pressure build-up, unless total production for a 90-day period exceeds 5400 Mcf.

DATE: Comments on the proposed rule are due on September 30, 1985. Any requests for public hearing must be received by Augusrt 26, 1985.

ADDRESS: Comments and requests for hearing must be addressed to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 and should refer to Docket No. RM85-7-000. An original and fourteen copies should be filed.

FOR FURTHER INFORMATION CONTACT: Richard Howe, Jr., Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, (202) 357-8308.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Commission is proposing to amend its stripper gas well regulation [1] to permit producers to obtain a one-time determination that a stripper gas well is subject to temporary overproduction caused by pressure build-up during shut-in (a pressure build-up determination).[2] Such a determination will permit the well to continue to qualify for stripper gas well prices after all future shut-ins, as long as production does not exceed 5400 Mcf during a 90-day production period, without requiring the producer to file new applications for temporary pressure build-up determinations. The Commission is also proposing to eliminate the requirement that producers file subsequent notices of disqualification for stripper gas wells determined to be subject to pressure build-up, unless total production for a 90-day period exceeds 5400 Mcf.

II. Background

Section 108 of the Natural Gas Policy Act of 1978 (NGPA)[3] defines a stripper gas well generally as a well producing non-associated natural gas at a rate not exceeding an average of 60 Mcf per production day for a 90-day production period. A production day includes days during which gas is produced or production is prohibited by State law or state-approved conservation practice.[4] A 90-day production period is any period of 90 consecutive days, including days in which gas is not produced as a result of voluntary action by the operator by excluding other days of non-production.[5] A producer must file an application with the appropriate jurisdictional agency for a determination that a well qualifies as a stripper well.[6]

When a producer temporarily shuts in a well, for example to permit maintenance or repair work, pressure builds up in the well bore. This cause greater than normal production for a period after the well is reopened. Such shut-in days are included in a 90-day production period. However, unless required by state law or state-approved conservation practice, the shut-in days are not production days for purposes of determining the well's average rate of

[1] 18 CFR Part 271, Subpart H (1984).

[2] A well is considered to be "shut-in" when a producer stops production from it.

[3] 15 U.S.C. 3318 (1982).

[4] 18 CFR 271.803(d) (1984).

[5] 18 CFR 271.803(c)(2) (1984). In order to avoid the necessity of bringing additional days into a 90-day production period when some are excluded pursuant to the above definition, the Commission has provided that, where records for a 90-consecutive-calendar-day period indicate that the well produced 60 Mcf or less per production day during that period, a rebuttable presumption is created that the well produced 60 Mcf or less during the statutory 90-day production period. 18 CFR 271.803(c)(2) (1984).

[6] 15 U.S.C. 3413 (1982) (section 503 of the NGPA).

VOL 50 ISS 146 JL 30 1985 UMI

production during the 90-day period. Therefore, if a temporary pressure build-up causes average production from a previously qualified well to exceed 60 Mcf per day for the actual production days in any 90-day period during part of which the well had been shut in, the well would be disqualified as a stripper gas well.[7]

The Commission has determined that short-term overproduction resulting from temporary pressure build-up should not disqualify a stripper well. It issued an interim rule,[8] later finalized,[9] permitting a previously-qualifying stripper well which produces an average of more than 60 Mcf per production day during a 90-day period to continue to qualify, if the producer obtains a determination from the jurisdiction agency that: (1) Average production exceeded 60 Mcf because of a pressure build-up resulting from a temporary shut-in, (2) total production for the relevant 90-day period did not exceed 5400 Mcf, and (3) the well would likely have produced at no more than an average of 60 Mcf per production day during the 90-day period but for the shut-in.[10] Under the rule, the producer must obtain a new temporary pressure build-up determination for each 90-day period the well overproduces after a shut-in in order to avoid disqualification during the period of temporary overproduction. Also, the operator of the well and any purchaser must give notice to one another and the Commission that production has averaged more than 60 Mcf per day for a 90-day period even though the well eventually receives a temporary pressure build-up determination.[11]

III. Discussion

The Commission continues to believe that stripper gas wells should not be disqualified if their overproduction is caused by temporary pressure build-up. The Commission has tentatively determined that the present regulations permitting such continued qualification impose unduly burdensome filing requirements on producers and purchasers. Accordingly, it is proposing reductions in those filing requirements.

A. Pressure Build-Up Determinations

Reduced market demand in recent years has required an increasing number of producers to shut in their wells periodically. This has caused many stripper gas wells to regularly overproduce when reopened, as a result of temporary pressure build-up. Currently, the Commission's regulations require new applications for pressure build-up determinations each time a well overproduces; thus, many producers must file such applications for the same well as often as once a month. The Commission believes that its regulations maybe unduly burdensome since the producer must repeatedly compile the necessary supporting data, pay state filing fees, if applicable, and a $25 fee for Commission review. The financial burden is particularly significant, since most stripper gas wells are of marginal profitability.

Additionally, the increase in applications for pressure build-up determinations has significantly increased the workload of the Commission and the jurisdictional agencies. Requests for the Commission to review pressure build-up determinations have increased dramatically, from 266 in fiscal year 1982 to 3,463 in fiscal year 1984. The Commission believes that this burden may not be justified.

In order to reduce this burden on producers, jurisdictional agencies, and the Commission, the Commission proposes to eliminate the requirement that new applications for pressure build-up determinations be filed each time a well overproduces after a shut-in. Instead, the Commission proposes to permit a stripper gas well which has received one such determination to retain its stripper status during all future periods of temporary overproduction due to shut-in without filing new applications, provided that total production during the relevant 90-day period does not exceed 5400 Mcf.[12]

Eliminating the requirement for new applications should not adversely affect compliance with the NGPA. Applications for pressure build-up determinations are usually routine. To obtain a determination, a producer generally need only show that a qualifying well was shut in and thereafter temporarily overproduced.[13] Since these facts can be verified by reviewing a producer's or a pipeline's records, there is generally no dispute whether a well qualifies for a pressure build-up determination. In fact, the Commission has never reversed any of the 5,097 pressure build-up determinations it has reviewed.[14] In addition, the risk that a producer could violate NGPA ceiling prices by charging stripper prices for an overproducing well based on temporary pressure build-up, when not entitled to do so, is small since purchasers and pipelines know current market requirements and almost always know the production histories of the wells.[15]

Furthermore, under the proposed rule, the producer will still have to obtain (1) an original determination that the well is a stripper gas well and (2) an initial pressure build-up determination before the well can retain its stripper status during a future period of temporary overproduction without a pressure build-up determination. Also, the 5400 Mcf limit on production during a 90-day period will remain in effect.

Finally, elimination of the requirement for more than the initial pressure build-up determination is consistent with the Commission's decision in Order No. 336 to permit stripper gas wells which have desqualified altogether to requalify once production returns to appropriate levels without a new jurisdictional agency determination. The Commission stated that this would alleviate the burden on producers of filing new applications for stripper gas well determinations, but not undermine compliance with the NGPA.[16]

[7] For example, if a producer shut in a well for the first 45 days of a 90-day period and then reopened it and that well then produced 3150 Mcf during the remaining 45 days of the period, average daily production for the 90-day period would be 70 Mcf (total production of 3150 divided by 45 production days equals 70). Therefore, even though total production for the 90-day period was well below 5400 Mcf, the well would be disqualified because average production per production day exceeded 60 Mcf.

[8] Interim Rule under Section 108 of the NGPA Concerning Temporary Pressure Buildup in Qualifying Stripper Wells, 46 FR 6901 (Jan. 22, 1981).

[9] Reduction in Filing Requirements for Well Category Applications under sections 102, 103, 107, and 108 of the Natural Gas Policy Act of 1978; Regulations for Temporary Pressure Buildup Determinations Under section 108 of the Natural Gas Policy Act, 48 FR 44 508 (Sept. 29, 1983) (Order No. 336), *reh'g denied*, 49 FR 566 (Jan. 5, 1984) (Order No. 336–A).

[10] 18 CFR 271.804(e) (1984).

[11] 18 CFR 271.805(d) (1984).

[12] If production from a well did exceed 5400 Mcf during a 90-day period, the producer could not again charge stripper well prices until production decreased to a level not exceeding an average of 60 Mcf per production day for a new 90-day period. 19 CFR 271.805(c) (1984). However, once that well did requalify pursuant to § 271.805(c), if it subsequently overproduced as a result of temporary pressure build-up, it could continue to qualify for stripper prices based on a temporary pressure build-up determination obtained before the first disqualification so long as it otherwise met the requirements of the temporaty pressure build-up rule.

[13] *See* 18 CFR 274.206(e)(6) (1984).

[14] The applicant or the jurisdictional agency has withdrawn eight of those determinations in response to Commission leiters requesting further information.

[15] In many cases, the purchaser is the one who keeps the production records and determines the price to which the producer is entitled.

[16] Reduction in Filing Requirements for Well Category Applications Under sections 102, 103, 107, and 108 of the Natural Gas Policy Act of 1978; Regulations for Temporary Pressure Buildup Determinations Under Section 108 of the Natural Gas Policy Act, 48 FR 44,508 (Sept. 29, 1983) (Order No. 336), *reh'g denied*, 49 FR 566 (Jan. 5, 1984) (Order No. 336–A).

This has proven to be the case. The Commission is not aware that Order No. 336 has resulted in any significant increase in producers' charging stripper well prices when not entitled to do so. There appears no reason why the same should not be true with respect to the elimination of new applications for pressure build-up determinations.[17]

B. Notices of Disqualification

The Commission's regulations now require that the operator and any purchaser of gas give written notice when a stripper gas well produces an average of more than 60 Mcf per production day during any 90-day period.[18] These notices must be filed even if the well eventually receives a pressure build-up determination permitting stripper gas well prices to be charged despite the overproduction. The Commission proposes to remove this requirement for wells which would retain their stripper status by virtue of an earlier pressure build-up determination. Since such wells will continue to qualify for stripper prices without any action by jurisdictional agencies or the Commission, notices that overproduction has occurred are unnecessary. Elimination of the notice requirement will reduce filing burdens on the industry and lessen the Commission's workload by substantially reducing the number of notices of disqualification which the Commission must review.

IV. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) [19] requires certain statements, descriptions, and analyses of rules that will have "a significant economic impact on a substantial number of small entities." [20] The Commission is not required to make an RFA analysis if it certifies that a rule will not have a "significant economic impact on a substantial number of small entities."[21]

There are approximately 10,000 natural gas producers in the United States, many of which would be classified as small entities under the appropriate RFA definition.[22] This proposed rule could affect most of these entities by eliminating filing requirements that are unnecessary. In addition, this proposal does not impose any additional regulatory burdens. Thus, while this proposal has a beneficial impact on small entities, the Commission believes that this impact will not be "significant," within the meaning of the RFA. Accordingly, the Commission certifies that this proposal will not have a "significant economic impact on a substantial number of small entities."

V. Paperwork Reduction Act

The information collection provisions in this final rule are being submitted to the Office of Management and Budget (OMB) for its approval under the Paperwork Reduction Act, 44 U.S.C. 3501–3520 (1982), and OMB's regulations, 5 CFR 1320.13 (1985). Inquiries relating to the information collection provisions in this rule can be made to Richard Howe, Jr., Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, D.C. 20426 (202) 357–8308. Comments on these information collection provisions should be sent to the Office of Information and Regulatory Affairs of OMB (Attention: Desk Officer for the Federal Energy Regulatory Commission).

VI. Written Comment Procedure

The Commission invites all interested persons to submit written data, views and other information concerning the matters set out in this Notice. All comments in response to this Notice should be submitted to the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NW, Washington, D.C. 20426, and should refer to Docket No. RM85–7–000. An original and 14 copies should be filed. All comments received before 4:30 p.m. EST, on September 30, 1985, will be considered by the Commission.

All written submissions will be placed in the public file which has been established in this docket and which is available for public inspection during regular business hours in the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, NW., Washington, D.C. 20426.

In addition, an opportunity for a public hearing to receive oral comments will be afforded, if requested, in accordance with section 502(b) of the NGPA. Any person requesting an opportunity to appear to give oral comments must file with the Secretary a request to do so by August 26, 1985.

List of Subjects in 18 CFR Part 271

Ceiling prices, continental shelf, natural gas, price controls, reporting and recordkeeping requirements.

By direction of the Commission.

Kenneth F. Plumb,

Secretary.

PART 271—[AMENDED]

In consideration of the foregoing, the Commission proposes to amend Part 271, Title 18, Code of Federal Regulations, as set forth below.

1. The authority citation for Part 271 is revised to read as follows:

Authority: Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); Executive Order No. 12,009, 3 CFR 142 (1978); Natural Gas Act, 15 U.S.C. 717–717w (1982); Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432 (1982), unless otherwise noted.

2. Section 271.804(e) is amended by adding new paragraphs (3) and (4) to read as follows:

§ 271.804 Special rule.

* * * * *

(e) *Temporary pressure build-up in previously qualified stripper wells.*

* * * * *

(3) If a jurisdictional agency has made an affirmative determination for a well pursuant to paragraph (e)(1) and that well subsequently produces in excess of an average of 60 Mcf per production day for a 90-day period because of pressure build-up occurring during a temporary shut-in, a new determination pursuant to paragraph (e)(1) need not be obtained to avoid disqualification of the well so long as production does not exceed 5400 Mcf for a 90-day production period. If a well is disqualified as a stripper well after an affirmative determination pursuant to paragraph (e)(1) but requalifies before subsequent 90-day production period in which a temporary pressure build-up occurs, it will continue to qualify pursuant to this paragraph based on the prior affirmative determination.

(4) If a well which produces in excess of 60 Mcf per production day continues to qualify for stripper well prices under paragraph (e)(3), the operator of such well and the purchaser of production from such well are exempt from the

[17] Until the effective date of a final rule in this docket, the producer must continue to obtain new pressure build-up determinations for each 90-day period the well overproduces in order to continue to collect stripper prices under the temporary pressure build-up rule as now in effect. If a final rule is promulgated, however, after the effective date of the rule, a stripper gas well may retain its stripper status based on a temporary pressure build-up determination obtained before the rule's effective date so long as all other conditions of the pressure build-up rule are satisfied.

[18] 18 CFR 271.805(d) (1984).

[19] 5 U.S.C. 601–612 (1982).

[20] *Id.* at section 603(a).

[21] *Id.* at section 605(b).

[22] ID. at section 601(3) *citing* section 3 of the Small Business Act, 15 U.S.C. 632 (1982). Section 3 of the Small Business Act defines "small business concern" as a business which is independently owned and operated and which is not dominant in its field of operation.

filing requirements of § 271.805 for subsequent periods.

BILLING CODE 6717-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 913

Permanent State Regulatory Program of Illinois; Consideration of Modification of Deadline for Conditions of Approval

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: The Office of Surface Mining (OSM) is considering modifying the deadline until July 31, 1986, for Illinois to meet two conditions of the Secretary of the Interior's approval of its State permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). Condition (b) concerns covering the pit floor and highest coal seam with water and condition (c) concerns sedimentation ponds.

DATE: Written comments not received on or before 4:00 p.m. August 29, 1985 will not necessarily be considered in the Director's decision.

ADDRESSES: Written comments must be mailed or hand-delivered to the Office of Surface Mining, Springfield Field Office, 600 E. Monroe Street, Room 20, Springfield, Illinois 62701.

FOR FURTHER INFORMATION CONTACT: Mr. James Fulton, Field Office Director, Springfield Field Office, Office of Surface Mining, 600 East Monroe Street, Room 20, Springfield, Illinois 62701; Telephone: (217) 492-4495.

SUPPLEMENTARY INFORMATION:

Background

The Illinois program was conditionally approved by the Secretary of the Interior on June 1, 1982. Information pertinent to the general background, revisions, modifications and amendments to the proposed program submission, as well as the Secretary's findings, the disposition of comments, and detailed explanation of the conditions of approval can be found in the June 1, 1982 **Federal Register** (47 FR 23858).

Under 30 CFR 732.13(j), the Secretary may conditionally approve a State permanent regulatory program which contains minor deficiencies where the deficiencies are of such a size and nature as to render no part of the program incomplete, the State is actively proceeding with steps to correct the deficiencies, according to a schedule set forth in the notice of conditional approval. The Schedule is established in consultation with the State based on the time required for changes to be adopted under State procedures or legislative schedules.

In accepting the Secretary's conditional approval, Illinois agreed to satisfy conditions (a), (d), and (e) by December 1, 1982 and conditions (b) and (c) by June 1, 1983. Conditions (a), (d), and (e) have been removed (48 FR 23412, May 25, 1983, and 48 FR 51619, November 10, 1983).

On May 23, 1983, Illinois requested a six-month extension of the June 1, 1983 deadline to satisfy conditions (b) and (c). On August 19, 1983, OSM announced the decision to extend the deadline to December 1, 1983 (48 FR 37625).

On December 1, 1983, Illinois requested a further extension of the deadline for satisfying conditions (b) and (c), until June 1, 1984. In its request, the State pointed to certain developments in the litigation on the approval of the Illinois program. The State noted that the United States District Court for the Central District of Illinois had granted, on November 30, 1983, the Secretary's motion to remand the *Illinois South Project* v. *Watt*, (Civ. No. 82-2229) case to the Secretary for review in light of legal developments that have occured since the approval date. Conditions (b) and (c) concern subjects that are directly at issue in the litigation and which may be affected by the Secretary's review on remand. In order to avoid rulemaking proceedings which may prove to be unnecessary, the State requested a six-month extension of the December 1, 1983 deadline. On February 22, 1984, OSM announced the decision to extend the deadline to June 1, 1984 (49 FR 6467).

On May 31, 1984, Illinois requested a further extension of the deadline, until November 30, 1984. The State noted that the conditions are directly affected by two cases which are still unresolved—*Illinois South Project* v. *Watt* and *Illinois Department of Mines and Minerals* v. *Watt*. The State indicated that it had hoped that the cases would have been resolved by June 1, 1984, but as they have not been, Illinois requested that possibly unnecessary rulemaking proceedings be delayed for six months. In the interim, Illinois stated that it would continue to enforce its regulations in accordance with the Federal regulations. On August 24, 1984, OSM announced the decision to extend the deadline to November 30, 1984 (49 FR 33645).

On November 28, 1984, Illinois requested a further extension of the deadline until May 30, 1985. The State noted that the remaining conditions were and remain directly affected by two cases which are still unresolved: *Illinois South Project et al.* v. *Watt* and the Federal District Court Case of the *Illinois Department of Mines and Minerals* v. *Watt*. On March 11, 1985, OSM granted an extension to Illinois to May 30, 1985. (50 FR 9621).

Condition (b) stipulates that Illinois must amend its program to require a cover of the pit floor and highest coal seam with a minimum of ten meters (33 feet) of water, and that pending completion of the above, Illinois may not use its authority to approve covering with less than 10 meters of water or the approval will terminate. Condition (c) stipulates that Illinois must amend its program to demonstrate that Illinois understands that at the present time the best technology currently available for sediment control is sedimentation ponds and should Illinois wish to approve any other technology, the State will first send the proposal to OSM for review and approval as either an experimental practice or a program amendment. Furthermore, pending completion of the above Illinois may not use its authority to approve siltation structures other than sedimentation ponds or the approval will terminate.

Proposal to Extend Deadline

Illinois has informed OSM that the litigation affecting these two conditions is ongoing. The State is preparing for oral arguments in the case in October and cannot estimate when a decision would be made by the Court. Therefore, Illinois is requesting that the deadline to submit material for the removal of these conditions be extended to July 31, 1986. It is hoped that this extension will be sufficient for the court to render a decision and the State to propose program amendments which would enable the Secretary to remove the conditions on program approval.

Therefore, OSM is seeking comment on the State's request to extend the deadline until July 31, 1986, for Illinois to submit material to satisfy the two conditions of approval.

Procedural Matters

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3,4,7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

30 CFR Part 935

Public Comment Procedures and Opportunity for Public Hearing on Proposed Modification to the Ohio Permanent Regulatory Program Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing procedures for a public comment period and for requesting a public hearing on the substantive adequacy of program amendments to the Ohio permanent regulatory program (hereinafter referred to as the Ohio program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments consist of proposed revisions to Ohio's Reclamation Board of Review's (RBR) rules of procedures.

This notice sets forth the times and locations that the Ohio program and proposed amendments will be available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendments, and the procedures that will be followed for the public hearing.

DATES: Written comments from the public not received by 4:30 p.m., August 29, 1985 will not necessarily be considered in the decision on whether the proposed amendment should be approved and incorporated into the Ohio regulatory program. The public hearing on the proposed amendment has been scheduled for August 26, 1985. Any person interested in speaking at the hearing should contact Ms. Nina Rose Hatfield at the address or telephone number listed below by August 14, 1985. If no person has contacted Ms. Hatfield by that date to express an interest in the hearing, the hearing will be cancelled. If only one person requests an opportunity to speak at the public hearing, a public meeting, rather than a hearing, may be held and the results of the meeting included in the Administrative Record.

ADDRESSES: The public hearing is scheduled for 1:00 p.m., in Room 202, Columbus Field Office, 2242 South Hamilton Road, Columbus, Ohio 43227.

Written comments and requests for an opportunity to speak at the hearing should be directed to Ms. Nina Rose Hatfield, Field Office Director, Columbus Field Office of Surface Mining, Room 202, 2242 South Hamilton Road, Columbus, Ohio 43227; Telephone: (614) 866-0578.

Copies of the Ohio program, the proposed modifications to the program, a list of any scheduled public meetings, and all written comments received in response to this notice will be available for public review at the OSM Field Office listed above and at the OSM Headquarters and the Office of the State regulatory authority listed below, during normal business hours Monday through Friday, excluding holidays. Each requestor may receive, free of charge, one single copy of the proposed amendment by contacting the OSM Columbus Field Office.

Office of Surface Mining, Room 5124, 1100 L Street, NW., Washington, D.C. 20240

Ohio Division of Reclamation, Building B-3, Fountain Square, Columbus, Ohio 43224

FOR FURTHER INFORMATION CONTACT: Ms. Nina Rose Hatfield, Director, Columbus Field Office, Office of Surface Mining, Room 202, 2242 South Hamilton Road, Columbus, Ohio 43232; Telephone: (614) 866-0578.

SUPPLEMENTARY INFORMATION: The Ohio program was approved effective August 16, 1982, by notice published in the August 10, 1982 **Federal Register** (47 FR 34688). The approval was conditioned on the correction of 28 minor deficiencies contained in 11 conditions. Information pertinent to the general background, revisions, modifications, and amendments to the Ohio program submission, as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Ohio program can be found in the August 10, 1982 **Federal Register**.

On May 23, 1985, OSM approved several amendments submitted by Ohio on February 27, 1985, revising rules 1513-13-01 through 1513-3-22 which establish the Reclamation Board of Review's (RBR) rules of procedures (50 FR 21256). On July 3, 1985, Ohio requested that OSM consider an informal submittal of amendments dated May 20, 1985, as a formal request for a program amendment. OSM is responding to that request with this announcement of a public comment period on the RBR proposed amendments.

The proposed amendments include revisions or modifications of Ohio rules 1513-3-01—definitions, 1513-3-02—internal regulations, 1513-3-0—appearances and practices before the board, 1513-3-04—appeals to the RBR, 1413-3-06—computation on and extension of time, 1513-3-06—temporary relief, 1513-3-10—discovery, 1513-3-11—motions, 1513-3-12—pre-hearing procedures, 1513-3-13—notice of hearings and continuance of hearing, 1513-3-14—site views and location of hearings, 15-3-16—conduct of evidentiary hearings, 1513-3-17—voluntary dismissal and settlement, 1513-3-18—reports and recommendations of the hearing officer, and 1513-3-20—costs. The revisions made to 1513-3-19—decisions of the board and 1513-3-21—awards of costs and expenses, were approved by OSM on May 23, 1985 (50 FR 21256).

The full text of the proposed program amendments submitted by Ohio is available for public inspection at the addresses listed above. Upon request to OSM's Field Office Director, each person may receive, free of charge, one single copy of the proposed amendments. The Director now seeks

public comment on whether the

Notices

VOL 50 ISS 146 JL 30 1985 UMI

public comment on whether the proposed amendments are no less stringent than SMCRA and no less effective than the Federal regulations. If approved the amendments will become part of the Ohio permanent regulatory program.

Procedural Matters

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7 and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, for this action OSM is exempt from the requirement to prepare a Regulatory Impact Analysis and this action does not require regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Managment and Budget under 44 U.S.C. 3507.

Oil Country Tubular Goods From Spain; Final Results of Changed Circumstances Administrative Review and Revocation of Antidumping Duty Order

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of Final Results of Changed Circumstances Administrative Review and Revocation of Antidumping Duty Order.

SUMMARY: On June 10, 1985, the Department of Commerce published the preliminary results of its administrative review of the antidumping duty order on oil country tubular goods from Spain and announced its tentative determination to revoke the order. The review covers the period from October 16, 1984.

We gave interested parties an opportunity to coment. We received no comments. We determine that domestic interested parties are no longer interested in continuation of the order. Therefore, we will revoke the order. In accordance with petitioners' notification the revocation will apply to all oil country tubular goods entered, or withdrawn from warehouse, for consumption on or after October 18, 1984.

EFFECTIVE DATE: October 18, 1984.

FOR FURTHER INFORMATION CONTACT: Chip Hayes or G. Leon McNeill, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377-5255/3601.

SUPPLEMENTARY INFORMATION:

Background

On June 10, 1985, the Department of Commerce ("the Department") published in the **Federal Register** (50 FR 24277) the preliminary results of its changed circumstances administrative review of the antidumping duty order on oil country tubular goods from Spain (50 FR 21479, May 24, 1985). The Department has now completed that administrative review, in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

Imports covered by the review are shipments of Spanish oil country tubular goods. Such merchandise is currently classifiable under items 610.3216, 610.3219, 610.3233, 610.3242, 610.3243, 610.3249, 610.3252, 610.3254, 610.3256, 610.3258, 610.3262, 610.3264, 610.3721, 610.3722, 610.3751, 610.3925, 610.3935, 610.4025, 610.4035, 610.4225, 610.4235, 610.4325, 610.4335, 610.4942, 610.4944, 610.4946, 610.4954, 610.4955, 610.4956, 610.4957, 610.4966, 610.4967, 610.4968, 610.4969, 610.4970, 610.5221, 610.5222, 610.5226, 610.5234, 610.5240, 610.5242, 610.5243, and 610.5244 of the Tariff Schedules of the United States Annotated. The review covers the period from October 18, 1984.

Final Results of the Review and Revocation

We gave interested parties an opportunity to comment on the preliminary results and tentative determination to revoke. We received no comments.

As a result of our review, we determine that the domestic interested parties are no longer interested in continuation of the antidumping duty order on oil country tubular goods from Spain and that the order should be revoked on this basis.

Therefore, we are revoking the order on oil country tubular goods from Spain effective October 18, 1984. We will instruct the Customs Service to proceed with liquidation of all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after October 18, 1984, without regard to antidumping duties and to refund any estimated antidumping duties collected with respect to those entries.

This administrative review, revocation and notice are in accordance with sections 751 (b) and (c) of the Tariff Act (19 U.S.C. 1675 (b), (c) and sections 353.53 and 353.54 of the Commerce Regulations (19 CFR 353.53, 353.54).

Dated: July 23, 1985.

Gilbert B. Kaplan,

Acting Deputy Assistant Secretary for Import Administration.

[A-588-003]

Stainless Clad Steel Plate From Japan; Intention To Review and Preliminary Results of Changed Circumstances Administrative Review and Tentative Determination To Revoke Antidumping Duty Order

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of Intention to review and Preliminary Results of Changed Circumstances Administrative Review and Tentative Determination to Revoke Antidumping Duty Order.

SUMMARY: The Department of Commerce has received information which shows changed circumstances sufficient to warrant an administrative review, under section 751(b)(1) of the Tariff Act, of the antidumping duty order on stainless clad steel plate from Japan. The review covers the period from October 1, 1984. The petitioner to this proceeding has notified the Department that it is no longer interested in the antidumping duty order. This affirmative statement of no interest provides a reasonable basis for the Department to revoke the order. Therefore, we tentatively determine to revoke the order. In accordance with the petitioner's notification, the revocation will apply to all stainless clad steel plate entered, or withdrawn from warehouse, for consumption on or after October 1, 1984. Interest parties are invited to comment on these preliminary results and tentative determination to revoke.

EFFECTIVE DATE: October 1, 1984.

FOR FURTHER INFORMATION CONTACT: Chip Hayes or G. Leon McNeill, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377-5255.

SUPPLEMENTARY INFORMATION:

Background

On August 6, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 34178-79), an antidumping duty order on stainless clad steel plate from Japan.

In a letter dated June 25, 1985, Lukens Steel Company, the petitioner in this proceeding, informed the Department that it was no longer interested in the order and stated its support for revocation of the order. Under section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department may revoke an antidumping duty order that is no longer of interest to domestic interested parties.

Scope of the Review

Imports covered by the review are shipments of stainless clad steel plate currently classifiable under item 607.9400 of the Tariff Schedules of the United States Annotated. The review covers that period from October 1, 1984.

Preliminary Results of the Review and Tentative Determination

As a result of our review, we preliminarily determine that Lukens Steel Company's affirmative statement of no interest in continuation of the antidumping duty order on stainless clad steel plate from Japan provides a reasonable basis for revocation of the order. In light of the October 1, 1984, effective date for revocation requested by the petitioner, there is good cause (as required by section 751(b)(2) of the Tariff Act) to conduct this review at this time.

Therefore, we tentatively determine to revoke the order on stainless clad steel plate from Japan effective October 1, 1984. We intend to instruct the Customs Service to proceed with liquidation of all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after October 1, 1984, without regard to antidumping duties and to refund any estimated antidumping duties collected with respect to those entries. The current requirement for a cash deposit of estimated antidumping duties will continue until publication of the final results of this review.

This notice does not cover unliquidated entries of stainless clad steel plate from Japan which were entered, or withdrawn from warehouse, for consumption prior to October 1, 1984. The Department will cover any such entries in a separate review, if one is requested.

Interested parties may submit written comments on these preliminary results and tentative determination to revoke within 30 days of the date of publication of this notice, and may request a hearing within five days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. The Department will publish the final results of the review and its decision on revocation, including its analysis of issues raised in any such written comments or at a hearing.

This intention to review, administrative review, tentative determination to revoke, and notice are in accordance with sections 751 (b) and (c) of the Tariff Act (19 U.S.C. 1675 (b), (c)) and §§ 353.53 and 353.54 of the Commerce Regulations (19 CFR 353.53, 353.54).

Gilbert B. Kaplan,

Acting Deputy Assistant Secretary for Import Administration.

July 23, 1985.

BILLING CODE 3510-DS-M

[A-588-015]

Television Receiving Sets, Monochrome and Color, From Japan; Final Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration/Import Administration; Commerce.

ACTION: Notice of Final Results of Administrative Review of Antidumping Finding.

SUMMARY: On September 12, 1984, the Department of Commerce published the preliminary results of its administrative review and tentative determination to revoke in part the antidumping finding on television receiving sets, monochrome and color, from Japan. The review covers television receiving sets manufactured by Orion Electric Co., Ltd., exported to the United States by Otake Trading Co., Ltd., and the period of review from April 1, 1981, through March 31, 1982.

We gave interested parties an opportunity to submit oral or written comments on the preliminary results and tentative determination to revoke in part. We received no comments on the preliminary results or the tentative determination to revoke.

EFFECTIVE DATE: July 30, 1985.

FOR FURTHER INFORMATION CONTACT: Michael A. Hudak or Linnea Bucher, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202)-377-2923/5255.

SUPPLEMENTARY INFORMATION:

Background

On September 12, 1984, the Department of Commerce ("the Department") published in the **Federal Register** (49 FR 35821), the preliminary results of its administrative review and tentative determination to revoke in part the antidumping finding on television receiving sets, monochrome and color, from Japan (36 FR 4597, March 10, 1971). The Department has now completed that administrative review.

Scope of the Review

Imports covered by the review are shipments of television receiving sets, monochrome and color, from Japan. Television receiving sets include, but are not limited to, units known as projection televisions, receiver monitors, and kits (containing all the parts necessary to receive a broadcast television signal and produce a video image). Not included are certain monitors not capable of receiving a broadcast signal, certain combination units (combinations of television receivers with other electrical entertainment components such as tape recorders, radio receivers, etc.), and certain sub-assemblies not containing the components essential for receiving a broadcast television signal and producing a video image.

The review covers television receiving sets manufactured by Orion Electric Co., Ltd., exported to the United States by Otake Trading Co., Ltd., and the period April 1, 1981 through March 31, 1982.

Final Results of Review

We gave interested parties an opportunity to comment on the preliminary results and the tentative determination to revoke in part. The Department received no written comments or requests for a hearing. Based on our analysis, the final results of our review are the same as those presented in the preliminary results of review and we determine that no margins exist for the period April 1, 1981 through March 31, 1982.

As provided for in § 353.48(b) of the Commerce Regulations, no cash deposit of estimated antidumping duties shall be required on entries of television receiving sets, manufactured in Japan by Orion Electric Co., Ltd., and exported to the United States by Otake Trading Co., Ltd. A cash deposit of 0.86 percent shall be required on future entries of this merchandise for any shipment from a new exporter not covered in this or prior reviews whose first shipment occurred after March 31, 1981. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

The Department encourages interested parties to review the public record and submit applications for protective orders as early as possible.

We will examine exports by Otake Trading Co., Ltd., made during the period April 1, 1982 through September 12, 1984, the date of our tentative determination to revoke in part, in our next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gilbert B. Kaplan,

Acting Deputy Assistant Secretary for Import Administration.

July 16, 1985.

Permits; Foreign Fishing

This document publishes for public review a summary of applications received by the Secretary of State requesting permits for foreign vessels to fish in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act (Magnuson Act, 16 U.S.C. 1801 *et seq.*)

Send comments on applications to: Fees, Permits and Regulations Division (F/M12), National Marine Fisheries Service, Department of Commerce. Washington, D.C. 20235

or, send comments to the Fishery Management Council(s) which review the application(s), as specified below:

Douglas G. Marshall, Executive Director. New England Fishery Management Council, 5 Broadway (Route 1), Saugus, MA 01906, 617/231–0422

John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council. Federal Building, Room 2115, 300 South New Street, Dover, DE 19901. 302/674–2331

David H.G. Gould, Executive Director, South Atlantic Fishery Management Council, Southpark Building, Suite 306, 1 Southpark Circle, Charleston, SC 29407. 803/571–1366

Omar Munoz-Roure, Executive Director. Caribbean Fishery Management Council, Banco De Ponce Building, Suite 1108, Hato Rey, PR 00818, 809/753–6910

Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 West Kennedy Blvd., Tampa, FL 33609, 813/228–2815

Joseph C. Greenley, Executive Director, Pacific Fishery Management Council. 526 S.W. Mill Street, Portland, OR 97201. 503/221–6352

Jim H. Branson, Executive Director, North Pacific Fishery Management Council, 411 W. Fourth Avenue, Suite 2D, Anchorage, AK 99510. 907/271–4060

Kitty M. Simonds, Executive Director, Western Pacific Fishery Management Council, 164 Bishop Street, Room 1405, Honolulu, HI 96813, 808/523–1368.

For further information contact John D. Kelly (Fees, Permits, and Regulations Division, 202–634–7432).

The Magnuson Act requires the Secretary of State to publish a notice of receipt of all applications for such permits summarizing the contents of the applications in the Federal Register. The National Marine Fisheries Service, under the authority granted in a memorandum of understanding with the Department of State effective November 29, 1943, issues the notice on behalf of the Secretary of State.

Individual vessel applications for fishing in 1985 have been received between June 1, 1985, and July 16, 1985, from the Government(s), shown below.

Dated: July 25, 1985.

William G. Gordon,

Assistant Administrator For Fisheries, National Marine Fisheries Service.

Joint Venture

Spain—The Spanish vessels, *Ria Deponteveda, Beiramar Dos,* and the *Isla Montana Clara* will replace the vessels, *Pescapuerta Tercero, Pescapuerta Segundo,* and *Campa De Torres,* in the joint venture operation published February 15, 1985, at 50 FR 6374 in the Nortwest Atlantic Ocean fishery. The vessels being replaced received a permit May 8, 1985, authorizing them for joint venture as well as directed fishing. Although the *Moradina* was originally included in this application, it was withdrawn, and the vessel will not be used in this operation. Notification of receipt of the permit application for the *Isla Montana Clara* was published December 3, 1984, at 49 FR 47317. The American partner is Stonavar Trading, Inc., Bristol, Rhode Island.

For the Information of the Reader

USSR—The Soviet vessel, *Mys Babushkini,* is a large stern trawler; however, its intended use is for other support activities only.

VOL 50 ISS 146 JL 30 1985 UMI

Organization of Notice

This notice contains three parts. Part I includes general information on mailing and delivering instructions. Part II includes the list of all application closing dates for new awards covered by this notice. Part III consists of individual application announcement for each program.

PART I—INSTRUCTIONS FOR TRANSMITTAL OF APPLICATIONS

Applicants should note specifically the instructions for the transmittal of applications included below:

Closing date for transmittal of applications: Applications for new awards must be mailed or hand delivered on or befor ethe closing date given in the individual application announcements included in this document.

Applications delivered by mail: Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: (insert appropriate CFDA Number), 400 Maryland Avenue, SW., Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping lable, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretry of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

Applications delivered by hand: Applications that are hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building #3, 7th and D Streets SW., Washington, D.C.

The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:00 p.m. (Washington D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

Applications that are hand delivered will not be accepted by the Application Control Center after 4:00 p.m. on the closing date.

Intergovernmental review: All programs in this notice are subject to the requirements of the Executive Order 12372 and the regulations in 34 CFR Part 79 except 84.072A, Indian-Controlled Schools—Enrichment and 84.061F, Education Personnel Development. The objective of Executive Order 12372 is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

The Executive Order—

- Allows States, after consultation with local officials, to establish their own process for review and comment on proposed Federal financial assistance;
- Increases Federal responsiveness to State and local officials by requiring Federal agencies to accommodate State and local views or explain why those views will not be accommodated; and
- Revokes OMB Circular A–95.

Transactions with nongovernmental entities, including State postsecondary educational institutions and federally recognized Indian tribal governments, are not covered by Executive Order 12372. Also excluded from coverage are research, development, or demonstration projects that do not have a unique geographic focus and are not directly relevant to the governmental responsibilities of a State or local government within that geographic area.

The following is the current list of States that have established a process, designated a single point of contact, and have selected these programs for review:

State		
Alabama	Missouri	Oregon
Arizona	Montana	Pennsylvania
Arkansas	Nebraska	South Carolina
California	Nevada	Texas
Connecticut	New Jersey	South Dakota
Deleware	New Mexico	Utah
Florida	New York	Vermont
Hawaii	North Dakota	Virginia
Indiana	Northern Mariana Islands	Washington
Kansas	Ohio	Wisconsin
Louisiana	Oklahoma	Wyoming
Maine		Guam
Michigan		

Immediately upon receipt of this notice, applicants that are governmental entities, including local educational agencies, must contact the appropriate State single points of contact to find out about, and to comply with, the State's process under the Executive Order. Applicants proposing to perform activities in more than one State should contact, immediately upon receipt of this notice, the single point of contact for each State and follow the procedures established in those States under the Executive Order. A list containing the single point of contact for each State is included in the application packages for these programs.

In States that have not established a process or chosen these programs for review, State, areawide, regional, and local entities may submit comments directly to the Department.

All comments from State single points of contact and all comments from State, areawide, regional, and local entities must be mailed or hand delivered by November 19, 1985 to the following address:

The Secretary, U.S. Department of Education, Room 4161 (Insert appropriate CFDA No.), 400 Maryland Avenue SW., Washington, D.C. 20202.

Proof of mailing will be determined on the same basis as applications.

PLEASE NOTE THAT THE ABOVE ADDRESS IS NOT THE SAME ADDRESS AS THE ONE TO WHICH THE APPLICANT MUST SUBMIT ITS COMPLETED APPLICATION. *DO NOT SEND APPLICATIONS TO THE ABOVE ADDRESS.*

APPLICATION FORMS: Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. However, the program information package is only intened to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirements beyond those imposed under the statute and regulations.

The Secretary strongly urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

PART III—INDIVIDUAL ANNOUNCEMENTS FOR PROGRAMS LISTED IN PART II

84.072A—Indian Education Act—Part A—Indian-Controlled Schools—Enrichment

Closing date: September 20, 1985.

Applications are invited for new grants under the Indian Education Act—Indian Controlled Schools—Enrichment Projects.

Authority for this program is contained in section 303(b) of Part A of the Act, as amended.

(20 U.S.C. 241bb(b)).

The purpose of the enrichment grants is to provide financial assistance for educational enrichment projects designed to meet the special educational and culturally related academic needs of Indian children in Indian-controlled elementary and secondary schools or local educational agencies that are located on or geographically near one or more reservations. The requirement that a school be on or near a reservation does not apply to schools serving Indian children in California, Oklahoma, or Alaska.

Grants for enrichment projects may be to Indian tribes, Indian organizations, and local educational agencies that have been in existence not more than three years.

Program information: In Fiscal Year (FY) 1985, 35 enrichment projects were awarded grants totaling $4,410,000. The average grant amount was $126,000.

Applicotion forms: Application forms and program information packages are expected to be available by August 8, 1985. These may be obtained by writing to Indian Education Programs, U.S. Department of Education 400 Maryland Avenue SW., Room 2177, FOB–6, Washington, D.C. 20202.

(Approved by the Office of Management and Budget under control number 1810–0021)

Available funds: The President's budget request for FY 1986 was for $4,410,000 for this program. The Congress has not passed the FY 1986 appropriation act covering this program. If the Congress appropriates the request amount, it is estimated that the awards would range from $79,000 to $289,000. The estimated average grant would be $147,000 and approximately 30 projects would be supported. Projects supported under this program would be for a period of one year.

These estimates do not bind the U.S. Department of Education to a specific number of grants, or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

Applicable regulations: The following regulations apply to this program:

(a) The regulations governing the Indian Education Programs in 34 CFR Part 250 and 253, published in the **Federal Register** on June 7, 1984 at 49 FR 23761 and 23767, and as amended, published in the **Federal Register** on March 18, 1985 at 50 FR 10925.

(b) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, and 78.

Furtner information: For further information contact: Elsie Janifer, Indian Education Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue SW., Room 2177, FOB–6, Washington, D.C. 20202. Telephone: (202) 732–1916.

(20 U.S.C. 241bb(b))

84.061A—Indian Education Act—Part B—Educational Services for Indian Children

Closing date: September 20, 1985.

Applications are invited for new grants under the Educational Services for Indian Children program.

Authority for this program is contained in section 1005(a) and (c) of the Act, as amended.

(20 U.S.C. 3385 (a), (c))

This program provides financial assistance for:

(1) Projects designed to improve educational opportunities for Indian children by providing educational services that are not available in sufficient quantity or quanity to those children; and

(2) Enrichment projects that introduce innovative and exemplary approaches, methods, and techniques into the education of Indian children in elementary and secondary schools.

Grants may be made to State educational agencies, local educational agencies, Indian tribes, Indian organizations, and Indian institutions.

Program information: In Fiscal Year (FY) 1985, 33 projects were awarded service grants totaling $3,430,000. The average grant award amount was $103,939.

Application forms: Application forms and program information packages are expected to be available by August 8, 1985. These my be obtained by writing to Indian Education Programs, U.S. Department of Education, 400 Maryland Avenue SW., Room 2177, FOB–6, Washington, D.C. 20202.

(Approved by the Office of Management and Budget under control number 1810–0021).

Available funds: The President's budget request for FY 1986 was for $3,430,000 for this program. The Congress has not passed the FY 1986 appropriation act covering this program. If the Congress appropriates the requested amount, it is estimated that the awards would range from $43,000 to $300,000. The estimated average grant would be $100,882 and approximately 34 projects would be supported. Projects supported under this program would be for a period of one year.

These estimates do not bind the U.S. Department of Education to a specific number of grants, or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

Applicable regulations: The following regulations apply to this program:

(a) The regulations governing the Indian Education Program in 34 CFR Parts 250 and 254, published in the **Federal Register** on June 7, 1984 at 49 FR 23761 and 23769.

(b) The Educational Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, 78 and 79.

Further information: For further information contact Elise Janifer, Indian Education Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, SW., Room 2177, FOB–6, Washington, D.C. 20202. Telephone: (202) 732–1918.

(20 U.S.C. 3385(a), (c))

84.061C—Indian Education Act—Part B—Planning Projects for Indian Children

Closing date: September 20, 1985.

Applications are invited for new planning projects under the Planning, Pilot, and Demonstration Projects for Indian Children program.

Authority for this program is contained in section 1005(a)(1) and (b) of the Act, as amended.

(20 U.S.C. 3385(a)(1), (b))

This program provides financial assistance for projects designed to create programs for improving educational opportunities for Indian children.

Grants may be made to State educational agencies, local educational agencies, Indian tribes, Indian

organizations, Indian institutions, and federally supported elementary and

(20 U.S.C. 3385(a)(1), (b))

84.061E—Indian Education Act—Part B—Demonstration Projects for Indian

(EDGAR), 34 CFR Parts 74, 75, 77, 78.

Available funds: The President's

organizations, Indian institutions, and federally supported elementary and secondary schools for Indian children.

Program information: In Fiscal Year (FY) 1985, eight projects were awarded planning grants totaling $531,180. The average grant amount was $66,398.

Application forms: Application forms and program information packages are expected to be available by August 8, 1985. These may be obtained by writing to Indian Education Programs, U.S. Department of Education, 400 Maryland Avenue, SW., Room 2177, FOB–6, Washington, D.C. 20202.

(Approved by the office of Management and Budget under control number 1810–0021)

Available funds: Under the President's budget request for FY 1986 about $532,180 would be alocated to this program. The Congress has not passed the FY 1986 appropriation act covering this program. If the Congress appropriates the requested amount, it is estimated that the awards would range from $28,000 to $115,000. The average grant would be $66,398 and approximately eight projects would be supported. Projected supported under this program would be for a period of one year.

These estimates do not bind the U.S. Department of Education to a specific number of grants, or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

Applicable regulations: The following regulations apply to this program:

(a) The regulations governing the Indian Education Programs in 34 CFR Parts 250 and 255, published in the **Federal Register** on June 7, 1984 at 49 FR 23761 and 23770.

(b) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, 78, and 79.

Further information: For further information contact Elsie Janifer, Indian Education Programs, Office of Elementary and Secondary Education. U.S. Department of Education, 400 Maryland Avenue SW., Room 2177, FOB–6, Washington, D.C. 20202. Telephone: (202) 732–1918.

(20 U.S.C. 3385(a)(1), (b))

84.061D—Indian Education Act—Part B—Pilot Projects for Indian Children

Closing date: September 20, 1985.

Applications are invited for new pilot projects under the Planning, Pilot, and Demonstration Projects for Indian Children program.

Authority for this program is contained in section 1005 (a)(1) and (b) of the Act, as amended.

(20 U.S.C. 3385(a)(1), (b))

This program provides financial assistance for projects designed to test the effectiveness of programs for improving educational opportunities for Indian children.

Grants may be made to State educational agencies, local educational agencies, Indian tribes, Indian organizations, Indian institutions, and federally supported elementary and secondary schools for Indian children.

Program information: In Fiscal Year (FY) 1985, four projects were awarded pilot grants totaling $613,569. The average grant amount was $153,392.

Application forms: Application forms and program information packages are expected to be available by August 8, 1985. These may be obtained by writing to Indian Education Programs, U.S. Department of Education, 400 Maryland Avenue SW., Room 2177, FOB–6, Washington, D.C. 20202.

(Approved by the Office of Management and Budget under control number 1810–0021)

Available funds: Under the President's budget request for FY 1986 about $613,569 would be allocated to this program. The Congress has not passed the FY 1986 appropriation act covering this program. If the Congress appropriates the requested amount, it is estimated that the awards would range from $32,000 to $153,000. The average grant would be $102,094 and approximately six projects would be supported. Projects supported under this program would be for a period of one year.

These estimates, however, do not bind the U.S. Department of Education to a specific number of grants, or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

Applicable regulations: The following regulations apply to this program: (a) The regulations governing Indian Education Programs in 34 CFR Parts 250 and 255, published in the **Federal Register** on June 7, 1984 at 49 FR 23761 and 23770.

(b) The Education Department General Administrative Regulations (EDGAR), 34 CFR Parts 74, 75, 77, 78, and 79.

Further information: For further information contact Elsie Janifer, Indian Education Programs, U.S. Department of Education, Office of Elementary and Secondary Education, 400 Maryland Avenue SW., Room 2177, FOB–6, Washington, D.C. 20202. Telephone: (202) 732–1918.

(20 U.S.C. 3385(a)(1), (b))

84.061E—Indian Education Act—Part B—Demonstration Projects for Indian Children

Closing date: September 20, 1985.

Applications are invited for new demonstration projects under the Planning, Pilot, and Demonstration Projects for Indian children program.

Authority for this program is contained in section 1005 (a)(1) and (b) of the Act, as amended.

(20 U.S.C. 3385(a)(1), (b))

This program provides financial assistance for projects designed to demonstrate the effectiveness of programs for improving educational opportunities for Indian children.

Grants may be made to State educational agencies, local educational agencies, Indian tribes, Indian organizations, Indian institutions, and federally-supported elementary and secondary schools for Indian children.

Program information: In Fiscal Year (FY) 1985, ten projects were awarded demonstration grants totaling $1,304,251. The average grant amount was $130,425.

Application forms: Application forms and program information packages are expected to be available by August 8, 1985. These may be obtained by writing to Indian Education Programs, U.S. Department of Education, 400 Maryland Avenue SW., Room 2177, FOB–6, Washington, D.C. 20202.

(Approved by the Office of Management and Budget under control number 1810–0021)

Available funds: Under the President's budget request for FY 1986 about $1,304,251 would be allocated for this program. The Congress has not passed the FY 1986 appropriation act covering this program. If the Congress appropriates the requested amount, the awards would range from $42,000 to $253,000. The estimated average grant would be $130,425 and approximately ten projects would be supported. Projects supported under this program would be for a period of one year.

These estimates, however, do not bind the U.S. Department of Education to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulations.

Applicable regulations: The following regulations apply to this program:

(a) The regulations governing Indian Education Programs in 34 CFR Parts 250 and 255, published in the **Federal Register** on June 7, 1984 at 49 FR 23761 and 23770.

(b) The Education Department General Administrative Regulations (EDGAR), 34 CFR Parts 74, 75, 77, 78, and 79.

Further information: For further information contact Elsie Janifer, Indian Education Programs, U.S. Department of Education, Office of Elementary and Secondary Education, 400 Maryland Avenue SW., Room 2177, FOB–6, Washington, D.C. 20202. Telephone: (202) 732–1918.

(20 U.S.C. 3385 (a)(1), (b))

84.061F—Indian Education Act—Part B—Educational Personnel Development

Closing date: September 20, 1985.

Applications are invited for new grants under the Educational Personnel Development program.

Authority for the Educational Personnel Development program is contained in section 1005(d) and section 422 of the Indian Education Act, as amended.

(20 U.S.C. 3385(d), 3385a)

This program provides financial assistance to projects designed to (1) prepare persons to serve Indian students as teachers, administrators, teacher aides, social workers, and ancillary educational personnel; and (2) improve the qualifications of persons serving Indian students in such capacities.

Under the section 1005(d) program, grants may be made to institutions of higher education, and to State educational agencies and local educational agencies in combination with those institutions.

Under the section 422 program, grants may be made to institutions of higher education, Indian tribes, and Indian organizations.

The estimated maximum stipend for participants in projects in Fiscal Year (FY) 1986 will be $600 per month at the graduate level and $375 per month at the undergraduate level. An estimated maximum allowance of $90 per month will be allowed for each dependent.

Program information: In Fiscal Year (FY) 1985, six grants were awarded under section 1005(d) totaling $1,176,000. The average grant amount was $196.000. Under section 422, nine grants were awarded totaling $980,000. The average grant amount was $108,889.

Application forms: Application forms and program information packages are expected to be available by August 8, 1985. These may be obtained by writing to Indian Education Programs, U.S. Department of Education, 400 Maryland Avenue SW., Room 2177, FOB–6, Washington, D.C. 20202.

(Approved by the Office of Management and Budget under control number 1810–0021)

Available funds: The President's budget request for FY 1986 was for $1,176,000 for section 1005 and $980,000 for section 422. The Congress has not passed the FY 1986 appropriation act covering this program. If the Congress appropriates the requested amount, it is estimated that the awards for section 1005 would range from $162,000 to $265,000 and awards for section 422 will range from $84,000 to $216,000. The estimated average grant would be $168,000 for section 1005 and $108,889 for section 422. It is estimated that approximately seven projects would be supported under section 1005, and nine under section 422. Projects supported under this program would be for a period of one year.

These estimates, however, do not bind the U.S. Department of Education to a specific number of grants or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

Applicable regulations: The following regulations apply to this program:

(a) The regulations governing Indian Education Programs in 34 CFR Parts 250 and 256, published in the **Federal Register** on June 7, 1984 at 49 FR 23761 and 23774.

(b) The Education Department General Administrative Regulations (EDGAR), 34 CFR Parts 74, 75, 77, and 78.

Further information: For further information contact Elsie Janifer, Indian Education Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, SW., Room 2177, FOB–6, Washington, D.C. 20202. Telephone: (202) 732–1918.

(20 U.S.C. 3385(d), 3385a)

84.062A—Indian Education Act—Part C—Educational Services for Indian Adults

Closing date: September 20, 1985.

Applications are invited for new projects under the Educational Services for Indian Adults program.

Authority for this program is contained in section 315(b) of Part C of the Act, as amended.

(20 U.S.C. 1211a(b))

This program issues awards to Indian tribes, Indian organizations, and Indian institutions for educational service projects.

The purpose of the projects is to improve educational opportunities for Indian adults.

Program information: In Fiscal Year (FY) 1985, thirteen projects were awarded grants under this program totaling $1,176,000. The average grant amount was $90,462.

Application forms: Application forms and program information packages are expected to be available by August 8, 1985. These may be obtained by writing to Indian Education Programs, U.S. Department of Education, 400 Maryland Avenue SW., Room 2177, FOB–6, Washington, D.C. 20202. (Approved by the Office of Management and Budget under control number 1810–0021).

Available funds: The President's budget request for FY 1986 was for $1,176,000 for this program. The Congress has not passed the FY 1986 appropriation act covering this program. If the Congress appropriates the requested amount, it is estimated that the award would range from $10,000 to $300,000. The estimated average grant would be $98,000 and approximately twelve projects would be supported. Projects supported under this program would be for a period of one year.

These estimates, however, do not bind the U.S. Department of Education to a specific number of grants, or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

Applicable regulations: The following regulations apply to this program:

(a) The regulations governing Indian Education Programs in 34 CFR Parts 250 and 257, published in the **Federal Register** on June 7, 1984 at 49 FR 23761 and 23776.

(b) The Education Department General Administrative Regulations (EDGAR), 34 CFR Parts 74, 75, 77, 78, and 79.

Further information: For further information contact Elsie Janifer, Indian Education Programs, U.S. Department of Education, Office of Elementary and Secondary Education, 400 Maryland Avenue SW., Room 2177, FOB–6, Washington, D.C. 20202. Telephone: (202) 732–1918.

(20 U.S.C. 1211a(b))

84.062C—Indian Education Act—Part C—Planning Projects for Indian Adults

Closing date: September 20, 1985.

Applications are invited for new planning projects under the Planning, Pilot, and Demonstration Projects for Indian Adults program.

Authority for this program is contained in section 315(a)(1), (2) of Part C of the Act, as amended.

(20 U.S.C. 1211a(a)(1), (2))

This program provides financial assistance for projects designed to create effective programs for improving

employment and educational

Further information: For further

estimated that the awards would range

a private organization, local educational agency, State agency, or the Bureau of

DEPARTMENT OF ENERGY

Headquarters Building located at 1002 NE. Holladay, Portland, Oregon,

employment and educational opportunities for Indian adults.

Grants may be made to State educational agencies, local educational agencies, Indian tribes, Indian organizations, and Indian institutions.

Program information: In Fiscal Year (FY) 1985, three planning projects were awarded grants under this program totaling $332,379. The average grant amount was $110,793.

Program priorities: Under 34 CFR 75.105(c)(1), "Annual Priorities," the Secretary invites applicants to submit applications that address the special needs of Indian adults who reside in rural or isolated areas where adult educational services are not provided by a private organization, local educational agency, State agency, or the Bureau of Indian Affairs, Department of the Interior.

This priority, however, is not weighted. An application that meets this priority receives no competitive or absolute preference over applications that do not meet the priority.

Application forms: Application forms and program information packages are expected to be available by August 8, 1985. These may be obtained by writing to Indian Education Programs, U.S. Department of Education, 400 Maryland Avenue SW., Room 2177, FOB–6, Washington, D.C. 20202.

(Approved by the Office of Management and Budget under control number 1810–0021)

Available funds: Under the President's budget request for FY 1986 about $332,379 would be allocated to this program. The Congress has not passed the FY 1986 appropriation act covering this program. If the Congress appropriates the requested amount, it is estimated that the awards would range from $78,688 to $162,000. The estimated average grant would be $110,793 and approximately three projects would be supported. Projects supported under this program would be for a period of one year.

These estimates, however, do not bind the U.S. Department of Education to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulations.

Applicable regulations: The following regulations apply to this program:

(a) The regulations governing Indian Education Programs in 34 CFR Parts 250 and 258, published in the Federal Register on June 7, 1984 at 49 FR 23761 and 23777.

(b) The Education Department General Administrative Regulations (EDGAR), 34 CFR Parts 74, 75, 77, 78, and 79.

Further information: For further information contact Elsie Janifer, Indian Education Programs, U.S. Department of Education, Office of Elementary and Secondary Education, Room 2177, FOB–6, 400 Maryland Avenue SW., Washington, D.C. 20202. Telephone: (202) 732–1918.

(20 U.S.C. 1211a(a)(1), (2))

84.062D—Indian Education Act—Part C—Pilot Projects for Indian Adults

Closing date: September 20, 1985.

Applications are invited for new pilot porjects under the Planning, Pilot, and Demonstration Projects for Indian Adults program.

Authority for this program is contained in section 315(a)(1), (2) of Part C of the Act, as amended.

(20 U.S.C. 1211a(a)(1), (2))

This program provides financial assistance for projects designed to test the effectiveness of programs for improving employment and educational opportunities for Indian adults.

Grants may be made to State educational agencies, local educational agencies, Indian tribes, Indian organizations, and Indian institutions.

Program information: In Fiscal Year (FY) 1985, six pilot projects were awarded grants totaling $621,661. The average grant amount was $103,610.

Program priorities: Under 34 CFR 75.105(c)(1), "Annual Priorities," the Secretary invites applicants to submit applications that address the special needs of Indian adults who reside in rural or isolated areas where adult educational services are not provided by a private organization, local educational agency, State agency, or the Bureau of Indian Affairs, Department of the Interior.

This priority, however, is not weighted. An application that meets this priority receives no competitive or absolute preference over applications that do not meet the priority.

Application forms: Application forms and program information packages are expected to be available by August 8, 1985. These may be obtained by writing to Indian Education Programs, U.S. Department of Education, 400 Maryland Avenue SW., Room 2177, FOB–6, Washington, D.C. 20202.

(Approved by the Office of Management and Budget under control number 1810–0021)

Available funds: Under the President's budget request for FY 1986 about $621,661 would be allocated to this program. The Congress has not passed the FY 1986 appropriation act covering this program. If the Congress appropriates the requested amount, it is estimated that the awards would range from $92,000 to $123,000. The estimated average grant would be $103,610 and approximately six projects would be supported. Projects supported under this program would be for a period of one year.

These estimates, however, do not bind the U.S. Department of Education to a specific number of grants, or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

Applicable regulations: The following regulations apply to this program:

(a) The regulations governing Indian Education Programs in 34 CFR Parts 250 and 258, published in the Federal Register on June 7, 1984 at 49 FR 23761 and 23777.

(b) The Education Department General Administrative Regulations (EDGAR), 34 CFR Parts 74, 75, 77, 78, and 79.

Further information: For further information contact Elsie Janifer, Indian Education Programs, U.S. Department of Education, Office of Elementary and Secondary Education, Room 2177, FOB–6, 400 Maryland Avenue SW., Washington, DC. 20202. Telephone: (202) 732–1918.

(20 U.S.C. 1211a(a)(1), (2))

84.062E—Indian Education Act—Part C—Demonstration Projects for Indian Adults

Closing date: September 20, 1985.

Applications are invited for new demonstration projects under the Planning, Pilot, and Demonstration Projects for Indian Adults program.

Authority for this program is contained in section 315(a)(1), (2) of Part C of the Act, as amended.

(20 U.S.C. 1211a(a)(1), (2))

This program provides financial assistance for projects designed to demonstrate the effectiveness of programs for improving employment and educational opportunities for Indian adults.

Grants may be made to State educational agencies, local educational agencies, Indian tribes, Indian organizations, and Indian institutions.

Program Information: In Fiscal Year (FY) 1985, seven demonstration projects were awarded grants totaling $809,960. The average grant amount was $115,709.

Program priorities: Under 34 CFR 75.105(c)(1), "Annual Priorities," the Secretary invites applicants to submit applications that address the special needs of Indian adults who reside in rural or isolated areas where adult educational services are not provided by a private organization, local educational agency, State agency, or the Bureau of Indian Affairs, Department of the Interior.

This priority, however, is not weighted. An application that meets this priority receives no competitive or absolute preference over applications that do not meet this priority.

Application forms: Application forms and program information packages are expected to be available by August 8, 1985. These may be obtained by writing to Indian Education Programs, U.S. Department of Education, Room 2177, FOB 6, 400 Maryland Avenue, SW., Washington, D.C. 20202.

(Approved by the Office of Management and Budget under control number 1810–0021)

Available funds: Under the President's budget request for FY 1986 about $809,960 would be allocated to this program. the Congress has not passed the FY 1986 appropriation act covering this program. If the Congress appropriates the requested amount, it is estimated that the awards would range from $30,000 to $165,000. The estimated average grant would be $115,709 and approximately seven projects would be supported. Projects supported under this program would be for a period of one year.

These estimates, however, do not bind the U.S. Department of Education to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulations.

Applicable regulations: The following regulations apply to this program:

(a) The regulations governing Indian Education Programs in 34 CFR Parts 250 and 258, published in the Federal Register on June 7, 1984 at 49 FR 23761 and 23777.

(b) The Education Department General Administrative Regulations (EDGAR), 34 CFR Parts 74, 75, 77, 78, and 79.

Further information: For further information contact Elsie Janifer, Indian Education Programs, U.S. Department of Education, Office of Elementary and Secondary Education, Room 2177, FOB–6, 400 Maryland Avenue SW., Washington, D.C. 20202. Telephone: (202) 732–1918.

(20 U.S.C. 1211a(a)(1), (2))

Dated: July 24, 1985.

William J. Bennett,

Secretary of Education.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Bonneville Power Administration

Proposal To Implement the Industrial Incentive Rate for the Direct-Service Industrial Customers of the Bonneville Power Administration

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice and request for comments. *BPA File No:* INCENT–3.

SUMMARY: On July 19, 1985, BPA proposed implementation of the Industrial Incentive Rate for BPA's direct-service industrial customers (DSIs) as provided in BPA's 1985 Wholesale Power Rate Schedules. The market price for aluminum is at an historically low level in real terms. At this time, the U.S. Market price is approximately 47 cents per pound. Several DSIs are expected to curtail production from current levels beginning in September 1985 when BPA's industrial rate increases as a result of the winter energy charge taking effect.

In an effort to maintain as much of the existing load as possible, BPA has investigated whether BPA's revenues would increase as a result of implementing an Industrial Incentive Rate. Based on the results of this study, BPA proposes adopting an Incentive Rate. The rate would include a demand charge equal to that included in the Standard Industrial Rate and an energy charge which has been reduced by 5 mills per kilowatthour. If adopted, the Industrial Incentive Rate would become effective for a 9-month period beginning September 1, 1985, and would be applied on a take-or-pay basis to the committed loads of those DSIs who elect to purchase under this arrangement. Additional power could be purchased by the DSIs at either the Standard or Premium Industrial Rate. BPA proposes to implement the Industrial Incentive Rate only if, in the aggregate, the DSIs committed to purchasing approximately 1900 megawatts or more of Industrial Firm Power. BPA has provided notice of this proposed action to its customers as required by BPA's General Rate Schedule Provisions (GRSPs).

Responsible Official: Janet W. McLennan, Assistant Power Manager for Natural Resources and Public Services, is the official responsible for implementation of the Industrial Incentive Rate.

DATE: A Public Information and Comment Forum on this proposal will be held from 9 a.m.—12 noon, Tuesday, August 6, in Room 464 of the BPA Headquarters Building located at 1002 NE. Holladay, Portland, Oregon.

ADDRESS: Address comments to the Public Involvement Manager, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212. Written comments must be received by 5 p.m. on August 12, 1985, in order to be considered in determining the appropriateness of implementing the Industrial Incentive Rate.

FOR FURTHER INFORMATION CONTACT: Ms. Lynn Baker, Public Involvement Office, at the address listed above. Telephone numbers, voice/TTY for the Public Involvement Office are: 503–230–3478 in Portland; toll-free 800–452–8429 for Oregon outside of Portland; 800–547–6048 for Washington, Idaho, Montana, Utah, Nevada, Wyoming, and California. Information may also be obtained from:

Mr. George Gwinnutt, Lower Columbia Area Manager, Suite 288, 1500 Plaza Building, 1500 NE. Irving Street, Portland, Oregon 97232, 503–230–4551

Mr. Ladd Sutton, Eugene District Manager, Room 206, 211 East Seventh Avenue, Eugene, Oregon 97401, 503–687–6952

Mr. Wayne R. Lee, Upper Columbia Area Manager, Room 561, West 920 Riverside Avenue, Spokane, Washington 99201, 509–456–2518

Mr. George E. Eskridge, Montana District Manager, 800 Kensington, Missoula, Montana 59801, 406–329–3060

Mr. Ronald K. Rodewald, Wenatchee District Manager, P.O. Box 741, Wenatchee, Washington 98801, 509–662–4377, extension 379

Mr. Reginald Kaiser, Puget Sound Area Manager, 415 First Avenue North, Room 250, Seattle, Washington 98109, 206–442–4131

Mr. Thomas Wagenhoffer, Snake River Area Manager, West 101 Poplar, Walla Walla, Washington 99362, 509–434–6226, extension 701

Mr. Robert N. Laffel, Idaho Falls District Manager, 531 Lomax Street, Idaho Falls, Idaho 83401, 208–523–2706

Mr. Frederic D. Rettenmund, Boise District Manager, Owyhee Plaza, Suite 245, 1109 Main Street, Boise, Idaho 83707, 208–334–9137.

SUPPLEMENTARY INFORMATION:

I. Background

The Industrial Incentive Rate is a reduced rate designed to increase BPA's revenues during periods of adverse market conditions for the aluminum industry over those revenues which would otherwise be expected to result from application of BPA's Standard Industrial Rate. The rate is also intended

to stimulate industrial production and maintain employment in the Pacific

BPA Public Involvement office listed under ADDRESSEES.

Comment date: August 5, 1985, in accordance with Standard Paragraph E

Agreement and related Billing Format will be applicable to sales of capacity

Firm Power Other Than State Allocated Power" dated October 2, 1962 and

385.214). All such motions or protests should be filed on or before

VOL 50 ISS 146 JL 30 1985 UMI

to stimulate industrial production and maintain employment in the Pacific Northwest. Under the terms of the CRSPs, the Industrial Incentive Rate can be offered to the DSIs only if BPA can demonstrate that the net result of implementing the rate would be to increase total BPA revenues. The proposed Incentive Rate would take effect in September, the first month that BPA's winter energy charge applies to power sales. The rate would remain in effect for a 9-month period, ending May 31, 1986. Although BPA has not yet implemented the Incentive Rate pursuant to the 1985 wholesale power rate schedules, this Incentive Rate will, if implemented, be the third such rate to be adopted by BPA.

For the week ending July 12, 1985, the U.S. market price for aluminum was approximately 47 cents per pound as contrasted to the January 1984 price of slightly more than 77 cents per pound. In response to reduced prices for their products and high worldwide inventories, several of BPA's industrial customers are expected to curtail production on September 1, 1985, when BPA's winter energy charges first apply. BPA is concerned about the effect of such curtailments on its revenues and believes that implementation of another Industrial Incentive Rate may prevent serious erosion of BPA's revenues.

BPA has conducted a feasibility study which concludes that it is appropriate to propose implementing another Industrial Incentive Rate effective in September. In conducting this study, BPA used various computer programs to determine whether total BPA revenues would be greater under the Standard Industrial Rate or under an Incentive Rate.

II. Proposal

BPA is proposing to adopt an Industrial Incentive Rate which would result in a 5 mill per kilowatthour discount from the Standard Industrial Rate for the months of September 1985 through May 1986. This discount would result in an average DSI rate of 19.08 mills per kilowatthour for the Incentive Rate period.

BPA's proposal stipulates that any offer of the Industrial Incentive Rate be conditioned on a total DSI take-or-pay commitment level averaging approximately 1900 megawatts over the 9-month period. If the rate were adopted, BPA would expect to earn $1.3 million more over the Incentive Rate period than would be earned were the Standard Industrial Rate to remain in effect.

Copies of the feasibility study and draft contract are available from the BPA Public Involvement office listed under ADDRESSEES.

III. Receipt of Comments

BPA is now accepting public comments on its proposed implementation of the Industrial Incentive Rate. BPA will accept both oral and written comment at the Public Information and Comment Forum listed under DATES. BPA will accept written comment received by 5 p.m. on August 12, 1985, at the address listed above. Comments received by the Public Involvement Manager or presented at the Public Information and Comment Forum will be considered in determining the appropriateness of BPA's implementation of the Industrial Incentive Rate. Should BPA adopt an Incentive Rate for the period September 1, 1985, through May 31, 1986, BPA will publish a notice of its final action on this matter in the Federal Register after September 1, 1985.

Issued in Portland, Oregon, on July 19, 1985.

James J. Jura,

Acting Administrator.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER85-625-000, et al.]

Electric Rate and Corporate Regulation Filings; Altech Energy III, et al.

July 25, 1985.

Take notice that the following filings have been made with the Commission:

1. Altech Energy III

[Docket No. ER85-625-000]

Take notice that on July 12, 1985, Altech Energy III (Altech), a California limited partnership, submitted for filing a long term contract for the sale of power to Southern California Edison Company (Edison). The power will be made available from some 390 wind powered turbine generators now under construction in Riverside County, California. The anticipated capacity of the generators is 36,121 kw. the generators will comprise a small power production facility. The rates for the power and energy will be based on Edison's avoided costs as approved by the California Public Service Commission.

Altech has a requested waiver of the cost support requirements of the Commission's Regulations and has requested an effective date of October 1, 1985.

Comment date: August 5, 1985, in accordance with Standard Paragraph E at the end of this notice.

2. Centel Corporation

[Docket No. ER85-622-000]

Take notice that on July 9, 1985, Centel Corporation (Centel) tendered for filing revised Rate Schedule 85-D for Off-Peak service to generating and distribution municipals (the Firm Municipals).

Comment date: August 5, 1985, in accordance with Standard Paragraph E at the end of this notice.

3. Cliffs Electric Service Company

[Docket No. ER85-624-000]

Take notice that on July 12, 1985, Cliffs Electric Service Company (Service Company) tendered for filing an unexecuted wheeling agreement which provides the rate at which Upper Peninsula Power Company will be entitled to use Service Company's Plains Forsyth transmission line for non-firm transmission services. Service Company proposes a rate of 2.49 mills/kwh.

Service Company requests an effective date 60 days from the date of the filing.

Comment date: August 5, 1985, in accordance with Standard Paragraph E at the end of this notice.

4. Middle South Energy, Inc.

[Docket No. ER82-616-004]

Take notice that on June 28, 1985, Middle South Energy, Inc. (MSE) tendered for filing pursuant to Ordering Paragraph (L) of FERC Opinion No. 234, 31 FERC ¶ 61,305 (1985), six copies of the Unit Power Sales agreement dated June 10, 1982 between MSE, as seller, and Arkansas Power & Light Company, Louisiana Power & Light Company, Mississippi Power & Light Company and New Orleans Public Service Inc., as purchasers, (MSE Rate Schedule FERC No. 1) and related Billing Format (Exhibit A thereto) which have been revised as required by Opinion No. 234.

The Unit Power Sales Agreement establishes rates, terms and conditions of service for the sale of capacity and energy available to MSE from Unit 1 of the Grand Gulf Nuclear Electric Station which MSE has constructed near Port Gibson, Miss. In Opinion No. 234, the Commission ordered certain modifications in the Agreement and related Billing Format applicable to sales of such capacity and energy.

As the FERC has previously been advised, Grand Gulf Unit 1 will commence commercial operation on July 1, 1985. The revised Unit Power Sales Agreement and related Billing Format will be applicable to sales of capacity and energy from Grand Gulf Unit 1 Unit made thereafter by MSE to the purchasers.

Comment date: August 6, 1985, in accordance with Standard Paragraph H at the end of this notice.

5. Mississippi Power Company

[Docket No. ER85-620-000]

Take notice that on July 11, 1985, Mississippi Power Company tendered for filing an Amendment to the Contract between Mississippi Power Company and Singing River Electric Power Association providing for an additional delivery point.

Comment date: August 5, 1985, in accordance with Standard Paragraph E at the end of this notice.

6. Orange and Rockland Utilities, Inc.

[Docket No. ER85-634-000]

Take notice that on July 16, 1985, Orange and Rockland Utilities, Inc. (O&R) tendered for filing as an initial rate schedule a contract dated July 12, 1985 between O&R and the County of Orange, New York, through its agent, the Orange County Municipal Distribution Agency (MDA).

O&R states that the contract is for the purpose of delivery of "Preference Power" made available to the MDA by the New York Power Authority.

O&R requests an effective date of July 15, 1985, and therefore requests waiver of the Commission's notice requirements.

Comment date: August 5, 1985, in accordance with Standard Paragraph E at the end of this notice.

7. Southwestern Public Service Company

[Docket No. ER84-604-005]

Take notice that on June 19, 1985, Southwestern Public Service Company submitted for filing six (6) copies of its revised rates and revised cost of service statements in compliance with the Commission's order which was issued May 20, 1985.

Comment date: August 6, 1985, in accordance with Standard Paragraph H at the end of this notice.

8. Vermont Electric Power Company, Inc.

[Docket No. ER85-604-000

Take notice that Vermont Electric Power Company, Inc. ("VELCO") on July 5, 1985 filed a notice of cancellation of its FERC Rate Schedule No. 9, entitled "Agreement re Charges for Additional Facilities Constructed by VELCO for Transmission for Central Vermont of Firm Power Other Than State Allocated Power" dated October 2, 1962 and amended November 18, 1965 (Supplement No. 1), August 2 1966 (Supplement No. 2) and August 1, 1967 (Supplement No. 3). This notice of cancellation is requested to be permitted to become effective as of end-of-day June 30, 1985, when the agreement terminates by its terms. Waiver of the Commission's notice requirements is requested to allow the June 30, 1985 effective date. If waiver is not granted, the notice of cancellation is requested to be permitted to become effective on September 3, 1985, sixty days after filing.

Comment date: August 6, 1985, in accordance with Standard Paragraph E at the end of this notice.

9. Bonneville Power Administration

[Docket No. ER85-2021-002]

Take notice that on July 16, 1985, Bonneville Power Administration (BPA) submitted for filing a request for approval of its impact aid methodology, which was promulgated pursuant to section 7(m) of the Pacific Northwest Electric Power Planning and Conservation Act (Northwest Power Act). 16 U.S.C. § 839e(m). Section 7(m) provides that the Administrator may make annual impact aid payments to local governments within the region with respect to major transmission facilities which are located within the boundaries of such governments, and which are determined to have a substantial impact on such governments. Section 7(m)(2) states: "Such rule shall become effective on its approval, after considering its effect on rates established pursuant to this section, by the Federal Energy Regulatory Commission."

BPA requests approval of the methodology at the earliest possible date, for a period extending through June 30, 1990 the end of the rate period for which BPA has requested approval of the power and transmission rates filed in this docket. BPA requests that approval of the methodology not be delayed pending final confirmation and approval of the rates.

Comment date: August 5, 1985, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

H. Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before the comment date. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

FEDERAL RESERVE SYSTEM

Commerce & Energy Bank Holding Co., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the office of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than August 21, 1985.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Commerce & Energy Bank Holding Company*, Lafayette, Louisiana; to become a bank holding company by acquiring 100 percent of the voting shares of Commerce & Energy Bank of Lafayette, Lafayette, Louisiana.

2. *First Polk Bankshares, Inc.*, Cedartown, Georgia; to become a bank holding company by acquiring 80 percent of the voting shares of First National Bank of Polk County, Cedartown, Georgia.

B. **Federal Reserve Bank of St. Louis** (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Citizens Fidelity Corporation*, Louisville, Kentucky; to acquire 100 percent of the voting shares of Central Kentucky Bancorp, Inc., Elizabethtown, Kentucky, thereby indirectly acquiring First Hardin National Bank & Trust, Elizabethtown, Kentucky.

Financial Trust Corp et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than August 19, 1985.

A. **Federal Reserve Bank of Philadelphia** (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *Financial Trust Corp* (formerly Financial Trans Corp), Carlisle, Pennsylvania; to engage through its subsidiary, Financial Trust Life Insurance Company, Phoenix, Arizona, in acting as underwriter with respect to insurance limited to assuring repayment of the outstanding balance due on a specific extension of credit by a bank holding company or its subsidiary in the event of the death of disability of the debtor, pursuant to section 4(c)(8)(A) of the Act. These activities will be conducted in Cumberland, Franklin, and Perry Counties in the State of Pennsylvania.

B. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Landmark Banking Corporation of Florida*, Ft. Lauderdale, Florida, and *Citizens and Southern Georgia Corporation*, Atlanta, Georgia; to engage *de novo* through their subsidiary, Capital Group Leasing, Inc., Ft. Lauderdale, Florida, in leasing personal property, acting as agent with respect to insurance limited to assuring repayment of the outstanding balance due on a specific extension of credit by a bank holding company or its subsidiary in the event of the death or disability of the debtor, pursuant to section 4(c)(8)(A) of the Act.

to allow the applicant to measure consumer acceptance of the food.

VOL 50 ISS 146 JL 30 1985 UMI

temporary permit is to allow the applicant to measure consumer acceptance of the food.

DATES: The permit is effective for 15 months, beginning on the date the test product is introduced or caused to be introduced into interstate commerce, but no later than October 28, 1985.

FOR FURTHER INFORMATION CONTACT: F. Leo Kauffman, Center for Food Safety and Applied Nutrition (HFF–214), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–485–0107.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 130.17 concerning temporary permits to facilitate market testing of foods deviating from the requirements of a standard of identity promulgated under seciton 401 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 341), FDA is giving notice that a temporary permit has been issued to The Larsen Co., 529 North Broadway, P.O. Box 19027, Green Bay, WI 54307–9027, and Continental Can Co., Inc., 51 Harbor Plaza, Box Number 10004, Stamford, CT 06904–2004.

The permit covers limited interstate marketing tests of experimental packs of canned green beans. The test product deviates from the standard of identity for canned green beans prescribed in 21 CFR 155.120 (canned green beans and canned wax beans) in that it will contain added zinc chloride in an amount reasonably necessary to retain the green color of the product (up to 75 parts per million of zinc in the finished food). The test product meets all requirements of § 155.120, with the exception of the variation.

The permit provides for the temporary marketing of 210,000 cases of number 303 cans and 190,000 cases of number 10 cans of the test product. The experimental packs of the test product will be distributed in the continental United States. The test product is to be manufactured at The Larsen Co. plant in Cambria, WI.

The principal display panel of the label states the product name as "Cut Green Beans" and each of the ingredients used is stated on the label as required by the applicable sections of 21 CFR Part 101. The permit is effective for 15 months, beginning on the date the test product is introduced or caused to be introduced into interstate commerce, but no later than October 28, 1985.

Dated: July 19, 1985.

Sanford A. Miller,

Director, Center for Food Safety and Applied Nutrition.

Health Resources and Services Administration

Application Announcement for Grants for Graduate Training in Family Medicine

The Bureau of Health Professions, Health Resources and Services Administration, announces that applications for Fiscal Year 1986 Grants for Graduate Training in Family Medicine are being accepted under the authority of section 786(a) of the Public Health Service Act, as amended.

Section 786(a) authorizes the Secretary to make grants to public or nonprofit private hospitals, accredited schools of medicine or ostreopathy, and other public or private nonprofit entities to assist in meeting the cost of planning, developing and operating or participating in approved graduate training programs in the field of family medicine. In addition, section 786(a) authorizes assistance in meeting the cost of supporting trainees in such programs who plan to specialize or work in the practice of family medicine.

To receive support, programs must meet the requirements of regulations as set forth in 42 CFR Part 57, Subpart Q.

In the funding of approved applications, preference will be given to projects in which:

1. Substantial training experience is in settings which exemplify interdependent utilization of physicians and physician assistants and/or nurse practioners; and/or

2. Substantial portions of the training program are conducted in a primary medical manpower shortage area which is part of a health manpower shortage area(s) designated under section 332 of the Public Health Service Act or in an Area Health Education Center, funded at least in part, under section 781 of the Act.

Requests for application materials and questions regarding grants policy should be directed to: Grants Management Officer (D-15), Bureau of Health Professions, Health Resources and Service Administration, 5600 Fishers Lane, Rm. 8C-22, Rockville, Maryland 20857. Telephone: (301) 443-6960.

If additional programmatic information is needed, please contact: Primary Care Graduate, Medical Education Branch, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, Rm. 4C-04, Rockville, Maryland. Telephone: (301) 443-6820.

The deadline date for receipt of applications is September 27, 1985. Applications shall be considered as meeting the deadline date if they are either:

(1) *Received* on or before the deadline date, or

(2) *Postmarked* on or before the deadline and received in time for submission to the independent review group. A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

Applicants should be advised that the application announcement is a contingency action being taken to ensure that should funds become available for this purpose, they can be awarded in a timely fashion consistent with the needs of the programs as well as to provide for even distribution of funds throughout the fiscal year.

This program is listed at 13.379 in the *Catalog of Federal Domestic Assistance.* It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs of 45 CFR Part 100.

Dated: July 24, 1985.

John H. Kelso,

Acting Administration.

BILLING CODE 4160-16-M

Public Health Service

Cooperative Agreement Award to the Boys Clubs of America for a National Prevention Initiative

This notice is to provide information to the public concerning a planned cooperative agreement award by the Office of Disease Prevention and Health Promotion (ODPHP) to the Boys Clubs of America. This award will be made in response to an unsolicited proposal from this organization.

The Boys Clubs will undertake a national prevention demonstration and utilization project to test our strategies for preventing alcohol and drug abuse among its members. Prevention programs, involving Boys Clubs members and their parents, will be established at multiple demonstration sites across the country, and the results of these programs will be compared with control sites where there are regular Boys Clubs programs. The demonstration programs will emphasize the prevention techniques and life skills which prepare young people to understand and resist the social influences that promote alcohol use, drug use, and related behaviors. This project will be supported under a cooperative agreement award for a three-year period.

The cooperative agreement mechanism is being used because it has been determined that a substantial Federal role in the performance of the project will help to ensure results consistent with the Federal goal of developing models for national disease prevention and health promotion approaches. This award mechanism will also facilitate the involvement of a variety of Federal Government organizations with programs relevant to the proposed Boys Clubs program. The Office of Disease Prevention and Health Promotion, which will administer this award, will coordinate the involvement of staff from the National Institute on Drug Abuse and the National Institute on Alcohol Abuse and Alcoholism, as well as staff from other relevant programs within and outside HHS. Federal staff will assist in developing curricula, detailed evaluation plans, materials for use in the project and broader dissemination.

Because of their direct involvement with a national network of community programs, the Boys Clubs of America is in a unique position to carry out this proposed program with its affiliate organizations.

Supplemental information about this project may be obtained from: James A. Harrell, Deputy Director, Office of Disease Prevention and Health Promotion, 330 C Street, SW., Room 2132, Washington, D.C. 20201.

Dated: July 22, 1985.

J. Michael McGinnis,

Deputy Assistant Secretary for Health (Disease Prevention and Health Promotion).

BILLING CODE 4160-17-M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Confederated Tribes of the Goshute Reservation Ordinance Providing for the Introduction, Use, Possession, and Consumption of Alcohol

July 16, 1985.

This notice is published in accordance with the authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8, and in accordance with the Act of August 15, 1953, 67 Stat. 586, 18 U.S.C. 1161. I certify that the Goshute Business Council has duly adopted Ordinance No. 85-G-04 on April 12, 1985. The ordinance provides for the introduction, possession, use and consumption of alcohol within the areas of Indian country under the jurisdiction of the Confederated Tribe of Goshute in Utah and Nevada. The ordinance reads as follows:

John W. Fritz,

Deputy Assistant Secretary, Indian Affairs.

Ordinance No. 85-G-04

Now, Therefore, be it enacted by the Confederated Tribes of the Goshute Reservation, that pursuant to the authority vested in it by Article VII, Section 1(f) of the Constitution of the Confederated Tribes of the Goshute Reservation that the introduction, possession, use and consumption of alcoholic beverages shall be lawful within the exterior boundaries of those lands in the State of Nevada and Utah under the territorial jurisdiction of the Confederated Tribes of the Goshute Reservation, provided that such introduction, possession, use and comsumption shall be in conformity both with the laws of the State in which such act or transaction occurs and in accordance with the following:

Section 1

It shall be unlawful to sell alcoholic beverages by the bottle, drink, can or other package within the exterior boundaries of those lands of the States of Nevada and Utah, under the territorial jurisdiction of the Confederated Tribes of the Goshute Reservation.

Section 2

It shall be unlawful for any person to use or consume any alcoholic beverages while operating a motor vehicle.

Section 3

It shall be unlawful to open any container of alcoholic beverages in the passenger compartment of a motor vehicle when such vehicle is being driven.

Section 4

It shall be unlawful for any person[s] to manifestly consume alcoholic beverages, while under the influence of alcoholic beverages to the degree that he/she may endanger himself/herself or other persons or property.

Section 5

It shall be unlawful to consume, use, possess any alcoholic beverages within the restricted premises of the Goshute Tribal Building, Goshute Enterprise Welding Shop, and the Goshute Farming Enterprises (former Halstead Ranches), and at any other [sic] designated by the Goshute Business Council by the adoption of a tribal resolution.

Section 6

It shall be unlawful for any person to furnish any alcoholic beverages to any person under the age of twenty-one (21) years or to leave or to deposit any alcoholic beverages with the intent that the alcoholic beverages shall be procured by any person under the age of twenty-one (21 years).

Section 7

It shall be unlawful for any person under the age of twenty-one (21) years of age to introduce, possess, use or consume alcoholic beverages.

Section 8

Any Indian who violates any of the provisions of this ordinance shall be deemed guilty of an offense and upon conviction thereof, shall be punished by a fine of not more than $150 or by imprisonment of not more than thirty (30) days or both such fine and imprisonment: Provided, however, that any person under the age of eighteen (18) years may, in the discretion of the judge, be treated as a juvenile and have the charge(s) disposed of pursuant to applicable juvenile law and procedures.

Section 9

When any provisions of this ordinance is [sic] violated by a non-Indian, he or she will be referred to State, County, and/or Federal authorities for prosecution under applicable law.

Section 10

All ordinances, resolutions or acts that have previously been enacted by the Business Council of the Confederated Tribes of the Goshute Reservation which are in conflict with any provision[s] of this ordinance are hereby repealed.

Certification

I, the undersigned, as Vice-Chairman of the Business Council of the Confederated Tribes of the Goshute Reservation, do hereby certify that the Business Council of the Confederated Tribes of the Goshute Reservation, is composed of 5 members, of whom 4 constituting a quorum were present at a duly held meeting on the 12th day of April 1985 and that the foregoing ordinance was adopted and approved at such meeting by the affirmative vote of 3 FOR; 0 ABSTENTIONS; pursuant to the authority contained under Article VII, Section 1(f) of the Constitution of the Confederated Tribes of the Goshute Reservation, approved November 25, 1940.

Dated: April 15, 1985.

Henry Pete,

Vice-Chairman, Goshute Business Council.

Recommended Approval:

Steven D. Tibbetts,

Superintendent, Eastern Nevada Agency.

Ordinance No. 85–G–04.

Correction

In the FR Doc. 85–17447 appearing on page 30018 in the issue of Tuesday, July 23, 1985, make the following correction: In the third column, in the heading, the docket number should have read as set forth above.

BILLING CODE 1505–01–M

Camping Stay Limit on Public Land

AGENCY: Bureau of Land Management, Interior.

ACTION: Establishment of camping stay limit for public lands administered by the BLM in the Butte District, Montana. Persons may occupy any one site or miltiple sites within a 5 mile radius on public lands not closed or otherwise restricted to camping within the Butte District for a total period of not more than fourteen days during any 28-day period. Following the fourteen day period persons may not relocate within a distance of five (5) miles of the site that was just previously occupied until completion of the 28-day period. The fourteen day limit may be reached either through a number of separate visits or through a period of continuous occupations of a site. Under special circumstances and upon request, the authorized officer may give written permission for extension to the fourteen day limit.

Additionally, no person may leave personal property unattended in designated campgrounds, recreation developments or elsewhere on public lands within the Butte District for a period of more than 24 hours without written permission from the authorized officer.

SUPPLEMENTARY INFORMATION: This camping stay limit is being established in order to assist the Bureau in reducing the incidence of long-term occupancy trespass being conducted under the guise of camping on public lands within the Butte District. Of equal importance is the problem of long-term camping, which precludes equal opportunities for other members of the public to camp in the same area, which creates user conflicts.

DATE: This camping stay limit will be effective immediately upon publication in the **Federal Register.**

FOR MORE INFORMATION CONTACT: Jack McIntosh, District Manager, Butte District Office, 106 North Parkmont, P.O. Box 3388, Butte, Montana 59702, telephone (406) 494–5059.

Authority for this stay limit is contained in CFR Title 43, Chapter II Part 8365, subparts 8365.1–2 and 8365.2–3.

Jack A. McIntosh,

District Manager Butte District.

BILLING CODE 4310-84-M

Coeur d'Alene District; Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: District Advisory Council Meeting.

SUMMARY: Notice is hereby given, in accordance with Pub. L. 940579 and 43 CFR Part 1780, that a meeting of the Coeur d'Alene District Advisory Council will be held on Tuesday, August 27, 1985 at 10:00 a.m., at the Bureau of Land Management Office, 1808 North Third, Coeur d'Alene, ID 83814.

Agenda for the meeting will include:

1. Discussion of potential land actions;
2. Update on BLM/USFS Interchange;
3. Briefing on hazardous waste activities;
4. Update on Lower Salmon River withdrawal;
5. Discussion of nominations for expiring Council terms;
6. Arrangement for next meeting.

The meeting is open to the public. Interested persons may make oral statements to the Council between 11:30 a.m. and 12:00 noon, or file written statements for the Council's consideration. Anyone wishing to make an oral statement must notify the District Manager at the above address by August 23, 1985.

Depending on the number of persons wishing to make an oral statement, a per person time limit may be established.

Summary minutes of the meeting will be maintained in the District Office and will be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Dated: July 19, 1985.

Wayne Zinne,

District Manager.

A.I.D. Mission Directors in Jordan, Morocco, Tunisia and Yemen; Redelegation of Authority No. 113.9

Pursuant to the authority delegated to me by A.I.D. Delegations of Authority No. 5, dated December 29, 1961 (27 FR 449), as amended, with respect to Loan Agreements; No. 38, dated June 21, 1977 (42 FR 31511), as amended, with respect to Project Agreements, Trust Fund Agreements, and Grant Agreements; No. 40 dated December 29, 1981 (47 FR 1049) with respect to Source, Origin and Nationality for Procurement; No. 113, dated October 15, 1975, and No. 133 dated December 11, 1981, I hereby redelegate to the Directors of the A.I.D. Missions in Jordan, Morocco, Tunisia and Yemen authority to exercise any of the following functions assigned to me for the country to which such official is assigned, retaining for myself concurrent authority to exercise any of the functions herein redelegated:

1. The authority to approve project identification documents (PIDs) and program assistance initial proposals (PAIPs) for non-project assistance if such PIDs or PAIPs:

(a) Do not have an anticipated life of project funding of more than $2.5 million;

(b) Have been included in the Mission's annual action plan approved by AID/W; and

(c) Do not have a life of project in excess of ten years.

2. Authority to authorize a project or activity if such project or activity:

(a) Does not exceed $20 million over the approved life of the project (except as provided in paragraph 3 below);

(b) Does not present significant policy issues;

(c) Does not require waivers which may only be approved in AID/W or, if such waivers are required, that they have been approved prior to such authorization; and

(d) Does not have a life of project in excess of ten years and that such life of project has been approved in the PID review;

3. Authority to amend project or non-project assistance authorizations executed by any A.I.D. official, if the amendment:

(a) Does not result in a total life of project funding of more than $30 million;

(b) Does not present significant policy issues; and

(c) Does not require issuance of waivers which may only be approved in AID/W or, if such waivers are required, that they have been approved prior to such authorization.

4. Authority to negotiate, execute and implement trust fund agreements, project and non-project assistance agreements (both loan and grant) and amendment thereto duly authorized under the Foreign Assistance Act of 1961, as amended, in accordance with regulations, policies and procedures now or hereafter established or modified and promulgated within A.I.D. This authority shall include, without limitation, the following:

(a) Authority to prepare, negotiate, and execute letters of implementation;

(b) Authority to review and approve documents and other evidence submitted by borrowers or grantees in satisfaction of conditions precedent to financing under such agreements;

(c) Authority to negotiate, execute and implement all documents ancillary to such agreements.

5. Authority to sign or approve Project Implementation Orders.

6. Authority to review and approve the terms of country contracts, contractors, amendments and modifications to such contracts, and invitations for bids and request for proposals with respect thereto.

7. Authority to waive, in accordance with the criteria prescribed in Supplement B of A.I.D. Handbook 1:

(a) U.S. source, origin, and nationality requirements to permit A.I.D. financing of procurement of goods and services, other than transportation services, in countries included in A.I.D. Geographic Code 941 (Selected Free World) and the cooperating country when the cost of the goods and services does not exceed $5,000,000 per transaction (exclusive of transportation costs); and

(b) U.S. or Code 941 source, origin, and nationality requirements for specific transactions to permit A.I.D. financing of the procurement of goods and services, other than transportation services, in any country included in A.I.D. Geographic Code 899 (Free World) or A.I.D. Geographic Code 935 (Special Free World) when the cost of the goods and services does not exceed $5,000,000 per transaction (exclusive of transportation costs); provided, however:

(1) That all waivers of source, origin, and nationality for procurement of goods authorized pursuant to section 6(b) shall contain a certification by the approving official that "Exclusion of procurement from free world countries other than the cooperating country and countries included in Code 941 would seriously impede attainment of U.S. foreign policy objectives and objectives of the foreign assistance program";

(2) That all waivers of the nationality requirements for services, other than ocean transportation services, authorized pursuant to section 6(b) shall contain a certification by the approving official that "The interests of the United States are best served by permitting the procurement of services from free world countries other than the cooperating country and countries included in Code 941"; and

(3) That authority to waive source and origin requirements under 6 (a) or (b) above for motor vehicles shall be limited to $50,000 per transaction (exclusive of transportation costs).

8. Authority to waive competition in the procurement of goods and services for country contracts and approve single-source negotiated contracts therefor if the estimated value of the procurement does not exceed $1,000,000 (exclusive of transportation costs); provided, however that the Mission's non-competitive review board finds such waiver justified in accordance with Handbook 11.

9. Authority to waive advertising in the Commerce Business Daily and A.I.D. Bulletin for project funded transactions up $500,000 for professional and technical services, construction services and commodities (excluding transportation costs); provided, however that such waivers shall be granted only where required to avoid serious delay in project implementation. Efforts shall be made, in any event, to secure proposals from a reasonable number of potential contractors.

10. Authority to extend terminal dates for signing such agreements, and meeting initial and additional conditions precedent for a cumulative period of not to exceed 180 days for each, and to extend terminal dates for requesting disbursement authorizations, terminal disbursement dates and Project Assistance Completion Dates (PACDs) for a cumulative period of not to exceed 730 days for each. Provided that such authority shall not be exercised if the result of doing so would:

(a) Cause the total life of the project (e.g. from point of initial obligation and revised PACD) to be in excess of 10 years.

(b) Require additional funding for the project unless the project authorization is formally amended to provide the additional funds; and

(c) Cause a significant change in project purpose.

11. The authorities herein redelegated shall be exercised in accordance with agency handbooks, regulations and other official guidance as modified from time to time. Each officer exercising this authority must obtain necessary engineering, economic, financial, legal and other technical clearances calling on regional or AID/W offices and personnel as appropriate.

12. The authorities herein redelegated shall be exercised by an officer serving in an "Acting" capacity and may also be redelegated by the Director to his or her principal deputy. The authorities contained in section 5 and 6 above may be further redelegated under the general supervision of the Mission Director. This redelegation shall be effective immediately and shall remain in effect until modified or revoked with application to the principal officer in each of the affected countries notwithstanding any change in the name of the A.I.D. office or the title of its principal officer.

13. The signature of the Mission Director or other A.I.D. officer as appropriate under this Redelegation is required for all project or non-project assistance agreements and amendments thereto. The Ambassador or Charge d'Affairs may also sign such project and non-project assistance agreements as have been signed by the Mission Director.

14. The following Redelegation of Authority is hereby revoked: No. 113.3A dated March 10, 1982 in its entirety.

15. This Redelegation shall be effective immediately and shall remain in effect until modified or revoked.

Dated: April 4, 1985.

W. Antoinette Ford,

Assistant Administrator Bureau for Near East.

BILLING CODE 6116-01-M

A.I.D. Representative in Oman; Redelegation of Authority No. 113.11

Pursuant to the authority delegated to me by A.I.D. Delegations of Authority No. 5, dated December 29, 1961 (27 FR 449), as amended, with respect to Loan Agreements; No. 38, dated June 21, 1977 (42 FR 31511), as amended, with respect to Project Agreements, Trust Fund Agreements, and Grant Agreements; No. 40 dated December 29, 1981 (47 FR 1049) with respect to Source, Origin and Nationality for Procurement; No. 113, dated October 15, 1975, and No. 133 dated December 11, 1981, I hereby redelegate to the A.I.D. Representative in Oman authority to exercise any of the following functions assigned to me for the country to which such official is assigned, retaining for myself concurrent authority to exercise any of the functions herein redelegated:

1. Authority to authorize a project or activity if such project or activity:

(a) Does not exceed $10 million over the approved life of the project (except as provided in paragraph 2 below);

(b) Does not present significant policy issues;

(c) Does not require waivers which may only be approved in AID/W or, if such waivers are required, that they have been approved prior to such authorization; and

(d) Does not have a life of project in excess of ten years and that such life of project has been approved in the PID review;

2. Authority to amend project or non-project assistance authorizations executed by any A.I.D. official, if the amendment:

(a) Does not result in a total life of project funding of more than $20 million.

(b) Does not present significant policy issues; and

(c) Does not require waiver which may only be approved in AID/W or, if such waiver are required, that they have been approved prior to such authorization.

3. Authority to negotiate, excute and implement trust agreements, project and non-project assistance agreements (both loan and grant) and amendments thereto duly authorized under the Foreign Assistance Act of 1961, as amended, in accordance with regulations, policies and procedures now or hereafter established or modified and promulgated within A.I.D. This authority shall include, without limitation, the following:

(a) Authority to prepare, negotiate, and excute letters of implementation;

(b) Authority to review and approve documents and other evidence submitted by borrowers or grantees in satisfaction of conditions precedent to financing under such agreements;

(c) Authority to negotiate, execute and implement all documents ancillary to such agrements.

4. Authority to sign or approve Project Implementation Orders.

5. Authority to review and approve the terms of country contracts, contractors, amendments and modifications to such contracts, and invitations for bids and requests for proposals with respect thereto.

6. Authority to waive, in accordance with the criteria prescribed in Supplement B of A.I.D. Handbook 1:

(a) U.S. source, origin, and nationality requirements to permit A.I.D. financing of the procurement of goods and services, other than transportation services, in countries included in A.I.D. Assistant Administrator Bureau for Near East.

services, in countries included in A.I.D. Geographic Code 941 (Selected Free World) and the cooperating country when the cost of the goods and services does not exceed $5,000,000 per transaction (exclusive of transportation costs); and

(b) U.S. or Code 941 source, origin, and nationality requirements for specific transactions to permit A.I.D. financing of the procurement of goods and services, other than transportation services, in any country included in A.I.D. Geographic Code 899 (Free World) or A.I.D. Geographic Code 935 (Special Free World) when the cost of the goods and services does not exceed $5,000,000 per transaction (exclusive of transportation costs); provided, however:

(1) That all waivers of source, origin, and nationality for procurement of goods authorized pursuant to section 6(b) shall contain a certification by the approving official that "Exclusion of procurement from free world countries other than the cooperating country and countries included in Code 941 would seriously impede attainment of U.S. foreign policy objectives and objectives of the foreign assistance program";

(2) That all waivers of the nationality requirements for services, other than ocean transportation services, authorized pursuant to section 6(b) shall contain a certification by the approving official that "The interests of the United States are best served by permitting the procurement of services from free world countries other than the cooperating country and countries included in Code 941"; and

(3) That authority to waive source and origin requirements for motor vehicles shall be limited to $50,000 per transaction (exclusive of transportation costs).

8. Authority to waive competition in the procurement of goods and services for country contracts and approve single-source negotiated contracts therefor if the estimated value of the procurement does not exceed $1,000,000 (exclusive of transportation); provided however that the Mission's non/competitive review board finds such waiver justified in accordance with Handbook 11.

9. Authority to waive advertising in the Commerce Business Daily and A.I.D. Bulletin for project funded transactions up to $500,000 for professional and technical services, construction services and commodities (excluding transportation costs); provided however that such waivers shall be granted only where required to avoid serious delay in project implementation. Efforts shall be made, in any event, to secure proposals from a reasonable number of potential contractors.

10. Authority to extend terminal dates for signing such agreements, and meeting initial and additional conditions precedent for a cumulative period of not to exceed 180 days for each, and to extend terminal dates for requesting disbursement authorizations, terminal disbursement dates and Project Assistance Completion Dates (PACDs) for a cumulative period of not to exceed 730 days for each. Provided that such authority shall not be exercised if the result of doing so would:

(a) Cause the total life of the project (e.g. from point of initial obligation and revised PACD) to be in excess of 10 years.

(b) Require additional funding for the project unless the project authorization is formally amended to provide the additional funds; and

(c) Cause a significant change in project purpose.

11. The authorities herein redelegated shall be exercised in accordance with agency handbooks, regulations and other official guidance as modified from time to time. Each officer exercising this authority must obtain necessary engineering, economic, financial, legal and other technical clearances calling on regional or AID/W offices and personnel as appropriate.

12. The authorities herein redelegated shall be exercised by an officer serving in an "Acting" capacity and may also be redelegated by the Director to his or her principal deputy. The authorities contained in section 5 and 6 above may be further redelegated under the general supervision of the Mission Director. This redelegation shall be effective immediately and shall remain in effect until modified or revoked with application to the principal officer in each of the affected countries notwithstanding any change in the name of the A.I.D. office or the title of its principal officer.

13. The signature of the Mission Director or other A.I.D. officer as appropriate under this Redelegation is required for all project or non-project assistance agreements and amendments thereto. The Ambassador or Charge d'Affairs may also sign such project and non-project assistance agreements as have been signed by the Mission Director.

14. The following Redelegation of Authority is hereby revoked: No. 113.3A dated March 10, 1982 in its entirety.

15. This Redelegation shall be effective immediately and shall remain in effect until modified or revoked.

Dated: April 4, 1985.
W. Antoinette Ford,
Assistant Administrator Bureau for Near East.

BILLING CODE 6116-01-M

A.I.D. Representative in Oman; Redelegation of Authority No. 113.11

Pursuant to the authority delegated to me by A.I.D. Delegations of Authority No. 5, dated December 29, 1961 (27 FR 449), as amended, with respect to Loan Agreements; No. 38, dated June 21, 1977 (42 FR 31511), as amended, with respect to Project Agreements, Trust Fund Agreements, and Grant Agreements; No. 40 dated December 29, 1981 (47 FR 1049) with respect to Source, Origin and Nationality for Procurement; No. 113, dated October 15, 1975, and No. 133 dated December 11, 1981, I hereby redelegate to the A.I.D. Representative in Oman authority to exercise any of the following functions assigned to me for the country to which such official is assigned, retaining for myself concurrent authority to exercise any of the functions herein redelegated:

1. Authority to authorize a project or activity if such project or activity:

(a) Does not exceed $10 million over the approved life of the project (except as provided in paragraph 2 below);

(b) Does not present significant policy issues;

(c) Does not require waivers which may only be approved in AID/W or, if such waivers are required, that they have been approved prior to such authorization; and

(d) Does not have a life of project in excess of ten years and that such life of project has been approved in the PID review;

2. Authority to amend project or non-project assistance authorizations executed by any A.I.D. official, if the amendment:

(a) Does not result in a total life of project funding of more than $20 million.

(b) Does not present significant policy issues; and

(c) Does not require waiver which may only be approved in AID/W or, if such waiver are required, that they have been approved prior to such authorization.

3. Authority to negotiate, excute and implement trust agreements, project and non-project assistance agreements (both loan and grant) and amendments thereto duly authorized under the Foreign Assistance Act of 1961, as amended, in accordance with regulations, policies and procedures now or hereafter established or modified and promulgated within A.I.D. This authority shall include, without limitation, the following:

(a) Authority to prepare, negotiate, and excute letters of implementation;

(b) Authority to review and approve documents and other evidence submitted by borrowers or grantees in satisfaction of conditions precedent to financing under such agreements;

(c) Authority to negotiate, execute and implement all documents ancillary to such agrements.

4. Authority to sign or approve Project Implementation Orders.

5. Authority to review and approve the terms of country contracts, contractors, amendments and modifications to such contracts, and invitations for bids and requests for proposals with respect thereto.

6. Authority to waive, in accordance with the criteria prescribed in Supplement B of A.I.D. Handbook 1:

(a) U.S. source, origin, and nationality requirements to permit A.I.D. financing of the procurement of goods and services, other than transportation services, in countries included in A.I.D. Geographic Code 941 (Selected Free World) and the cooperating country when the cost of the goods and services does not exceed $5,000,000 per transaction (exclusive of transportation costs); and

(b) U.S. or Code 941 source, origin, and nationality requirements for specific transactions to permit A.I.D. financing of the procurement of goods and services, other than transportation services, in any country included in A.I.D. Geographic Code 899 (Free World) or A.I.D. Geographic Code 935 (Special Free World) when the cost of the goods and services does not exceed $5,000,000 per transaction (exclusive of transportation costs); provided, however:

(1) That all waivers of source, origin, and nationality for procurement of goods authorized pursuant to section 6(b) shall contain a certification by the approving official that "Exclusion of procurement from free world countries other than the cooperating country and countries included in Code 941 would seriously impede attainment of U.S. Foreign policy objectives and objectives of the foreign assistance program",

(2) That all waivers of the nationality requirements for services, other than ocean transportation services, authorized pursuant to section 6(b) shall contain a certification by the approving official that "The interests of the United States are best served by permitting the procurement of services from free world countries other than the cooperating country and countries included in Code 941", and

(3) That authority to waive source and origin requirements for motor vehicles shall be limited to $50,000 per transaction (exclusive of transportation costs).

7. Authority to waive competition in the procurement of goods and services for country contracts and approve single-source negotiated contracts therefore if the estimated value of the procurement does not exceed $1,000,000 (exclusive of transportation); provided however that the Mission's non/competitive review board finds such waiver justified in accordance with Handbook 11.

8. Authority to waive advertising in the Commerce Business Daily and A.I.D. Bulletin for project funded transactions up to $500,000 for professional and technical services, construction services and commodities (excluding transportation costs); provided however that such waivers shall be granted only where required to avoid serious delay in project implementation. Efforts shall be made, in any event, to secure proposals

from a reasonable number of potential contractors.

9. Authority to extend terminal dates for signing such agreements and meeting initial and additional conditions precedent for a cumulative period of not to exceed 180 days for each, and to extend terminal dates for requesting disbursement authorizations, terminal disbursement dates and Project Assistance Completion Dates (PACDs) for a cumulative period of not to exceed 730 days for each. Provided that such authority shall not be exercised if the result of doing so would:

(a) Cause the total life of the project (e.g. from point of initial obligation to revised PACD) to be in excess of 10 years;

(b) Require additional funding for the project, unless the project authorization is formally amended to provide the additional funds; and

(c) Cause a significant change in project purpose.

10. The authorities herein redelegated shall be exercised in accordance with agency handbooks, regulations and other official guidance as modified from time to time. Each officer exercising this authority must obtain necessary engineering, economic, financial, legal and other technical clearances calling on regional or AID/W offices and personnel as appropriate.

11. The authorities herein redelegated may be exercised by an officer serving in an "Acting" capacity and may also be redelegated by the Director to his or her principal deputy. The authorities contained in sections 4 and 5 above may be further redelegated under the general supervision of the Mission Director. The redelegation shall be effective immediately and shall remain in effect until modified or revoked, with application to the principal officer in each of the affected countries notwithstanding any change in the name of the A.I.D. office of the title of its principal officer.

12. The signature of the Mission Director or other A.I.D. officer as appropriate under this Redelegation is required for all project and non-project assistance agreements and amendments thereto. The Ambassador or Charge d'Affairs may also sign such project and non-project assistance agreement as has been signed by the Mission Director.

13. The following Redelegations of Authority are hereby revoked:

2. Authority to sign or approve Project Implementation Orders.

3. Authority to review and approve the terms of country contracts, contractors, amendments and modifications to such contracts, and invitations for bids and requests for proposals with respect thereto.

4. Authority to waive, in accordance with the criteria prescribed in Supplement B of A.I.D. Handbook 1:

(a) U.S. source, origin, and nationality requirements to permit A.I.D. financing of the procurement of goods and services, other than transportation services, in countries included in A.I.D. Geographic Code 941 (Selected Free World) and the cooperating country when the cost of the goods and services does not exceed $5,000,000 per transaction (exclusive of transportation costs); and

(b) U.S. or Code 941 source, origin, and nationality requirements for specific transactions to permit A.I.D. financing of the procurement of goods and services, other than transportation services, in any country included in A.I.D. Geographic Code 899 (Free World or A.I.D. Geographic Code 935 (Special Free World) when the cost of the goods and services does not exceed $5,000,000 per transaction (exclusive of transportation costs); provided, however:

(1) That all waivers of source, origin, and nationality for procurement of goods authorized pursuant to this section 4(b) shall contain a certification by the approving official that "Exclusion of procurement from free world countries other than the cooperating country and countries included in Code 941 would seriously impede attainment of U.S. foreign policy objectives and objectives of the foreign assistance program";

(2) That all waivers of the nationality requirements for services, other than ocean transportation services, authorized pursuant to section 4(b) shall contain a certification by the approving official that "The interests of the United States are best served by permitting the procurement of services from free world countries other than the cooperating country and countries included in Code 941"; and

(3) That authority to waive source and origin requirements for motor vehicles shall be limited to $50,000 per transaction (exclusive of transportation costs).

5. Authority to waive competition in the procurement of goods and services for country contracts and approve single-source negotiated contracts therefor if the estimated value of the procurement does not exceed $1,000,000 (exclusive of transportation costs); provided, however, that the field post's non-competitive review board finds such waiver justified in accordance with Handbook 11.

6. Authority to waive advertising in the Commerce Business Daily and A.I.D. Bulletin for project funded transactions up to $500,000 for professional and technical services, construction services and commodities (excluding transportation costs); provided however that such waivers shall be granted only where required to avoid serious delay in project implementation. Efforts shall be made, in any event, to secure proposals from a reasonable number of potential contractors.

7. Authority to extend terminal dates for signing such agreements, and meeting initial and additional conditions precedent for a cumulative period of not to exceed 180 days for each, and to extend terminal dates for requesting disbursement authorizations, terminal disbursement dates and Project Assistance Completion Dates (PACDs) for a cumulative period of not to exceed 730 days for each. Provided that such authority shall not be exercised if the result of doing so would:

(a) Cause the total life of the project (e.g. from point of initial obligation to revised PACD) to be in excess of 10 years;

(b) Require additional funding for the project unless the project authorization is formally amended to provide the additional funds; and

(c) Cause a significant change in project purpose.

8. The authorities herein redelegated shall be exercised in accordance with agency handbooks, regulations and other official guidance as modified from time to time. Each officer exercising this authority must obtain necessary engineering, economic, financial, legal and other technical clearances calling on regional or AID/W offices and personnel as appropriate.

9. The authorities herein redelegated may be exercised by an officer serving in an "Acting" capacity. The authorities contained in sections 4 and 5 above may be further redelegated under the general supervision of the respective principal officer in each of the affected countries. this redelegation shall be effective immediately and shall remain in effect until modified or revoked, with application to the principal officer in each of the affected countries notwithstanding any change in the name of the A.I.D. office or the title of its principal officer.

10. The signature of the A.I.D. Representative, or other A.I.D. officer as appropriate under this Redelegation is required for all project or non-project assistance agreements and amendments thereto. The Ambassador or Charge d' Affairs may also sign such project and non-project assistance agreement as has been signed by the A.I.D. Representative.

11. The following Redelegations of Authority are hereby revoked: (a) Nos. 113.B, dated March 10, 1982 in its entirety.

Dated: April 4, 1985.

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Federal-State Unemployment Compensation Program; Extended Benefits; Ending of Extended Benefit Period in the State of Idaho

This notice announces the ending of the Extended Benefit Period in the State of Idaho, effective on June 29, 1985.

Background

The Federal-State Extended Unemployment Compensation Act of 1970 (26 U.S.C. 3304 note) established the Extended Benefit Program as a part of the Federal-State Unemployment Compensation Program. Under the Extended Benefit Program, individuals who have exhausted their rights to regular unemployment benefits (UI) under permanent State (and Federal) unemployment compensation laws may be eligible, during an extended benefit period, to receive up to 13 weeks of extended unemployment benefits, at the same weekly rate of benefits as previously received under the State law. The Federal-State Extended Unemployment Compensation Act is implemented by State unemployment compensation laws and by Part 615 of Title 20 of the Code of Federal Regulations (20 CFR Part 615).

Extended Benefits are payable in a State during an Extended Benefit Period which is triggered "on" when the rate of insured unemployment in the State reaches the State trigger rate set in the Act and the State law. During an Extended Benefit Period, individuals are eligible for a maximum of up to 13 weeks of benefits, but the total of Extended Benefits and regular benefits together may not exceed 39 weeks.

The Act and the State unemployment compensation laws also provide that an Extended Benefit Period in a State will trigger "off" when the rate of insured unemployment in the State is no longer at the trigger rate set in the law. A benefit period actually terminates at the end of the third week after the week for which there is an off indicator, but not less than 13 weeks after the benefit period began.

An Extended Benefit Period commenced in the State of Idaho on March 31, 1985, and has now triggered off.

Determination of an "off" Indicator

The head of the employment security agency of the State named above has determined that the rate of insured unemployment in the State for the period consisting of the week ending on June 8, 1985, and the immediately preceding twelve weeks, fell below the State trigger rate, so that for that week there was an "off" indicator in the State.

Therefore, the Extended Benefit Period in the State terminated with the week ending June 29, 1985.

Information for Claimants

The State employment security agency will furnish a written notice to each individual who is filing claims for

Extended Benefits of the ending of the Extended Benefit Period and its effect on the individual's right to Extended

Conclusion

After reconsideration, I affirm the original denial of eligibility to apply for

[FR Doc. 85-18028 Filed 7-29-85; 8:45 am]

BILLING CODE 4510-30-M

[TA-W-15,061]

Philadelphia Steel and Wire Corp., Philadelphia, PA; Negative Determination on Reconsideration

On August 1, 1984, the Department issued an Affirmative Determination Regarding Application for Reconsideration for former workers producing lockwashers at the Philadelphia Steel and Wire Corporation, Philadelphia, Pennsylvania. This determination was published in the **Federal Register** on August 19, 1984 (49 FR 32919).

A company official in his application for reconsideration claims that the Department's denial was based on imports of washers in general and not specifically on lockwashers. It is also claimed that Philadelphia Steel and Wire's customers may not have been aware of the extent of their imported lockwasher usage.

The Department's denial notice was based on the facts that not only did U.S. imports of washers decrease absolutely in the first nine months of 1983 compared to the same period in 1982 but that customers of Philadelphia Steel and Wire, in general, do not import lockwashers. The survey revealed that the customers which increased purchases of imported washers while decreasing purchases from the subject firm in 1982 compared to 1981 and in 1983 compared to 1982 did not represent a significant proportion of Philadelphia Steel and Wire's sales decline during the relevant period.

On reconsideration, the Department found that U.S. imports of lockwashers decreased, in quantity and value, in the first nine months of 1983 compared to the same period in 1982.

Findings in the Department's survey do not show that Philadelphia Steel and Wire's customers were purchasing imported lockwashers through their domestic suppliers.

Conclusion

After reconsideration, I affirm the original denial of eligibility to apply for adjustment assistance to former workers producing lockwashers at Philadelphia Steel and Wire Corporation, Philadelphia, Pennsylvania.

Signed at Washington, D.C., this 22nd day of July 1985.

Robert A. Schaerfl,

Director, Office of Program Management, UIS.

BILLING CODE 4510-30-M

[TA-W-15,782; TA-W-15,782A and TA-W-15,782B]

Smith-Corona, Cortland, NY, Syracuse, NY, New Canaan, CT; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on May 20, 1985 applicable to all workers of the Cortland, New York plant of Smith-Corona. The Notice of Certification was published in the **Federal Register** on June 4, 1985. (50 FR 23539).

Information and data furnished to the Department show that workers separated at Smith-Corona's Syracuse, New York and New Canaan, Connecticut provided support services to the Cortland production facility and that the decline in production of portable electronic typewriters which was related to increased imports of like or directly competitive articles, reduced the demand for their services. Therefore, the certification is being amended to include workers at the Syracuse and New Canaan facilities.

The certification applicable to TA-W-15,782 is hereby amended and issued as follows:

All workers of Smith-Corona, Cortland, New York, Syracuse, New York, and New Canaan, Connecticut who became totally or partially separated from employment on or after February 11, 1984 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, D.C., this 22nd day of July 1985.

Robert A. Schaerfl,

Director, Office of Program Management, UIS.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Museum Advisory Panel (Catalogue/Utilization Section) to the National Council on the Arts will be held on August 20-22, 1985, from 9:00 a.m.-5:30 p.m. in Room 730 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC.

This meeting is for the purpose of Panel Review, discussion, evaluation, and recommendation on application for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682-5433.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Long Range Plan for NRC; Revised

The **Federal Register** published on Friday, July 19, 1985 (50 FR 29497) contained notice of a meeting of the ACRS Subcommittee on Long Range Plan for NRC to be held on Wednesday, August 7, 1985, 8:30 a.m., Room 1046, 1717 H Street, NW., Washington, DC. To the extent practical the meeting will be open to public attendance. However, portions of the meeting may be closed to discuss predecisional information provided by the NRC Staff. All other items regarding this meeting remain the same as previously announced.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Richard Major (telephone 202/634-1414) between 8:15 a.m. and 5:00 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: July 25, 1985.

Chief, Project Review Branch No. 1.

[FR Doc. 85-18025 Filed 7-29-85; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-289]

General Public Utilities Nuclear Corp. (Three Mile Island, Unit 1); Order Modifying License To Confirm Additional Licensee Commitments on Emergency Response Capability

I

The General Public Utilities Nuclear Corporation (GPUN) (the licensee) is the holder of Facility Operating License No. DPR-50 which authorizes the operation of the Three Mile Island, Unit 1 (TMI-1) (the facility) at steady-state power levels not in excess of 2535 megawatts thermal. The facility is a pressurized water reactor (PWR) located in Dauphin County, Pennsylvania.

II

Following the accident at Three Mile Island, Unit No. 2 (TMI-2) on March 28, 1979, the Nuclear Regulatory Commission (NRC) staff developed a number of proposed requirements to be implemented on operating reactors and on plants under construction. These requirements include Operational Safety, Siting and Design, and Emergency Preparedness and are intended to provide substantial additional protection in the operation of nuclear facilities and significant upgrading of emergency response capability based on the experience from the accident at TMI-2 and the official studies and investigations of the accident. The requirements are set forth in NUREG-0737, "Clarification of TMI Action Plan Requirements," and in Supplement 1 to NUREG-0737, "Requirements for Emergency Response Capability." Among these requirements are a number of items consisting of emergency response facility operability, emergency procedure implementation, addition of instrumentation, possible control room design modification, and specific information to be submitted.

On December 17, 1982, a letter (Generic Letter 82-33) was sent to all licensees of operating reactors, applicants for operating licenses, and holders of construction permits enclosing Supplement 1 to NUREG-0737. In this letter operating reactor licensees and holders of construction permits were requested to furnish the following information, pursuant to 10 CFR 50.54(f), no later than April 15, 1983:

(1) A proposed schedule for completing each of the basic requirements for the items identified in Supplement 1 to NUREG-0737, and

(2) A description of plans for phased implementation and integration of emergency response activities including training.

III

GPUN responded to Generic Letter 82-33 by letter dated April 15, 1983. By letters dated July 12 and September 1, 1983, GPUN modified several dates as a result of negotiations with the NRC staff. In these submittals, GPUN made commitments to complete the basic requirements. GPUN's commitments included (1) dates for providing required submittals to the NRC, (2) dates for implementing certain requirements, and (3) a schedule for providing implementation dates for other requirements. The staff found that these dates were reasonable and achievable dates for meeting the Commission requirements and concluded that the schedule proposed by the licensee would provide timely upgrading of the licensee's emergency response capability. On June 14, 1984, the NRC issued "Order Confirming Licensee Commitments on Emergency Response Capability" which confirmed GPUN's commitments.

IV

The June 14, 1984, Order stated that for those requirements for which GPUN committed to a schedule for providing implementation dates, those dates would be reviewed, negotiated and confirmed by a subsequent order. In conformance with the milestones in the June 14, 1984 Order, GPUN's letters dated October 1 and November 9, 1984, provided completion schedules for the Regulatory Guide 1.97 requirements (Items 3a. and 3b. of the Table attached to the June 14, 1984 Order). All upgrade modifications required to meet Regulatory Guide 1.97 requirements are scheduled to be completed by the second refueling after restart, designated Refueling Outage 7 (estimated date July 1988, depending on the time of restart).

The NRC staff finds that Refueling Outage 7 is a reasonable and achievable date for meeting the Commission requirements for Regulatory Guide 1.97. The NRC staff concludes that the schedule proposed by the licensee will provide timely upgrading of the licensee's emergency response capability.

In view of the foregoing, I have determined that the implementation of GPUN's commitments is required in the interest of the public health and safety and should, therefore, be confirmed by an immediately effective Order.

V

Accordingly, pursuant to sections 103, 161i, 161o and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.204 and 10 CFR Part 50, it is hereby ordered, effective immediately, that License No. DPR-50 is modified to provide that the licensee shall:

Implement the specific requirements of Regulatory Guide 1.97 as described in the Licensee's submittals dated October 1 and November 9, 1984, no later than the completion of Refueling Outage 7.

Extension of time for completing these items may be granted by the Director, Division of Licensing, for good cause shown.

VI

The licensee or any other person with an adversely affected interest may request a hearing on this Order within 20 days of the date of publication of this Order in the **Federal Register**. Any request for a hearing should be addressed to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A copy should be sent to the Executive Legal Director at the same address. A request for hearing shall not stay the immediate effectiveness of this Order.

If a hearing is to be held, the Commission will issue an Order designating the time and place of any such hearing.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the licensee should comply with the requirements set forth in section V of this Order.

Dated in Bethesda, Maryland this 18th day of July 1985.

This Order is effective upon issuance.

For the Nuclear Regulatory Commission.

Frank J. Miraglia,

Deputy Director, Division of

ARKANSAS NUCLEAR ONE, UNIT NO. 1; LICENS-

VOL 50 ISS 146 JL 30 1985 UMI

BILLING CODE 7590-01-M

[Docket No. 50-313]

Arkansas Power and Light Co. (Arkansas Nuclear One, Unit No. 1); Order Modifying License Confirming Additional Licensee Commitment on Emergency Response Capability

I

Arkansas Power and Light Company (AP&L or the licensee) is the holder of Facility Operating License No. DPR-51 which authorizes the operation of Arkansas Nuclear One, Unit No. 1 (the facility) at steady-state power levels not in excess of 2568 megawatts thermal. The facility is a pressurized water reactor (PWR) located at the licensee's site in Pope County, Arkansas.

II

Following the accident at Three Mile Island Unit No. 2 (TMI-2) on March 28, 1979, the Nuclear Regulatory Commission (NRC) staff developed a number of proposed requirements to be implemented on operating reactors and on plants under construction. These requirements include Operational Safety, Siting and Design, and Emergency Preparedness and are intended to provide substantial additional protection in the operation of nuclear facilities and significant upgrading of emergency response capability based on the experience from the accident at TMI-2 and the official studies and investigations of the accident. The requirements are set forth in NUREG-0737, "Clarification of TMI Action Requirements," and in Supplement 1 to NUREG-0737, "Requirements for Emergency Response Capability." Among these requirements are a number of items consisting of emergency response facility operability, emergency procedure implementation, addition of instrumentation, possible control room design modification, and specific information to be submitted.

On December 17, 1982, a letter (Generic Letter 82-33) was sent to all licensees of operating reactors, applicants for operating licenses, and holders of construction permits enclosing Supplement 1 to NUREG-0737. In this letter operating reactor licensees and holders of construction permits were requested to furnish the following informtion, pursuant to 10 CFR 50.54(f), no later than April 15, 1983:

(1) A proposed schedule for completing each of the basic requirements for the items identified in Supplement 1 to NUREG-0737, and

(2) A description of plans for phased implementation and integration of emergency response activities including training.

III

AP&L responded to Generic Letter 82-33 by letter dated April 15, 1983. In this submittal, AP&L made commitments to complete the basic requirements. AP&L's commitments included (1) dates for providing required submittals to the NRC, (2) dates for implementing certain requirements, and (3) a schedule for providing implementation dates for other requirements.

The NRC staff reviewed AP&L's April 15, 1983 letter and entered into discussions with the licensee regarding schedules for meeting the requirements of Supplement 1 to NUREG-0737. As a result of these discussions, the NRC staff found that these dates were reasonable and achievable dates for meeting the Commission requirements. The NRC staff concluded that the schedule proposed by the licensee would provide timely upgrading of the licensee's emergency response capability. On June 14, 1984, the NRC issued "Order Confirming Licensee Commitments on Emergency Response Capability" which confirmed AP&L's commitments.

IV

The June 14, 1984, Order stated that for those requirements for which AP&L committed to a schedule for providing implementation dates, those dates would be reviewed, negotiated and confirmed by subsequent order. In conformance with the milestones in the June 14, 1984 Order, AP&L's letter dated June 25, 1984, provided a completion schedule for the following requirement:

3. Regulatory Guide 1.97—Application to Emergency Response Facilities.

3b. Implement (installation or upgrade) requirements.

The attached Table summarizing AP&L's schedular commitment for the above item was developed by the NRC staff from the information provided by AP&L. The staff reviewed AP&L's June 25, 1984 letter and discussed the implementation date with the licensee.

As a result of this discussion, the NRC staff finds that the implementation date is a reasonable and achievable date for meeting the Commission requirements. The NRG staff concludes that the schedule proposed by the licensee will provide timely upgrading of the licensee's emergency response capability.

In view of the foregoing, I have determined that the implementation of AP&L's commitments is required in the interest of the public health and safety and should, therefore, be confirmed by an immediately effective Order.

Accordingly, pursuant to Sections 103, 161i, 161o, and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.204 and 10 CFR Part 50, it is hereby ordered, effective immediately, that License DPR-51 is modified to provide that the licensee shall:

Implement the specific item described in the Attachment to this Order in the manner described in AP&L's submittal noted in Section IV herein no later than the date in the Attachment.

Extension of time for completing this item may be granted by the Director, Division of Licensing, for good cause shown.

VI

The licensee or any other person with an adversely affected interest may request a hearing on this Order within 20 days of the date of publication of this Order in the **Federal Register**. Any request for a hearing should be addressed to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A copy should be sent to the Excutive Legal Director at the same address. A request for hearing shall not stay the immediate effectiveness of this order.

If a hearing is to be held, the Commission will issue an Order designating the time and place of any such hearing.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the license should comply with the requirements set forth in section V of this Order

Dated in Bethesda, Maryland, this 19th day of July 1985.

This Order is effective upon issuance.

For the Nuclear Regulatory Commission.

Frank Miraglia,

Deputy Director, Division of Licensing, Office of Nuclear Reoctor Regulation.

ARKANSAS NUCLEAR ONE, UNIT NO. 1; LICENSEE'S ADDITIONAL COMMITMENTS ON SUPPLEMENT 1 TO NUREG-0737

Title	Requirements	Licensee's completion schedule (or status)
3. Regulatory Guide 1.97—Application to Emergency Response Facilities.	3b. Implement (installation or upgrade) requirements.	During the seventh refueling outage (estimated to end March 1986).

[FR Doc. 85-18023 Filed 7-29-85; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-368]

Arkansas Power and Light Co. (Arkansas Nuclear One, Unit No. 2); Order Modifying License Confirming Additional Licensee Commitment on Emergency Response Capability

I

Arkansas Power and Light Company (AP&L or the licensee) is the holder of Facility Operating License No. NPF-6 which authorizes the operation of Arkansas Nuclear One, Unit No. 2 (the facility), at steady-state power levels not in excess of 2815 megawatts thermal. The facility is a pressurized water reactor (PWR) located at the licensee's site in Pope County, Arkansas.

II

Following the accident at Three Mile Island Unit No. 2 (TMI-2) on March 28, 1979, the Nuclear Regulatory Commission (NRC) staff developed a number of proposed requirements to be implemented on operating reactors and on plants under construction. These requirements include Operational Safety, Siting and Design, and Emergency Preparedness and are intended to provide substantial additional protection in the operation of nuclear facilities and significant upgrading of emergency response capability based on the experience from the accident at TMI-2 and the official studies and investigations of the accident. The requirements are set forth in NUREG-0737, "Clarification of TMI Action Plan Requirements," and in Supplement 1 to NUREG-0737, "requirements for Emergency Response Requirements Capability." Among these requirements are a number of items consisting of emergency response facility operability, emergency procedure implementation, addition of instrumentation, possible control room design modification, and specific information to be submitted.

On December 17, 1982, a letter (Generic Letter 82-33) was sent to all licensees of operating reactors, applicants for operating licenses, and holders of construction permits enclosing Supplement 1 to NUREG-0737. In this letter, operating reactor licensees and holders of construction permits were requested to furnish the following information, pursuant to 10 CFR 50.54(f), no later than April 15, 1983:

(1) A proposed schedule for completing each of the basic requirements for the items identified in Supplement 1 to NUREG-0737, and

(2) A description of plans for phased implementation and integration of emergency response activities including training.

III

AP&L responded to Generic Letter 82-33 by letter dated April 15, 1983. In this submittal, AP&L made commitments to complete the basic requirements. AP&L's commitments included (1) dates for providing required submittals to the NRC, (2) dates for implementing certain requirements, and (3) a schedule for providing implementation dates for other requirements.

The NRC staff reviewed AP&L's April 15, 1983 letter and entered into discussions with the licensee regarding schedules for meeting the requirements of Supplement 1 to NUREG-0737. As a result of these discussions, the NRC staff found that the proposed dates were reasonable and achievable dates for meeting the Commission requirements. The NRC staff concluded that the schedule proposed by the licensee would provide timely upgrading of the licensee's emergency response capability. On June 14, 1984, the NRC issued "Order Confirming Licensee Commitments on Emergency Response Capability" which confirmed AP&L's commitments.

IV

The June 14, 1984, Order stated that, for those requirements for which AP&L committed to a schedule for providing implementation dates, those dates would be reviewed, negotiated and confirmed by a subsequent order. In conformance with the milestones in the June 14, 1984 Order, AP&L's letter dated April 13, 1984 and as supplemented by letter dated November 9, 1984 provided a completion schedule for the following requirement:

3. Regulatory Guide 1.97—Application to Emergency Response Facilities.

3b. Implement (installation or upgrade) requirements.

The attached Table summarizing AP&L's schedular commitment for the above item was developed by the NRC staff from the information provided by AP&L. The staff reviewed AP&L's April 13 and November 9, 1984 letters and discussed the implementation date with the licensee.

As a result of this discussion, the NRC staff finds that the implementation date is a reasonable and achievable date for meeting the Commission requirements. The NRC staff concludes that the schedule proposed by the licensee will provide timely upgrading of the licensee's emergency response capability.

In view of the foregoing, I have determined that the implementation of AP&L's commitment is required in the interest of the public health and safety and should, therefore, be confirmed by an immediately effective Order.

V

Accordingly, pursuant to sections 103, 161i, 161o and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.204 and 10 CFR Part 50, it is hereby Ordered, effective immediately, that License NPF-6 is modified to provide that the licensee shall:

Implement the specific item described in the Attachment to this Order in the manner described in AP&L's submittals noted in Section IV herein no later than the date in the Attachment.

Extension of time for completing this item may be granted by the Director, Division of Licensing, for good cause shown.

VI

The licensee or any other person with an adversely affected interest may request a hearing on this Order within 20 days of the date of publication of this Order in the **Federal Register**. Any request for a hearing should be addressed to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A copy should be sent to the Executive Legal Director at the same address. A request for hearing shall not stay the immediate effectiveness of this Order.

If a hearing is to be held, the Commission will issue an Order designating the time and place of any such hearing.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the licensee

should comply with the requirements set forth in section V of this Order.

Dated in Bethesda, Maryland, this 19th day of July 1985.

This Order is effective upon issuance.

For the Nuclear Regulatory Commission.

Frank Miraglia,

Deputy Director, Division of Licensing, Office of Nuclear Reactor Regulation.

3. Regulatory Guide 1.97—Application to Emergency Response Facilities.	3b. Implement (installation or upgrade) requirements.	During the sixth refueling outage (estimated to end August 1986).

[FR Doc. 85–18024 Filed 7–29–85; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–255]

Consumers Power Co. (Palisades Plant); Exemption

I

The Consumers Powers Company (CPC, the licensee) is the holder of Provisional Operating License No. DPR–20 which authorizes operations of the Palisades Plant. This license provides, among other things, that it is subject to all rules, regulations and Orders of the Commission now or hereafter in effect.

The facility comprises one pressurized water reactor at the licensee's site located in Van Buren County, Michigan.

II

On November 19, 1980, the Commission published a revised § 50.48 and a new Appendix R to 10 CFR Part 50 regarding fire protection features of nuclear power plants. The revised § 50.48 and Appendix R became effective on February 17, 1981. Section III of Appendix R contains fifteen subsections, lettered A through O, each of which specifies requirements for a particular aspect of the fire protection features at a nuclear power plant. One of these subsections, III.G., is the subject of the licensee's exemption request. Section III.G.2.d. requires separation of cable and equipment and associated non-safety circuits of redundant trains by a horizontal distance of more than 20 feet with no intervening combustibles or fire hazards.

III

By letter dated July 20, 1984 the licensee requested an exemption from section III.G.2.d. of Appendix R inside of containment. The exemption was requested from the requirement to separate redundant trains with no intervening combustibles.

Inside of containment left and right channel cable trays containing redundant instrumentation circuitry are routed such that they enter containment in separate penetration areas and then pass through containment with at least 35 feet of horizontal separation. At one location inside containment two cable trays containing intervening combustibles (i.e., cables) connect the two redundant sets of trays. To prevent a fire from propagating from one redundant cable tray to the other via the intervening combustibles, fire stops have been installed in the intervening cable trays. The design of the fire stops was reviewed and approved by the staff in a supplement to the Appendix A Fire Protection Safety Evaluation dated March 11, 1980. The intervening combustibles and other in-situ combustibles in the area of the redundant cable tray compile a light fuel load. Strict administrative controls limit transient combustibles being brought into containment during operation. Administrative controls also require removal of all transient combustibles from the containment prior to startup. There are no ignition sources in the area of the redundant cable trays. Fire protection inside containment consists of early warning fire detectors installed in areas of cable concentrations, hose reels and portable fire extinguishers.

Due to the light fuel load, separation of the redundant cable trays and the fire stops installed in the intervening cable trays, the staff has reasonable assurance that one train of instrumentation circuits will be free on fire damage for anticipated fires inside containment. The early warning fire detectors will provide rapid detection of fires inside containment. The light fuel load and strict administrative controls on transient combustibles assure that anticipated fires will be limited in size and duration. The separation of the redundant cable trays and the fire stops installed in the intervening cable trays provide adequate passive protection for the redundant circuits prior to the arrival of the fire brigade and their effective extinguishment of the fire. Based on the above evaluation, the staff concludes that the removal of the intervening combustibles between the redundant cable trays would not significantly increase the level of fire protection inside containment. Therefore, the exemption request should be granted.

IV

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a), the requested exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest. Therefore, the Commission hereby grants an exemption from the requirements of section III.G.2.d. of Appendix R to 10 CFR Part 50 to the extent it requires separation of cables and equipment and associated non-safety circuits of redundant trains with no intervening cumbustibles installed between the redundant cable trays identified in section III above.

Pursuant to 10 CFR 51.32, the Commission had determined that the granting of this exemption will have no significant impact on the environment (July 5, 1985, 50 FR 27707).

This Exemption is effective upon issuance.

Dated at Bethesda, Maryland, this 23th day of July 1985.

For the Nuclear Regulatory Commission.

Hugh L. Thompson Jr.,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 1505–01–M

SECURITIES AND EXCHANGE COMMISSION

[File No. 22–14003]

Application and Opportunity For Hearing; Citicorp

July 24, 1985.

Notice is hereby given that Citicorp (the "Applicant") has filed an application under clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding that the

trusteeship of United States Trust Company of New York (the "Trust Company") under four existing indentures, and two Pooling and Servicing Agreements dated as of May 1, 1985 under which certificates evidencing interests in a pool of mortgage loans have been issued, is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Trust Company from acting as Trustee under either of such indentures or the Agreements.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest it shall within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of such section provides, in effect, with certain exceptions, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which any other securities of the same issuer are outstanding. However, under clause (ii) of subsection (1), there may be excluded from the operation of this provision another indenture under which other securities of the issuer are outstanding, if the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that trusteeship under such qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under either of such indentures.

The Applicant alleges that:

(1) The Trust Company currently is acting as Trustee under four indentures in which the Applicant is the obligor. The indenture dated as of February 15, 1972 involved the issuance of Floating Rate Notes due 1989, the Indenture dated as of March 15, 1977 involved the issuance of various series of unsecured and unsubordinated Notes, the Indentures dated as of August 25, 1977 involved the issuance of Rising-Rate Notes, Series A and the Indenture dated as of April 21, 1980 involved the issuance of various series of unsecured subordinated Notes. Said Indentures were filed as, respectively, Exhibits 4(a), 2(b), 2(b), and 2(a) to Applicant's respective Registration Statements Nos. 2–42915, 2–58355, 2–59396 and 2–64862 filed under the Securities Act of 1933, and have been qualified under the Trust Indenture Act of 1939. Said four Indentures are hereinafter called the Indentures and the securities issued pursuant to the Indentures are hereinafter called the Notes.

(2) The Applicant is not in default in any respect under the Indentures or under any other existing indenture.

(3) On May 28, 1985, the Trust Company entered into a Pooling and Servicing Agreement dated as of May 1, 1985 (the "1985-D Agreement") with Citibank, N.A., Originator and Servicer, and Citicorp Homeowners, Inc., under which there were issued on April 25, 1985 Mortgage Pass-Through Certificates, Series 1985–D 12.25% Pass-Through Rate (the "Series 1985–D Certificates"), which evidence fractional undivided interests in a pool of conventional one-to-four-family mortgage loans (the "1985–D Mortgage Pool") originated and serviced by Citibank, N.A. and having adjusted principal balances aggregating $103,383,637.40 at the close of business on May 1, 1985, which mortgage loans were assigned to the Trust Company as Trustee simultaneously with the issuance of the Series 1985–D Certificates. On May 28, 1985, Applicant, the parent of Citibank, N.A., entered into a Guaranty of even date (the "1985–D Guaranty") pursuant to which Applicant agreed, for the benefit of the holders of the Series 1985–D Certificates, to be liable for 8% of the initial aggregate principal balance of the 1985–D Mortgage Pool and for lesser amounts in later years pursuant to the provisions of the 1985–D Guaranty. The 1985 Guaranty states that Applicant's obligations thereunder rank *pari passu* with all unsecured and unsubordinated indebtedness of Applicant, and accordingly, if enforced against Applicant, the 1985–D Guaranty would rank on a parity with the obligations evidenced by the Notes. The Series 1985–D Certificates were registered under the Securities Act of 1933 (Registration Statement on Forms S–1 and S–3, File No. 2–96656) as part of a delayed or continuous offering of $350,000,000 aggregate amount of Mortgage Pass-Through Certificates pursuant to Rule 415 under the Act. The Series 1985–D Certificates were offered by a Prospectus Supplement dated May 15, 1985, supplemental to a Prospectus dated March 26, 1985. The 1985–D Agreement has not been qualified under the Trust Indenture Act of 1939.

(4) On May 31, 1985, the Trust Company entered into a Pooling and Servicing Agreement dated as of May 1, 1985 (the "1985–E Agreement") with Citibank, N.A., Originator and Servicer, and Citicorp Homeowners, Inc., under which there were issued on May 31, 1985 Mortgage Pass-Through Certificates, Series 1985–E, 11.50% Pass-Through Rate (the "Series 1985–E Certificates"), which evidence fractional undivided interests in a pool of conventional one-to-four-family mortgage loans (the "1985–E Mortgage Pool") originated and serviced by Citibank, N.A. and having adjusted principal balances aggregating $52,180,446.40 at the close of business on May 1, 1985, which mortgage loans were assigned to the Trust Company as Trustee simultaneously with the issuance of the Series 1985–E Certificates. On May 31, 1985, Applicant entered into a Guaranty of even date (the "1985–E Guaranty") pursuant to which applicant agreed, for the benefit of the holders of the Series 1985–E Certificates, to be liable for 10% of the initial aggregate principal balance of the 1985–E Mortgage Pool and for lesser amounts in later years pursuant to the provisions for the 1985–E Guaranty. The 1985–E Guaranty states that Applicant's obligations thereunder rank *pari passu* with all unsecured and unsubordinated indebtedness of Applicant, and accordingly, if enforced against Applicant, the 1985–E Guaranty would rank on a parity with the obligations evidenced by the Notes. The Series 1985–E Certificates were registered under the Securities Act of 1933 (Registration Statements on Form S–11 and S–3, File Nos. 2–96656 and 2–80415) as part of a delayed or continuous offering of $500,000,000 aggregate amount of Mortgage Pass-Through Certificates pursuant to Rule 415 under the Act. The Series 1985–E Certificates were offered by a Prospectus Supplement dated May 24, 1985, supplemental to a Prospectus dated May 15, 1985. The 1985–E Agreement has not been qualified under the Trust Indenture Act of 1939.

The 1985–D Agreement and the 1985–E Agreement are hereinafter called the 1985 Agreements, and the 1985–D Guaranty and the 1985–E Guaranty are hereinafter called the 1985 Guarantees, and the 1985–D Certificates and the 1985–E Certificates are hereinafter called the 1985 Certificates.

(5) The obligations of Applicant under the Indentures and the 1985 Guarantees are wholly unsecured, are unsubordinated and rank *pari passu*. Any differences that exist between the provisions of the Indentures and the 1985 Guarantees are unlikely to cause any conflict of interest among the trusteeship of the Trust Company under the Indentures and the 1985 Agreements.

(6) Applicant has waived notice of hearing, hearing and any and all rights to specify procedures under the Rules of Practice of the Commission

The proceeds of the sale of the Bonds, net of any underwriters' discount or other expenses payable from proceeds,

Tender Agent, if appointed to facilitate the transfer of Bonds delivered by holders exercising their right to tender.

John Wheeler,

withheld under 5 U.S.C. 552, are available for inspection and copying at the Commission's Public Reference

The Commission is publishing this notice to solicit public comment on the proposal.

VOL 50 ISS 146 JL 30 1985 UMI

(6) Applicant has waived notice of hearing, hearing and any and all rights to specify procedures under the Rules of Practice of the Commission in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application, File No. 22-14003, which is a public document on file in the Office of the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C.

Notice is Further given that any interested person may, not later than August 22, 1985, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon.

Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the application upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and for the protection of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Rel. 35-23772; 70-7127]

Arkansas Power & Light Co.; Notice of Proposal To Enter Into Pollution Control Financing

July 23, 1985.

Arkansas Power & Light Company ("AP&L"), a wholly owned subsidiary of Middle South Utilities, Inc., a registered holding company, has filed an application-declaration subject to sections 6(a), 7, 9(a), 10, and 12(d) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 50(a)(2) and 50(a)(5) thereunder.

AP&L proposes to enter into one or more installment sale agreements ("Agreement") with Pope County, Arkansas ("County") which contemplate the issuance by the County of one or more series of its pollution control revenue bonds ("Bonds") in an aggregate principal amount not to exceed $150 million with a maturity of from 5 to 30 years.

The proceeds of the sale of the Bonds, net of any underwriters' discount or other expenses payable from proceeds, will be deposited by the County with the indenture trustee ("Trustee"). The net proceeds will be applied to permanently finance the costs of that portion of the Pollution Control Facilities ("Facilities") at Arkansas Nuclear One Generating Station, Pope County, Arkansas ("Station") not previously financed by pollution control revenue bonds and additional costs of construction of the Facilities.

Under the Agreement, AP&L is to sell the Facilities to the County for cash, and is to simultaneously repurchase the Pollution Control Facilities from the County for a purchase price, payable on an installment payment basis over a period of years, sufficient (together with any other moneys held by the Indenture Trustee under the Indenture and available for the purpose for the particular series of Bonds involved) to pay the principal or purchase price of, the premium, if any and the interest on such series of Bonds as the same due and payable. Such installment payments are to be made directly to the Trustee pursuant to an assignment and pledge thereof by the County to the Trustee as set forth in the Indenture. Under the Agreement the Company will also be obligated to pay certain fees incurred in the transactions.

Upon the occurrence of certain events relating to the construction or operation of the Station or the Facilities, the Bonds will be redeemable by the County, at the direction of AP&L. Any series of the Bonds may be subject to a mandatory cash sinking fund and they may be subject to mandatory redemption in other cases. The payment by AP&L in such circumstances shall be sufficient to pay the principal of all the Control Bonds, the premium, if any, together with interest accrued or to accrue to the redemption date. The indenture may provide for the application of such of the proceeds of the Bonds which, after completion of the Facilities, may remain unused for the redemption or purchase of the Bonds at the direction of AP&L. The Agreement and the Indenture may provide for an adjustment interest rate for one or more series of the Bonds. The Agreement and the Indenture would also provide that holders of the Bonds would have the right to tender their Bonds for purchase at a price equal to the principal amount plus accured and unpaid interest thereon. Under the Agreement, AP&L would be obligated to pay amounts equal to the amounts to be paid by the Remarketing Agent or the Tender Agent, if appointed to facilitate the transfer of Bonds delivered by holders exercising their right to tender.

In order to obtain a favorable rating on any series of the Bonds to improve their marketability, AP&L may arrange for an irrevocable letter of credit from a bank or banks ("Banks") in favor of the Trustee. In such event, payments with respect to principal, premium, if any, interest and purchase obligations in connection with such series of the Bonds would be secured by, or payable from, funds drawn under the letter of credit. In order to induce the Bank to issue such letter of credit, AP&L would enter into a reimbursement agreement ("Reimbursement Agreement") with the Bank pursuant to which AP&L would agree to reimburse the Bank for all amounts drawn under its letter of credit. As an alternative to securing the Bonds with a letter of credit, AP&L may arrange to have such Bonds secured by a commercial bond insurance company or, in order to obtain security accorded to holders of first mortgage bonds outstanding, AP&L may seek to obtain the authentication of one or more new series of first mortgage bonds. The first mortgage bonds would be issued on the basis of unfunded net property additions and/or previously-retired first mortgage bonds. AP&L requests an exception from the competitive bidding requirements of Rule 50 pursuant Rule 50(a)(5) with respect to the issuance and pledge of the first mortgage bonds insofar as competitive bidding would be inappropriate under the circumstances.

The application-declaration and any amendments thereto is available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by August 16, 1985, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant-declarant at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application declaration, as filed or as it may be amended, may be granted and permitted to become effective.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

[FR Doc. 85-18034 Filed 7-29-85; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. 34-22268; File No. SR-OCC-85-12]

Self-Regulatory Organizations; Options Clearing Corp. Notice of Proposed Rule Change

The Options Clearing Corporation ("OCC") on July 15, 1985 submitted a proposed rule change to the Commission under section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"). OCC's proposal would give OCC's Chairman express authority to designate a substitute to perform the Chairman's functions at meetings of OCC's Securities Committee. The Commission is publishing this notice to solicit public comment on the proposal.

OCC's Securities Committee meets on an *ad hoc* basis to determine the appropriateness of adjustments to the terms of outstanding options. Under OCC By-Law Article VI, Section 11, the Committee is comprised of two designated representatives from each exchange on which the subject options are traded, plus the Chairman of OCC.[1] OCC states in its filing that it believes that the Chairman already has implied power under OCC By-Laws to designate a substitute when it is impractical or impossible for the Chairman to participate personally. Nevertheless, to clarify the Chairman's authority in this regard, OCC proposes to give OCC's Chairman express authority to designate any OCC officer [2] to take the Chairman's place at Securities Committee meetings.

OCC believes the proposal will ensure that OCC can continue to react quickly to events affecting outstanding OCC options and therefore to act fairly to all holders and writers of those options in determining the appropriateness of adjustments. OCC therefore believes that the proposal is consistent with section 17A of the Act.

Copies of all documents relating to the propsal, except those that may be withheld under 5 U.S.C. 552, are available for inspection and copying at the Commission's Public Reference Room 450 Fifth Street, NW., Washington, D.C., and at OCC's principal office.

OCC's proposal has become effective under section (19)(b)(3)(A) of the Act. Nevertheless, at any time within 60 days of the filing of the proposal the Commission may summarily abrogate the proposal if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. To assist the Commission in making this determination, the Commission is soliciting comment on the proposal. Please refer to File No. SR-OCC-85-12 and send six copies of comments to the Secretary of the Commission, Securities and Exchange Commission 450 Fifth Street, NW, Washington, D.C. 20549. Comments are invited until August 20, 1985.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: July 24, 1985.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. 34-22267; File No. SR-OCC-85-11]

Self-Regulatory Organizations; Options Clearing Corp.; Notice of Proposed Rule Change

The Options Clearing Corporation ("OCC") on July 9, 1985 submitted a proposed rule change to the Commission under section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"). OCC's proposal would amend OCC By-Laws and Rules to enable OCC to issue, clear and settle European style options on foreign currencies.[1] In addition, OCC's proposal would amend OCC Rule 1606A to broaden the availability of OCC's alternative settlement procedure for large foreign currency option exercises and would amend OCC Rule 1804 to reflect current price intervals for automatic exercise of index options.[2] The Commission is publishing this notice to solicit public comment on the proposal.

OCC states in its filing that European style foreign currency options will be processed similarly to American style (conventional) options. Specifically, OCC states that clearance and settlement of opening and closing trades in European style foreign currency options will be identical to clearance and settlement of trades in American style foreign currency options. Exercises of European style foreign currency options on their expiration date will be processed under the same rules and procedures that currently apply to exercise of American style foreign curency options at expiration. No exercise of European style foreign currency options will be permitted before their expiration date, however. Since OCC expiration dates always fall on Saturdays, the proposal would amend OCC Rule 1605 to clarify that European style options can be exercised on Saturdays rather than a business day. Procedures for assignment of exercise notices to clearing members with open short positions in European style foreign currency options will be identical to procedures for assignment of American style foreign currency option exercise notices.

In OCC By-Law Article XV, Section 1, the definiton of "class of options" with respect to foreign currency options would be amended to include the style of option and the unit of trading for the option. OCC states that it is including the unit of trading within the definition of class of options because the units of trading for foreign currency options proposed by the Chicago Board Options Exchange ("CBOE") are different than those proposed by the Philadelphia Stock Exchange ("PHLX").[3] Consequently, a short foreign currency contract traded on one of the exchanges cannot be paired with a long foreign currency contract traded on the other exchange for purposes of calculating OCC margin.

OCC's proposal also would amend By-Law Article XV, Section 2, to distinguish the rights of holders of European style foreign currency options from those of holders of American style foreign currency options. The only difference in rights is that European style foreign currency options cannot be exercised before their expiration date.

[1] Under OCC By-Law Article VI, Section 11, the Securities Committee acts by majority vote, with the OCC Chairman voting only in the case of a tie. The Committee may transact its business over the telephone. OCC represented to Commission staff that to date OCC's Chairman has not had to vote in a Committee meeting.

[2] OCC has represented to Commission staff that while the Chairman normally would choose a substitute from OCC's legal department, any OCC Assistant Vice President or higher officer would be eligible for designation.

[1] European style options are options that can be exercised only on their expiration date. In a related filing, OCC has proposed By-Law and Rule amendments to enable it to issue, clear and settle European style options. *See* File No. SR-OCC-85-9. Neither filing includes the issuance, clearance or settlement of European style stock options.

[2] The proposal also would correct typographical errors in OCC's By-Laws and Rules.

[3] For convenience, OCC is including "Interpretations and Policies" to By-Law Article XV, Section 1, to enumerate the units of trading proposed by the two exchanges. CBOE units of trading are twice those of the PHLX.

OCC Rule 1601 would be amended to clarify that foreign currency cannot be deposited with OCC in lieu of margin on a permanent basis, would reduce clearing members' financing costs by allowing them to submit a bank

Pilot Program was amended in 1982, and is scheduled to terminate on June 30,

(B) Self-Regulatory Organization's Statement on Burden on Competition

number in the caption above and should be submitted by August 20, 1985.

It is now proposed that the GPU Companies amend the New Credit

VOL 50 ISS 146 JL 30 1985 UMI

OCC Rule 1601 would be amended to clarify that foreign currency cannot be deposited with OCC in lieu of margin on foreign currency options positions. OCC will continue to allow the deposit of underlying securities in lieu of margin on short call option positions, and the deposit of Treasury bills in lieu of margin on short put option positions, for options other than foreign currency options.

OCC Rule 1605 would be amended to accommodate different foreign currency option units of trading in the exercise settlement procedures. Specifically, subparagraph (a)(2) would be amended to permit discharge of a clearing member's settlement obligations prior to the exercise settlement date where the obligations result from netted exercised options of identical terms. Netting of obligations in respect of exercised options whose terms are not identical also discharges a clearing member's settlement obligations, but only on the exercise settlement date and only after the clearing member has paid any remaining required settlement amount.

OCC Rule 1606A would be amended to allow all OCC clearing members obligated to deliver or receive foreign currency on an exercise settlement date to use OCC's alternative settlement procedures for any amount of foreign currency. Those procedures were implemented on a pilot basis in September 1984, and were limited to clearing members receiving more than 100 units of trading of a foreign currency.[4] The proposal would establish the alternative settlement procedure permanently.

Unrelated to foreign currency options, the proposal would amend OCC Rule 1804 to codify price intervals previously established for automatic exercise of index options. Current Rule 1804 allows the OCC Board of Directors to establish such intervals, but does not contain the actual intervals already established and in effect ($25 for customer accounts and $1 for all other accounts). OCC's Board of Directors would continue to have discretion to set different intervals on 30 days notice to all index options clearing members.

OCC believes that its proposal facilitates the prompt and accurate clearance and settlement of European style foreign currency options by applying to those options substantially the same clearing system and rules currently used for American style foreign currency options. OCC believes that expansion of the alternative foreign currency options settlement procedure, on a permanent basis, would reduce clearing members' financing costs by allowing them to submit a bank guarantee two days in advance of settlement date rather than making actual payment two days in advance. OCC therefore believes that the proposal is consistent with Section 17A of the Act.

Copies of all documents relating to the proposal, except those that may be withheld under 5 U.S.C. 522, may be inspected and copied at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C., and at OCC's principal office.

To assist the Commission in determining whether to approve the proposal or to institute disapproval proceedings, the Commission is soliciting public comment on the proposal. Please refer to File No. SR-OCC-85-11 and send six copies of comments to the Secretary of the Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Comments are invited until August 20, 1985.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: July 24, 1985.

John Wheeler,

Secretary.

[Rel. No. 34-22263; File No. SR-PSE-85-18]

Self-Regulatory Organizations; Proposed Rule Change by the Pacific Stock Exchange Inc. Relating to Pilot Program for the Appointment and Evaluation of Specialists and the Creation of New Specialist Posts

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on July 8, 1985, the Pacific Stock Exchange Incorporated ("PSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from the interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The PSE filed its Pilot Program for the Appointment and Evaluation of Specialists and the Creation of New Specialist Posts ("Pilot Program") with the Commission on May 4, 1981. The Pilot Program was amended in 1982, and is scheduled to terminate on June 30, 1985. The Exchange is currently preparing proposed amendments to the Pilot Program for review by its Board of Governors. To permit the Exchange to finalize these revisions and submit them to the Commission, the PSE is requesting that the term of the Pilot Program be extended for a period of three months, through September 30, 1985.

In connection with the proposed extension of the Pilot Program, the PSE proposes to amend sections 1(l) and 11 (t) of Rule II of the Rules of the Board of Governors of the PSE, which currently reflect the Pilot Program's scheduled expiration date of June 30, 1985.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Pilot Program was initially filed with the Commission on May 4, 1981, and approved for a period of one year on May 27, 1981. The term of the Pilot Program was subsequently extended several times by the Commission. In December 1982, the Pilot Program was amended. It is currently scheduled to terminate on June 30, 1985.

The PSE's Board of Governors and the Equity Allocation Committee have reviewed certain proposed modifications to the Pilot Program. To permit the Exchange to finalize these proposed modifications and to submit appropriate filings to the Commission, the PSE is requesting a three-month extension of the Pilot Program, to and including September 30, 1985.

The PSE believes that the proposed rule change is consistent with section 6(b) of the Act in general, and in particular section 6(b)(5) and (6)(b)(7).

(B) Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change imposes no burden on competition.

(C) *Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, participants or Others*

Comments on the proposed rule change were neither solicited nor received by the Exchange.

III. Date of Effectiveness of the Proposed Rule Change and Time Period for Commission Action

To permit the Pilot Program to remain in effect without interruption, the PSE has requested that this filing be approved on an accelerated basis, effective July 1, 1985.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6, and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that it will provide the Exchange with the additional time necessary to complete its review of proposed amendments to the Pilot Program and to submit appropriate filings to the Commission, while permitting the Pilot Program to remain in effect without interruption.

I. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission. 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submnisison, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 522, wil be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of such filings will also be available for inspection and copying at the principal office of the above mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by August 20, 1985.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: July 23, 1985.

John Wheeler,

Secretary.

[FR Doc. 85-18033 Filed 7-29-85; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 35-23769; 70-7060]

Jersey Central Power & Light Company et al., Notice of Proposal To Amend Credit Agreement

July 23, 1985.

Jersey Central Power & Light Company ("JCP&L"), Madison Avenue at Punch Bowl Road, Morristown, New Jersey 07960, Metropolitan Edison Company ("Met-Ed"), 2800 Pottsville Pike, Mahlenburg Township, Berks County, Pennsylvania 19605, and Pennsylvania Electric Company ("Penelec"), 1001 Broad Street, Johnstown, Pennsyvania 15907, wholly owned subsidiaries of General Public Utilities Corporation ("GPU"), a registered holding company, have filed a post-effective amendment to their declaration in this proceeding subject to secions 6(a), and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rules 44 and 50(a)(2) thereunder.

By order dated March 27, 1985 (HCAR No. 23644), the Commission authorized GPU, JCP&L, Met-Ed and Penelec (collectively "GPU Companies") to enter into a New Credit Agreement dated March 31, 1985 with a group of commercial banks for whom Citibank, N.A. is acting as agent and Chemical Bank is acting as co-agent. The New Credit Agreement provides, among other things, for borrowing by the GPU Companies thereunder, up to a maximum aggregate amount of $150 million, subject to certain conditions, with sublimits applicable to borrowings by GPU and Met-Ed.

The agent and co-agent have previously advised the GPU companies that changes in governmental regulations affecting the determination of the DMM-Bid Rate may, under certain circumstances, increase the cost to the bank, or certain of them, in making advances under the New Credit Agreement bearing interest at the DMM-Bid Rate. Provisions for such a contingency were not provided in the New Credit Agreement.

It is now proposed that the GPU Companies amend the New Credit Agreement to provide for the reimbursement to the banks for the increased cost incurred by the banks in making, funding or maintaining DMM-Bid Rate borrowings under the New Credit Agreement which result from any change in law or governmental regulation or the compliance therewith by any bank. In all other respects, the authorization heretofore granted by the Commission would remain unchanged.

The declaration and any amendments thereto is available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by August 16, 1985, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarants at the addresses specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or oder issued in this matter. After said date, the declaration, as filed or as it may be amended, may be permitted to become effective.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

TENNESSEE VALLEY AUTHORITY

Paperwork Reduction Act of 1980 Forms Under Review by the Office of Management and Budget

AGENCY: Tennessee Valley Authority.

ACTION: Forms Under Review by the Office of Management and Budget.

SUMMARY: The Tennessee Valley Authority (TVA) has sent to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

Requests for information, including copies of the forms proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be directed to the Agency Clearance Officer and also to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503; Attention: Desk Officer for Tennessee Valley Authority, 395-7313.

Agency Clearance Officer: Mark R. Winter, Tennessee Valley Authority, 100 Lupton Building, Chattanooga, TN 37401; (615) 751-2524, FTS 858-2524.

Type of Request: Regular Submission

Title of Information Collection: Norris Tailwater Landowner Survey

Frequency of Use: Non-recurring

Type of Affected Public: Individuals or households

Small Businesses or Organizations Affected: No

Federal Budget Functional Category Code: 452

Estimated Number of Annual Responses: 80

Estimated Total Annual Burden Hours: 20

Need For and Use of Information: TVA's efforts to improve water quality and flows below Norris Dam have created an improved fishery and a subsequent increase in the number of fishermen using the Clinch River. This questionnaire will provide information which will be used to identify the need for a detailed assessment of perceived benefits or conflicts that may be related to improving water quality in the Norris tailwater.

Dated: July 22, 1985.

Federal Aviation Administration

Research, Engineering and Development Conference

The Department of Transportation hereby announces a Federal Aviation Administration (FAA) Research, Engineering and Development (R,E&D) Conference. This 2-day conference will commence at 8:30 a.m. on August 14, 1985, in the FAA Auditorium, 3rd floor, FOB-10A, 800 Independence Avenue, SW., Washington, DC.

The purpose of the conference is to present the FAA R,E&D Plan to the aviation community in draft form and to discuss the draft plan with conference attendees. This discussion is expected to solicit the views of individuals on R,E&D needs in general and the draft plan in particular. These individual views will provide guidance in completing the plan.

Copies of the draft plan will be distributed at the conference. In addition to views expressed during conference discussions, written comments on the draft plan will be accepted through September 10, 1985. Comments should be mailed to the address below.

Further information concerning the conference may be obtained from the Systems Studies and Advanced Concepts Division, AES-302, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 426-3280. Copies of the draft plan may be obtained from this address after August 14, 1985.

Issued in Washington, DC, on July 24, 1985.

Jerry W. Bradley,

Acting Manager, Systems Studies/Advanced Concepts Division.

Final Procedures for Considering Environmental Impacts

AGENCY: Maritime Administration (MARAD), (DOT).

ACTION: Notice—Publication of Final MARAD Procedures for Considering Environmental Impacts, MAO 600-1.

SUMMARY: The Maritime Administration announces its final procedures for considering environmental impacts under the National Environmental Policy Act and implementing regulations of the Council of Environmental Quality and the Department of Transportation. The procedures are issued as Maritime Administrative Order (MAO) 600-1, "Procedures for Considering Environmental Impacts."

EFFECTIVE DATE: These procedures are effective July 30, 1985.

FOR FURTHER INFORMATION CONTACT: Michael E. Myrtle, U.S. Department of Transportation, Maritime Administration, MAR-318, Room 7225, 400 Seventh Street, SW., Washington, D.C.; telephone (202) 426-5816.

SUPPLEMENTARY INFORMATION: The Council on Environmental Quality (CEQ) published regulations (40 CFR Parts 1500-1508, 43 FR 55978, November 29, 1978) establishing uniform procedures for implementing the procedural provisions of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.). Under part 1507 of the CEQ regulations, Federal agencies must adopt any necessary implementing procedures after publishing them for public comment and submitting them to CEQ for review. The final MAO 600-1 is issued in accordance with that requirement.

The proposed MAO 600-1 was prepared in response to the CEQ regulations and Department of Transportation Order 5610. 1C, "Procedures for Considering Environmental Impacts," to provide in a single document the basic MARAD policies and procdures for consideration of environmental impacts in decisionmaking on proposed MARAD actions. The order was reviewed within the Department of Transportation and by the CEQ. It was then published for public comment in the **Federal Register** March 22, 1985 (50 FR 11606) with a correction April 1, 1985 (50 FR 12887). The comment period closed April 22, 1985. Comments were received only from the United States Environmental Protection Agency (EPA) and the National Trust for Historic Preservation (NTHP).

The EPA, by letter dated April 22, 1985, suggested minor editorial changes to clarify that: (1) Actions other than those listed in appendix 1 require National Environmental Policy Act documentation, i.e., preparation of an environmental assessment, and finding of no significant impact or environmental impact statement; and (2) appendix 2 is onlyt to be used for actions specifically listed in appendix 1, i.e., categorical exclusions. We have revised the language in section 4.05 and appendix 2 of the final MAO 600-1 to accommodate that suggested changes.

The NTHP, by letter dated April 16, 1985, and signed by its President, commented that actions qualifying under nearly all ten of the proposed categorical exclusions could affect National Register of Historic Places properties. Accordingly, the NTHP recommended that rather than providing qualifying language in each of the ten exclusions, as was propcsed for two of them, a qualifying paragraph applicable to all exclusions should be inserted just before the exclusion list. We have added such qualifying language to the second sentence of the introductory paragraph of appendix 1 of the final MAO 600-1. Also, since this added language adequately qualifies all exclusions, we have deleted the previously proposed qualification language from exclusions 6 and 9.

The final order has been reviewed within the Department of Transportation and in consideration of the comments received and their accomodation in the final order, no further review is deemed necessary for issuance of the order.

Accordingly, MARAD publishes the following final MAO 600-1 entitled "Procedures for Considering Environmental Impacts." (National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.); the Environmental Quality Improvement Act of 1970, as amended (42 U.S.C. 4371 et seq.); sections 176 and 309 of the Clean Air Act, as amended (42 U.S.C. 7401 et seq.); section 4(F), Department of Transportation Act of 1966, as amended (49 U.S.C. 1653(f)); section 106 of the National Historic Preservation Act of 1966 (16 U.S.C. 470 et seq.); sections 303 and 307 of the Coastal Zone Management Act of 1972 (43 U.S.C. 1241); section 2 of the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.); section 7 of the Endangered Species Act, as amended (16 U.S.C. 1531 et seq.); the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.); Executive Order 11514, dated March 4, 1970, as amended by Executive Order 11991, dated May 24, 1977; Executive Order 12114, dated January 4, 1979; 40 CFR Parts 1500-1508; DOT Order 5610.1C, as amended (44 FR 56420, October 1, 1979)).

By Order of the Maritime Administrator.

Dated: July 25, 1985.

Georgia P. Stamas,

Secretary, Maritime Administration.

Maritime Administrative Order 600-1—Procedures for Considering Environmental Impacts

Section 1. Purpose:

This order prescribes the policies and procedures for consideration of environmental impacts in decisionmaking on proposed Maritime Administration actions. This order supplements Department of Transporation Order DOT 5610.1C, "Procedures for Considering Environmental Impacts," which is the basic reference document.

Section 2. Background:

2.01 The National Environmental Policy Act (NEPA) established certain policies and goals concerning the environment and requires that, to the fullest extent possible, the policies, regulations, and public laws of the United States shall be interpreted and administered in accordance with those policies and goals. Section 102 of NEPA is designed to insure that environmental considerations are given careful attention and appropriate weight in all decisions of the Federal Government.

2.02 The Council on Environmental Quality (CEQ) has issued regulations for implementation of the procedural provisions of NEPA (40 CFR Parts 1500-1508). These regulations apply uniformly to and are binding upon all Federal agencies, and direct each agency to adopt implementing procedures which relate the CEQ regulations to the specific needs of that agency's programs and operating procedures.

2.03 This order implements within the Maritime Administration the mandate of NEPA, as defined and elaborated upon by CEQ's regulations, and by DOT 5610.1C. These directives provide that information on environmental impacts of proposed actions will be made available to public officials and citizens through environmental documents (namely, environmental assessments, findings of no significant impact, and environmental impact statements).

Section 3. Responsibilities:

3.01 The *Associate Administrator for Shipbuilding, Operations, and Research* is the Coordinator of Environmental Activities for the Maritime Administration (Coordinator); and as such, shall direct the functions required of the Maritime Administration to implement the provisions of NEPA, CEQ regulations, and DOT 5610.1C. This includes serving as a focal point where interested persons can get information or status reports on environmental documents and other elements of the NEPA process.

3.02 The *Chief Counsel* shall:

1 Act as legal advisor to the Coordinator with respect to all environmental matters;

2 Upon request, review and comment upon any tentative determination by the Coordinator that a proposed action by the Maritime Administration requires the initiation of an environmental assessment or environmental impact statement; and;

3 Perform a legal review of all proposed final environmental assessments, draft and final environmental impact statements, and final findings of no significant impact.

3.03 *Associate Administrators, Independent Office Directors, and Other Officials* shall, at the earliest possible time, inform the Coordinator through proper channels of all proposed actions (including actions proposed by nonfederal applicants) under their jurisdiction which may have an impact on the environment. They shall assist the Coordinator in the review of such actions and in the preparation of environmental documents, as applicable, and shall assure implementation of mitigation measures identified in these documents.

3.04 *All Maritime Administration personnel* engaged in programs and projects which may have an environmental impact shall become thoroughly familiar and comply with this order, DOT 5610.1C, and the CEQ regulations.

Section 4. Procedures—Maritime Administration Actions:

4.01 The Coordinator, or designated representative, shall conduct a preliminary analysis of any proposed action received pursuant to this order to determine whether the preparation of an environmental document (see section 2.03, above) is required.

1 If preparation of an environmental document is not required on the part of the Maritime Administration, i.e., the proposed action is a categorical exclusion (see section 4.05, below), the Coordinator shall so notify the referring official.

2 If the preparation of an environmental document is required on the part of the Maritime Administration, the Coordinator shall direct the preparation of either an environmental assessment or an environmental impact statement (if it is obvious that an impact statement is required), obtaining the assistance and clearance of cognizant officials as necessary.

3 Based on the results of the environmental assessment, the Coordinator shall direct preparation of either an environmental impact statement or a finding of no significant impact.

4.02 In preparing and processing draft and final environmental assessments, findings of no significant impact, and environmental impact statements, the Coordinator shall consult with Associate Administrators and other officials and prepare a coordinated Maritime Administration response to the request. The Coordinator shall also assure that the views of the Maritime Administration are made available to the referring official.

4.03 The Coordinator shall assure that the Maritime Administration complies with the time limits established by CEQ regulations and DOT 5610.1C.

4.04 The Coordinator shall assure that the Maritime Administration complies with the requirements of CEQ regulations and DOT 5610.1C for publication of notices of intent to prepare environmental impact statements, notices of availability of draft and final environmental impact statements, and notices of availability of findings of no significant impact.

4.05 Actions Normally Requiring Neither an Environmental Assessment nor an Environmental Impact Statement. Maritime Administration actions normally requiring neither an environmental assessment nor an environmental impact statement are listed in appendix 1 to this order. However, the Coordinator shall require an environmental assessment or environmental impact statement if the proposed action is a type listed in appendix 1 but may cause significant environmental impacts.

4.06 Actions Normally Requiring an Environmental Impact Statement. Maritime Administration actions normally requiring an environmental impact statement are listed in appendix 2 to this order. However, the Coordinator may find that the proposed action is a type listed in appendix 2 but will not cause significant environmental impacts.

4.07 Environmental Assessments. Environmental assessments shall be prepared in accordance with section 1508.9 of CEQ regulations and section 4.02 of DOT 5610.1C.

4.08 Findings of No Significant Impact. Findings of no significant impact shall be prepared in accordance with section 1508.13 of CEQ regulations and section 4.03 of DOT 5610.1C.

4.09 Environmental Impact Statements. Environmental impact statements shall be prepared in accordance with sections 1502.1 through 1502.18 of CEQ regulations and section 4.04 of DOT 5610.1C.

4.10 Mitigation. Mitigation measures shall be considered, developed, and assessed in accordance with CEQ regulations and DOT 5610.1C. Measures determined to be necessary shall be monitored when appropriate.

Section 5. Procedures—Applicant Actions:

5.01 Applicants shall submit sufficient information to the Coordinator to enable the Maritime Administration to prepare an environmental assessment or environmental impact statement. Applicants may be required to submit environmental data, analyses, or studies.

5.02 Applicants shall submit sufficient information to the Coordinator to enable the Maritime Administration to determine whether the proposed action is a categorical exclusion, or is likely to require an environmental assessment or environmental impact statement.

5.03 Applicants shall submit sufficient information to the Coordinator to enable the Maritime Administration to prepare a finding of no significant impact.

5.04 Applicants shall submit sufficient information to the Coordinator to enable the Maritime Administration to prepare an environmental impact statement.

5.05 Applicants shall submit sufficient information to the Coordinator to enable the Maritime Administration to prepare a mitigation plan.

5.06 Applicants shall submit sufficient information to the Coordinator to enable the Maritime Administration to prepare a monitoring plan.

Section 6. Definitions:

6.01 Definitions of terms used in this order are contained in section 1508 of CEQ regulations and section 6 of DOT 5610.1C.

Section 7. Appendixes:

7.01 Appendix 1 lists Maritime Administration actions normally requiring neither an environmental assessment nor an environmental impact statement.

7.02 Appendix 2 lists Maritime Administration actions normally requiring an environmental impact statement.

Appendix 1—Maritime Administration Actions Normally Requiring Neither an Environmental Assessment nor an Environmental Impact Statement

1. Routine personnel actions.

2. This action would have significant effect on wildlife resources or would affect unique geographical features such as:

on Federal bonds in hereby terminated effective June 30, 1985.

[Dept. Circ. 570, 1984 Rev., Supp. No. 27]

4.02 In preparing and processing draft and final environmental assessments, findings of no significant impact, and environmental impact statements, the Coordinator and all other officials involved shall comply with the applicable procedures set forth in DOT 5610.1C and this order.

4.03 When programmatic and legal clearances have been obtained for a final environmental assessment, draft or final finding of no significant impact, or *draft* environmental impact statement, the Coordinator may approve the document(s). The Coordinator shall submit all *final* environmental impact statements to the Maritime Adminstrator for approval.

4.04 An environmental impact statement shall be prepared for any proposed Maritime Administration action which could significantly affect the environment. Environmental impact statements have been prepared for such major Maritime Administration programs as: (1) Tanker Construction Program, (2) Tank Vessels Engaged in Domestic Trade, (3) Bulk Chemical Carrier Program, (4) Vessels Engaged in Offshore Oil and Gas Drilling Operations, and (5) Chemical Waste Incinerator Ship Program.

4.05 Categorical exclusions are Maritime Administration actions or groups of actions that do not have a significant effect on the quality of the human environment, individually or cumulatively. Categorical exclusions do not require preparation of environmental documents. Appendix 1 of this order describes the Maritime Administration's categorical exclusions. Appendix 2 provides a means for determining whether specific circumstances exist in exceptional cases which render the exclusion in Appendix 1 inoperative. The Coordinator's determination that an action qualifies under a categorical exclusion shall be final.

Section 5. Procedures—Requests for Comments Relative to Actions of Other Agencies:

5.01 The Coordinator shall be the Maritime Administration's receiving official for all requests from the Department for comments on environmental assessments and environmental impact statements of other agencies both within and outside the Department. Such requests are normally received from the Environmental Division, Office of Transportation Regulatory Affairs (OST). If a Maritime Administration official receives a request for comments from other than the Coordinator, the request shall be forwarded promptly to the Coordinator. All requests shall be reviewed by the Coordinator to determine whether the Maritime Administration can provide useful and constructive comments concerning the action involved. This review and comment process shall be coordinated with Associate Administrators and other officials, as required. All Associate Administrators and other cognizant officials shall cooperate with the Coordinator in providing comments on a timely basis so that the Coordinator may respond to the Department or requesting agency in a similar manner (see paragraph 9., DOT 5610.1C).

5.02 The Coordinator shall assess the comments received from Associate Administrators and other officials and prepare a coordinated Maritime Administration response to the request. When considered appropriate, such response shall be forwarded to the Chief Counsel and to Associate Administrators and other officials involved for concurrence prior to its being forwarded to the Department. If the response is direct to the requesting agency, the Coordinator shall provide a copy of the response to the Assistant Secretary for Policy and International Affairs (OST).

Section 6. International Actions:

Due to the international character of merchant shipping, program officials should take special note of the provisions of paragraph 10., DOT 5610.1C.

Garrett E. Brown, Jr.,

Acting Deputy Maritime Administrator.

Appendix 1—Maritime Administration Actions Which Are Not Normally Major Actions Significantly Affecting the Environment (i.e., Categorical Exclusions)

Actions that do not individually or cumulatively have a significant effect on the environment are categorically excluded and thus do not require an environmental assessment or an environmental impact statement. The below listed actions are categorical exclusions for the Maritime Administration, except actions having an effect on properties on or eligible for listing on the National Register of Historic Places and in specific cases where there is or may be a significant environmental impact. In such exceptional cases, appendix 2 should be used to determine if preparation of an environmental assessment or impact statement is required.

1. Administrative procurements (e.g., general supplies), contracts for personal services, personnel actions, project amendments which do not significantly alter the environmental impact of an action; and operating or maintenance subsidies, ship financing guarantees, deferred tax programs, etc., not resulting in a change in the effect on the environment.

2. Research studies and activities, including those at the Computer-Aided Operations Research Facility, which do not involve the direct construction of facilities.

3. Internal orders and procedures not required to be published in the Federal Register, promulgation of rules, regulations, directives, and amendments thereto which do not require a regulatory impact analysis under section 3 of Executive Order 12291 or do not have a potential to cause a significant effect on the environment; routine enforcement of statutes, rules, and safety and environmental standards and requirements, e.g., enforcement of statutes and rules regarding transfer of certain U.S.-flag vessels to any person not a citizen of the United States (sections 9, 37 when operative, and 41, Shipping Act, 1916, as amended) and enforcement of requirements for admission to the United States Merchant Marine Academy (section 1303, Merchant Marine Act, 1936, as amended and 46 CFR Part 310, Subpart C); and hearings, meetings and public affairs activities.

4. Reconstruction, modification, modernization, replacement, repair, and maintenance (including emergency replacement, repair, or maintenance) of equipment, facilities, or structures which do not change substantially the existing character of the equipment/facility/structure.

5. Purchase, installation, or replacement of operating or maintenance equipment to be located within a Maritime Administration facility and with no significant physical impacts off the site.

6. Acquisition of land in which the property will not be modified, its use will not be changed, and displacements will not occur.

7. Project or program actions for which applicable environmental documentation has been prepared previously and environmental circumstances have not subsequently changed.

8. Excessing and disposing of Maritime Administration personal or real property to the General Services Administration or otherwise; use of space in Maritime Administration-owned buildings or buildings which are constructed for or controlled by the General Services Administration; lease of existing buildings; lease of space for a term of one year or less; and renewal of existing leases that do not involve significant changes in use of the property.

9. Demolition and removal of buildings and other structures; water, sewage, electrical, gas, or other utility extensions of temporary duration; new gardening or landscaping, or the maintenance of existing landscape; filling of earth into previously excavated land with material compatible with the natural features of the site; minor trenching and backfilling where the surface is restored and excavated material is protected against wash and runoffs; grading on land with a slope of less than 10 percent; removal of obstructions on Maritime Administration property; and erosion control actions with no off-Maritime Administration property impact.

10. Construction on Maritime Administration installations of small (30,000 square feet or less) structures such as storage buildings, garages, small parking areas, foot or bicycle path; installation of signs, fences, and security lighting; minor expansion of facilities which require no additional land; and where expansion is due to remodeling of space in current quarters or existing buildings.

Appendix 2.—Categorical Exclusion Checklist

Project(s): _____

Date: _____

Nature of Action(s): _____

Exclusion Category: No. _____ _____

Topic _____

Instructions: For the above action(s) under the subject project or group of homogeneous projects, check the appropriate answer to each of the questions below. If all the answers on this list are checked "No," then the action(s) meet the criteria for categorical exclusion. If any answer is checked "Yes" or "Uncertain," then an environmental assessment will be prepared unless there is no doubt that an environmental impact statement is required.

1. This action would have significant effect on public health or safety.
No ____ Uncertain ____ Yes ____
2. This action would have significant effect on wildlife resources or would affect unique geographical features such as: wetlands, wild or scenic rivers, refuges, floodplains, etc., or lands protected by section 4(f) of the DOT Act.
No ____ Uncertain ____ Yes ____
3. This action will have highly controversial environmental effects.
No ____ Uncertain ____ Yes ____
4. This will have highly uncertain environmental effects or involve unique or unknown environmental risk.
No ____ Uncertain ____ Yes ____
5. This action will establish a precedent for future actions.
No ____ Uncertain ____ Yes ____
6. This action is related to other actions with individually insignificant but cumulatively significant effects.
No ____ Uncertain ____ Yes ____
7. This action will affect properties listed or eligible for listing in the National Register of Historic Places, or otherwise protecterd by section 106 of the National Historic Preservation Act.
No ____ Uncertain ____ Yes ____
8. This action will affect a species listed or proposed to be listed as Endangered or Threatened.
No ____ Uncertain ____ Yes ____
9. This action is inconsistent with Federal, State, local or tribal law or requirements imposed for protection of the environment.
No ____ Uncertain ____ Yes ____
10. This action or group of actions would involve unresolved conflicts concerning alternative uses of available resources.
No ____ Uncertain ____ Yes ____

Conclusion:
NEPA Action-Categorical Exclusion _____
EA Required _____
EIS Required _____

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition; Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and Delegation of Authority No. 85–5 of June 27, 1985 (50 FR 27393, July 2, 1985), I hereby determine that the objects to be included in the exhibit entitled, "Ramses the Great" or "Ramses II: The Pharaoh and His Time" (included in the list [1] filed as a part of this determination) imported from abroad for the temporary exhibition without profit within the United States are of cultural significance. These objects are imported pursuant to loan agreements between the Egyptian Antiquities Organization and the participating United States cities and organizations. I also determine that the temporary exhibition or display of the listed exhibit objects at the Brigham Young University, Provo, Utah, beginning on or about October 25, 1985, to on or about April 8, 1986; by the Jacksonville Art Museum in Jacksonville, Florida, beginning on or about November 15, 1986, to on or about March 15, 1987; and in the City of Memphis, Tennessee, beginning on or about April 15, 1987, to on or about August 31, 1987, is in the national interest.

Public notice of this determination is ordered to be published in the Federal Register.

Dated: July 24, 1985.

FEDERAL COMMUNICATIONS COMMISSION

July 25, 1985.

The Federal Communications Commission considered an additional item on the subject listed below at the Open Meeting scheduled for 9:30 a.m. Thursday, July 25, 1985, at 1919 M Street, NW., Washington, D.C.

Agenda, Item No., and Subject

Common Carrier—8—Title: Applications for authority to construct, launch and/or operate space stations in the domestic Fixed-Satellite Service filed by Alascom, Inc., American Satellite Company, American Telephone and Telegraph Company, Cablesat General Corporation, Columbia Communications Corporation, COMSAT General Corporation, Digital Telesat, Inc., Equatorial Communication Services, Federal Express Corporation, Ford Aerospace Satellite Services Corporation, GTE Satellite Corporation, GTE Spacenet Corporation, Hughes Communications Galaxy, Inc., Martin Marietta Communications Systems, Inc., National Exchange, Inc., Rainbow Satellite, Inc., RCA American Communications, Inc., Satellite Business Systems, Systematics General Corporation, United States Satellite Systems, Inc., and The Western Union Telegraph Company. Summary: The Commission will consider the appropriate actions to be taken on the pending space station applications filed by the companies listed above.

The prompt and orderly conduct of Commission business requires that less than 7-days notice be given consideration of this additional item.

Action by the Commission July 25, 1985: Commissioners Fowler, Chairman; Quello, Dawson, Rivera and Patrick voting to consider this additional item.

Additional information concerning this item may be obtained from Judith Kurtich, FCC Office of Congressional and Public Affairs, telephone number (202) 254–7674.

William J. Tricarico,

Secretary, Federal Communications Commission.

[FR Doc. 85–18044 Filed 7–26–85; 9:18 am]

BILLING CODE 6712–01–M

2

FEDERAL HOME LOAN BANK BOARD

TIME AND DATE: 10:00 a.m., Thursday, August 1, 1985.

PLACE: Board Room, 6th Floor, 1700 G Street, NW., Washington, D.C.

STATUS: Open Meeting.

CONTACT PERSON FOR MORE INFORMATION: Ms. Martha Gravlee.

MATTERS TO BE CONSIDERED: ARM Booklet Distribution.

Jeff Scooyers,

Secretary.

[FR Doc. 85–18134 Filed 7–26–85; 3:50 pm]

BILLING CODE 6720–01–M

3

FEDERAL RESERVE SYSTEM

TIME AND DATE: 11:00 a.m., Monday, August 5, 1985.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Building renovation proposals regarding the Federal Reserve Bank of Cleveland.
2. Proposed purchase of computers within the Federal Reserve System.
3. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
4. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board, (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: July 26, 1985.

James McAfee,

Associate Secretary of the Board.

Environmental Protection Agency

40 CFR Parts 261 and 271
Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Proposed Rule

VOL 50 ISS 146 JL 30 1985 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 261 and 271

[SWN-FRL 2835-4]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comments.

SUMMARY: The Environmental Protection Agency (EPA) today is proposing to amend its regulations under the Resource Conservation and Recovery Act (RCRA) by adding four spent solvents and distillation bottoms from the recovery of these solvents to the current hazardous waste listings. The Agency also is proposing to amend the list of commercial chemical products which are hazardous wastes when discarded by adding one of these solvents, as well as adding two of these solvents to the list of hazardous constituents in Appendix VIII of Part 261. The effect of this proposed regulation, if promulgated, would be to subject these wastes to the hazardous waste management standards contained in 40 CFR Parts 262–266, Part 124, and the permitting requirements of Parts 270 and 271.

DATES: EPA will accept public comments on this proposed rule until September 13, 1985. Any person may request a hearing on this amendment by filing a request with Eileen B. Claussen, whose address appears below, by August 14, 1985.

ADDRESSES: Comments should be sent to the Docket Clerk, Office of Solid Waste (WH-562), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. Comments should identify the regulatory docket "Listing Four Spent Solvents and Still Bottoms from the Recovery of These Solvents." Requests for a hearing should be addressed to Eileen B. Claussen, Director, Characterization and Assessment Division, Office of Solid Waste, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C., 20460.

The public docket for this amendment is located in Room S-212E, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, and is available for viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: The RCRA Hotline at (800) 424-9346 or at (202) 382-3000. For technical information contact Mr. Robert Scarberry, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, (202) 382-4761.

SUPPLEMENTARY INFORMATION:

I. Background

On May 19, 1980, as part of its final and interim final regulations implementing Section 3001 of RCRA, EPA published a list of hazardous wastes generated from non-specific sources. This list has been amended several times, and is published in 40 CFR 261.31. It includes 27 commonly used organic solvents. These solvents are identified as EPA Hazardous Wastes Nos. F001, F002, F003, F004, and F005.

Today EPA is proposing to add spent 1,1,2-trichloroethane and the still bottoms from the recovery of this spent solvent to the generic F002 listing, and benzene, 2-ethoxyethanol, and 2-nitropropane, as well as still bottoms from the recovery of these spent solvents to the generic F005 listing. These wastes are described below and in the listing background document.[1] The hazardous constituents in these wastes are the solvents themselves, which are known to cause either carcinogenic, teratogenic, adverse reproductive, or other chronic toxic effects in laboratory animals. Also, benzene has been determined to cause leukemia in humans.

These solvents typically are present at concentrations ranging from 1 to 95 percent in the wastes, are moderately to highly mobile in air and water, are expected to be persistent in ground water, and can reach environmental receptors in harmful concentrations if these wastes are mismanaged. In addition, these solvents tend to degrade liners and thus may leach from land disposal facilities into ground or surface water, or form solutions of other hazardous substances, thereby rendering those compounds more mobile in the environment. Furthermore, three of these solvents (benzene, 2-ethoxyethanol, and 2-nitropropane) are also ignitable in their pure form and it is expected that the corresponding spent solvent will also exhibit the characteristic of ignitability as these wastes typically contain significant concentrations (*i.e.*, between 50 and 95 percent) of the solvent. The data collected by the Agency show that the still bottoms from the recovery of the subject solvents typically contain between 1 to 20 percent of these toxic solvents; in general, these recovery still bottoms are not expected to be ignitable.

EPA has evaluated these wastes against the criteria for listing hazardous wastes provided in 40 CFR 261.11(a)(3), and has determined that these wastes are hazardous because they are capable of posing a substantial present or potential threat to human health and the environment when improperly treated, stored, transported, disposed of, or otherwise managed. Also, it should be noted that section 222 of the Hazardous and Solid Waste Amendments of 1984 requires the Agency to determine whether or not to list wastes from a number of industrial sectors and operations, including the use of solvents. This proposal responds to Congress' request to consider listing additional solvents.

These proposed spent solvent listings will apply to wastes which result from the use of individual solvents identifiable as any technical grades of the solvents that are produced or marketed. These solvents are considered "spent" and are regulated under Subtitle C of RCRA when they no longer meet the specifications for which the solvent was originally used because they have become contaminated with physical or chemical impurities and are no longer fit for use without being regenerated, reclaimed, or otherwise reprocessed. This proposed listing does not cover manufacturing process wastes which are contaminated with solvents. Such wastes, if determined to be hazardous, would be listed individually.

The Agency realizes that a major regulatory loophole exists which allows wastes which result from the use of solvent mixtures containing one or more of the spent solvents to remain unregulated. In another regulatory action, however, the Agency proposed to consolidate the F001 through F005 listings into F001 and to amend the subsequent F001 listing by establishing a quantity and volume "cut-off" for solvent mixtures. See 50 FR 18378, April 30, 1985. Specifically, the Agency is proposing to expand the universe of wastes considered "spent solvents" to include any solvent mixture or blend which contains, in total, 10 percent or more of one or more listed solvents. The Agency intends to incorporate the four solvents which are the subject of this **Federal Register** notice under the consolidated F001 listing when this solvent mixture rule is promulgated.

[1] The listing background document is available in the public docket at the address cited above.

II. Summary of the Regulation

A. List of Wastes

This proposed regulation would list as hazardous the following wastes generated in conjunction with the use of four solvents:

F002—
- Spent 1,1,2-trichloroethane (T) and still bottoms from its recovery (T).

F005—
- Spent 2-ethoxyethanol (I,T) and still bottoms from its recovery (T),
- Spent benzene (I,T) and still bottoms from its recovery (T), and
- Spent 2-nitropropane (I,T) and still bottoms from its recovery (T).

The total quantities of the organic residual wastes from the use of these four solvents are estimated to be as follows:

Solvent	Spent solvent generation (kkg/yr)	Recovery still bottoms (kkg/yr)
Benzene	7,720	2,320
1,1,2-trichloroethane	9,470	2,840
2-nitropropane	2,330	1,110
2-ethoxyethanol	3,420	2,500

The listing background document and the sources cited there describe the sources of the wastes in more detail. The Agency has waste characterization data which show that typical spent solvent wastes contain between 50 and 95 percent solvent and the still bottoms from spent solvent recovery have a solvent content of between 1 and 20 percent. Table I lists the constituents of concern for the subject wastes along with their toxic effects of concern, concentrations, exposure pathways of concern, mobility in soil, solubility in water, and estimated persistence in ground water.

1. Effects of Concern. There is sufficient evidence from available studies on the toxicological properties of the subject solvents to list the spent solvents and the still bottoms which result from their recovery as hazardous. Specifically, these solvents have been demonstrated to cause either carcinogenic, teratogenic, adverse reproductive, or other chronic health effects in laboratory animals. In addition, benzene has been determined to cause leukemia in humans.

TABLE I.—CONSTITUENTS OF CONCERN IN THE SPENT SOLVENTS AND STILL BOTTOMS

Waste/constituent of concern	Concentration range (percent)	Effects of concern	Exposure pathway of concern	Mobility in soil	Log K_{oc}[1]	Persistence (ground water)	Solubility in water
F002:							
Spent 1,1,2-trichloroethane	50–95	Carcinogenic	Ground water	Moderate	2.5	High	High.
Still bottoms	1–20	Chronic					
F005:							
Spent benzene	50–95	Carcinogenic	Ground water	Moderate	2.15	Moderate	High.
Still bottoms	1–20						
F005:							
Spent 2-ethoxyethanol	50–95	Teratogenic	Ground water	High	−0.54	Moderate	High.
Still bottoms	1–20	Reproductive					
F005:							
Spent 2-nitropropane	50–95	Carcinogenic	Ground water	High	0.65	Moderate	High.
Still bottoms	1–20	Chronic					

[1] Leo, *et al.*, 1971. Calculated by the regression equation of Briggs, *et al.*, 1973 (log K_{oc}=0.524 (log K_{ow})+0.616).

These four constituents are present in the wastes at levels of regulatory concern. Ambient Water Quality Criteria (AWQC) have been established (see 45 FR 79318, November 28, 1980) for benzene and 1,1,2-trichlorethane. The AWQC developed for these substances to protect against health risks to humans resulting from the consumption of water and aquatic organisms are 0.66 μg/L and 0.6 μg/L, respectively. (These AWQC correspond to the 10^{-6} excess lifetime cancer risk levels.) As seen above, benzene and 1,1,2-trichloroethane are present in the wastes at concentrations millions of times greater than their AWQC values. Although no health-based standards have been developed yet for 2-ethoxyethanol and 2-nitropropane, the Agency believes that the levels expected in the wastes also are significant. In particular, since the concentrations of the solvents in the waste streams can be as high as 50 to 95 percent, and considering the toxicity of these two solvents, we believe that 2-ethoxyethanol and 2-nitropropane would reach human receptors at levels of regulatory concern.

Benzene and 1,1,2-trichloroethane are recognized by the Agency's Carcinogen Assessment Group as substances which present a significant potential for human carcinogenesis (USEPA, 1980a). In the case of benezene, there is epidemiological evidence that benzene causes leukemia in humans (Vigliani and Saita, 1964; Cavignaux 1962; and Ishimaru *et al.*, 1971). 1,1,2-trichloroethane has been shown to be carcinogenic in mice, causing hepatocellular carcinomas and adrenal pheochromocytomas (NCI, 1978; Parker, *et al.*, 1979).

2-nitropropane also is recognized by the International Agency for Research on Cancer as having exhibited significant evidence of carcinogenicity in laboratory animals; in particular, the compound has been shown to cause hepatocellular carcinomas and hepatic adenomas in rats (IARC, 1982). The American Conference of Governmental Industrial Hygienists also has designated 2-nitropropane [2] as an industrial substance suspected of having carcinogenic potential in man (ACGIH, 1981).

2-ethoxyethanol is known to be teratogenic in animals by oral, inhalation, and dermal routes, causing skeletal variants and cardiovascular malformations (Hardin *et al.*, 1981; Hardin *et al.*, 1982). As a reproductive toxin, 2-ethoxyethanol has been shown to cause testicular atrophy in rats (Morris *et al.*, 1942) and in dogs (Stenger *et al.*, 1971), as well as declining sperm counts and aberrant sperm morphology in rats (Zenick *el al.*, 1984). Therefore, these compounds exhibit toxicological properties of regulatory concern. Additional information on the toxicity of these solvents is provided in the Health and Environmental Effects Profiles (HEEPs) which are available in the public docket at the address noted above.

2. Mobility of the Constituents of Concern. The water solubility of a given hazardous constituent is indicative of its mobility potential (*i.e.*, the likelihood

[2] 2-nitropropane has already been included in the list of commercial chemical products which are hazardous wastes when discarded (§ 261.33(f)) due to its ignitability. Today's proposal would amend our basis for defining this compound as hazardous, namely, that it is both toxic and ignitable.

that it will be released from a management site and become dissolved

Bunger, 1970), it does not spontaneously react with oxygen at ordinary

hydrolysis, and the relatively low level of biological activity in ground water.

1.96 g O_2/g. In a 5-day BOD test with unacclimated cultures, the oxygen

could lead to a substantial threat to human health and the environment

subsequent mass spectrometric (MS) or flame ionization detection (FID)

that it will be released from a management site and become dissolved in a water resource of concern). The exposure pathway of principal concern is leaching to ground water. Leaching is a concern because these compounds are soluble in water and so could leach out of the wastes, potentially contaminating ground water.

The water solubilities of benzene and 1,1,2-trichloroethane are significant as they are millions of times greater than their corresponding AWQC values. Benzene is soluble to 1800 mg/L (2.7 million times the AWQC) and 1,1,2-trichloroethane is soluble to 4500 mg/L (7.5 million times the AWQC). Although there are no health-based values for 2-nitropropane and 2-ethoxyethanol, their solubilities are much higher than benzene and 1,1,2-trichloroethane (2-nitropropane is soluble to 17,200 mg/L, and 2-ethoxyethanol is completely miscible with water); thus they are capable of existing at significant concentrations in water.

Another factor which can provide an indication of the mobility of the subject solvents is their log octanol/water partition coefficient. The log octanol/water partition coefficients for benzene, 2-ethoxyethanol, 2-nitropropane, and 1,1,2-trichloroethane are 2.15, –0.54, 0.65, and 2.5, respectively (Leo *et al.*, 1971). According to Briggs (1983), these values mean that the subject solvents have a moderate to high affinity for water (see Table I) and are not expected to be immobilized to a significant degree by sorption to soil or sediments with a high organic content. Thus, the solvents are expected to leach with the water phase, and tend not to adsorb to soils.

Soil attenuation factors, such as soil binding, biodegradation, and other environmental degradative processes are expected to decrease the amount of the constituents available for migration. Even so, these solvents are expected to present a substantial hazard because they are present in the wastes in such high concentrations that only a small fraction need migrate from the wastes and reach environmental receptors to pose a potential for substantial harm.

3. Persistence of the Constituents of Concern. Persistence in the environment is an important criterion which the Agency considers when determining whether a waste has the potential to create a hazard. The chemical reactivity of the subject solvents indicate that they are persistent and thus pose a significant potential to human health and the environment.

Benzene does not react with water in the pH range of 2 through 14. Although benzene will readily burn if ignited (flash point = −11°C; Riddick and Bunger, 1970), it does not spontaneously react with oxygen at ordinary temperatures and pressures. Benzene does not absorb visible light; therefore, it will not be directly photolyzed in the lower atmosphere (troposphere) or surface water. Benzene can be attacked by hydroxyl radicals in the atmosphere (Hansen *et al.*, 1975), but event in bright sunlight, under optimal conditions for photooxidation, it will have a half-life of several hours (Darnall *et al.*, 1976).

Benzene is subject to biodegradation in aerobic soil and water (Gibson, 1968). Bacteria convert benzene to catechol using a dioxygenase enzyme in the first step of oxidation (Axcell and Geary, 1975). Also, there is evidence of some anaerobic degradation, but the mode in which it occurs is not clear.

Although benzene is expected to degrade through hydroxyl radical oxidation in the atomosphere and biodegradation in surface waters, it is expected to be moderately persistent in ground water due to its relatively high solubility in water and the relatively low level of biological activity in ground water. This has been demonstrated in that benzene has been found in ground water at a number of sites.

2-Nitropropane will readily burn if ignited (flash point-39°C; Riddick and Bunger, 1970), but it does not spontaneously react with oxygen at ordinary temperatures and pressures. 2-Nitropropane does not absorb visible light and will not directly photolyze in the lower atmosphere (troposphere) or surface water. 2-Nitropropane can be attacked by hydroxyl radicals in the atmosphere; an EPA reactivity classification ranks 2-nitropropane in a group that is not particularly reactive (Darnall *et al.*, 1976). Thus, 2-nitropropane should have a half-life of several hours even in bright sunlight under optimal conditions for photo-oxidation by hydroxyl radicals.

Little is known about the possible biodegradation of 2-nitropropane. It seems likely that it could be metabolized by microorganisms both in aerobic and anaerobic environments, but its half-life in typical unacclimated environmental ecosystems is probably long enough for significant movement to take place.

Although 2-nitropropane is expected to degrade through hydroxyl radical oxidation in the atmosphere and biodegradation in water, these processes probably are not fast enough, even under optimal conditions, to prevent migration of 2-nitropropane in the environment. 2-Nitropropane is expected to be moderately persistent in ground water because of its relatively high solubility in water, its resistance to hydrolysis, and the relatively low level of biological activity in ground water.

1,1,2-Trichloroethane does not react with water under ambient conditions. At high temperatures in the presence of a strong base, elimination of HCl would occur, yielding a dichloroethene, but this is not a significant process in the environment. 1,1,2-Trichloroethane does not absorb visible light and therefore, it will not be directly photolyzed in the lower atmosphere (troposphere) or surface water. 1,1,2-Trichloroethane can be attacked by hydroxyl radicals in the atmosphere. Drilling *et al.* (1976) studied the degradation of 1,1,2-trichloroethane under simulated atmospheric conditions, and their data allow the estimation of the half-life of this compound to be 41 hours under conditions of bright sunlight.

1,1,2-Trichloroethane resists biodegradation in surface water. Jensen and Rosenberg (1975) found that the half-life of 1,1,2-trichloroethane in sea water was much more than 200 hours. Volatilization was more important than biodegradation under these conditions. Bouwer and McCarty (1983) found that 1,1,2,2-tetrachloroethane was dehalogenated to 1,1,2-trichloroethane under anaerobic conditions. It is possible that 1,1,2-trichloroethane also is dehalogenated under these conditions.

1,1,2-Trichloroethane is expected to persist in the atmosphere, surface water, and ground water for long periods of time. It would move freely in the environment, and would be particularly difficult to control in ground water, where it would persist indefinitely.

2-Ethoxyethanol does not react with water in the pH range of 2 to 14. Although 2-ethoxyethanol is ignitable (flash point=44.4°C), it does not spontaneously react with oxygen under ambient conditions. 2-Ethoxyethanol also does not absorb visible light and will not be directly photolyzed in the lower atmosphere (troposphere) or surface water. However, 2-ethoxyethanol belongs to the structural class of ethers, and ethers are rapidly attacked by hydroxyl radicals in the atmosphere. Experiments by Dilling *et al.* (1976) on compounds like trioxane, dioxane and 1-methoxy-2-propanol, which have some structural similarity to 2-ethoxyethanol, indicate that these compounds would have half-lives on the order of about 10 hours in bright sunlight due to photooxidation by hydroxyl radicals.

Although 2-ethoxyethanol is fairly easily biodegraded under aerobic conditions in water, anaerobic degradation is expected to be quite slow. Its theoretical oxygen demand is 1.96 g O_2/g. In a 5-day BOD test with unacclimated cultures, the oxygen demand was 1.03 g O_2/g (53%); with acclimated cultures the BOD_5 was 1.27 g O_2/g (65%) (Verschueren, 1977).

2-Ethoxyethanol is expected to degrade through hydroxyl radical oxidation in the atmosphere and biodegradation in surface water; however, the processes are not fast enough to prevent the migration of 2-ethoxyethanol in the environment. 2-Ethoxyethanol is expected to be moderately persistent in ground water because of its miscibility with water, its low affinity for soil, its resistance to hydrolysis, and the relatively low level of biological activity in ground water.

4. Other Characteristics of the Wastes. Three of the solvents addressed in today's proposed rule also exhibit the characteristic of ignitability as their flash points are below 60 °C (see 40 CFR 261.21). Benzene, 2-ethoxyethanol, and 2-nitropropane are liquids that have flash points of −11 °C, 39 °C, and 44.4 °C, respectively. As spent solvents, these wastes would contain 50 to 95 percent of these solvents and thus, many of the spent solvents are expected to also exhibit the characteristic of ignitability. Still bottoms from the recovery of spent solvents have a lower concentration of solvent (1 to 20 percent); generally, the still bottoms are not expected to be ignitable.

Therefore, due to the high concentrations of the hazardous constitutents in these wastes, the toxic effects of these constituents, their moderate to high mobility (via leaching and volatilization), and the expected persistence in ground water in the environment, EPA concludes that these wastes have the capability to pose a substantial present or potential hazard to human health and the environment when improperly stored, transported, disposed of, or otherwise managed. The Agency, therefore, is proposing to add these spent solvents as well as the still bottoms from their recovery to the hazardous waste list in 40 CFR 261.31.

B. Addition of 2-Ethoxyethanol to § 261.33(f)

Section 261.33(f) is a list of commercial chemical products or manufacturing intermediates which are identified as hazardous wastes when discarded. The Agency has determined that 2-ethoxyethanol satisfies the criteria for hazardous waste listing contained in 40 CFR 261.11(a)(3). When sold as a commercial product, this substance is more than 85% pure (technical grade). The unsupervised disposal of such high concentrations of a toxic, mobile, and persistent chemical could lead to a substantial threat to human health and the environment. Accordingly, the Agency proposes to add 2-ethoxyethanol to the list of commercial chemical products that are hazardous when discarded.

C. Toxicants Added to Appendix VIII

This action also proposes to add 2-nitropropane and 2-ethoxyethanol to Appendix VIII based on the toxic effects these chemicals have on humans or other life forms (see 40 CFR 261.11(a)(3)). By adding these new compounds, the Agency also is increasing the number of hazardous constituents for which land disposal facilities must monitor ground water under compliance monitoring programs (see 40 CFR 264.99). Land disposal permittees also may be required to monitor for these constituents under ground-water detection monitoring programs (see 40 CFR 264.98).

D. Test Methods for Compounds Added to Appendices VII and VIII

The addition of compounds to Appendices VII and VIII requires that the Agency promulgate test methods for use in detecting specified substances by applicants who wish to conduct waste evaluations in support of delisting petitions and by owners or operators of hazardous waste management facilities who must conduct ground-water monitoring (see 40 CFR 264.99) or incinerator monitoring (see 40 CFR 264.341). In 40 CFR Part 261, Appendix III, the Agency has already established test methods for benzene (Method Numbers 8020 and 8240) and 1,1,2-trichloroethane (Method Numbers 8010 and 8240).

The Agency has performed a literature search and evaluated the currently established EPA test methods [3] with the objective of determining the suitability of these analytical methods for 2-ethoxyethanol and 2-nitropropane. This evaluation involved a review of methods historically used for the quantification of 2-ethoxyethanol and 2-nitropropane as well as a comparison of Appendix III methods already established for compounds with chemical structures similar to 2-ethoxyethanol and 2-nitropropane. Based on this evaluation, we have determined that these solvents may be separated by gas chromatographic (GC) methods with subsequent mass spectrometric (MS) or flame ionization detection (FID).

Gas chromatography is appropriate because these organic compounds exhibit characteristic retention times and subsequently are well separated in the GC column and easily identified. When combusted by the FID, 2-ethoxyethanol and 2-nitropropane will produce ionic intermediates that can be detected with excellent sensitivity. The mass spectrometer also is an appropriate detector for these compounds as they have a unique mass spectrum that allows for definitive identification and quantification. Therefore, the Agency is proposing Method Number 8030, which involves the use of a gas chromatograph with a flame ionization detector (GC/FID), and Method Number 8240, which involves the use of a gas chromatograph with mass spectrometric detection (GC/MS) for 2-ethoxyethanol and 2-nitropropane.

The Agency notes that Method Numbers 8010, 8020, 8030, and 8240 require that the concentration of the constituent in the sample be below 0.01 percent. The subject wastes are expected to have concentrations of the constituents in excess of 1 percent; therefore, the sample introduction method for the previously mentioned gas chromatographic methods are restricted to direct injection or dilution of the sample in the appropriate solvent followed by direct injection.

The Agency is inviting the public to comment on these proposed methods if they have industrial experience with the determination of these compounds in environmental media.

[3] See "Test Methods for Evaluating Solid Waste: Physical/Chemical Methods", SW-846, 2nd edition, July 1982, as amended; copies of this document are available from: Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, (202) 783-3238, Document number: 055-002-81001-2.

III. CERCLA Impacts

All hazardous wastes designated by today's proposed rule will, upon the effective date of promulgation, automatically become hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). (See CERCLA section 101(14).) CERCLA requires that persons in charge of vessels or facilities from which hazardous substances have been released in quantities that are equal to or greater than the reportable quantities (RQs) immediately notify the National Response Center (at (800) 424-8802 or (202) 426-2675) of the release. (See CERCLA section 103 and 50 FR 13456-13522, April 4, 1985.)

RQs have already been designated for three of the four solvents addressed in today's proposed listing: benzene has an RQ of 1000 pounds; while 1,1,2-trichloroethane and 2-nitropropane have

RQs of 1 pound.[4] According to CERCLA section 102(b), the RQ for any hazardous

applies in authorized States in the interim.

their efforts to implement their programs, rather than take separate

RQs of 1 pound.[4] According to CERCLA section 102(b), the RQ for any hazardous substance as defined in Section 101(14) (including those listed pursuant to RCRA section 3001) will be one pound or the RQ established pursuant to section 311 of the Clean Water Act, unless and until superseded by regulations establishing an RQ under section 102(a). With respect to 2-ethoxyethanol, an RQ has not yet been set. Thus, upon the effective date of promulgation of this proposal, 2-ethoxyethanol will be added to 40 CFR § 261.33(f), and pursuant to CERCLA section 101, automatically will have an RQ of one pound, unless and until adjusted by regulation under CERCLA.

IV. State Authority

A. Applicability of Rules in Authorized States

Under section 3006 of RCRA, EPA may authorize qualified States to administer and enforce the RCRA program within the State. (See 40 CFR Part 271 for the standards and requirements for authorization.) Following authorization, EPA retains enforcement authority under sections 3008, 7003, and 3013 of RCRA, although authorized States have primary enforcement responsibility.

Prior to the Hazardous and Solid Waste Amendments of 1984 (HSWA) amending RCRA, a State with final authorization administered its hazardous waste program entirely in lieu of the Federal program. The Federal requirements no longer applied in the authorized State, and EPA could not issue permits for any facilities in the State which the State was authorized to permit. When new, more stringent Federal requirements were promulgated or enacted, the State was obligated to enact equivalent authority within specified time frames. New Federal requirements did not take effect in an authorized State until the State adopted the requirements as State law.

In contrast, under newly enacted section 3006(g) of RCRA, 42 U.S.C. 6926(g), new requirements and prohibitions imposed by the HSWA take effect in authorized States at the same time that they take effect in nonauthorized States. EPA is directed to carry out those requirements and prohibitions in authorized States, including the issuance of permits, until the State is granted authorization to do so. While States must still adopt HSWA-related provisions as State law to retain authorization, the HSWA applies in authorized States in the interim.

Today's rule would be added to Table 1 in § 271.1(j) which identifies the Federal program requirements that are promulgated pursuant to HSWA. The Agency believes that it is extremely important to clearly specify which regulations implement HSWA since these requirements are immediately effective in authorized States. States may apply for either interim or final authorization for the HSWA provisions identified in Table 1 as discussed in the following section of this preamble.

B. Effect on State Authorizations

Today's announcement proposes regulations that would be effective in all States since the requirements are imposed pursuant to section 222 of the Hazardous and Solid Waste Amendments of 1984, 42 U.S.C. 6921(e)(2). Thus, EPA will implement the regulations in nonauthorized States, and in authorized States until they revise their programs to adopt these rules and the revision is approved by EPA.

A State may apply to receive either interim or final authorization under section 3006(g)(2) or 3006(b), respectively, on the basis of requirements that are substantially equivalent or equivalent to EPA's. The procedures and schedule for State adoption of these regulations is described in 40 CFR 271.21. See 49 FR 21678 (May 22, 1984).

Applying § 271.21(e)(2), States that have final authorization must revise their programs within a year of promulgation of EPA's regulations if only regulatory changes are necessary, or within two years of promulgation if statutory changes are necessary. These deadlines can be extended in exceptional cases (40 CFR 271.21(e)(3)).

States with authorized RCRA programs may have listings similar to those in today's rule. These State regulations have not been assessed against the Federal regulations being proposed today to determine whether they meet the tests for authorization. Thus, a State is not authorized to carry out these listings in lieu of EPA until the State program is approved. As a result, the standards proposed today, if promulgated, will apply in all States, including States with listings similar to those in today's rule. States with existing listings may continue to administer and enforce their standards as a matter of State law.

In implementing the Federal program, EPA will work with States under cooperative agreements to minimize duplication of efforts. In many cases EPA will be able to defer to the States in their efforts to implement their programs, rather than take separate actions under Federal authority.

States that submit official applications for final authorization less than 12 months after promulgation of EPA's regulations may be approved without including standards equivalent to those promulgated. However, once authorized, a State must revise its program to include standards substantially equivalent or equivalent to EPA's within the time period discussed above.

V. Regulatory Impact Analysis

Under Executive Order 12291, EPA must determine whether a regulation is "major" and, therefore, subject to the requirement of a Regulatory Impact Analysis. This proposed rule is not a major rule because it is not expected to result in an effect on the economy of $100 million or more. Although some generators may be newly regulated, data from the RCRA notification data base indicate that many solvent generators also generate other RCRA hazardous wastes. The Agency believes that many of the generators of the spent solvents proposed for listing in today's notice already manage these wastes in compliance with RCRA. The Agency expects that the proposed rule will minimize the competitive advantage experienced by those facilities that presently are not managing these solvent wastes as hazardous.

The Agency has completed a preliminary screening impact analysis of the potential impacts of today's proposal.[5] The analysis indicates that the total impact from this proposed rule, if promulgated, will be less than $7.5 million. This cost will be borne by approximately 1200 manufacturers of paint and coatings, inks, and organic chemicals. The analysis considered each of these industrial segments separately and found that the proposed listings will not result in either a significant increase in prices or a significant decrease in profits.

A worst case scenario was used to provide a conservative cost estimate of the economic impact. The analysis included the costs associated with the following: establishment of a manifest system, the maintenance of an on-site hazardous waste storage area, off-site incineration and transportation of the waste 250 miles to an incinerator, and initial costs of conducting chemical waste analysis and rewriting waste analysis plans.

[4] See Reportable Quantity Final Rule, 50 FR 13456–13522, April 4, 1985.

[5] A copy of the screening impact analysis is available in the public docket at the address cited above.

The addition of the new hazardous constituents to Appendix VIII also will not result in any significant increased burden in groundwater monitoring or incineration monitoring requirements because the analytical techniques currently employed to test for the presence and concentration of other Appendix VIII constituents also would detect and quantify these additional compounds.

The cost of adding 2-ethoxyethanol to 40 CFR 261.33(f), the list of commercial chemical products which are hazardous wastes when discarded, also will be minimal, because these commercial chemical products are rarely discarded due to their inherent value.

In addition, the Agency does not expect that there will be an adverse impact on the ability of the U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. This proposal is not a major regulation; therefore, no Regulatory Impact Analysis is being conducted.

VI. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available to the public, a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant impact on small entities.

Although some generators will be newly regulated and some will experience an increased regulatory burden, this amendment is not expected to have a significant economic impact on a substantial number of small entities. The largest costs are more likely to be borne by generators with large quantities of difficult to manage wastes (*i.e.*, wastes not suitable for land disposal or recycling). Accordingly, I hereby certify that this proposed regulation would not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis. (See 5 U.S.C. 603.)

For the reasons set out in the preamble, it is proposed to amend Title 40 of the Code of Federal Regulations as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for Part 261 continues to read as follows:

Authority: Secs. 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended [42 U.S.C. 6905, 6912(a), 6921, and 6922].

2. In § 261.31, revise the entries for F002 and F005 in the subgroup 'Generic' to read as follows:

§ 261.31 Hazardous wastes from non-specific sources.

Industry and EPA hazardous waste No.	Hazardous waste	Hazard code
Generic:		
F002	The following spent halogenated solvents: tetrachloroethylene, methylene chloride, trichloroethylene, 1,1,1-trichloroethane, chlorobenzene, 1,1,2-trichloro-1,2,2-trifluoroethane, ortho-dichlorobenzene, trichlorofluoromethane, and 1,1,2-trichloroethane; and still bottoms from the recovery of these solvents (T)	(T).
F005	The following spent non-halogenated solvents (I,T): toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, and 2-nitropropane; and the still bottoms from the recovery of these solvents (T)	(I,T).

§ 261.33 [Amended]

3. In § 261.33(f), add the following entry in alphabetical order:

Hazardous waste No.	Substance
U359	2-Ethoxyethanol (ethylene glycol monethyl ether).

4. In § 261.33(f) change both entries for Hazardous Waste No. U171 "2-Nitropropane (I)" and "Propane, 2-nitro- (I)" to read "2-Nitropropane (I,T)" and "Propane, 2-nitro- (I,T)", respectively.

5. Add the following hazardous constituents in alphabetical order to Table 1 of Appendix III of Part 261:

Compound	First edition methods	Second edition methods
2-Ethoxyethanol		8030, 8240
2-Nitropropane		8030, 8240

6. Revise the following entries in Appendix VII of Part 261 to read as follows:

Appendix VII—Basis for Listing Hazardous Waste

EPA hazardous waste No.	Hazardous constituents for which listed
F002	Tetrachloroethylene, methylene chloride, trichloroethylene, 1,1,1-trichloroethane, 1,1,2-trichloroethane, chlorobenzene, 1,1,2-trichloro-1,2,2-trifluoroethane, ortho-dichlorobenzene, trichlorofluoromethane.
F005	Toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, 2-ethoxyethanol, benzene, 2-nitropropane.

7. Add the following hazardous constituents (with CAS Numbers) in alphabetical order to Appendix VIII of Part 261:

Appendix VIII—Hazardous Constituents

* * * * *

Ethylene glycol monoethyl ether (Ethanol, 2-ethoxy) (CAS No. 110–80–5)

* * * * *

2-Nitropropane (Propane, 2-nitro) (CAS No. 79–46–9)

PART 271—REQUIREMENTS FOR AUTHORIZATION OF STATE HAZARDOUS WASTE PROGRAMS

8. The authority citation for Part 271 continues to read as follows:

Authority: Sec. 1006, 2002(a), and 3006 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), and 6926).

9. Section 271.1(j) is amended by adding the following entry to Table 1 in chronological order by date of publication:

TABLE 1.—REGULATIONS IMPLEMENTING THE HAZARDOUS AND SOLID WASTE AMENDMENTS OF 1984

Part III

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 901

Surface Coal Mining and Reclamation Operations Under the Permanent Federal Lands Program; State-Federal Cooperative Agreements; Alabama; Final Rule

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

regulation of surface coal mining and reclamation operations on Federal lands within the State of Alabama pursuant to the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act). The Agreement provides for State implementation of a Federal lands program under which the State will regulate surface coal mining and reclamation operations on Federal lands in accordance with the requirements of SMCRA and the Federal lands program regulations. The Agreement will eliminate duplicative Federal and State regulation of surface coal mining and reclamation operations on Federal lands within the State of Alabama.

DATES: Effective date: July 30, 1985.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Hagen, Director, Birmingham Field Office, Office of Surface Mining Reclamation and Enforcement, Room 230, Jim Nesbitt Building, P.O. Box 10638, Birmingham, Alabama 35202; Telephone: (205) 254–1087.

SUPPLEMENTARY INFORMATION:

I. Background

II. Discussion of the Agreement

III. Public Comments

IV. Procedural Matters

I. Background

On January 21, 1981, the Secretary of the Interior promulgated a Federal lands program for surface coal mining and reclamation operations on Federal lands (30 CFR Chapter VII, Subchapter B). The Federal lands program regulations provide that a State may assume jurisdiction over surface coal mining and reclamation operations on Federal lands within the State pursuant to a cooperative agreement with the Secretary (30 CFR 745.11). The Federal lands program regulations also provide that the Secretary may enter into a cooperative agreement with a State only if the Secretary finds that the State has the capability to carry out the terms of the agreement and to regulate surface coal mining and reclamation operations on Federal lands in accordance with the requirements of SMCRA and the Federal lands program regulations (30 CFR 745.12(a)). Finally, the Federal lands program regulations provide that a cooperative agreement may be entered into only if the Secretary finds that the agreement will be consistent with SMCRA and the Federal lands program regulations (30 CFR 745.12(b)).

On March 1, 1984, the Alabama Surface Mining Commission submitted a proposed cooperative agreement to the Secretary. The proposed agreement was published in the March 30, 1984, Federal Register (49 FR 12756) and was made available for public comment. A public hearing was scheduled for May 1, 1984, but because no one requested an opportunity to testify at the hearing, it was cancelled as provided in the January 23, 1985, notice.

consistency between applicable regulations and the Agreement. Where there are conflicts in definitions, there

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 901

Surface Coal Mining and Reclamation Operations Under the Permanent Federal Lands Program; State-Federal Cooperative Agreements; Alabama

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) adopts a cooperative agreement between the Department of the Interior and the State of Alabama for the regulation of surface coal mining and reclamation operations on lands subject to the Federal lands program in Alabama under the permanent regulatory program. Such a cooperative agreement is provided for by the Surface Mining Control and Reclamation Act of 1977. This notice provides the terms of the cooperative agreement and additional information on other issues. The Agreement is consistent with the July 1984, district court decision specifying various parameters for the Federal lands program.

EFFECTIVE DATE: August 29, 1985.

FOR FURTHER INFORMATION CONTACT: Murray Newton, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, D.C. 20240. Telephone (202) 343–5866.

SUPPLEMENTARY INFORMATION: This preamble is divided into three parts as follows:

I. Background
II. Summary of Cooperative Agreement and Responses to Public Comments
III. Procedural Matters

I. Background

Section 523(c) of the Surface Mining Control and Reclamation Act of 1977 (the Act), 30 U.S.C. 1201 *et seq.*, and the implementing regulations at 30 CFR Part 745 allow a State and the Secretary of the Interior to enter into a permanent program cooperative agreement if the State has an approved State program for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands. Permanent program cooperative agreements are authorized by the first sentence of section 523(c), which provides that "[a]ny State with an approved State program may elect to enter into a cooperative agreement with the Secretary to provide for State regulation of surface coal mining and reclamation operations on Federal lands within the State, provided the Secretary determines in writing that such State has the necessary personnel and funding to fully implement such a cooperative agreement in accordance with the provision of this Act." 30 U.S.C. 1273(c).

On July 20, 1984, Alabama submitted a proposed amendment program cooperative agreement between the Department of the Interior and the State of Alabama to make Alabama the regulatory authority for the regulation of surface coal mining and reclamation operations on Federal lands in that State. OSM proposed, and solicited comment on, that cooperative agreement in the **Federal Register** of January 23, 1985 (50 FR 2988). Public comments received, and OSM's disposition of each, are described below.

The requirements for the development, approval and administration of permanent program cooperative agreements under section 523(c) of the Act are found in 30 CFR Part 745. For recent amendments of this Part, see 48 FR 6912 (February 16, 1983). Sections 745.11 (b) and (f) of 30 CFR require a State to submit a request for a permanent program cooperative agreement, along with certain information relating to the State's ability to administer an agreement in accordance with the Act, except to the extent the information previously has been included in the approved State Program.

Alabama satisfied the requirements of 30 CFR 745.11(f)(1) when it obtained full program approval of its State Program on July 5, 1984 (49 FR 27500). The information required by 30 CFR 745.11(b)(1) and 30 CFR 745.11(f)(2) was included in Alabama's request for approval of its State Program, and in subsequent requests for administrative and enforcement funding under 30 CFR Part 735. The information relating to Alabama's authority to enter into a cooperative agreement was provided in a letter dated September 10, 1984, in which the Attorney General stated that there exists no statutory, regulatory, or legal constraint within the State of Alabama which would preclude the Alabama regulatory authority from fully carrying out the provisions of the cooperative agreement.

OSM proposed the Alabama cooperative agreement in a notice published in the **Federal Register** on January 23, 1985 (50 FR 2988). That notice announced that the public comment period would close on February 22, 1985, and tentatively scheduled a public hearing for February 18, 1985. Because no one asked to testify at the hearing, it was cancelled as provided in the January 23, 1985, notice. Three written comments were received during the comment period. They are described below, along with the terms of the Alabama cooperative agreement adopted here today.

The nature and extent of the Secretary's ability to delegate authority for surface coal mining operations on Federal lands to States through cooperative agreements was a subject of a recent Federal District Court opinion in *In Re: Permanent Surface Mining Regulation Litigation II*, Civil Action No. 79–1144 (D.D.C., July 6, 1984). The Alabama cooperative agreement adopted here is consistent with that opinion and delegates the Secretary's authority under the Surface Mining Act which is required to be covered under the Federal lands program and retains the Secretary's non-delegable responsibilities under the Mineral Leasing Act.

Although OSM has not yet amended the scope of the Federal lands program, 30 CFR Part 740, to be consistent with the District Court decision, this Agreement encompasses the salient features of that decision. If changes to the Federal lands program are adopted which are not covered by this Agreement, OSM and the Secretary will promptly initiate the steps necessary to conform the Agreement.

II. Summary of Cooperative Agreement and Responses to Public Comments

Article I: Introduction, Purpose, and Responsible Agencies

Article I sets forth the legal authority for the Alabama Cooperative Agreement (the Agreement), which is provided by section 523(c) of the Act. The purposes of the Agreement and the responsible administrative agencies of the Department and of the State are also specified in Article I.

Article II: Effective Date

Article II provides that after it has been signed by the Secretary and the Governor, the Agreement becomes effective 30 days after publication as a final rule in the **Federal Register**. It will remain in effect until terminated as provided in Articles XI.

Article III: Definitions

Article III provides that any terms and phrases used in the Agreement have the same meaning as set forth in the Federal and States Acts, regulations promulgated pursuant to those Acts, 30 CFR Parts 700, 701, and 740, and the approved State Program. Defining terms and phrases in this manner ensures consistency between applicable regulations and the Agreement. Where there are conflicts in definitions, those included in the approved State Program will apply, except where the term being defined relates to those responsibilities of the Secretary that cannot be assumed by the State under the Agreement.

Article IV: Applicability

Article IV states that the laws, regulations, terms, and conditions of Alabama's approved State Program are applicable to surface coal mining and reclamation operations subject to the Federal lands program in Alabama except as otherwise stated in the Agreement, the Act, 30 CFR 745.13, or other applicable laws or regulations. Thus, this provision is consistent with the Federal lands programs, which adopted the Alabama State Program as substantive Federal law on all Federal lands in Alabama and made it enforceable by the State and the United States. Because the applicability of this Agreement is keyed to the scope of the Federal lands program, when the Federal lands program is amended to conform with the district court decision, this Agreement will be so amended automatically. The reference to the Alabama State Program is intended to encompass the State's Program as approved on July 5, 1984 (49 FR 27500), and any amendments thereto which are approved in accordance with 30 CFR 732.17. Excluded from the scope of the Agreement are the authorities and responsibilities reserved to the Secretary pursuant to the Act and 30 CFR 745.13.

Article V: General Requirements

Article V mutually binds the Governor and the Secretary to comply with the provisions of the Agreement.

Paragraph A of Article V requires that the Alabama Surface Mining Commission (the agency designated by the Governor to administer the Agreement) continue to have authority under State law to carry out the Agreement.

Paragraph B of Article V provides that upon application for funds the State shall be reimbursed by OSM pursuant to section 705(c) of the Act if the necessary funds have been appropriated to OSM by Congress. Section 705(c) of the Act provides that a State with a cooperative agreement may receive an increase in its annual grant for the development, administration and enforcement of a State program on Federal lands by an amount which the Secretary determines is approximately equal to the amount the Federal government would otherwise have expended to regulate surface coal mining and reclamation operations on Federal lands within the State. See 30 U.S.C. 1285(c). The reference in section 705(c) to section 523(d) is obviously a typographical error; the correct reference is section 523(c). The regulations implementing section 705(c) appear at 30 CFR 735.16 through 735.26.

If, when requested by the State, adequate funds have not been appropriated, OSM and the Alabama Surface Mining Commission are to meet and decide on appropriate measures to ensure that mining operations are regulated in accordance with the approved State Program. Either party may terminate the Agreement if agreement cannot be achieved. Any funds granted to the State pursuant to the Agreement would be reduced by the amount of any fees collected by the State that are attributable to the Federal lands covered by the Agreement, in accordance with Office of Management and Budget (OMB) Circular A–102 (Uniform Requirements for Assistance to State and Local Governments), Attachment E (Program Income).

Paragraph V.B. as adopted differs from proposed paragraph V.B. Proposed paragraph V.B. described in detail a method of calculating the amount of the grant by comparing certain Federal/non-Federal ratios. The ASMC commented that the Agreement should instead use the more general phrasing in the State's initial submission, as later revised. OSM agrees and has modified final paragraph V.B. accordingly.

Paragraph C of Article V requires the State to make annual reports to OSM with respect to compliance with this Agreement. Paragraph C also provides for a general exchange of information developed under the Agreement, unless such an exchange is prohibited by Federal law. Final evaluation reports prepared by OSM on State administration and enforcement of this Agreement will be provided to ASMC.

Paragraph D of Article V requires ASMC to maintain the necessary personnel to fully implement this Agreement.

Paragraph E of Article V requires that ASMC avail itself of the facilities necessary to carry out the requirements of the Agreement. This provision ensures that the State will have access to and utilize any resources necessary to conduct inspections, investigations, studies, tests, and analyses required to fulfill the requirements of this Agreement.

Paragraph F of Article V concerns permit application fees. Fees will be determined according to section 15 of the Alabama Surface Mining Control and Reclamation Act of 1981, Section 880–X–8B–.07 of the State regulations, and the State Program or Federal law. The State will retain all permit application fees and civil penalties resulting from operations on Federal lands and deposit them in the Alabama Surface Mining Fund. The State will report the amount of these fees in the financial status report required under 30 CFR 735.26. State funding (under paragraph B of Article V) will be reduced by the amount collected from mining on Federal lands.

The ASMC commented that proposed paragraph V. F. contained an inaccurate citation to a State regulation which had been superseded by Section 880–X–8B–.07 of the State Regulations. Final paragraph V. F. has been corrected accordingly.

Readers should be aware that OSM has recently proposed rules governing the collection of fees for certain activities related to the review of permits and mining plans. (50 FR 7522; February 22, 1985). As proposed, the permit fee rule would involve recovery by the Department of costs incurred by the Department; it would not affect fees charged by the State. Should the final permit fees rule require modification of any cooperative agreement, OSM will propose appropriate changes in the Federal Register.

Article VI: Review of Permit Application Package

Paragraphs A through C of Article VI describe the procedures the State would follow in the review and analysis of a permit application package (PAP) for operations subject to the Federal lands program. "Permit application package" is a term adopted by OSM in revising the Federal lands program (48 FR 6912; February 16, 1983). It is the material submitted by an applicant proposing to mine on Federal lands, including permit revision and renewals.

OSM adopted the term because there are requirements for mining on Federal lands in addition to those required by a permit application under the approved State Program for non-Federal lands. For example, operations on Federal lands may be subject to requirements of the Federal land management agency under Federal laws other than the Act. The package concept allows such information to be included with the permit application required by the approved State Program. See the definition of "permit application package" under 30 CFR 740.5.

The cooperative agreement identifies ASMC as having the primary responsibility for the analysis, review,

and approval or disapproval of the permit application component of the PAP's. Although reference to the

1985), the Secretary will also perform VER determinations for proposed

bypassed these requirements under some circumstances, the FWS originally

eliminate this potential gap in section 7

Mineral Leasing Act (MLA) and the National Environmental Policy Act

review process. The State will review the PAP to ensure compliance with the

and approval or disapproval of the permit application component of the PAP in Alabama for operations subject to the Federal lands program. In assuming primary responsibility for review, analysis, and approval or disapproval of permit applications, ASMC also becomes responsible for coordinating the review of a PAP where leased Federal coal is not involved with Federal agencies other than OSM affected by the proposed surface coal mining and reclamation operations to ensure compliance with Federal laws other than the Act and regulations other than those implementing SMCRA. if requested by the State, OSM would assist in identifying Federal agencies which may be affected by the proposed mining operation. Under Paragraph A, an operator on Federal lands will be required by ASMC and the Secretary to submit a PAP in an appropriate number of copies to ASMC. ASMC will provide to OSM an appropriate number of copies of the PAP.

At a minimum, a PAP must include the uniform necessary for ASMC to make a determination of compliance with the approved State Program and for appropriate Federal agency to make determinations of compliance with applicable requirements of other Federal laws and regulations for which it is responsible.

Paragraph B.1. assigns to ASMC the primary responsibility for analysis, review, and approval or disapproval of the permit application component of the PAP. ASMC will be the principal contact for the applicant on issues concerned with the development, review and approval of the PAP for mining on Federal lands in Alabama, and will be responsible for informing applicants of determinations.

Under Paragraph B.2., ASMC will send a copy of the PAP to the Federal land management agency with a request for review and will be responsible for obtaining the views of other Federal agencies that would be affected by the PAP. ASMC also will forward information to OSM to assist OSM in determining whether the proposed mining operation is limited or prohibited under section 522(e) (1) or (2) of the Federal Act. Under 30 CFR 740.4(a)(4), the Secretary remains responsible for determining valid existing rights (VER) for surface coal mining operations on Federal lands within the boundaries of any area specified under section 522(e)(1) or (e)(2) of the Act. In accordance with the July 6, 1984, and March 22, 1985, opinions in *In Re Permanent Surface Mining Regulations Litigation*, No. 79–1144 (D.D.C. 1984 and 1985), the Secretary will also perform VER determinations for proposed surface coal mining operations within section 522(e)(1) areas affecting the Federal interest within such areas.

Under Paragraph B.3., ASMC will receive, upon request, assistance from OSM. OSM will be responsible for forwarding information from applicants to ASMC. Any information in ASMC files concerning mines on Federal lands will be available to OSM.

Paragraph B.4. requires ASMC to review the PAP for compliance with the Program.

The U.S. Fish and Wildlife Service (FWS) commented that the proposed Agreement might bypass compliance with section 7 of the Endangered Species Act (ESA), 16 U.S.C. 1536, for some surface coal mining and reclamation operations on Federal lands in Alabama. In response to this comment, a new paragraph B.5. has been added to Article VI of the Agreement.

New paragraph B.5. will ensure that section 7 of the ESA is complied with prior to the commencement of any operations covered by the Agreement. Where the Secretary must take a related action that is concurrent with a State permitting decision, the Secretary will comply with section 7 without involving the State. Where there would be no other concurrent Secretarial action, paragraph VI.B.5. will require the State to obtain the written concurrence of OSM regarding the effect the proposed operations would have on threatened and endangered species and critical habitat in the area affected by the proposed operations. It also will require the State to include in any permit that is issued for such operations any terms or conditions which OSM may require to avoid the likelihood of activities which would jeopardize the continued existence of any such species or result in the destruction or adverse modification of its critical habitat.

Section 7(a)(2) of the ESA, 16 U.S.C. 1536(a)(2), requires that "[e]ach Federal agency shall, in consultation with and with the assistance of the [FWS], insure that any action authorized, funded, or carried out by such agency * * * is not likely to jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of habitat of such species * * *." This requirement applies only to Federal agencies.

The promulgation of the Agreement in itself is an action which triggers the requirements of section 7. Because the proposed Agreement might have bypassed these requirements under some circumstances, the FWS originally requested formal consultation under section 7. After OSM and the State agreed to add new paragraph B.5. to the Agreement, however, the FWS withdrew this request.

The FWS was concerned that the proposed Agreement would bypass the requiements of section 7 in some circumstances by eliminating all of the Federal actions that would trigger compliance. In the absence of a Federal-State cooperative agreement, OSM must comply with section 7 before issuing a permit for operations on Federal lands. Under the Agreement, however, the State regulatory authority will issue the permit, and there will be no OSM permitting action to trigger section 7.

Where there were no other concurrent Federal action this delegation to the State would bypass entirely the requirements of section 7, which was the cause of the FWS concern.

The proposed Agreement would have had no effect on section 7 compliance where a concurrent action by the Secretary was required prior to the commencement of operations on Federal lands. This is because the Secretary would have to comply with section 7 notwithstanding the delegation of permitting authority to the State. A concurrent Secretarial action could result from various non-delegable responsibilities the Secretary has for most operations on Federal lands. For example, where Federal coal is to be mined the Secretary is required to approve a mining plan under the Mineral Leasing Act prior to commencement of mining. Also, operations on national forest lands may be conducted only where the Secretary has made certain determinations required by section 522(e) of the Surface Mining Control and Reclamation Act, 30 U.S.C. 1272(e). For any of these concurrent actions, compliance with section 7 would be required.

The proposed Agreement would have bypassed section 7 for any State permitting decision for which there was no concurrent Federal action. Since the Secretary must comply with section 7 for operations that propose to mine Federal coal, this result would not occur for State permits issued under Article VI.C. of the Agreement, which specifies the review procedures that apply where Federal coal is involved. However, this result could occur for State permits issued under Article VI.B., which specifies the review procedures that apply where only Federal surface is involved. New paragraph VI.B.5. has been added to the Agreement to eliminate this potential gap in section 7 compliance, and thus avoid the need for section 7 consultation with the FWS on the Agreement itself.

Paragraph VI.B.5. will apply to any State decision on a PAP for which there is no other concurrent Secretarial action that would trigger compliance with section 7 for the proposed surface coal mining and reclamation operation on Federal lands. Prior to making any such decision, the State must obtain the written concurrence of OSM regarding the effect the proposed operations would have on threatened and endangered species and critical habitat in the area affected by the proposed operations. The State may not make a decision on the PAP until written concurrence is received from OSM.

Under this concurrence procedure, the State must forward to OSM the PAP for the operations, including the information on threatened and endangered species and their critical habitats specified in 30 CFR 740.13(b)(3)(iii)(H). OSM will review the PAP to determine whether any listed species or critical habitat may be present in the area that would be affected. If either may be present, OSM will confer with the FWS on the need for formal consultation under section 7 of the ESA, 30 U.S.C. 1536.

If consultation is required, OSM will not make a decision on concurrence until it receives an FWS biological opinion. As a condition of concurrence, OSM may require, and the State must include in the permit, any terms or conditions that would avoid the likelihood of jeopardizing the continued existence of any threatened and endangered species that may be affected, or resulting in the destruction or adverse modification of its critical habitat. Where it is not otherwise possible for OSM to comply with section 7, OSM may withhold concurrence and the State shall not issue the permit.

Paragraph B.6. requires ASMC to include in a permit any terms or conditions imposed by the Federal land management agency. ASMC will send written notice to the Federal land management agency, the applicant, and OSM of its findings on the PAP and a copy of the permit.

Article VI.C. discusses review procedures where leased Federally-owned coal is involved and, consequently, where the Secretary must make a decision on a mining plan. Under paragraph C.1., ASMC has lead responsibility for analysis and review of the permit application component of the PAP for mining such coal. The Department retains those responsibilities that cannot be delegated to the State, including those under the Mineral Leasing Act (MLA) and the National Environmental Policy Act (NEPA). Working agreements between OSM and ASMC will specify those responsibilities that ASMC would assume. An industry commenter suggested that ASMC and OSM (rather than the Bureau of Land Management) review and approve permits "that meet all BLM's criteria" in order to save duplicate reviews.

Approval of a mining plan is a responsibility of the Secretary which may not be delegated to a State. Consequently, there must be a Federal review where leased Federal coal is involved. OSM has lead responsibility within the Department for such reviews and will coordinate with other Federal agencies to avoid or minimize unnecessary duplication.

Paragraph C.2. designates ASMC as the primary liaison for operators in matters regarding the PAP. As such, ASMC will inform the applicant of all joint State-Federal determinations. ASMC will provide OSM with any information affecting decisions on mining plans, and OSM will provide ASMC with information affecting decisions on PAPs. OSM will not ordinarily contact the applicant regarding the PAP, although there is no prohibition against doing so.

Under paragraph C.3., the responsibilities of OSM and ASMC are as follows:

1. ASMC will take on the responsibilities in 30 CFR 740.4(c) (1), (2), (4), (5), and (6).
2. OSM will retain the responsibilities in 30 CFR 740.4(c)(3) and (7).
3. OSM will assist the State by coordinating the review of the PAP between those Federal agencies involved. OSM will request that the involved Federal agencies submit their findings to OSM within 45 days of their receiving the PAP. OSM will then provide ASMC with these findings.
4. OSM will further assist the State by resolving conflicts of the involved Federal agencies and by helping to schedule meetings between the agencies and the State.
5. OSM will exercise its responsibilities in a timely manner and will provide ASMC with a work product within 45 days of receiving the State's request for assistance in reviewing the permit application.
6. OSM will be solely responsible for Federal lessee protection bond requirements.

Paragraph C.4. describes the procedures that OSM and the State will follow in reviewing the PAP. OSM and ASMC will coordinate their activities and exchange information during the review process. The State will review the PAP to ensure compliance with the Program, while OSM would review the PAP to ensure compliance with other Federal laws and regulations. Review of the MLA mining plan will include review of the operations and reclamation plan component of the SMCRA permit application. OSM and the State will plan and schedule PAP review and each will choose a project leader, with the OSM project leader designated as the primary point of contact between OSM and ASMC during the review process. OSM will provide the State with its preliminary findings within 50 days of receiving the PAP.

The State will provide OSM with its technical analysis of the PAP and its finding that the PAP complies with the Program. ASMC could then issue the permit before Secretarial approval. However, ASMC would have to advise the operator that it shall not conduct surface coal mining operations on Federal lands before the mining plan had been approved by the Secretary.

Paragraph C.5. assigns to ASMC sole authority to approve permit revisions not constituting modifications of a mining plan. However, OSM retains the responsibility to determine which revisions are mining plan modifications. ASMC will consult with OSM on whether any permit revisions constitute mining plan modifications. OSM must inform ASMC of its determination within 30 days. OSM may develop guidelines to determine which permit revisions are definitely not mining plan modifications.

Article VII: Inspections

Article VII specifies that ASMC must conduct inspections on lands covered by this agreement and prepare and file State inspection reports in accordance with its approved Program.

Article VII.C. designates ASMC as the point of contact and primary inspection authority in dealing with the operator. However, the Department retains the right to conduct inspections of surface coal mining and reclamation operations covered by the Federal lands program without prior notice to ASMC for the purpose of evaluating the manner in which the cooperative agreement is being carried out and ensuring that performance and reclamation standards are being met. OSM will ordinarily give ASMC reasonable notice before conducting an inspection so that State inspectors can join in the inspection. Under extraordinary circumstances, such as the threat of imminent harm to the public or the environment, OSM will

notify ASMC at least 24 hours prior to a Federal inspection, unless this proves impracticable.

regulatory impact analysis under

2. Section 901.30 is added to read as

Act, 30 CFR 745.13, or other applicable laws or regulations.

VOL 50 ISS 146 JL 30 1985 UMI

notify ASMC at least 24 hours prior to a Federal inspection, unless this proves impracticable.

This Article preserves OSM's obligation and authority to conduct inspections pursuant to 30 CFR Parts 842 and 843. The right of Federal and State agencies to conduct inspections for purposes outside the scope of the proposed cooperative agreement is not affected.

Article VIII: Enforcement

Article VIII sets forth the enforcement obligations and authorities of OSM and ASMC.

Under paragraph A, ASMC has primary enforcement authority on lands covered by the Federal lands program in accordance with the requirements of the cooperative agreement and the approved State Program.

Under paragraph B, ASMC has primary responsibility for enforcement during joint inspections with OSM. Paragraph B also includes a requirement that ASMC notify OSM prior to suspending or revoking a permit.

Paragraph C preserves OSM's authority to take enforcement action to comply with 30 CFR Parts 843 and 845 where OSM conducted an inspection or where, during a joint inspection with ASMC, the two could not agree on the appropriateness of a particular enforcement action. Such action would be based upon the Act or the substantive provisions contained in the approved State Program, but would use the Federal procedures and penalty system.

Paragraph D provides that OSM and ASMC will notify each other of all violations of applicable regulations and all actions taken on the violations. Paragraph E provides that personnel of the State and the Department are to be mutually available to serve as witnesses in enforcement actions taken by either party. Finally, paragraph F specifies that this agreement does not limit the Department's authority to enforce Federal laws other than the Act.

Article IX: Bonds

Under paragraph A, ASMC and the Secretary must require each operator covered by the Federal lands program to submit a single performance bond payable to both the State and the United States. All applicable State and Federal requirements must be fulfilled prior to releasing an operator from any obligation covered by the performance bond. If the cooperative agreement is terminated, paragraph A requires that the bond revert to being payable solely to the United States to the extent that lands covered by the Federal lands program are involved. ASMC will advise OSM of annual adjustments to the bond and release a bond only after OSM concurrence. Departmental concurrence will include coordination with other Federal agencies having jurisdiction over the lands involved.

Article IX.C. clarifies that the performance bond does not meet the requirement for a Federal lease bond under 43 CFR Part 3474, or for the lessee protection bond required in certain circumstances by section 715 of the Act.

Article X: Designating Land Areas Unsuitable For All or Certain Types of Surface Coal Mining Operations

Article X assigns to ASMC authority to designate State and private lands as unsuitable for surface coal mining, while reserving to the Secretary such authority over Federal lands. ASMC and OSM will each notify the other of any petition to designate lands as unsuitable, exchange information when either agency receives a petition that could impact surrounding Federal and non-Federal lands, and solicit and consider each other's views on a petition.

Article XI: Termination of Cooperative Agreement

Article XI specifies that this cooperative agreement may be terminated as specified under 30 CFR 745.15.

Article XII: Reinstatement of Cooperative Agreement

Article XII provides that, if terminated, the cooperative agreement may be reinstated under 30 CFR 745.15. That provision allows for reinstatement of a cooperative agreement upon application by a State after remedying the defects for which the Agreement was terminated and the submission of evidence to the Secretary that the State can and will comply with all of the provisions of the Agreement.

Article XIII: Amendment of Cooperative Agreement

Article XIII provides that the cooperative agreement may be amended by mutual agreement of the Governor and Secretary in accordance with 30 CFR 745.14.

Article XIV: Changes in State or Federal Standards

Paragraph A of Article XIV recognizes that the Department or the State may, from time to time, promulgate new or revised performance or reclamation requirements, or enforcement and administration procedures. If it is determined to be necessary to keep the Agreement in force, the State will request necessary legislative action and either the State or OSM will change or revise its regulations or promulgate new regulations, as applicable. Such changes will be made in accordance with 30 CFR Part 732 for changes to the approved State Program and section 501 of the Act for changes to the permanent regulatory program or to the Federal lands program.

Paragraph B requires the State and OSM to provide each other with copies of changes in their respective laws and regulations.

Article XV: Changes in Personnel and Organization

Article XV requires the State and the Department to advise each other of substantial changes in organization, funding, staff, or other changes which could affect administration or enforcement of the cooperative agreement.

Article XVI: Reservation of Rights

Article XVI recognizes that the Act, 30 CFR 745.13, and other legal authorities prohibit the Secretary from delegating certain responsibilities to the State. Article XVI states that this agreement does not delegate nor shall it be construed to delegate any responsibility that the Secretary has under 30 CFR 745.13, or under laws other than the Act, including those listed in Appendix A of this cooperative agreement.

III. Procedural Matters

1. E.O. 12291 and Regulatory Flexibility Act

In a "Determination of Significance" document prepared on December 31, 1979, and approved by the Assistant Secretary, Energy and Minerals, on January 7, 1980, the Department determined that the "promulgation of proposed or final rules for entering into a cooperative agreement with a State pursuant to 30 U.S.C. 1273 for State regulation of surface coal mining and reclamation operations on Federal lands was not a significant action and would not require a regulatory analysis." A copy of this determination was filed with the Department's Office of Policy Analysis and the Division of General Law in accordance with Departmental procedures.

The Department has reviewed this determination in light of Executive Order 12291, February 17, 1981; the Regulatory Flexibility Act (Pub. L. 96-354); and the Paperwork Reduction Act of 1980 (Pub. L. 96-511). Having conducted this review, the Department has determined that this document is not a major rule and does not require a regulatory impact analysis under Executive Order 12291. The document will not have a significant economic effect on a substantial number of small entities and therefore does not require a regulatory flexibility analysis under the Regulatory Flexibility Act, 5 U.S.C. 605(b). This determination was made by the Director, OSM and approved by the then Assistant Secretary, Energy and Minerals. A copy is on file in the OSM Administrative Record Room, room 5315, 1100 L Street NW., Washington, D.C. 20005.

2. Recordkeeping and Reporting Requirements

There are recordkeeping and reporting requirements in the Alabama Cooperative Agreement which are the same as and required by the permanent program regulations. Those regulations received clearance from the Office of Management and Budget under 44 U.S.C. 3507 and were assigned the following clearance numbers:

Location of requirement	OMB clearance No.
Article VI.A. (Required by 30 CFR Part 773)	1029-0041
Article VII.A. (Required by 30 CFR Part 840)	1029-0051
Article IX.A. (Required by 30 CFR Part 800)	1029-0043

3. National Environmental Policy Act

Proceedings relating to adoption of a permanent program cooperative agreement are part of the Secretary's implementation of the Federal lands program pursuant to section 523 of the Act. Such proceedings are exempt under section 702(d) of the Act from the requirement to prepare a detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

4. Indexing Requirements

List of Subjects in 30 CFR Part 901

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

(Pub. L. 95-87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*))

Dated: July 17, 1985.

J. Steven Griles,

Deputy Assistant Secretary for Land and Minerals Management.

PART 901—[AMENDED]

For the reasons set forth herein, 30 CFR Part 901 is amended as follows:

1. The Authority citation for Part 901 is revised to read as follows:

Authority: Pub. L. 95-87; 30 U.S.C. 1201 *et seq.*

2. Section 901.30 is added to read as follows:

§ 901.30 State-Federal cooperative agreement.

The Governor of the State of Alabama and the Secretary of the Department of the Interior (Secretary) enter into a Cooperative Agreement (Agreement) to read as follows:

Article I: Introduction, Purpose and Responsible Agencies

A. *Authority:* This agreement is authorized by sectoin 523(c) of the Surface Mining Control and Reclamation Act of 1977 (the Act), 30 U.S.C. 1273(c), which allows a State with a permanent regulatory program approved by the Secretary under 30 U.S.C. 1253, to elect to enter into an Agreement for State regulation of surface coal mining and reclamation operations on Federal lands. This Agreement provides for State regulation of surface coal mining and reclamation operations in Alabama subject to the Federal lands program (30 CFR Parts 740-746), consistent with State and Federal Acts governing such activities, and the Alabama State Program (Program).

B. *Purpose:* The purposes of this Agreement are to (a) foster Federal-State cooperation in the regulation of surface coal mining and reclamation operations; (b) minimize intergovernmental overlap and duplication; and (c) provide uniform and effective application of the Program on all lands in Alabama in accordance with the Act, the Program, and this Agreement.

C. *Responsible Administrative Agencies:* The Alabama Surface Mining Commission (ASMC) shall be responsible for administering this Agreement on behalf of the Governor. The Office of Surface Mining (OSM) shall administer this Agreement on behalf of the Secretary.

Article II: Effective Date

After it has been signed by the Secretary and the Governor, this Agreement shall be effective 30 days after publication in the Federal Register as a final rule. This Agreement shall remain in effect until terminated as provided in Article XI.

Article III: Definitions

The terms and phrases used in this Agreement which are defined in the Act, 30 CFR 700, 701, and 740, the approved State Program and the State Act, and in the rules and regulations promulgated pursuant to those Acts, shall be given the meanings set forth in said definitions. Where there is a conflict between the above referenced State and Federal definitions, the definitions used in the approved State Program will apply, except in the case of a term which defines the Secretary's continuing responsibilities under the Act and other laws.

Article IV: Applicability

In accordance with the Federal lands program in 30 CFR Part 745, the laws, regulations, terms and conditions of the Program are applicable to lands in Alabama subject to the Federal lands program except as otherwise stated in this Agreement, the Act, 30 CFR 745.13, or other applicable laws or regulations.

Article V: General Requirements

The Governor and the Secretary affirm that they will comply with all the provisions of this Agreement.

A. *Authority of State Agency:* ASMC has and shall continue to have the authority under State law to carry out this Agreement.

B. *Funds:* Upon application by ASMC and subject to appropriations, OSM shall provide the State with the funds to defray the costs associated with carrying out responsibilities under this Agreement as provided in section 705(c) of the Act and 30 CFR 735.16. Such funds shall cover the full cost of carrying out these responsibilities provided that such cost does not exceed the estimated cost the Federal government would have expended in regulating surface coal mining operations on Federal lands in Alabama in the absence of an agreement. If the State requests funds and sufficient funds have not been appropriated to OSM, OSM and the ASMC shall promptly meet to decide on appropriate measures that will insure that mining operations are regulated in accordance with the Program. If agreement cannot be reached, then either party may terminate the Agreement in accordance with 30 CFR 745.15. Funds provided to the State under this Agreement shall be adjusted in accordance with Office of Management and Budget Circular A-102, Attachment E.

C. *Reports and Records:* ASMC shall make annual reports to OSM containing information with respect to compliance with the terms of this Agreement, pursuant to 30 CFR 745.12(d). Upon request, ASMC and OSM shall exchange information developed under this Agreement, except where prohibited by Federal law.

OSM shall provide ASMC with a copy of any final evaluation report prepared concerning State administration and enforcement of this Agreement.

D. *Personnel:* ASMC shall have the necessary personnel to fully implement this agreement in accordance with the provisions of the Act and the approved State Program.

E. *Equipment and Laboratories:* ASMC will assure itself access to equipment, laboratories, and facilities with which all inspections, investigations, studies, tests, and analyses can be performed which are necessary to carry out the requirements of the Agreement.

F. *Permit Application Fees and Civil Penalties:* The amount of the fee accompanying an application for a permit shall be determined in accordance with Section 15 of the Alabama Surface Mining Control and Reclamation Act of 1981, Section 880-X-8B-.07 of the State regulations, and the applicable provisions of the State Program and Federal law. All permit fees and civil penalties collected from operations on Federal lands will be retained by the State and shall be deposited with the State Treasurer in the Alabama Surface Mining Fund. The financial status report submitted pursuant to 30 CFR 735.26 shall include the amount of fees collected during the prior State fiscal year.

Article VI: Review of Permit Application Package

A. *Submission of Permit Application Package (PAP):* ASMC shall provide OSM with a complete PAP for all surface coal mining and reclamation operations proposed to be conducted on Federal lands. ASMC shall provide OSM with a complete PAP for all surface coal mining and reclamation operations proposed to be conducted on non-Federal lands within the boundaries of Federal lands. ASMC shall provide OSM with a complete PAP for all surface coal mining and reclamation operations proposed to be conducted on non-Federal lands adjacent to Federal lands where the operation may have an impact on Federal lands. ASMC shall provide OSM with a complete PAP for all surface coal mining and reclamation operations proposed to be conducted on non-Federal lands adjacent to Federal lands where the operation may have an impact on Federal lands.

B. *Review of PAP:* ASMC shall review the PAP for compliance with the Program.

C. *Consultation:* Prior to making a decision on a PAP for

the primary point of contact between OSM and ASMC throughout the review process. Not later than 30 days after receipt of the

resources, pursuant to 30 CFR 842.11(b)(1)(ii)(C), it will contact ASMC no less than 24 hours prior to the Federal

obtain the concurrence of OSM. The ASMC shall also advise OSM of annual adjustment to the performance bond, pursuant to the

VOL 50 ISS 146 JL 30 1985 UMI

Article VI: Review of Permit Application Package

A. *Submission of Permit Application Package:* ASMC and the Secretary shall require an operator proposing to conduct surface coal mining operations on Federal lands covered by this Agreement to submit a permit application package (PAP) in an appropriate number of copies to ASMC. ASMC shall furnish OSM with an appropriate number of copies of the PAP. The PAP shall be in the form required by ASMC and include any supplemental information required by OSM or the Federal land management agency. At a minimum, the PAP shall include the information necessary for ASMC to make a determination of compliance with the State Program and for the appropriate Federal agency to make a determination of compliance with applicable requirements of Federal laws and regulations for which it is responsible.

B. *Review Procedures Where Leased Federally-Owned Coal Is Not Involved:*

1. ASMC shall assume primary responsibility for the analysis, review and approval or disapproval of the permit application component of the PAP required by 30 CFR 740.13 for surface coal mining and reclamation operations under the Federal lands program in Alabama not requiring a mining plan under 30 CFR 746.11. ASMC shall be the primary point of contact for operators regarding decisions on the PAP and will be responsible for informing the applicant of determinations.

2. Upon receipt of a PAP that involves surface coal mining and reclamation operations on Federal lands not containing leased Federal coal, ASMC shall (1) transmit a copy of the complete PAP to the Federal land management agency with a request for review pursuant to 30 CFR 740.13(c)(4), and (2) provide OSM with a complete copy of the PAP and any additional information necessary to allow OSM to determine whether the operations are prohibited or limited by the requirements of section 522(e) (1) or (2) of the Federal Act (30 U.S.C. 1272(e)) and 30 CFR Part 761 with respect to areas designated therein by Congress as unsuitable for mining. Except as specified by paragraph 5 of this article, ASMC shall be responsible for obtaining, in a timely manner, the views and determinations of any other Federal agencies with jurisdiction or responsibility over Federal lands affected by a PAP in Alabama.

3. OSM will provide technical assistance to ASMC when requested if available resources allow and will process requests for determinations of compatibility and valid existing rights under 30 CFR Part 761 relating to areas designated by Congress under section 522(e)(1) or (2) as unsuitable for mining. OSM will be responsible for ensuring that any information OSM receives from an applicant is promptly sent to ASMC. OSM shall have access to ASMC files concerning mines on Federal lands. The Secretary reserves the right to act independently of ASMC to carry out his responsibilities under laws other than the Federal Act. A copy of all resulting correspondence with the applicant that may have a bearing on decisions regarding the PAP shall be sent to the State.

4. ASMC shall review the PAP for compliance with the Program.

5. Prior to making a decision on a PAP for proposed surface coal mining and reclamation operations for which there is no other concurrent Secretarial action that would trigger compliance with Section 7 of the Endangered Species Act, 16 U.S.C. 1536, ASMC shall obtain the written concurrence of OSM regarding the effect the proposed operations would have on threatened and endangered species and critical habitat in the area affected by the proposed operations, and shall include in any permit that is issued for such operations any terms or conditions which OSM may require to avoid the likelihood of actions which would jeopardize the continued existence of any such species or result in the destruction or adverse modification of its critical habitat.

6. The permit issued by ASMC shall incorporate any terms or conditions imposed by the Federal land management agency, including conditions relating to post-mining land use, and shall condition the initiation of surface coal mining and reclamation operations on compliance with the requirements of the Federal land management agency. After issuing the decision on the PAP, ASMC shall send a notice to the applicant, the Federal land management agency, and OSM with a copy of the permit and written findings.

C. *Review Procedures Where Leased Federally-Owned Coal is Involved:*

1. ASMC shall assume primary responsibility for the analysis, review and approval or disapproval of the permit application component of the PAP for surface coal mining and reclamation operations on Federal lands in Alabama where a mining plan is required by 30 CFR 746.11. OSM, as requested, shall assist the State in this analysis and review. The Department of the Interior (Department) shall concurrently carry out its responsibilities under the Mineral Leasing Act (MLA), the National Environmental Policy Act (NEPA), and other applicable Federal laws that cannot be delegated to the State. The Department shall carry out these responsibilities in accordance with the Federal lands program and this Agreement in a timely manner so as to avoid, to the extent possible, duplication of the responsibilities of the State as set forth in this Agreement and the Program. Responsibilities and decisions which can be delegated to the State under other applicable Federal laws may be specified in working agreements between OSM and the State without amendment to this Agreement. The Secretary will consider the information in the PAP and, where appropriate, make decisions required by the Federal Act, MLA, NEPA, and other Federal laws.

2. ASMC will be the primary point of contact for operators regarding the review of the PAP, except on matters concerned exclusively with 43 CFR Parts 3480–3487, administered by the Bureau of Land Management (BLM). ASMC will be responsible for informing the applicant of all joint State-Federal determinations. The Secretary may act independently of the State to carry out responsibilities under laws other than the Federal Act or provisions of the Act not covered by the Program, and in instances of disagreement over the Act and the Federal lands program. ASMC shall send to OSM, copies of any correspondence with the applicant and any information received from the applicant regarding the mining plan including the operation and reclamation plan portion of the permit application. OSM shall send to ASMC copies of all independent correspondence with the applicant which may have a bearing on the PAP. As a matter of practice, OSM will not independently initiate contacts with applicants regarding completeness or deficiencies of the PAP with respect to matters covered by the Program.

3. ASMC shall assume the responsibilities listed in 30 CFR 740.4(c) (1), (2), (4), (5), and (6). OSM shall retain the responsibilities listed in 30 CFR 740.4(c)(3) and the exceptions specified in (c)(7) (i) through (vii). OSM shall assist the State in carrying out its responsibilities by:

(a) Distributing copies of the PAP to, and coordinating the review of the PAP among, all Federal agencies which have responsibilities relating to decisions on the PAP. This shall be done in a manner which ensures timely identification, communication and resolution of issues relating to those Federal agencies' statutory requirements. OSM shall request that such other Federal agencies furnish their findings and any requests for additonal data to OSM within 45 calendar days of their receipt of the PAP.

(b) Providing ASMC with the analyses and conclusions of other Federal agencies.

(c) Addressing conflicts and difficulties of the other Federal agencies in a timely manner.

(d) Assisting in scheduling joint meetings as necessary between State and Federal agencies.

(e) Where OSM is assisting ASMC in reviewing the permit application, furnish the State with the work product within 45 calendar days of receipt of the State's request for such assistance, or earlier if mutually agreed upon by OSM and the State.

(f) Exercising its responsibilities in a timely manner as set forth in a mutually agreed upon schedule, governed to the extent possible by the deadlines established in the Program.

(g) Assuming all responsibility for ensuring compliance with any Federal lessee protection bond requirement.

4. Review of the PAP:

(a) OSM and ASMC shall coordinate with each other during the review process as needed. ASMC shall keep OSM informed of findings during the review process which bear on the responsibilities of other Federal agencies. OSM shall ensure that any information OSM receives which has a bearing on decisions regarding the PAP is promptly sent to ASMC.

(b) The State shall review the PAP for compliance with the Program.

(c) OSM shall review the PAP for compliance with the Act and the requirements of other Federal laws and regulations. OSM and ASMC shall develop a work plan and schedule for PAP review and each shall identify a person as the project leader. The OSM project leader shall serve as the primary point of contact between OSM and ASMC throughout the review process. Not later than 50 days after receipt of the PAP, OSM shall furnish ASMC with its preliminary findings on the PAP and specify any requirements for additional data. To the extent practicable, the State shall provide OSM all available information that may aid OSM in preparing any findings.

(d) ASMC shall provide to OSM written findings indicating whether the PAP is in compliance with the Program, and a technical analysis of the PAP.

(e) ASMC may proceed to issue a permit in accordance with the Program prior to the necessary Secretarial decision on the mining plan, provided that ASMC advises the operator in the permit that Secretarial approval of a mining plan must be obtained before the operator may conduct surface coal mining operations on Federal lands. ASMC shall reserve the right to amend or rescind any requirements of the approved permit to conform with any terms or conditions imposed by the Secretary in his approval of the mining plan.

5. Prior to acting on a permit revision or renewal, ASMC shall consult with OSM on whether such revision or renewal constitutes a mining plan modification under 30 CFR 746.18. OSM shall inform the State within 30 days of receiving notice of a proposed revision or renewal, whether any permit revision or renewal constitutes a mining plan modification. Permit revisions which do not constitute mining plan modifications shall be approved solely by the State.

OSM may establish criteria consistent with 30 CFR 746.18 to determine which permit revisions and renewals clearly do not constitute mining plan modifications. If such criteria are promulgated, revisions or renewals which do not constitute mining plan modifications in accordance with the criteria may be approved by ASMC before it submits copies of the revision or renewal to OSM.

Article VII: Inspections

A. ASMC shall conduct inspections on Federal lands and prepare and file inspection reports in accordance with the Program.

B. ASMC shall, subsequent to conducting any inspection, and on a timely basis, file with OSM a legible copy of the completed State inspection report.

C. ASMC shall be the point of contact and primary inspection authority in dealing with the operator concerning operations and compliance with the requirements covered by the Agreement, except as described hereinafter. Nothing in this Agreement shall prevent inspections by authorized Federal or State agencies for purposes other than those covered by this Agreement. The Department may conduct any inspections necessary to comply with 30 CFR Parts 842 and 843 and its obligations under laws other than the Act.

D. OSM shall ordinarily give the ASMC reasonable notice of its intent to conduct an inspection under 30 CFR 842.11 in order to provide State inspectors with an opportunity to join in the inspection. When OSM is responding to a citizen complaint of an imminent danger to the public health and safety, or of significant, imminent environmental harm to land, air or water resources, pursuant to 30 CFR 842.11(b)(1)(ii)(C), it will contact ASMC no less than 24 hours prior to the Federal inspection, if practicable, to facilitate a joint Federal/State inspection. All citizen complaints which do not involve an imminent danger or significant imminent environmental harm shall be referred to ASMC for action. The Secretary reserves the right to conduct inspections without prior notice to ASMC to carry out his responsibilities under the Federal Act.

Article VIII: Enforcement

A. ASMC shall have primary enforcement authority under the Act concerning compliance with the requirements of this Agreement and the Program. Enforcement authority given to the Secretary under other laws and orders, including but not limited to those listed in Appendix A, is reserved to the Secretary.

B. During any joint inspection by OSM and ASMC, ASMC shall have primary responsibility for enforcement procedures, including issuance of orders of cessation, notices of violation, and assessment of penalties. The ASMC shall inform OSM prior to issuance of any decision to suspend or revoke a permit.

C. During any inspection made solely by OSM or any joint inspection where the ASMC and OSM fail to agree regarding the propriety of any particular enforcement action, OSM may take any enforcement action necessary to comply with 30 CFR Parts 843 and 845. Such enforcement actions shall be based on the standards in the approved Program, the Act, or both, and shall be taken using the procedures and penalty system contained in 30 CFR Parts 843 and 845.

D. The ASMC and the Department shall promptly notify each other of all violations of applicable laws, regulations, orders, or approved mining permits subject to this Agreement, and of all actions taken with respect to such violations.

E. Personnel of the State and representatives of the Department shall be mutually available to serve as witnesses in enforcement actions taken by either party.

F. This Agreement does not limit the Department's authority to enforce violations of Federal law which establish standards and requirements which are authorized by laws other than the Act.

Article IX: Bonds

A. ASMC and the Secretary shall require each operator covered by the Federal lands program to submit a single performance bond payable to Alabama and the United States to cover the operator's responsibilities under the Federal Act and the Program. Such performance bond shall be conditioned upon compliance with all requirements of the Federal Act, the Program and any other requirements imposed by the Department or the Federal land management agency. Such bond shall provide that if this Agreement is terminated, the bond shall be payable only to the United States to the extent that lands covered by the Federal lands program are involved.

B. Prior to releasing the operator from any obligation under such bond, the ASMC shall obtain the concurrence of OSM. The ASMC shall also advise OSM of annual adjustment to the performance bond, pursuant to the Program. Departmental concurrence shall include coordination with other Federal agencies having authority over the lands involved.

Such bond shall be subject to forfeiture with the consent of OSM, in accordance with the procedures and requirements of the Program.

C. Submission of a performance bond does not satisfy the requirements for a Federal lease bond required by 30 CFR Subpart 3474 or lessee protection bond required in addition to a performance bond, in certain circumstances, by Section 715 of the Act.

Article X: Designating Land Areas Unsuitable for All or Certain Types of Surface Coal Mining Operations

A. When either ASMC or OSM receives a petition to designate lands areas unsuitable for all or certain types of surface coal mining operations that could impact adjacent Federal and non-Federal lands, the agency receiving the petition shall (1) notify the other of receipt and the anticipated schedule for reaching a decision; and (2) request and fully consider data, information and views of the other.

B. Authority to designate State and private lands as unsuitable for mining is reserved to the State. Authority to designate Federal lands as unsuitable for mining is reserved to the Secretary.

Article XI: Termination of Cooperative Agreement

This Agreement may be terminated by the Governor or the Secretary under the provisions of 30 CFR 745.15.

Article XII: Reinstatement of Cooperative Agreement

If this Agreement has been terminated in whole or in part it may be reinstated under the provisions of 30 CFR 745.16.

Article XIII: Amendment of Cooperative Agreement

This Agreement may be amended by mutual agreement of the Governor and the Secretary in accordance with 30 CFR 745.14.

Article XIV: Changes in State or Federal Standards

A. The Department or the State may from time to time promulgate new or revised performance or reclamation requirements or enforcement and administration procedures. Each party shall, if it determines it to be necessary to keep this Agreement in force, change or revise its regulations and request necessary legislative action. Such changes shall be made under the procedures of 30 CFR Part 732 for changes to the State Program and under the procedures of Section 501 of the Act for changes to the Federal lands program.

B. ASMC and the Department shall provide each other with copies of any changes to their respective laws, rules, regulations and standards pertaining to the enforcement and administration of this Agreement.

Article XV: Changes in Personnel and Organization

Each party to this Agreement shall notify

Article XV: Changes in Personnel and Organization

Each party to this Agreement shall notify the other, when necessary, of any changes in personnel, organization and funding or other changes that will affect the implementation of this Agreement to ensure coordination of responsibilities and facilitate cooperation.

Article XVI: Reservation of Rights

In accordance with 30 CFR 745.13, this Agreement shall not be construed as waiving or preventing the assertion of any rights that have not been expressly addressed in this Agreement that the State or Secretary may have under other laws or regulations, including but not limited to those listed in Appendix A.

Dated: July 16, 1985.

Signed:

George C. Wallace,

Governor of Alabama.

Dated: June 28, 1985.

Signed:

Ann McLaughlin,

Under Secretary of the Interior.

Federal Register

VOL 50 ISS 147 JL 31 1985 UMI

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 50, No. 147
Wednesday, July 31, 1985

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1421

Special Producer Storage Loan Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: The interim rule governing the Special Producer Storage Loan Program, published in the Federal Register on April 25, 1985 (50 FR 16221) is hereby adopted as a final rule without change. Under the program, a producer may pledge as collateral for such loans that collateral which is presently securing a matured Commodity Credit Corporation (CCC) farmer-owned grain reserve loan.

EFFECTIVE DATE: July 31, 1985.

FOR FURTHER INFORMATION CONTACT: Steve Gill, Cotton, Grain, and Rice Price Support Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013. Phone: (202) 447–8480.

SUPPLEMENTARY INFORMATION: Information collection requirements contained in this regulation (7 CFR Part 1421) have been approved by the Office of Management and Budget in accordance with the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Number 0560–0087.

This final rule has been reviewed under USDA procedures established in accordance with provisions of Departmental Regulation 1512–1 and Executive Order 12291 and has been classified "not major". It has been determined that these program provisions will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S. based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal Assistance Program to which this final rule applies are: Title—Commodity Loans and Purchases; Number–10.051, as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this final rule because the Commodity Credit Corporation (CCC) is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this final rule.

An Environmental Evaluation with respect to the Special Producer Storage Loan Program has been completed. It has been determined that this action is not expected to have any significant impact on the quality of the human environment. In addition, it has been determined this action will not adversely affect environmental factors such as wildlife habitat, water quality, and land use and appearance. Accordingly, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

Statutory Authority

The program will be conducted pursuant to the Commodity Credit Corporation Charter Act, as amended (the "Charter Act"). The Charter Act gives the Corporation broad authority to support the price of agricultural commodities through loans, purchases, or other operations, stabilize agricultural commodity markets and remove and dispose of surplus agricultural commodities.

Interim Rule

An interim rule setting forth the terms and conditions of the Special Producer Storage Loan Program was published in the **Federal Register** on April 25, 1985, at 50 FR 16221. The interim rule provided for a 30-day comment period.

General Summary of Comments

The Department received one comment with respect to the interim rule from a state Attorney General. The comment received is on file and available for public inspection in Room 3627-South Building, 14th and Independence Avenue, S.W., Washington, D.C. 20013.

The comment received discussed several issues on the theory that the provisions of the Special Producer Storage Loan Program should be similar to those of the Farmer-Owned Grain Reserve Program. The Farmer-Owned Grain Reserve Program is authorized by section 110 of the Agricultural Act of 1949, as amended (the "1949 Act"). The Special Producer Storage Loan Program is carried out under the broader authority of the Charter Act. Accordingly, there is no requirement that the terms and conditions which are specified for the Farmer-Owned Grain Reserve Program by section 110 of the 1949 Act also be made applicable to the Special Producer Storage Loan Program. The following is a summary of the comment and issues raised with respect to the Special Producer Storage Loan Program established by the interim rule:

Comment on Major Program Provisions

I. Length of Special Producer Storage Loon Agreement

Provisions of the Interim Rule. The interim rule provided that loan agreements shall be for a 12-month period. The interim rule further provided that loan agreements may be extended for an additional 12-month period if authorized and announced by the Secretary.

Comment. The respondent argued that this provision represents a reduction in the length of agreements entered into under the Farmer-Owned Grain Reserve Program. It was suggested that the new program provide for a two-year loan period in order to be consistent with extensions granted under the reserve program.

Discussion and conclusion. The purpose of the Special Producer Program is to permit producers to maintain control of their grain which had been pledged as loan collateral under the

VOL 50 ISS 147 JL 31 1985 UMI

Farmer-Owned Grain Reserve Program instead of being required upon maturity of the loans to immediately repay their loans or to forfeit the pledged grain to CCC. Since the Special Producer Storage Loan Program is not an extension of the Farmer-Owned Grain Reserve Program, the new loan is available to those producers who may have matured reserve agreements, some of which may have reached the statutory maximum period of five years. While the loan period under the Special Producer Storage Loan Program is for 12 months, the Secretary may offer an additional 12 month extension if market conditions indicate the need. This program provides the Secretary with needed flexibility to address future market needs or circumstances. Accordingly, the provisions of the interim rule have been retained.

II. Interest Rates

Provisions of the interim rule. The interim rule provided that each special producer storage loan shall bear interest during the loan period at the rate applicable to CCC price support loans in effect on the first day of the loan period, adjusted in accordance with any subsequent increase or decrease in the rate of interest to be charged on CCC price support loans as determined and announced by the Secretary.

Comment. The respondent suggested the interest requirement be eliminated to conform with the practice of not charging interest on extended Farmer-Owned Grain Reserve Program loans.

Discussion and conclusion. The waiving of interest on extended Farmer-Owned Grain Reserve Program loans was specifically authorized by Section 110 of the 1949 Act. Charging interest for loans made under the Special Producer Storage Loan Program is consistent with CCC's long-standing policy of charging interest with respect to loans which are made under other CCC programs. Accordingly, the provisions of the interim rule have been retained.

Acceleration of Loan Maturity Date

Provisions of the interim rule. The interim rule provided that the Secretary may accelerate the maturity date of special producer storage loans if the Secretary determines that conditions exist which require that the commodity which is serving as collateral for the loan be made available in the market to meet domestic or international needs.

Comment. The respondent suggested that the acceleration provision be modified to make it consistent with provisions governing the Farmer-Owned Grain Reserve Program.

Discussion and conclusion. Since this provision would only be used under unusual circumstances and after reviewing supply and demand conditions existing at that time, it is not considered to be prudent to limit the Secretary's authority to specific conditions or actions. Accordingly, the provisions of the interim rule have been retained.

List of Subjects in 7 CFR Part 1421

Grains, Loan programs/agriculture, Price support programs, Warehouses.

Final Rule

Accordingly, the interim rule published at 50 FR 16221 on April 25, 1985, which added 7 CFR 1421.900–1421.917, is hereby adopted as a final rule without change.

Signed at Washington, D.C., on July 26, 1985.

John R. Block,

Secretary.

BILLING CODE 3410-05-M

DEPARTMENT OF ENERGY

10 CFR Part 1047

Defense Programs; Limited Arrest Authority and Use of Force by Protective Force Officers

AGENCY: Department of Energy.

ACTION: Final rule.

SUMMARY: The Department of Energy (DOE) is adopting regulations which set forth its policy concerning arrests and associated use of force by all DOE and DOE contractor employees engaged in nuclear security duties. Under section 161.k. of the Atomic Energy Act of 1954 (42 U.S.C. 2201.k.), certain DOE and DOE contractor protective force personnel are authorized to carry firearms and to make arrests without warrant for any offense against the United States committed in their presence or for any felony cognizable under the laws of the United States if they have reasonable grounds to believe that the person to be arrested has committed or is committing the felony. However, this arrest authority is specifically limited by the statute to enforcement of: (1) Laws regarding the property of the United States in the custody of the Department of Energy, the Nuclear Regulatory Commission (NRC) or a contractor of the DOE or NRC; or (2) any provision of the Atomic Energy Act that may subject an offender to a fine, imprisonment, or both. The purpose of these rules is to insure that protective force personnel at DOE facilities exercise such arrest authority, including the use of force to effect an arrest or apprehend a suspect, in a manner consistent with both DOE's security objectives and recognized legal standards.

EFFECTIVE DATE: August 30, 1985.

FOR FURTHER INFORMATION CONTACT: Martin J. Dowd, Department of Energy, Defense Programs, DP–343, Germantown, Washington, D.C. 20585, (301) 353–4642; Jo Ann Williams, Department of Energy, Office of General Counsel, Room 6B–256, Forrestal Building, 1000 Independence Avenue, SW, Washington, D.C. 20585, (202) 252–6975.

SUPPLEMENTARY INFORMATION:

I. Background
II. Discussion
III. Discussion of Comments
IV. Additional Revisions
V. Administrative Procedures

I. Background

The nationwide nuclear program administered by the Secretary of Energy is conducted principally at nuclear facilities and sites owned by the federal government. Most of these facilities and sites, however, are operated under contracts with private industry. The increasing threat of terrorist activities at these facilities and sites where classified information, nuclear materials and nuclear weapons are located presents a real and present danger. DOE's armed security force, comprised of DOE and DOE contractor employees, is the first line of human defense against terrorist or other assaults. The effectiveness of its protective force officers is a key factor in DOE's program to provide a high degree of physical security to each of its nuclear activities.

On July 31, 1984, DOE issued a notice of proposed rulemaking (49 FR 30638) setting forth its proposed policy on the making of arrests and associated use of force by all DOE and DOE contractor employees engaged in nuclear security duties. DOE held five hearings in various parts of the country and accepted written comments on the proposed rule until September 7, 1984. In addition, to ensure that all interested parties had an opportunity to participate in the rulemaking process, DOE issued press releases and contacted guard unions and various federal, state, and local law enforcement agencies to solicit their comments and to invite their participation in the rulemaking process.

II. Discussion

Based on DOE's assessment of its security capabilities and the increasing threat of terrorist, paramilitary, criminal and other threatening activities, DOE has determined that formalization of a uniform policy on arrest and associated use of force by protective personnel armed pursuant to section 161.k. of the Atomic Energy Act will enhance the common defense and security. Section 161.k. of the Atomic Energy Act of 1954 authorizes DOE and DOE contractor security personnel to make arrests without warrant for: (1) Laws regarding the property of the United States in the custody of the DOE, NRC, or a contractor of the DOE or NRC; or (2) any provision of the Atomic Energy Act that may subject an offender to a fine or imprisonment, or both. This Final Rule specifies those provisions of the Atomic Energy Act and Title 18, United States Code, that DOE has determined should be enforced by its protective force personnel.

Eight offenses from Chapter 16 "Enforcement" of the Atomic Energy Act are enumerated. These five felonies and three misdemeanors pertain to the unlawful dissemination of Restricted Data (classified atomic energy information) and to criminal acts against facilities, equipment, materials, and other property of the DOE. Nineteen offenses from Title 18, United States Code, have been identified. These fourteen felonies and five misdemeanors prohibit criminal acts such as theft, arson, and sabotage against federal property, including DOE property.

This Final Rule also sets out procedures that protective force personnel are to follow in making arrests. A protective force officer is authorized to make an arrest for any of the felonies enumerated in the rule if the offense is committed in his or her presence or if he or she has reasonable grounds to believe that the individual to be arrested has committed or is committing the felony. In the case of a misdemeanor, the officer may only make an arrest if the offense is committed in his or her presence. This Final Rule also provides guidance on arrest techniques, including questioning of arrested persons and searches and seizure of evidence.

DOE is concerned that its protective force personnel only use the degree of force that is necessary and justified in making an arrest. This Final Rule establishes those circumstances under which the use of physical force is authorized and restrictions applicable to its use.

A protective force officer is authorized to use deadly force under conditions of extreme necessity and as a last resort only under the following five circumstances:

(1) To protect himself or herself from imminent danger of death or serious bodily harm; (2) to prevent serious offenses against other persons; (3) to prevent the theft, sabotage, or unauthorized control of a nuclear weapon or nuclear explosive device; (4) to prevent the theft, sabotage or unauthorized control of special nuclear material or (5) to apprehend or prevent the escape of a person who has committed an offense specified in (1) through (4); or who is escaping by use of a weapon or explosive or who otherwise indicates that he or she poses a significant threat of death or serious bodily harm to the protective force officer or other unless apprehended without delay.

III. Discussion of Comments

DOE held hearings in Washington, D.C., Denver, San Francisco, Pittsburgh, and Atlanta and requested written comments on these rules (49 FR 30638, July 31, 1984). Three (3) interested parties testified at the hearings and two (2) written comments were received during the thirty-day comment period. Each person testifying or submitting written comments represented either a DOE contractor or a guard union.

One commenter expressed concern that proposed §§ 1047.4(e), 1047.5(e) and 1047.6(b) compel an "unnecessary and perhaps unwarranted" reliance by protective force officers on the advice of local DOE legal counsel. These proposed sections state that guidance on the Assimilative Crimes Act; search and seizure of evidence; and physical force in making arrests, respectively, shall be obtained from the local DOE Office of Chief Counsel. DOE accepts the suggestion that coordination with contractor legal counsel, as appropriate, be provided for in each subpart directing consultation with DOE legal counsel. However, we do not view obtaining guidance from contractor counsel without coordination with DOE counsel as a viable option since these regulations establish federal standards.

A number of comments recommended reconsideration of certain requirements related to the exercise of arrest authority on the basis that they were not legally required and unreasonably impeded protective force officers in the safe and effective performance of their duties. DOE agrees with these comments and has revised this Final Rule accordingly. First, the requirement that a protective force officer announce the offense committed in making an arrest has been deleted. Secondly, an arresting officer is authorized pursuant to these regulations to search any arrested person at the time and place of arrest for weapons and criminal evidence and the area into which the arrested person might reach for a weapon or to destroy evidence. The proposed regulations only authorized a "frisk" if the arrested person was suspected of carrying weapons or other dangerous articles. We agreed with the commenter that a more extensive search is legally permissible and necessary for the safety of protective force officers and others.

The greatest number of comments received suggested refinements in the provisions relating to the use of deadly force in making an arrest. One commenter expressed the view that the requirement to give an order to halt before a shot is fired is appropriate where there is a pursuit in progress, but inappropriate and dangerous in other situations; e.g., where a nuclear weapon is under hostile armed attack. DOE agrees and has limited the requirement to give warning to situations where it is feasible. This standard is consistent with the language of the United States Supreme Court in *Tennessee v. Garner*, 105 S. Ct. 1694, 1701 (1985). Secondly, the requirement to shoot to disable has been deleted at the recommendation of a number of commenters who correctly point out that the requirement is too onerous since normal police practice is to shoot to stop. We agree with the commenter that it is unreasonable to require a protective force officer when the use of deadly force is authorized to attempt to wound a person rather than to fire at the center mass of the body.

The regulations have also been changed to reflect comments regarding the five circumstances under which deadly force may be used. One commenter suggested that the provision in the regulations addressing the right of a protective force officer to use deadly force "in the event of serious offenses against persons involving violence and threatening death or serious bodily harm" be modified to emphasize that an imminent threat is required. This modification has been made. Deadly force is authorized in the Final Rule to "prevent the commission of a serious offense against a person(s) in circumstances presenting an *imminent danger* of death or serious bodily harm." As requested, DOE has also reworded § 1047.7(a)(1)—(5) to clarify that the use of deadly force in each of the five circumstances authorized is based on the reasonable belief of the protective force officer that the circumstance

VOL
50
ISS
147
JL

1985
UMI

requiring the use of deadly force exists. For example, proposed § 1047.7(a)(3) stated that deadly force is authorized "to prevent the theft, sabotage, or unauthorized control of a nuclear weapon or nuclear explosive devices." It has been modified to state that such use is authorized "when deadly force reasonably appears necessary to prevent the theft, sabotage, or unauthorized control of a nuclear weapon or nuclear explosive device." As reworded, the provisions state the standard that DOE intended and that has been applied by the courts to law enforcment officers in cases involving the use of deadly force.

DOE has adopted in part and rejected in part recommendations to modify the provision concerning use of deadly force to protect special nuclear material and other inherently dangerous property. The concept of inherently dangerous property, criticized in several comments as being vague and unnecessary, has been removed from the regulations. We agree with the commenters that the provisions authorizing the use of deadly force to protect nuclear weapons, nuclear explosive devices, and special nuclear material adequately cover property that would have been covered by the "inherently dangerous property" category. In addition, the provision has been modified to authorize a protective force officer to use deadly force to prevent the theft, sabotage, or unauthorized control of special nuclear material "from an area of a fixed site or from a shipment where Category II or greater quantities are known or are reasonably believed to be present." This accommodates the concerns of those commenters who expressed the view that the proposed rule set forth an impractical standard requiring a protective force officer in an emergency situation to determine the exact cagegory (i.e., Category II or greater quantities) of special nuclear material involved.

DOE rejected the recommendation that its policy governing deadly force not be implemented to protect special nuclear material because of alleged inconsistencies between the policy and some state laws. Specifically, the commenter expressed the view that the DOE policy would be inconsistent with the laws of those states that do not permit the use of deadly force merely to protect property absent other circumstances involving an immediate threat to human life. DOE does not agree that there are inherent inconsistencies between the two. Because of its possible use as a radiological contaminant or in an explosive device, special nuclear material differs quantitatively from ordinary property and its theft, sabotage, or unauthorized control is tantamount to a "dangerous felony" within the meaning of those state laws that require commission of a "dangerous felony" to justify the use of deadly force. Moreover, as federal law enforcement officers, DOE's protective force is not properly limited by state laws on the use of deadly force in performing their official federal duties. This legal principle was established by the United States Supreme Court in the landmark decision *In Re Neagle*, 135 U.S. 1 (1890), that has been widely followed. With respect to constitutional standards, DOE's policy as expressed in this Final Rule is consistent with the decision of the United States Supreme Court in *Tennessee* v. *Garner*, 105 S. Ct. 1694 (1985). The Court held that law enforcemrnt officers cannot resort to deadly force unless they have probable cause to believe that the suspect poses a significant threat of death or serious physical injury to the officer or others if not apprehended without delay.

A substantial portion of the provision in the proposed rules specifying additional considerations involving firearms has been deleted as suggested by a commenter. DOE agrees with his statemnt that some of the guidance provided in the provision is more appropriate for an internal agency directive or training manual.

From several comments received, it is clear to DOE that the provision regarding legal defense and reimbursement of protective personnel was not clearly understood by all readers. Upon further reflection, DOE has decided to accomplish the objectives of the provision by a contract-by-contract approach rather than by regulation. The specifics regarding legal defense and reimbursement of protective force officers will be set forth in a written agreement between DOE and each contractor employing protective force officers. Each protective force officer will be fully advised of and receive a copy of such agreement.

IV. Additional Revisions

Upon further reflection, DOE has decided to make a few revisions other than those suggested by commenters. Section 2114 of Title 18, United States Code, has been removed from the list of federal statutes to be enforced by DOE protective force officers because case law limits its application to property of the Postal Service. (See *United States* v. *Rivera*, 513 F.2d 519 (2nd Cir. 1975) and *United States* v. *Fernondez*, 497 F.2d 730 (9th Cir. 1974).)

The certification requirement for individual officers has been removed because it poses an undue administrative burden on DOE field operations.

V. Administrative Procedures

A. Review Under Executive Order 12291

This Final Rule was reviewed under Executive Order 12291 (48 FR 13193, Feb. 19, 1981). DOE has concluded that the rule is not a "major rule" under the Executive Order. It will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, State, Federal, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Pursuant to section 3(c)(3) of Executive Order 12291, this Final Rule was submitted to the Director of OMB for a 10-day review. The Director has concluded this review under that Executive Order.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act, Pub. L. 96-354, 94 Stat. 1164 (5 U.S.C. 601 *et seq.*), requires, in part, that an agency prepare a regulatory flexibility analysis for any final rule unless it determines that the rule will not have a "significant economic impact on a substantial number of small entities." In the event that such an analysis is not required for a particular rule, the agency must publish a certification and an explanation of that determination in the **Federal Register**. This Final Rule deals with the arrest authority of DOE protective personnel. The economic impact on small businesses is negligible. Accordingly, pursuant to section 605(b) of the Regulatory Flexibility Act, DOE certifies that this Final Rule will not have a significant economic impact on a substantial number of small entities.

C. Environmental Review

DOE has determined that this Final Rule is not a major Federal action with significant environmental impact, and therefore does not require preparation of an environmental assessement or environmental impact statement under the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*).

D. Paperwork Reduction Act

These regulations do not impose a collection of information requirement; therefore, it is not necessary to submit them to the Office of Management and Budget for review under the Paperwork Reduction Act, 44 U.S.C. 3501 through 3520.

Lists of Subjects in 10 CFR Part 1047

Security measures, Government contracts, Arrest authority and use of force.

In consideration of the foregoing, DOE hereby adds a new Part to Chapter X, Title 10 of the Code of Federal Regulations.

Issued in Washington, D.C., this 25th day of July, 1985.

William W. Hoover,

Assistant Secretary for Defense Programs.

Part 1047 is added to 10 CFR Chapter X to read as follows:

PART 1047—LIMITED ARREST AUTHORITY AND USE OF FORCE BY PROTECTIVE FORCE OFFICERS

General Provisions

Sec.

1047.1 Purpose.
1047.2 Scope.
1047.3 Definitions.
1047.4 Arrest authority.
1047.5 Exercise of arrest authority—general guidelines.
1047.6 Use of physical force when making an arrest.
1047.7 Use of deadly force.

Authority: Sec. 2201, Pub. L. 83-703, 68 Stat. 919 (42 U.S.C. 2011 *et seq.*); Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*).

General Provisions

§ 1047.1 Purpose.

The purpose of this part is to set forth Department of Energy (hereinafter "DOE") policy and procedures on the exercise of arrest authority and use of force by protective force personnel.

§ 1047.2 Scope.

This part applies to DOE and DOE contractor protective force personnel armed pursuant to section 161.k. of the Atomic Energy Act of 1954 (42 U.S.C. 2011 *et seq.*) to protect nuclear weapons, special nuclear material, clasified matter, nuclear facilities, and related property.

§ 1047.3 Definitions.

(a) "Act" means section 161.k. of the Atomic Energy Act of 1954, as amended, (42 U.S.C. 2201.k.).

(b) "Arrest" means any act, including taking, seizing or detaining of a person, that indicates an intention to take a person into custody and that subjects the person to the control of the person making the arrest.

(c) "Citizen's Arrest" means that type of arrest which can be made by citizens in general and which is defin ed in the statutory and case law of each state.

(d) "Contractor" means contractors and subcontractors at all tiers.

(e) "LLEA" means local law enforcement agencies: city, county; and state.

(f) "Offender"means the person to be arrested.

(g) "Protective Force Officer" means any person authorized by DOE to carry firearms under section 161.k. of the Atomic Energy Act of 1954.

(h) "Special Nuclear Material" (SNM) means (1) plutonium, uranium enriched in the isotope 233 or in the isotope 235, and any other material which DOE, pursuant to the provisions of Section 51 of the Atomic Energy Act of 1954, determines to be special nuclear material, but does not include source material; or (2) any material artificially enriched by any of the foregoing, but does not include source material.

§ 1047.4 Arrest authority.

(a) Under the Act, the authority of a DOE protective force officer to arrest without warrant is limited to the performance of official duties and should be exercised only in the enforcement of:

(1) The following laws only if property of the United States which is in the custody of the DOE or its contractors is involved:

(i) *Felonies:*

(A) Arson—18 U.S.C. 81—(only applicable to "special maritime and territorial jurisdiction of the United States" as defined by 18 U.S.C. 7).

(B) Building or property within special maritime and territorial jurisdiction—18 U.S.C. 1363—(only applicable to "special maritime and territorial jurisdiction of United States" as defined by 18 U.S.C. 7).

(C) Civil disorder—18 U.S.C. 231.

(D) Communication lines, stations or systems—18 U.S.C. 1362.

(E) Concealment, removal or mutilation generally—18 U.S.C. 2071.

(F) Conspiracy—18 U.S.C. 371—(violation of this section is a felony if the offense which is the object of the conspiracy is a felony).

(G) Destruction of motor vehicles or motor vehicle facilities—18 U.S.C. 33.

(H) Explosives—18 U.S.C. 844(f).

(I) Government property or contracts—18 U.S.C. 1361—(violation of section is a felony if property damage exceeds $100).

(J) Military, naval or official passes—18 U.S.C. 499—(pertains to forging or altering official passes).

(K) Personal property of the United States—18 U.S.C. 2112.

(L) Public money, property, or records—18 U.S.C. 641—(violation of section is a felony if the property value exceeds $100).

(M) Sabotage—18 U.S.C. 2151, 2153-2156.

(N) Violation under Physical Security Convention—18 U.S.C. 831.

(ii) *Misdemeanors:*

(A) Conspiracy—18 U.S.C. 371—(violation of section is a misdemeanor if the offense which is the object of the conspiracy is a misdemeanor).

(B) Explosives—18 U.S.C. 844(g).

(C) Government property or contracts—18 U.S.C. 1361—(violation of section is a misdemeanor if the property damage does not exceed $100).

(D) Official badges, identification cards, other insignia—18 U.S.C. 701—(prtains to the manufacture, sale, and possession of official insignia).

(E) Public money, property or records—18 U.S.C. 641—(violation of section is a misdemeanor if the property value does not exceed $100).

(2) The following criminal provisions of the Atomic Energy Act:

(i) *Felonies:*

(A) Section 222. Violation of Specific Sections—42 U.S.C. 2272.

(B) Section 223. Violation of Sections Generally. 42 U.S.C. 2273.

(C) Section 224. Communication of Restricted Data—42 U.S.C. 2274.

(D) Section 225. Receipt of Restricted Data—42 U.S.C. 2275.

(E) Section 226. Tampering with Restricted Data—42 U.S.C. 2276.

(ii) *Misdemeanors:*

(A) Section 227. Disclosure of Restricted Data—42 U.S.C. 2277.

(B) Section 229. Trespass Upon Commission (DOE) Installations—42 U.S.C. 2278.

(C) Section 230. Photographing, etc., of Commission (DOE) Installations—42 U.S.C. 2278.b.

(b) *Felony Arrests.* A protective force officer is authorized to make an arrest for any felony listed in paragraph (a)(1)(i) or (a)(2)(i) of this section if the offense is committed *in the presence* of the protective force officer or if he or she has *reasonable grounds to believe* that the individual to be arrested has committed or is committing the felony.

(1) "*In the presence of*" means that the criminal act must have taken place in the physical presence of (under the observation of) the protective force officer. Knowledge of the existence of a criminal violation obtained in any other way (e.g., information from other persons) is not sufficient to permit an arrest under this part of the Act.

VOL
50
ISS
147
JL
31
1985
UMI

(2) "*Reasonable grounds to believe*" means that, at the moment of arrest, either the facts and circumstances within the knowledge of the protective force officer, or of which the protective force officer had reasonably trustworthy information, were sufficient to cause a prudent person to believe that the suspect had committed or was committing the offense.

(c) *Misdemeanor Arrest:* A protective force officer is authorized to make an arrest for any misdemeanor listed in paragraph (a)(1)(ii) or (a)(2)(ii) of this section if the offense is committed in the presence of the protective force officer.

(d) *Other Authority.* The Act does not provide authority to arrest for violations of state criminal statutes or for violations of federal criminal statutes other than those listed in paragraph (a) of this section. Therefore, arrests for violations of such other criminal statutes shall be made by other peace officers (e.g., U.S. Marshals or Federal Bureau of Investigation (FBI) agents for federal offenses; LLEA officers for state or local offenses) unless:

(1) The protective force officer can make a citizen's arrest for the criminal offense under the law of the state,

(2) The protective force officer is an authorized state peace officer or otherwise deputized by the particular state to make arrests for state criminal offenses, or

(3) The protective force officer has been deputized by the U.S. Marshals Service or other federal law enforcement agency to make arrests for the criminal offense.

(e) In those locations which are within the "special maritime and territorial jurisdiction of the United States," as defined in 18 U.S.C. 7, the Assimilative Crimes Act (18 U.S.C. 13) adopts the law of the state for any crime under state law not specifically prohibited by Federal statute and provides for federal enforcement of that state law. The local DOE Office of Chief Counsel, in coordination with contractor legal counsel, as appropriate, shall provide guidance in this matter.

§ 1047.5 Exercise of arrest authority—General Guidelines.

(a) In making an arrest, the protective force officer should announce his or her authority (e.g., "Security Officer") and that the person is under arrest prior to taking the person into custody. If the circumstances are such that making such announcements would be useless or dangerous to the officer or others, the protective force officer may dispense with these announcements.

(b) The protective force officer at the time and place of arrest may search any arrested person for weapons and criminal evidence and the area into which the arrested person might reach for a weapon or to destroy evidence. Guidance on the proper conduct and limitations in scope of search and seizure of evidence shall be obtained from the local DOE Office of Chief Counsel, in coordination with contractor legal counsel, as appropriate.

(c) After the arrest is effected, the arrested person shall be advised of his or her constitutional right against self-incrimination (Miranda warnings). If the circumstances are such that making such advisement is dangerous to the officer or others, this requirement may be postponed until the immediate danger has passed.

(d) Custody of the person arrested should be transferred to other federal law enforcement personnel (i.e., U.S. Marshals or FBI agents) or to LLEA personnel, as appropriate, as soon as practicable. The arrested person should not be questioned or required to sign written statements unless:

(1) Questioning is necessary for security or safety reasons (e.g., questioning to locate a bomb), or

(2) Questioning is authorized by other federal law enforcement personnel or LLEA officers responsible for investigating the crime.

§ 1047.6 Use of physical force when making an arrest.

(a) When a protective force officer has the right to make an arrest as discussed above, the protective force officer may use only that physical force which is reasonable and necessary to apprehend and arrest the offender; to prevent the escape of the offender; or to defend himself or herself or a third person from what the protective force officer believes to be the use or threat of imminent use of physical force by the offender. It should be noted that verbal abuse alone by the offender cannot be the basis under any circumstances for use of physical force by a protective force officer.

(b) Protective force officers shall consult the local DOE Office of Chief Counsel and contractor legal counsel, as appropriate, for additional guidance on use of physical force in making arrests.

§ 1047.7 Use of deadly force.

(a) Deadly force means that force which a reasonable person would consider likely to cause death or serious bodily harm. Its use may be justified only under conditions of extreme necessity, when all lesser means have failed or cannot reasonably be employed. A protective force officer is authorized to use deadly force only when one or more of the following circumstances exists:

(1) *Self-Defense.* When deadly force reasonably appears to be necessary to protect a protective force officer who reasonably believes himself or herself to be in imminent danger of death or serious bodily harm.

(2) *Serious offenses against persons.* When deadly force reasonably appears to be necessary to prevent the commission of a serious offense against a person(s) in circumstances presenting an imminent danger of death or serious bodily harm (e.g. sabotage of an occupied facility by explosives).

(3) *Nuclear weapons or nuclear explosive devices.* When deadly force reasonably appears to be necessary to prevent the theft, sabotage, or unauthorized control of a nuclear weapon or nuclear explosive device.

(4) *Special nuclear material.* When deadly force reasonably appears to be necessary to prevent the theft, sabotage, or unauthorized control of special nuclear material from an area of a fixed site or from a shipment where Category II or greater quantities are known or reasonably believed to be present.

(5) *Apprehension.* When deadly force reasonably appears to be necessary to apprehend or prevent the escape of a person reasonably believed to: (i) have committed an offense of the nature specified in paragraph (a)(1)—(a)(4)[1] of this section; or (ii) be escaping by use of a weapon or explosive or who otherwise indicates that he or she poses a significant threat of death or serious bodily harm to the protective force officer or others unless apprehended without delay.

(b) *Additional Considerations Involving Firearms.* If it becomes necessary to use a firearm, the following precautions shall be observed:

(1) A warning, e.g. an order to halt, shall be given, if feasible, before a shot is fired.

(2) Warning shots shall not be fired.

[FR Doc. 85-18074 Filed 7-30-85; 8:45 am]

BILLING CODE 6450-01-M

[1] These offenses are considered by the Department of Energy to pose a significant threat of death or serious bodily harm.

FEDERAL RESERVE SYSTEM

[Regs. G, T, U and X]

12 CFR Parts 207, 220, 221, and 224

Securities Credit Transactions

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The List of Marginable OTC Stocks is comprised of stocks traded over-the-counter (OTC) that have been determined by the Board of Governors of the Federal Reserve System to be subject to the margin requirements under certain Federal Reserve regulations. The List is published from time to time by the Board as a guide for lenders subject to the regulations and the general public. This document sets forth additions to or deletions from the previously published List effective May 14, 1985 and will serve to give notice to the public about the changed status of certain stocks.

EFFECTIVE DATE: August 13, 1985.

FOR FURTHER INFORMATION CONTACT: Jamie Lenoci, Financial Analyst, Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-2781, or Joy W. O'Connell, Telecommunication Device for the Deaf (TDD) (202) 452-3244.

SUPPLEMENTARY INFORMATION: Set forth below are stocks representing additions to or deletions from the Board's List of Marginable OTC Stocks. A copy of the complete List incorporating these additions and deletions was filed with the original of this document. This List supersedes the last complete List which was effective May 14, 1985 (50 FR 18230, April 30, 1985). The List includes those stocks that the Board of Governors has found meet the criteria specified by the Board and thus have the degree of national investor interest, the depth and breadth of market, and the availability of information respecting the stock and its issuer to warrant incorporating such stocks within the requirements of Regulations G, T, U, and X (12 CFR 207, 220, 221, and 224, respectively). It also includes, as a result of an amendment to the margin regulations (49 FR 35756, September 12, 1984), any stock designated under a SEC rule as qualified for trading in a national market system (NMS Security). The List of Marginable OTC Stocks, as it is now called, is a composite of the List of OTC Margin Stocks and all NMS securities. Additional OTC securities may be designated as NMS securities in the interim between the Board's quarterly publications. They will become automatically marginable at broker-dealers upon the effective date of their designation. The names of these securities are available at the Board and the Securities and Exchange Commission and will be subsequently incorporated into the Board's next quarterly List. Copies of the current List may be obtained from any Federal Reserve Bank.

The requirements of 5 U.S.C. 553 with respect to notice and public participation were not followed in connection with the issuance of this amendment due to the objective character of the criteria for inclusion and continued inclusion on the List specified in 12 CFR 207.6(a) and (b), 220.17 (a) and (b), and 221.7 (a) and (b). No additional useful information would be gained by public participation. The full requirements of 5 U.S.C. 553 with respect to deferred effective date have not been followed in connection with the issuance of this amendment because the Board finds that it is in the public interest to facilitate investment and credit decisions based in whole or in part upon the composition of this List as soon as possible. The Board has responded to a request by the public and allowed a two-week delay before the List is effective.

List of Subjects

12 CFR 207

Banks, banking, Credit, Federal Reserve System, Margin, Margin requirements, National Market System (NMS Security), Reporting requirements, Securities.
